

SUBJECT INDEX

- Acetyl phosphate
Activation of Ca^{2+} uptake by ——— in muscle microsomes (De Meis). . . (172) 343
- cis*-Aconityl adenylate
Stability and thermodynamic parameters of ——— (Ozawa) . . . (172) 1
- Actin
Divalent cation bound to ——— and thin filament (Kasai) (172) 171
- F-Actin
Behaviour of divalent cations and nucleotides bound to ——— (Kasai, Oosawa). (172) 300
- F-Actin-heavy meromyosin
Physicochemical studies of ——— solutions (Tawada) (172) 311
- Acyl anhydrides
Conservation of oxidative energy in phosphate-free systems. Formation of ——— via the oxidation of hydroquinone monocarboxylic esters (Thanassi, Cohen). (172) 389
- Anabaena variabilis*
Properties and structure of fractions prepared from ——— by the action of Triton X-100 (Ogawa *et al.*) . . . (172) 216
- Anion transport
Light-dependent ——— in isolated spinach chloroplasts (Deamer, Packer) (172) 539
- Antimycin A
Ectopic inhibition of the complexes of the electron transport system by rotenone, piericidin A, demerol and ——— (Teeter *et al.*). (172) 331
- Arsenate uptake
Inhibition of phosphate uptake and ——— in yeast by monoiodoacetate, fluoride, 2,4-dinitrophenol and acetate (Borst Pauwels, Jager) (172) 399
- Azoferredoxin
Properties of ——— purified from nitrogen-fixing extracts of *Clostridium pasteurianum* (Moustafa, Mortenson) (172) 106
- Bacterial photosynthesis
Nature of the free radical formed during the primary process of ——— (McElroy *et al.*) (172) 180
- Bacteriochlorophyll *b*
Light-induced absorbance changes of cytochromes and carotenoids in a sulphur bacterium containing ——— (Olson *et al.*) (172) 338
- Biguanides
Site-specific uncoupling and inhibition of oxidative phosphorylation by ———, II (Schäfer) (172) 334
- Caffeine
Inhibition of sarcotubular calcium transport by ———: Species and temperature dependence (Fuchs) . . . (172) 566
- Calcium transport
Inhibition of sarcotubular ——— by caffeine: Species and temperature dependence (Fuchs) (172) 566
- Calcium uptake
Activation of ——— by acetyl phosphate in muscle microsomes (De Meis) (172) 343
- Calcium uptake
Stabilization of cardiac microsomal ——— by hypertonic sucrose solutions (Repke, Katz) (172) 348
- Carbon monoxide
——-reactive haemoproteins of yeast (Mok *et al.*) (172) 438
- β -Carboxylation photosynthesis
—— and photorespiration in higher plants (Osmond) (172) 144
- Carotenoids
Energy transfer from ——— to chlorophyll in blue-green, red and green algae and greening bean leaves (Goedheer) (172) 252
- Carotenoids
Light-induced absorbance changes of cytochromes and ——— in a sulphur bacterium containing bacteriochlorophyll *b* (Olson *et al.*) (172) 338
- Carotenoids
Photo-bleaching of ——— related to the electron transport in chloroplasts (Yamashita *et al.*) (172) 511
- Chlorella pyrenoidosa*
Induction of respiratory metabolism in illuminated ——— and isolated spinach chloroplasts by the addition of vitamin K_5 (Krause, Bassham). (172) 553
- Chloride
Role of ——— in photosynthesis. I. The chloride requirement of electron transport (Hind *et al.*) (172) 277
- Chloride
Role of ——— in photosynthesis. II. The effect of chloride upon fluorescence (Heath, Hind) (172) 290
- Chlorobacteriaceae
Quinones of the ———. Properties and possible function (Pows, Redfearn) (172) 429
- Chlorophyll
Energy transfer from carotenoids to ——— in blue-green, red and green

- algae and greening bean leaves (Goedheer) (172) 252
- Chlorophyll *a* fluorescence
Control of excitation transfer in photosynthesis. I. Light-induced change of — in *Porphyridium cruentum* (Murata). (172) 242
- Chlorophyll *a*-protein complex
Comparison of a — isolated from a blue-green alga with chlorophyll-protein complexes obtained from green bacteria and higher plants (Thorner) (172) 230
- Chloroplasts
Delayed light studies on photosynthetic energy conversion. II. Effect of electron acceptors and phosphorylation cofactors on the millisecond emission from — (Bertsch *et al.*) . . (172) 525
- Chloroplasts
Enhancement of emission from — at 698 nm by a naturally-occurring factor (Brody *et al.*) (172) 340
- Chloroplasts
Fractionation of spinach — with sodium deoxycholate (Bril *et al.*) (172) 345
- Chloroplasts
Induction of respiratory metabolism in illuminated *Chlorella pyrenoidosa* and isolated spinach — by the addition of vitamin K₅ (Krause, Bassham) (172) 553
- Chloroplasts
Light-dependent anion transport in isolated spinach — (Deamer, Packer) (172) 539
- Chloroplasts
Light-induced changes in the ionic content of — in *Pisum sativum* (Nobel) (172) 134
- Chloroplasts
Nicotinamide cofactors of intact — isolated on a sucrose density gradient (Harvey, Brown) (172) 116
- Chloroplasts
Photo-bleaching of carotenoids related to the electron transport in — (Yamashita *et al.*) (172) 511
- Chloroplasts
Potentiometric titration of the fluorescence yield of spinach — (Cramer, Butler) (172) 503
- Colpoda steinii*
Electron transport and phospholipase activity in encysting cells of the ciliate — (Tibbs, Marshall) . . . (172) 382
- Cytochromes
Electron-transport systems of *Rhizobium japonicum*. I. Haemoprotein P-450, other CO-reactive pigments, — and oxidases in bacteroids from nitrogen-fixing root nodules (Appleby) (172) 71
- Cytochromes
Electron-transport systems of *Rhizobium japonicum*. II. Rhizobium haemoglobin, — and oxidases in free-living (cultured) cells (Appleby) (172) 88
- Cytochromes
Light-induced absorbance changes of — and carotenoids in a sulphur bacterium containing bacteriochlorophyll *b* (Olson *et al.*) (172) 338
- Cytochrome *c*-lipid
Proteolipids. V. The activity of — (Sun, Crane) (172) 417
- Cytochrome P890 and P800
Light-induced reactions of — in the purple photosynthetic bacterium *Rhodospirillum rubrum* (Sybesma) (172) 177
- Cytochrome oxidase
— and derivatives. IX. Spectrophotometric studies on the rapid reaction of ferrous cytochrome *c* oxidase with molecular oxygen under conditions of complete and partial oxygenation (Gilmour *et al.*) . . . (172) 37
- Demerol
Ectopic inhibition of the complexes of the electron transport system by rotenone, piericidin A, — and antimycin A (Teeter *et al.*) (172) 331
- Digitonin particles
Energy-linked reactions in — from beef heart mitochondria (Haas, Gray) (172) 571
- Ectopic inhibition
— of complexes of the electron transport system by rotenone, piericidin A, demerol and antimycin A (Teeter *et al.*) (172) 331
- Electron acceptors
Delayed light studies on photosynthetic energy conversion. II. Effect of — and phosphorylation cofactors on the millisecond emission from chloroplasts (Bertsch *et al.*) (172) 525
- Electron acceptor
Nature of the primary — in bacterial photosynthesis (Ke) . . . (172) 583
- Electron-transfer reactions
One — in biochemical systems. II. The reaction of free radicals formed in the enzymic oxidation (Ohnishi *et al.*) (172) 357
- Electron-transfer reactions
One — in biochemical systems. III. One-electron reduction of quinones by microsomal flavin enzymes (Iyanagi, Yamazaki) (172) 370
- Electron transport
— and phospholipase activity in encysting cells of the ciliate *Colpoda steinii* (Tibbs, Marshall) . . . (172) 382
- Electron transport
Role of Cl⁻ in photosynthesis. I. The Cl⁻ requirement of — (Hind *et al.*) (172) 277
- Electron transport in chloroplasts

- Photo-bleaching of carotenoids related to the ——— (Yamashita *et al.*) (172) 511
- Electron-transport system
- Ectopic inhibition of the complexes of the ——— by rotenone, piericidin A, demerol and antimycin A (Teeter *et al.*) (172) 331
- Electron-transport systems
- of *Rhizobium japonicum*. I. Haemoprotein P-450, other CO-reactive pigments, cytochromes and oxidases in bacteroids from nitrogen-fixing root nodules (Appleby) (172) 71
- Electron-transport systems
- of *Rhizobium japonicum*. II. Rhizobium haemoglobin, cytochromes and oxidases in free-living (cultured) cells (Appleby) (172) 88
- Energy metabolism of platelets
- Clot retraction and ———. Effect and mechanism of inhibitors (Mürer) (172) 266
- Energy transfer
- from carotenoids to chlorophyll in blue-green, red and green algae and greening bean leaves (Goedheer) (172) 252
- Fatty acid inhibition
- Light-driven scattering changes and increased 515 nm absorbance changes associated with ——— of photosynthesis in *Chlorella* (Hiller) (172) 546
- Flavin enzymes
- One-electron-transfer reactions in biochemical systems. III. One-electron reduction of quinones by microsomal ——— (Iyanagi, Yamazaki) . . (172) 370
- Free radicals
- One-electron-transfer reactions in biochemical systems. II. The reaction of ——— formed in the enzymic oxidation (Ohnishi *et al.*) (172) 357
- Glucose dehydrogenase
- of *Bacillus megaterium* KM. Coupling of the cytoplasmic enzyme with membrane-bound cytochromes (Broberg *et al.*) (172) 205
- Glutamate dehydrogenase
- NAD(P)-linked oxidoreductions and the nicotinamide nucleotide specificity of ——— in rat liver mitochondria (Papa *et al.*) (172) 20
- Glutamate oxidation
- in rat liver homogenate (Hoek *et al.*) (172) 407
- Haemoproteins
- Carbon monoxide-reactive ——— of yeast (Mok *et al.*) (172) 438
- Haemoprotein P-450
- Electron-transport systems of *Rhizobium japonicum*. I. ———, other CO-reactive pigments, cytochromes and oxidases in bacteroids from nitrogen-fixing root nodules (Appleby). . (172) 71
- Haemoprotein 563
- Soluble ——— isolated from spinach leaves (Nakajima *et al.*) (172) 578
- Heavy meromyosin
- Interaction of ——— with substrate. II. Rate of the formation of ATP-induced ultraviolet difference spectrum of heavy meromyosin measured by stopped-flow method (Morita) . (172) 319
- Heavy meromyosin-F-actin
- Physicochemical studies of ——— solutions (Tawada) (172) 311
- Hydroquinone monocarboxylic esters
- Conservation of oxidative energy in phosphate-free systems. Formation of acyl anhydrides via the oxidation of ——— (Thanassi, Cohen) . . . (172) 389
- Inorganic pyrophosphatase
- Alkaline ——— of maize leaves (Simmons, Butler) (172) 150
- Ion transport
- Role of sulphhydryl groups in oxidative phosphorylation and ——— by rat liver mitochondria (Haugaard *et al.*) . (172) 198
- Lipid-cytochrome *c*
- Proteolipids. V. The activity of ——— (Sun, Crane) (172) 417
- Membrane-bound cytochromes
- Glucose dehydrogenase of *Bacillus megaterium* KM. Coupling of the cytoplasmic enzyme with ——— (Broberg *et al.*) (172) 205
- Membrane potential
- Direction of polarity of the mitochondrial trans-—— (Harris, Pressman) (172) 66
- Micrococcus dinitrificans*
- Aerobic and anaerobic respiration in ——— (Lam, Nicholas) (172) 450
- Microsomal calcium uptake
- Stabilization of cardiac ——— by hypertonic sucrose solutions (Repke, Katz) (172) 348
- Microsomal flavin enzymes
- One-electron-transfer reactions in biochemical systems. III. One-electron reduction of quinones by ——— (Iyanagi, Yamazaki) (172) 370
- Microsomes
- Activation of Ca²⁺ uptake by acetyl phosphate in muscle ——— (De Meis) (172) 343
- Microsomes
- Free-radical mechanism by which triphenyltetrazolium chloride stimulates aerobic oxidation of NADPH by ——— (Sato, Iwaizumi) (172) 30
- Mitochondria
- Acid-soluble nucleotides of beef heart ——— (Mansurova, Kulaev) . . (172) 328
- Mitochondria
- Control of NAD(P)-linked oxidoreductions in rat liver ——— (Tager *et al.*) (172) 7
- Mitochondria
- Determination of the rate of uptake of

- substrates by rat liver ——— (Kraayenhof *et al.*) (172) 580
- Mitochondria
- Energy-linked reaction in digitonin particles from beef heart ——— (Haas, Gray) (172) 571
- Mitochondria
- Inhibitory action of oxaloacetate on succinate oxidation in rat liver ——— and the mechanism of its reversal (Wojtczak). (172) 52
- Mitochondria
- Interaction between uncouplers and substrates in rat liver ——— (Kraayenhof, Van Dam). (172) 189
- Mitochondria
- NAD(P)-linked oxidoreductions and the nicotinamide nucleotide specificity of glutamate dehydrogenase in rat liver ——— (Papa *et al.*) (172) 20
- Mitochondria
- Role of sulphhydryl groups in oxidative phosphorylation and ion transport by rat liver ——— (Haugaard *et al.*) (172) 198
- Mitochondrial trans-membrane potential
- Direction of polarity of the ——— (Harris, Pressman) (172) 66
- Myosin
- Binding of ADP to ——— (Kiely, Martonosi). (172) 158
- NADH
- Interaction between ——— and succinate during simultaneous oxidation by non-phosphorylating submitochondrial particles from bovine heart (Davis *et al.*) (172) 574
- NADH dehydrogenase
- Inactivation of lyophilized ——— from *Escherichia coli* by oxygen (Gutman *et al.*) (172) 462
- NAD(P)-linked oxidoreductions
- Control of ——— in rat liver mitochondria (Tager *et al.*) (172) 7
- NAD(P)-linked oxidoreductions
- and nicotinamide nucleotide specificity of glutamate dehydrogenase in rat liver mitochondria (Papa *et al.*) (172) 20
- NAD(P) reduction
- Generation of reducing power in chemosynthesis. V. The mechanism of ——— by nitrite in the chemoautotroph *Nitrobacter agilis* (Sewell, Aleem) . . . (172) 467
- NADPH
- Free-radical mechanism by which triphenyltetrazolium chloride stimulates aerobic oxidation of ——— by microsomes (Sato, Iwaizumi) (172) 30
- Nicotinamide cofactors
- of intact chloroplasts isolated on a sucrose density gradient (Harvey, Brown) (172) 116
- Nitrite
- Generation of reducing power in chemosynthesis, V. The mechanism of NAD(P) reduction by ——— in the chemoautotroph *Nitrobacter agilis* (Sewell, Aleem) (172) 467
- Nitrobacter agilis*
- Generation of reducing power in chemosynthesis. V. The mechanism of NAD(P) reduction by nitrite in the chemoautotroph ——— (Sewell, Aleem). . . (172) 467
- Nitrogen-fixing extract
- Properties of azoferredoxin purified from ——— of *Clostridium pasteurianum* (Moustafa, Mortenson). (172) 106
- Oxaloacetate
- Inhibitory action of ——— on succinate oxidation in rat liver mitochondria and the mechanism of its reversal (Wojtczak). (172) 52
- Oxidation
- One-electron-transfer reactions in biochemical systems. II. The reaction of free radicals formed in the enzymic ——— (Ohnishi *et al.*) (172) 357
- Oxidative energy
- Conservation of ——— in phosphate-free systems. Formation of acyl anhydrides via the oxidation of hydroquinone monocarboxylic esters (Thannassi, Cohen). (172) 389
- Oxidative phosphorylation
- Effect of monovalent cations on ——— in submitochondrial particles (Papa *et al.*) (172) 184
- Oxidative phosphorylation
- Role of sulphhydryl groups in ——— and ion transport by rat liver mitochondria (Haugaard *et al.*) . . . (172) 198
- Oxidative phosphorylation
- Site-specific uncoupling and inhibition of ——— by biguanides. II (Schäfer) (172) 334
- Oxygen
- Inactivation of lyophilized NADH dehydrogenase from *Escherichia coli* by ——— (Gutman *et al.*) (172) 462
- Phosphate uptake
- Inhibition of ——— and arsenate uptake in yeast by monoiodoacetate, fluoride, 2,4-dinitrophenol and acetate (Borst Pauwels, Jager) (172) 399
- Phospholipase activity
- Electron transport and ——— in encysting cells of the ciliate *Colpoda steinii* (Tibbs, Marshall) (172) 382
- Phosphorylation cofactors
- Delayed light studies on photosynthetic energy conversion. II. Effect of electron acceptors and ——— on the millisecond emission from chloroplasts (Bertsch *et al.*) (172) 525
- Photorespiration
- β -Carboxylation photosynthesis and ——— in higher plants (Osmond) (172) 144
- Photosynthesis

- Control of excitation transfer in ———.
I. Light-induced change of chlorophyll *a* fluorescence in *Porphyridium cruentum* (Murata) (172) 242
- Photosynthesis
Light-driven scattering changes and increased 515 nm absorbance changes associated with fatty acid inhibition of ——— in *Chlorella* (Hiller). . . (172) 546
- Photosynthesis
Nature of the free radical formed during the primary process of bacterial ——— (McElroy *et al.*). (172) 180
- Photosynthesis
Nature of the primary electron acceptor in bacterial ——— (Ke). (172) 583
- Photosynthesis
Role of Cl⁻ in ———. I. The Cl⁻ requirement of electron transport (Hind *et al.*). (172) 277
- Photosynthesis
Role of Cl⁻ in ———. II. The effect of Cl⁻ upon fluorescence (Heath, Hind) (172) 290
- Photosynthetic energy conversion
Delayed light studies on ———. II. Effect of electron acceptors and phosphorylation cofactors on the millisecond emission from chloroplasts (Bertsch *et al.*). (172) 525
- Piericidin A
Ectopic inhibition of the complexes of the electron transport system by rotenone, ———, demerol and antimycin A (Teeter *et al.*). (172) 331
- Platelets
Clot retraction and energy metabolism of ———. Effect and mechanism of inhibitors (Müser) (172) 266
- Porphyridium cruentum*
Control of excitation transfer in photosynthesis. I. Light-induced change of chlorophyll *a* fluorescence in ——— (Murata). (172) 242
- Protein-chlorophyll *a* complex
Comparison of a ——— isolated from a blue-green alga with chlorophyll-protein complexes obtained from green bacteria and higher plants (Thorner) (172) 230
- Proteolipids
———. V. Activity of lipid-cytochrome *c* (Sun, Crane). (172) 417
- Protochlorophyll pigments
Optical properties of the ———. I. Isolation, characterization, and infrared spectra (Houssier, Sauer) . . . (172) 476
- Protochlorophyll pigments
Optical properties of the ———. II. Electronic absorption, fluorescence, and circular dichroism spectra (Houssier, Sauer). (172) 492
- Proton transport
Characteristics of a light-dependent ——— in cells of *Rhodospirillum rubrum* (Edwards, Bovell) (172) 126
- Pyrophosphatase
Alkaline inorganic ——— of maize leaves (Simmons, Butler) . . . (172) 150
- Quinones
——— of Chlorobacteriaceae. Properties and possible function (Powls, Redfearn). (172) 429
- Quinones
One-electron-transfer reactions in biochemical systems. III. One-electron reduction of ——— by microsomal flavin enzymes (Iyanagi, Yamazaki) . (172) 370
- Reducing power
Generation of ——— in chemosynthesis. V. The mechanism of NAD(P) reduction by nitrite in the chemolithotroph *Nitrobacter agilis* (Sewell, Aleem) (172) 467
- Respiration
Aerobic and anaerobic ——— in *Micrococcus dinitrificans* (Lam, Nicholas) (172) 450
- Respiratory metabolism
Induction of ——— in illuminated *Chlorella pyrenoidosa* and isolated spinach chloroplasts by the addition of vitamin K₅ (Krause, Bassham) . (172) 553
- Respiratory rate
Dependence of the efficiency of uncouplers on the ——— (Tsou, Van Dam) (172) 174
- Rhizobium haemoglobin
Electron-transport systems of *Rhizobium japonicum*. II. ———, cytochromes and oxidases in free-living (cultured) cells (Appleby) . . . (172) 88
- Rhizobium japonicum*
Electron-transport systems of ———. I. Haemoprotein P-450, other CO-reactive pigments, cytochromes and oxidases in bacteroids from nitrogen-fixing root nodules (Appleby) (172) 71
- Rhizobium japonicum*
Electron-transport systems of ———. II. Rhizobium haemoglobin, cytochromes and oxidases in free-living (cultured) cells (Appleby) . . . (172) 88
- Rhodopseudomonas viridis*
Isolation of the reaction center of ——— (Thorner *et al.*) (172) 351
- Rhodospirillum rubrum*
Characteristics of a light-dependent proton transport in cells of ——— (Edwards, Bovell) (172) 126
- Rhodospirillum rubrum*
Light-induced reactions of cytochrome P890 and P800 in the purple photosynthetic bacterium ——— (Sybesma) (172) 177
- Rotenone
Ectopic inhibition of the complexes of the electron transport system by ———,

piericidin A, demerol and antimycin A (Teeter <i>et al.</i>) (172)	331	the mechanism of its reversal (Wojtczak). (172)	52
Spinach chloroplasts		Triphenyltetrazolium chloride	
Fractionation of ——— with sodium deoxycholate (Bril <i>et al.</i>) (172)	345	Free-radical mechanism by which ———— stimulates aerobic oxidation of NADPH by microsomes (Sato, Iwai- zumi) (172)	30
Spinach leaves		Uncouplers	
Soluble haemoprotein 563 isolated from ———— (Nakajima <i>et al.</i>) (172)	578	Dependence of the efficiency of ——— on the respiratory rate (Tsou, Van Dam) (172)	174
Submitochondrial particles		Uncouplers	
Effect of monovalent cations on oxida- tive phosphorylation in ——— (Papa <i>et al.</i>) (172)	184	Interaction between ——— and sub- strates in rat liver mitochondria (Kraayenhof, Van Dam) (172)	189
Submitochondrial particles		Uncoupling	
Interaction between NADH and suc- cinate during simultaneous oxidation by non-phosphorylating ——— from bovine heart (Davis <i>et al.</i>) (172)	574	Site-specific ——— and inhibition of oxidative phosphorylation by bigua- nides. II (Schäfer) (172)	334
Succinate		Vitamin K ₅	
Interaction between NADH and ——— during simultaneous oxidation by non- phosphorylating submitochondrial par- ticles from bovine heart (Davis <i>et al.</i>) (172)	574	Induction of respiratory metabolism in illuminated <i>Chlorella pyrenoidosa</i> and isolated spinach chloroplasts by the ad- dition of ——— (Krause, Bassham) (172)	553
Succinate oxidation			
Inhibitory action of oxaloacetate on ———— in rat liver mitochondria and			

TITLES OF RELATED PAPERS IN OTHER SECTIONS

The following papers that have recently appeared in other sections of BIOCHIMICA ET BIOPHYSICA ACTA may be of interest to the readers of this specialized section:

BBA-BIOMEMBRANES

- The movement of H⁺ and other ions at the onset of photosynthesis in ulva (BBA 75241)
by J. T. CUMMINS, J. A. STRAND AND B. E. VAUGHAN (San Francisco, Calif.) 173 (1969) 198
- Respiration and energy-dependent movements of chloride at plasmalemma and tonoplast of
carrot root cells (BBA 75237)
by W. J. CRAM (Cambridge) 173 (1969) 213

BBA-PROTEIN STRUCTURE

- A correlation between spin states and light-absorption spectra of ferric lamprey hemoglobin
at room and low temperature (BBA 35331)
by N. M. RUMEN AND B. CHANCE (Augusta, Ga. and Philadelphia, Pa.) . 175 (1969) 242
- The oxygen equilibria and aggregation behavior of polymerizing mouse hemoglobins (BBA
35339)
by A. RIGGS AND M. RONA (Austin, Texas) 175 (1969) 248
- The preparation of tropomyosin and troponin from natural actomyosin (BBA 35325)
by D. J. HARTSHORNE AND H. MUELLER (Pittsburgh, Pa.) 175 (1969) 301
- Studies on troponin (BBA 35326)
by D. J. HARTSHORNE, M. THEINER AND H. MUELLER (Pittsburgh, Pa.) . 175 (1969) 320
- Large-scale isolation of phytochrome from oat seedlings (BBA 35336)
by H. H. KROES, A. VAN ROOIJEN, J. M. GEERS AND E. H. M. GREUILL (Zevenaar)
175 (1969) 409

BBA-ENZYMOLGY

- Malate dehydrogenase in leaf peroxisomes (BBA 65860)
by R. K. YAMAZAKI AND N. E. TOLBERT (East Lansing, Mich.) 178 (1969) 11
- The intracellular and intramitochondrial distribution of malonyl-CoA decarboxylase and
propionyl-CoA carboxylase in rat liver (BBA 65872)
by H. R. SCHOLTE (Amsterdam) 178 (1969) 137
