

SUBJECT INDEX

- Adenine nucleotides, mitochondrial metabolism of; effect of oligomycin and succinate on, (PINNA *et al.*) 18
- Adenosine triphosphatase, ($\text{Na}^+ + \text{K}^+$)-dependent —; further characterization of phosphorylated intermediate in, (BADER *et al.*) 229
- Adenosine triphosphatase, ($\text{Na}^+ + \text{K}^+$)-dependent —; possible role of phosphorylated intermediate in reaction mechanism of, (NAGANO *et al.*) 239
- Adenosine triphosphatase, relationship to light- and cysteine-activated ATP- P_i exchange reaction in chloroplasts to, (RIENITS) 595
- Adenosine triphosphatase, soluble — with high coupling activity (VALLEJOS, SLATER) 441
- Adenosine triphosphate, — P_i exchange reaction in chloroplasts activated by light and cysteine; relationship of, to ATPase and photophosphorylation (RIENITS) 595
- Adenosine triphosphate, — pool in *E. coli*; measurement of, using modified luciferase assay (COLE *et al.*) 445
- Adenosine triphosphate, — production in light and dark by vesicle preparations from *Chlorobium thiosulphatophilum* L660 (SYKES, GIBBON) 173
- Adrenal tissue, guinea-pig —; steroid hydroxylation by, (PÉRON, CALDWELL) 532
- Algae, blue-green —; oxygen inhibition of nitrogen fixation in cell-free preparations of, (FAY, COX) 562
- Algae, energy transfer between photosynthetic units of system 1 in, (FORK, AMESZ) 266
- Algae, green —; induction of fluorescence in, under intense illumination (DELOSME) 108
- Algae, quenching of chlorophyll fluorescence by quinones in, (AMESZ, FORK) 97
- Amytal, action of, on frog gastric mucosa (SACHS *et al.*) 522
- Arsenate, uncoupling of respiratory-chain phosphorylation by, (TER WELLE, SLATER) 1
- Ascites cells, low-temperature spectroscopy of, (RITTER, ELKIN) 269
- Azotobacter vinelandii*, cytochrome system of, (JONES, REDFEARN) 340
- Azotobacter vinelandii*, red and green electron transport particles from; preparation of, (JONES, REDFEARN) 354
- Bacteriochlorophyll, decline in — fluorescence induced by carotenoid absorption (GOEDHEER, VAN DER TUIN) 399
- Bacteriochlorophyll, — reactions in *Rhodospirillum rubrum* cells (KE, NGO) 319
- Bird, — kidney, see Kidney
- Carbonyl cyanine *p*-trifluoromethoxyphenylhydrazone, effect of, on chlorophyll fluorescence and photosynthesis (BANNISTER) 275
- Carotenoid, — content of particles from spinach chloroplasts (BOARDMAN, ANDERSON) 187
- Carotenoid, decline in bacteriochlorophyll fluorescence induced by absorption (GOEDHEER, VAN DER TUIN) 399
- Catecholamines, in aerobic oxidations (CILENTO, ZINNER) 88
- Cattle, — heart, see Heart
- Chlorella, fluorescent lifetime of, in weak light; measurement of, (NICHOLSON, FORTOUL) 577
- Chlorobium thiosulphatophilum* L660, vesicle preparations from; ATP production in light and dark by, (SYKES, GIBBON) 173
- Chlorophyll, — fluorescence and photosynthesis; effect of carbonyl cyanine *p*-trifluoromethoxyphenylhydrazone on, (BANNISTER) 275
- Chlorophyll, — fluorescence; quenching of, by quinones in algae and chloroplasts (AMESZ, FORK) 97
- Chlorophyll *a*, — fluorescence and photochemical activities of chloroplast fragments (VREDENBERG, SLOOTEN) 583
- Chlorophyll *a*, long-wave absorbing form of, responsible for "red drop" in fluorescence at 298 °K and F723 band at 77 °K (DAS, GOVINDJEE) 570
- Chlorophyll *a*-695, fluorometric evidence for participation of, in system 2 of photosynthesis (BROWN) 391
- Chloroplast, illuminated — suspensions; kinetics of pH rise in, (IZAWA, HIND) 377
- Chloroplastic structures, re-establishment of link between two — isolated with Triton X-100 (BRIANTAIS) 650
- Chloroplasts, factor from spinach leaves interacting with, (TERPSTRA) 221
- Chloroplasts, — fragments; chlorophyll *a* fluorescence and photochemical activities of, (VREDENBERG, SLOOTEN) 583
- Chloroplasts, induction of fluorescence in, under intense illumination (DELOSME) 108
- Chloroplasts, isolated —; effects of P_i on O_2 evolution by, (COCKBURN *et al.*) 614
- Chloroplasts, light- and cysteine-activated ATP- P_i exchange reaction in; relation

- of, to ATPase and photophosphorylation (RIENITS) 595
- Chloroplasts, quenching of chlorophyll fluorescence by quinones in, (AMESZ, FORK) 97
- Chloroplasts, spinach —; cytochrome and carotenoid contents of particles from, (BOARDMAN, ANDERSON). . . . 187
- Chloroplasts, spinach —; dichroism in, (THOMAS *et al.*) 204
- Chloroplasts, spinach —; digitonin incubation of, in Tris (hydroxymethyl) methylglycine solutions of varying ionic strengths (ANDERSON, VERNON) . 363
- Chloroplasts, spinach —; light-induced absorbance changes of two cytochrome *b* components in electron-transport system of, (CRAMER, BUTLER) 332
- Chloroplasts, spinach —; photosynthetic induction phenomena in, in relation to nature of isolating medium (COCKBURN *et al.*) 606
- Cholesterol, relation of synthesis of, and NADPH oxidation by microsomal electron transport system involving P-450 (WADA *et al.*) 273
- Chromatophores, *Rhodospirillum rubrum* —; *p*-phenylenediamines as electron donors for photosynthetic pyridine nucleotide reduction in, (TREBST *et al.*) 257
- Chromatophores, *Rhodospirillum rubrum* —; pigment-protein complexes derived from, by enzymatic digestion (VERNON, GARCIA) 144
- Cysteine, ———-activated ATP-P_i exchange reaction in chloroplasts; relationship of, to ATPase and photophosphorylation (RIENITS) 595
- Cytochrome, — content of particles from spinach chloroplasts (BOARDMAN, ANDERSON) 187
- Cytochrome, — reactions in *Rhodospirillum rubrum* cells (KE, NGO). . . . 319
- Cytochrome, — system of *Azotobacter vinelandii* (JONES, REDFEARN) 340
- Cytochrome *b*, two — components in electron-transport system of spinach chloroplasts; light-induced absorbance changes in, (CRAMER, BUTLER). . . . 332
- Cytochrome *c*, from *Dendrostomum zosteri-colum*; purification and properties of, (YAMANAKA, KAMEN). 425
- Cytochrome *c*, mechanism of reduction of, by xanthine oxidase (MURAOKA *et al.*) 408
- Cytochrome *c* (552), of aerobically grown *E. coli* str. McElroy and its function (BARRETT, SINCLAIR) 279
- Cytochrome *c*₂, from *Rhodopseudomonas spheroides* (ORLANDO). 634
- Cytochrome oxidase, from beef heart mitochondria (GILMOUR *et al.*) 487
- Cytochrome oxidase, in intact rat-liver mitochondria; low temperature spectra of, (WILSON, GILMOUR) 52
- Cytochrome oxidase, oxygenated —; formation and properties of, and its re-conversion to ferrous and ferric oxidase (LEMBERG, GILMOUR). 500
- Cytochrome oxidase, preparation of, by non-ionic detergent (SUN, JACOBS) . . 639
- Cytochrome oxidase, from yeast; ESR studies on, (PALMER *et al.*) 636
- Cytochrome *c* oxidase, ferrous —; compounds formed by reaction of, with O₂ and H₂O₂ (LEMBERG, STANBURY). . . 37
- Cytochromes, occurrence of, in rat thymus nuclei (BETEL). 62
- Delayed light emitter, in mutants of *Scenedesmus obliquus*; identification of oxygen-evolving photoreacting as, (BERTSCH *et al.*) 129
- Dendrostomum zosteri-colum*, purification and properties of cytochrome *c* from, (YAMANAKA, KAMEN). 425
- Deoxyadenine nucleotides, and oxidative phosphorylation (KEMP, GROOT) . . . 628
- Digitonin, — incubation of spinach chloroplasts in Tris (hydroxymethyl) methylglycine solutions of varying ionic strengths (ANDERSON, VERNON) . 363
- Dio-9, inhibition by, of energy conservation reactions in *Rhodospirillum rubrum* (FISHER, GUILLORY). 654
- Electric organ, phosphate metabolism in, (CHENG, KEYNES) 249
- Electron transport particles, red and green — from *Azotobacter vinelandii*; preparation of, (JONES, REDFEARN) . 354
- Electron transport system, microsomal — involving P-450; relation of cholesterol synthesis and NADPH oxidation by, (WADA *et al.*) 273
- Electron transport system, of spinach chloroplasts; light-induced absorbance changes of two cytochrome *b* components of, (CRAMER, BUTLER). . . . 332
- Energy transfer, intramolecular — in NADH and NADPH; influence of solvents on, (FREED *et al.*) 432
- Energy transfer, in rat-liver mitochondria; inhibition of, by formaldehyde (VAN BUSKIRK, FRISSELL). 292
- Escherichia coli*, aerobically grown — str. McElroy; cytochrome *c* (552) of, and its function (BARRETT, SINCLAIR) 279
- Escherichia coli*, measurement of ATP pool in, using modified luciferase assay (COLE *et al.*) 445
- Ferredoxin, plant —; degradation and resynthesis of active centre of, (BAYER *et al.*) 435
- Ferric oxidase, re-conversion of cytochrome oxidase to, (LEMBERG, GILMOUR). . . 500
- Ferrous cytochrome *c* oxidase, compounds formed by reaction of, with O₂ and H₂O₂ (LEMBERG, STANBURY). . . . 37
- Ferrous oxidase, re-conversion of cyto-

- chrome oxidase to, (LEMBERG, GILMOUR) 500
- Flavin, ———indole and flavin-phenol interactions (PEREIRA, TOLLIN) 79
- Formaldehyde, inhibition by, of energy transfer and related processes in rat-liver mitochondria (VAN BUSKIRK, FRISELL) 292
- Frog, ——— gastric mucosa, see Mucosa
- Glyoxylate reductase, intracellular localization of, (THOMPSON, WHITTINGHAM) 642
- Guinea pig, ——— adrenal tissue, see Adrenal tissue
- Haem *a*, conversion of protohaem to, in *Staphylococcus* (SINCLAIR *et al.*) . . . 427
- Haem pigments, nitrite metabolism by skeletal muscle mitochondria in relation to, (WALTERS *et al.*) 310
- Heart, beef ——— mitochondria; cytochrome oxidase from, (GILMOUR *et al.*) 487
- Heart, ——— mitochondria; electron microscopic evidence for volumetric changes in, (BLAIR, TAN) 630
- Heart, ——— sarcosomes; effect of pyruvate on cyclic oxidations by, (DAVIS) . . . 26
- Hydrocortisone, ———stimulated responses of reduced pyridine nucleotide fluorescence in prostate cultured from castrate rats (RITTER, PADDLE) 547
- Hydrogen peroxide, compounds formed by reaction of, with ferrous cytochrome *c* oxidase (LEMBERG, STANBURY) 37
- Hypoxanthine dehydrogenase, of avian kidney; NADH oxidation by, (LONDON, MYLES) 429
- Indole, flavin-—— interactions (PEREIRA, TOLLIN) 79
- Kidney, avian ———; NADH oxidation by hypoxanthine dehydrogenase of, (LONDON, MYLES) 429
- Kidney, mammalian ——— membrane; interaction of, with mitochondria *in vitro* (LONDON) 518
- Leaves, abnormal phytochrome spectrum in, (SPRUIT) 260
- Leaves, spinach ———; factor from, interacting with chloroplasts (TERPSTRA) . 221
- Liver mitochondria, see Mitochondria
- Luciferase, measurement of ATP pool in *E. coli* using modified ——— assay (COLE *et al.*) 445
- Lysosomes, mitochondrial swelling and uncoupling of oxidative phosphorylation by, (MELLORS *et al.*) 299
- Membrane, mammalian kidney ———; interaction of, and mitochondria *in vitro* (LONDON) 518
- Membrane, phosphorylating membrane fragments of *Micrococcus denitrificans*; preparation and properties of, (IMAI *et al.*) 462
- Micrococcus denitrificans*, oxidative phosphorylation in, (IMAI *et al.*) . . . 462, 477
- Microsomes, electron transport system of, involving P-450; relation of cholesterol synthesis and NADPH oxidation by, (WADA *et al.*) 273
- Microsomes, NADPH-———triphenyltetrazolium chloride system; free radicals in, (SATO) 554
- Mitochondria, beef heart ———; cytochrome oxidase from, (GILMOUR *et al.*) 487
- Mitochondria, heart ———; electron microscopic evidence for volumetric changes in, (BLAIR, TAN) 630
- Mitochondria, inhibition of uptake and oxidation of succinate in, (PALMIERI *et al.*) 625
- Mitochondria, inhibitors of NADH-ubiquinone reductase from, (SALACH *et al.*) 281
- Mitochondria, intact rat-liver ———; low-temperature spectra of cytochrome oxidase in, (WILSON, GILMOUR) 52
- Mitochondria, interaction of mammalian kidney membrane and, *in vitro* (LONDON) 518
- Mitochondria, low-temperature spectroscopy of, (RITTER, ELKIN) 269
- Mitochondria, metabolism of adenine nucleotides by; effect of oligomycin and succinate on, (PINNA *et al.*) 18
- Mitochondria, rat-liver ———; inhibition by formaldehyde of energy transfer and related processes in, (VAN BUSKIRK, FRISELL) 292
- Mitochondria, rat-liver ———; nature of endogenous substrate in, (BRYLA *et al.*) 285
- Mitochondria, rat-liver ———; stimulation by uncouplers of efflux of α -oxoglutarate from, (PAPA *et al.*) 438
- Mitochondria, respiration of; multiple inhibition of, (NIJS) 454
- Mitochondria, skeletal muscle ———; nitrite metabolism by, in relation to haem pigments (WALTERS *et al.*) 310
- Mitochondria, swelling of, and uncoupling of oxidative phosphorylation by lysosomes (MELLORS *et al.*) 299
- Mucosa, frog gastric ———; action of amyltal on, (SACHS *et al.*) 522
- Mucosa, gastric ———; NADP in, (BANISTER, MORRISSEY) 645
- Muscle, skeletal ——— mitochondria, see Mitochondria
- Navicula pelliculosa*, highly purified cytochromes *c* from, (YAMANAKA *et al.*) . . 416
- Nicotinamide-adenine dinucleotide, reduced ———; influence of solvents on intramolecular energy transfer in, (FREED *et al.*) 432
- Nicotinamide-adenine dinucleotide, reduced ———; oxidation of, by hypoxanthine dehydrogenase of avian kidney (LONDON, MYLES) 429
- Nicotinamide-adenine dinucleotide dehydrogenase, high-molecular-weight reduced ——— of respiratory chain; isolation of, (KANIUGA, GARDAS) 647

- Nicotinamide-adenine dinucleotide phosphate, in gastric mucosa (BANNISTER, MORRISSEY) 645
- Nicotinamide-adenine dinucleotide phosphate, reduced —; influence of solvents on intramolecular energy transfer in, (FREED *et al.*) 432
- Nicotinamide-adenine dinucleotide phosphate, reduced — microsome-triphenyltetrazolium chloride system; free radicals in, (SATO) 554
- Nicotinamide-adenine dinucleotide phosphate, reduced —; relation of cholesterol synthesis and oxidation of, by microsomal electron transport system involving P-450 (WADA *et al.*) 273
- Nicotinamide-adenine dinucleotide (reduced)-ubiquinone reductase, from mitochondria; inhibitors of, (SALACH *et al.*) 281
- Nitrite, — metabolism by skeletal muscle mitochondria in relation to haem pigments (WALTERS *et al.*) 310
- Nitrogen, — fixation in cell-free preparations of blue-green algae; oxygen inhibition of, (FAY, COX) 562
- Nuclei, rat thymus —; occurrence of cytochromes in, (BETEL) 62
- Oligomycin, effect of, on mitochondrial metabolism of adenine nucleotides (PINNA *et al.*) 18
- α -Oxoglutarate, efflux of, from rat-liver mitochondria; stimulation of, by uncouplers (PAPA *et al.*) 438
- Oxygen, — activation (CILENTO, ZINNER) 88, 93
- Oxygen, compounds formed by reaction of, with ferrous cytochrome *c* oxidase (LEMBERG, STANBURY) 37
- Oxygen, — evolution by isolated chloroplasts; effects of P₁ on, (COCKBURN *et al.*) 614
- Oxygen, — evolving photoreaction; identification of, as delayed light emitter in mutants of *Scenedesmus obliquus* (BERTSCH *et al.*) 129
- Oxygen, — inhibition of nitrogen fixation in cell-free preparations of blue-green algae (FAY, COX) 562
- Phenol, flavin—interactions (PEREIRA, TOLLIN) 79
- p*-Phenylenediamines, as electron donors for photosynthetic pyridine nucleotide reduction in *Rhodospirillum rubrum* chromatophores (TREBST *et al.*) 256
- p*-Phenylenediamines, monoprotonated —; oxygen activation by, (CILENTO, ZINNER) 93
- Phosphate, inorganic —; effects of, on O₂ evolution by isolated chloroplasts (COCKBURN *et al.*) 614
- Phosphate, light- and cysteine-activated ATP-inorganic — exchange reaction in chloroplasts; relationship of, to ATPase and photophosphorylation (RIENITS) 595
- Phosphate, — metabolism in electric organ (CHENG, KEYNES) 249
- Phosphoglycollate phosphatase, intracellular localization of, (THOMPSON, WHITTINGHAM) 642
- Phosphorylation, oxidative — and deoxyadenine nucleotides (KEMP, GROOT) 628
- Phosphorylation, oxidative — in *Micrococcus denitrificans* (IMAI *et al.*) 462, 477
- Phosphorylation, oxidative —; mitochondrial swelling and uncoupling of, by lysosomes (MELLORS *et al.*) 299
- Phosphorylation, photosynthetic and oxidative — in chromatophores from light-grown cells in *Rhodospirillum rubrum*; relationship between, (YAMASHITA *et al.*) 154
- Phosphorylation, respiratory-chain —; uncoupling of, by arsenate (TER WELLE, SLATER) 1
- Photophosphorylation, relationship of light- and cysteine-activated ATP-P₁ exchange reaction in chloroplasts to, (RIENITS) 595
- Photosynthesis, system 2 of; fluorometric evidence for participation of chlorophyll *a*-695 in, (BROWN) 391
- Photosynthetic units, of system 1 in algae; energy transfer between, (FORK, AMESZ) 266
- Phytochrome, abnormal spectrum of, in leaves (SPRUIT) 260
- Pigment, 503 m μ absorbing — in some yeasts; nature and function of, (LABBE *et al.*) 70
- Pigment-protein complexes, see Protein
- Plant, — ferredoxin; degradation and resynthesis of active centre of, (BAYER *et al.*) 435
- Porphyridium, fluorescent lifetime of, in weak light; measurement of, (NICHOLSON, FORTOUL) 577
- Protein, pigment — complexes derived from *Rhodospirillum rubrum* chromatophores by enzymatic digestion (VERNON, GARCIA) 144
- Protohaem, conversion of, to haem *a* in *Staphylococcus* (SINCLAIR *et al.*) 427
- Pyridine nucleotide, photosynthetic — reduction in *Rhodospirillum rubrum* chromatophores; *p*-phenylenediamines as electron donors for, (TREBST *et al.*) 256
- Pyridine nucleotide, reduced — fluorescence in prostates cultured from castrate rats; testosterone and hydrocortisone-stimulated responses of, (RITTER, PADDLE) 547
- Pyridine nucleotide transhydrogenase, in membrane fragments of *Micrococcus denitrificans*; properties of, (ASANO *et al.*) 477

- Pyruvate, effect of, on cyclic oxidations by heart sarcosomes (DAVIS) 26
- Quinones, quenching of chlorophyll fluorescence by, in algae and chloroplasts (AMESZ, FORK). 97
- Rat, — liver mitochondria, see Mitochondria
- Rat, — thymus, see Thymus
- Respiration, mitochondrial —; multiple inhibition of, (NIJS) 454
- Respiratory chain, isolation of high-molecular-weight NADH dehydrogenase of, (KANIUGA, GARDAS) 647
- Respiratory-chain phosphorylation, uncoupling of, by arsenate (TER WELLE, SLATER) 1
- Rhodospseudomonas spheroides*, — cytochrome *c*₂, (ORLANDO) 634
- Rhodospirillum rubrum*, changes in ultraviolet absorbance caused by succinate and light in, (PARSON) 263
- Rhodospirillum rubrum*, — chromatophores; *p*-phenylenediamines as electron donors for photosynthetic pyridine nucleotide reduction in, (TREBST *et al.*) 257
- Rhodospirillum rubrum*, — chromatophores; pigment-protein complexes derived from, by enzymatic digestion (VERNON, GARCIA) 144
- Rhodospirillum rubrum*, — chromatophores; relationship between photosynthetic and oxidative phosphorylation in, (YAMASHITA *et al.*) 154
- Rhodospirillum rubrum*, cytochrome and bacteriochlorophyll reactions in cells of, (KE, NGO) 319
- Rhodospirillum rubrum*, inhibition of energy conservation reactions of, by Dio-9 (FISHER, GUILLORY) 654
- Sarcosomes, heart —; effect of pyruvate on cyclic oxidations by, (DAVIS) . . . 26
- Scenedesmus obliquus*, delayed light emitter in mutants of; identification of oxygen-evolving photoreaction as, (BERTSCH *et al.*) 129
- Skeletal muscle, — mitochondria, see Mitochondria
- Spinach, — chloroplasts, see Chloroplasts
- Spinach, — leaves, see Leaves
- Staphylococcus, conversion of protohaem to haem *a* in, (SINCLAIR *et al.*) 427
- Steroid, — hydroxylations by guinea-pig adrenal tissue (PÉRON, CALDWELL) 532
- Stomach, mucosa from, see Mucosa
- Succinate, changes in ultraviolet absorbance caused by, and light in *Rhodospirillum rubrum* (PARSON) 263
- Succinate, effect of, on mitochondrial metabolism of adenine nucleotides (PINNA *et al.*) 18
- Succinate, inhibition of uptake and oxidation of, in rat-liver mitochondria (PALMIERI *et al.*) 625
- Testosterone, — stimulated responses of reduced pyridine nucleotide fluorescence in prostates cultured from castrate rats (RITTER, PADDLE). 547
- Thymus, rat — nuclei; occurrence of cytochromes in, (BETEL) 62
- Triphenyltetrazolium chloride, NADPH-microsomes — system; free radicals in, (SATO) 554
- Tris (hydroxymethyl) methylglycine, — solutions of varying ionic strengths; digitonin incubation of spinach chloroplasts in, (ANDERSON, VERNON) 363
- Vesicle preparations, from *Chlorobium thiosulphatophilum* L660; ATP production in light and dark by, (SYKES, GIBBON) 173
- Xanthine oxidase, mechanism of reduction of cytochrome *c* by, (MURAOKA *et al.*) . 408
- Yeast, cytochrome oxidase from; ESR studies on, (PALMER *et al.*) 636
- Yeasts, nature and function of 503 mμ absorbing pigment in, (LABBÉ *et al.*) . . 70
