

SUBJECT INDEX

- Acetoacetate oxidation
 ——— activation in kidney and heart mitochondria (Alexandre et al.), (180) 237
- Acetobacter suboxydans
 Effect of glucose on the electron-transport systems of the aerobic bacteria *Azotobacter vinelandii* and ——— (Daniel, Erickson), (180) 63
- Actin
 Thermodynamical aspect of G-F transformations of ——— (Kasai), (180) 399
- F-Actin
 Effect of the H-meromyosin plus ATP system on ——— (Tawada, Oosawa), (180) 199
- F-Actin
 Natural ———. III. Natural F-actin as inactive polymer (Kasai, Hama), (180) 550
- ADP-ATP exchange
 Comparative studies of the ——— and the ATP-P_i exchange reactions related to oxidative phosphorylation in rat-liver mitochondria (Groot), (180) 439
- Anabaena variabilis
 Fraction from ——— enriched in the reaction center chlorophyll P700 (Ogawa, Vernon), (180) 334
- Anabaena variabilis
 Site-specific inactivation of the photophosphorylation reactions of ——— (Lee et al.), (180) 130
- Ascorbate photooxidation
 Properties of ——— in isolated chloroplasts. Evidence for two ATP sites in noncyclic photophosphorylation (Böhme, Trebst), (180) 137
- ATPase
 Identification of denatured mitochondrial ——— in "structural protein" from beef heart mitochondria (Schatz, Saltzgaber), (180) 186
- ATP hydrolysis
 The question of the initial burst of ——— in myosin subfragments (Yazawa, Yagi), (180) 190
- ATP-P_i exchange
 Comparative studies of the ADP-ATP exchange and the ——— reactions related to oxidative phosphorylation in rat-liver mitochondria (Groot), (180) 439
- Avian embryonic development
 Oxidative enzyme components of avian liver microsomes. Changes during ——— and the effects of phenobarbital administration (Strittmatter, Umberger), (180) 18
- Azotobacter vinelandii*
 Effect of glucose on the electron-transport systems of the aerobic bacteria ——— and *Acetobacter suboxydans* (Daniel, Erickson), (180) 63
- Azotobacter vinelandii*
 Purification and properties of cytochromes c of ——— (Swank, Burris), (180) 473
- Bacteriochlorophyll pheophytinization
 ——— in chromatophores and subchromatophores from *Rhodospirillum rubrum* (Fujimori), (180) 360
- Beating heart cells
 In vitro studies of ——— in culture. XIII. The utilization of ATP and phosphocreatine in oligomycin and 2-deoxyglucose inhibited cells (Seraydarian et al.), (180) 264
- Bleaching
 Light dependence of temperature-induced ——— in *Euglena gracilis* (Uzzo, Lyman), (180) 573
- Calcium transport
 Effect of some local anesthetic compounds of sarcotubular ——— (Wilcox, Fuchs), (180) 210
- Chemiluminescence
 Compound III kinetics and ——— in oscillatory oxidation reactions catalyzed by horseradish peroxidase (Degn), (180) 271
- Chloride ion
 Role of ——— in photosynthesis. III. The effect of artificial electron donors upon electron transport (Izawa et al.), (180) 388
- Chloride ion
 Role of ——— in photosynthesis. IV. Studies on the low temperature fluorescence emission spectrum (Heath, Hind), (180) 414
- Chlorophyll P700
 A fraction from *Anabaena variabilis* enriched in the reaction center ——— (Ogawa, Vernon), (180) 334
- Chlorophyll-water interactions
 ———. Hydration, dehydration and hydrates of chlorophyll (Ballschmiter et al.), (180) 347
- Chloroplasts
 Conformational changes of ——— induced by illumination of leaves in vivo (Heber), (180) 302
- Chloroplasts
 Mechanism of photosynthetic sulphate reduction by isolated ——— (Schmidt, Trebst), (180) 529
- Chloroplasts
 Photosynthesis by isolated ———. IV. Regulation by factors from leaf cells (Moore et al.), (180) 368
- Chloroplasts
 Properties of ascorbate photooxidation in isolated ———. Evidence for two ATP sites

- in noncyclic photophosphorylation (Böhme, Trebst), (180) 137
- Chloroplast**
Reversible changes in the conformation of thylakoid membranes accompanying ——— expansion or contraction (Murakami, Parker), (180) 420
- Chloroplasts**
'State 3-State 4 transition' and phosphate potential in 'Class I' spinach ——— (Kraayenhof), (180) 213
- Chloroplasts**
Thermal uncoupling in ——— (Emmett, Walker), (180) 424
- Chloroplasts**
Uptake and light activated esterification of ^{32}P by isolated ——— (Harvey, Brown), (180) 520
- Chloroplast membranes**
Biogenesis of ———. III. Light-dependent induction of proton pump activity in whole cells and its correlation to cytochrome *f* photooxidation during greening of a *Chlamydomonas reinhardtii* mutant (*y-1*) (Schuldiner, Ohad), (180) 165
- Chromatium D**
Reversible interconversion of B850 and B810 in chromatophores of ——— as induced with detergents (Suzuki et al.), (180) 114
- Chromatophores**
Bacteriochlorophyll pheophytinization in ——— and subchromatophores from *Rhodospirillum rubrum* (Fujimori), (180) 360
- Chromatophores**
NAD photoreduction in *Rhodospirillum rubrum* ——— (Jones, Vernon), (180) 149
- Chromatophores**
Reversible interconversion of B850 and B810 in ——— of *Chromatium D* as induced with detergents (Suzuki et al.), (180) 114
- Compound III**
——— kinetics and chemiluminescence in oscillatory oxidation reactions catalyzed by horseradish peroxidase (Degn), (180) 271
- Contraction**
Muscular ——— (Volkenstein), (180) 562
- Corticosteroidogenesis**
Studies on ———. VI. Pyruvate and malate supported steroid 11β -hydroxylation in rat adrenal gland mitochondria (Péron, Tsang), (180) 445
- Coupling factor $F_1 \cdot X$**
Identity of mitochondrial factor X in ——— with F_0 (Groot, Meyer), (180) 575
- Cytochromes**
Respiratory ——— of *Euglena gracilis* (Raison, Smillie), (180) 500
- Cytochromes c**
Purification and properties of ——— of *Azotobacter vinelandii* (Schwank, Burris), (180) 473
- Cytochrome c-554**
Reactivity of *Anacystis nidulans* ——— with cytochrome oxidases (Yamanaka et al.), (180) 193
- Cytochrome oxidase**
A nitrite reductase with ——— activity from *Micrococcus denitrificans* (Lam, Nicholas), (180) 459
- Cytochrome oxidases**
Reactivity of *Anacystis nidulans* cytochrome c-554 with ——— (Yamanaka et al.), (180) 193
- Cytochrome *f* photooxidation**
Biogenesis of chloroplast membranes. III. Light-dependent induction of proton pump activity in whole cells and its correlation to ——— during greening of a *Chlamydomonas reinhardtii* mutant (*y-1*) (Schuldiner, Ohad), (180) 165
- Electron transfer components**
——— of wild-type and photosynthetic mutant strains of *Scenedesmus obliquus D₃* (Pows et al.), (180) 490
- Electron transport**
——— in beef heart muscle preparation. The inhibition of ubiquinone-stimulated succinate oxidase activity by antimycin and a quinoline-N-oxide derivative (Fynn), (180) 244
- Electron transport**
Photosynthetic ——— induced by flashing light in the purple photosynthetic bacterium *Rhodospirillum rubrum* (Sybesma, Kok), (180) 410
- Electron transport**
Role of chloride ion in photosynthesis. III. The effect of artificial electron donors upon ——— (Izawa et al.), (180) 388
- Electron transport particles**
Properties of ——— from *Halobacterium cutirubrum*. The respiratory chain system (Cheah), (180) 320
- Electron transport system**
Effect of glucose on the ——— of the aerobic bacteria *Azotobacter vinelandii* and *Acetobacter suboxydans* (Daniel, Erickson), (180) 63
- Electron transport system**
——— of *Micrococcus luteus* (*Sarcina lutea*) (Erickson, Parker), (180) 56
- Electron transport system**
Site of manganese function in photosynthetic ——— (Itoh et al.), (180) 509
- Euglena gracilis**
Light dependence of temperature-induced bleaching in ——— (Uzzo, Lyman), (180) 573
- Ferredoxin**
Photoreduction of ——— and its use in NAD(P) $^{+}$ reduction by a subcellular preparation from the photosynthetic bacterium, *Chlorobium thiosulphatophilum* (Buchanan, Evans), (180) 123
- Ferredoxin**
Purification and some properties of ——— derived from the blue-green alga, *Anacystis nidulans* (Yamanaka et al.), (180) 196

- Ferroleghaemoglobin
Nature of a supposed N_2 complex of ——— (Appleby), (180) 202
- Glycolysis
Studies on the mechanism of the stimulation of ——— and respiration by potassium ion in *Saccharomyces cerevisiae* (Peña et al.), (180) 1
- Haemoflavoprotein
Sulphite reductase from baker's yeast: A ——— (Prabhakararao, Nicholas), (180) 253
- Halobacterium cutirubrum*
Properties of electron transport particles from ———. The respiratory chain system (Cheah), (180) 320
- Heart cells
In vitro studies of beating ——— in culture. XIII. The utilization of ATP and phosphocreatine in oligomycin and 2-deoxyglucose inhibited cells (Seraydarian et al.), (180) 264
- High-potential iron protein
Studies on the chelate structure of the ——— of Chromatium (Flatmark, Dus), (180) 377
- Ion transport
——— by heart mitochondria. XIV. The mannitol-impermeable compartment of the mitochondrion and its relation to ion uptake (Hunter, Brierley), (180) 68
- Ion transport
——— by heart mitochondria. XV. Morphological changes associated with the penetration of solutes into isolated heart mitochondria (Hunter et al.), (180) 81
- Iron protein
Studies on the chelate structure of the high-potential ——— of Chromatium (Flatmark, Dus), (180) 377
- Manganese
Site of ——— function in photosynthetic electron transport system (Itoh et al.), (180) 509
- Meromyosin
Effect of the H- ——— plus ATP system on F-actin (Tawada, Oosawa), (180) 199
- Meromyosin
Interaction of heavy ——— with substrate. III. Difference spectrum of ultraviolet absorption in Subfragment 1 induced by ATP or ADP (Morita, Shimizu), (180) 545
- Micrococcus denitrificans*
A nitrite reductase with cytochrome oxidase activity from ——— (Lam, Nicholas), (180) 459
- Micrococcus luteus*
Electron-transport system of ——— (*Sarcina lutea*) (Erickson, Parker), (180) 56
- Mitochondria
Acetoacetate activation and oxidation in kidney and heart ——— (Alexandre et al.), (180) 237
- Mitochondria
Comparative studies of the ADP-ATP exchange and the ATP- P_i exchange reactions related to oxidative phosphorylation in rat-liver ——— (Groot), (180) 439
- Mitochondria
Distribution of α -tocopherol in beef heart ——— (Oliveira et al.), (180) 98
- Mitochondria
Inhibition by 2,4-dinitrophenol of the removal of oxaloacetate formed by the succinate oxidation by rat-liver and -heart ——— (Oestreicher et al.), (180) 45
- Mitochondria
Ion transport by heart ———. XIV. The mannitol-impermeable compartment of the mitochondrion and its relation to ion uptake (Hunter, Brierley), (180) 68
- Mitochondria
Ion transport by heart ———. XV. Morphological changes associated with the penetration of solutes into isolated heart mitochondria (Hunter et al.), (180) 81
- Mitochondria
Mechanism of inhibition by uncouplers of succinate oxidation in isolated ——— (Papa et al.), (180) 35
- Mitochondria
Redox states of respiratory-chain components in rat-liver ———. I. Effect of varying substrate concentration and of azide (Muraoka, Slater), (180) 221
- Mitochondria
Redox states of respiratory-chain components in rat-liver ———. II. The 'crossover' on the transition from State 3 to State 4 (Muraoka, Slater), (180) 227
- Mitochondria
Stoichiometry of oxidative phosphorylation with tetramethyl-p-phenylenediamine in rat-liver ——— (Chamalaun, Tager), (180) 204
- Mitochondria
Studies on corticosteroidogenesis. VI. Pyruvate and malate supported steroid 11β -hydroxylation in rat adrenal gland ——— (Péron, Tsang), (180) 445
- Mitochondrial ATPase
Identification of denatured ——— in "structural protein" from beef heart mitochondria (Schatz, Saltzgaber), (180) 186
- Mitochondrial factor X
Identity of ——— in coupling factor $F_1 \cdot X$ with F_c (Groot, Meyer), (180) 575
- Mitochondrial respiratory chain
Effect of substrates on reconstruction of the ——— under various conditions (Luzikov et al.), (180) 429
- Muscular contraction
——— (Volkenstein), (180) 562
- Myosin
Similar effects on enzymic activity due to chemical modification of either of two sulphhydryl groups of ——— (Seidel), (180) 216
- Myosin B
Structural changes in ——— during the

- process of superprecipitation (Nihei, Yamamoto), (180) 178
- Myosin subfragments
The question of the initial burst of ATP hydrolysis in ——— (Yazawa, Yagi), (180) 190
- NAD⁺ photoreduction
——— in *Rhodospirillum rubrum* chromatophores (Jones, Vernon), (180) 149
- NAD(P)⁺ reduction
Photoreduction of ferredoxin and its use in ——— by a subcellular preparation from the photosynthetic bacterium, *Chlorobium thiosulphatophilum* (Buchanan, Evans), (180) 123
- Nitrite reductase
A ——— with cytochrome oxidase activity from *Micrococcus denitrificans* (Lam, Nicholas), (180) 459
- Oligomycin
In vitro studies of beating heart cells in culture. XIII. The utilization of ATP and phosphocreatine in ——— and 2-deoxyglucose inhibited cells (Seraydarian et al.), (180) 264
- Oscillations
Theory of ——— in peroxidase catalyzed oxidation reactions in open system (Degn, Meyer), (180) 291
- Oscillatory oxidation
Compound III kinetics and chemiluminescence in ——— reactions catalyzed by horseradish peroxidase (Degn), (180) 271
- Oxidative enzyme components
——— of avian liver microsomes. Changes during avian embryonic development and the effects of phenobarbital administration (Strittmatter, Umberger), (180) 18
- Oxidative phosphorylation
Comparative studies of the ADP-ATP exchange and the ATP-P_i exchange reactions related to ——— in rat-liver mitochondria (Groot), (180) 439
- Oxidative phosphorylation
Effect of anions on ——— in submitochondrial particles (Christiansen et al.), (180) 207
- Oxidative phosphorylation
——— as a function of temperature (Kemp Jr. et al.), (180) 28
- Oxidative phosphorylation
Mechanism of uncoupling of ——— by 2-methyl-1,4-naphthoquinone (De Haan, Charles), (180) 417
- Oxidative phosphorylation
Stoichiometry of ——— with tetramethyl-p-phenylenediamine in rat-liver mitochondria (Chamalaun, Tager), (180) 204
- Oxidative phosphorylation
——— in yeast. V. Phosphorylation efficiencies in growing cells determined from molar growth yields (Kormančíkova et al.), (180) 9
- Peroxidase
Compound III kinetics and chemiluminescence in oscillatory oxidation reactions catalyzed horseradish ——— (Degn), (180) 271
- Peroxidase
Theory of oscillations in ——— catalyzed oxidation reactions in open system (Degn, Meyer), (180) 291
- Phenobarbital
Oxidative enzyme components of avian liver microsomes. Changes during avian embryonic development and the effects of ——— administration (Strittmatter, Umberger), (180) 18
- Phosphate potential
'State 3-State 4 transition' and ——— in 'Class I' spinach chloroplasts (Kraayenhof), (180) 213
- Phosphocreatine
In vitro studies of beating heart cells in culture. XIII. The utilization of ATP and ——— in oligomycin and 2-deoxyglucose inhibited cells (Seraydarian et al.), (180) 264
- Phosphorylation efficiencies
Oxidative phosphorylation in yeast. V. ——— in growing cells determined from molar growth yields (Kormančíkova et al.), (180) 9
- Photophosphorylation
Properties of ascorbate photooxidation in isolated chloroplasts. Evidence for two ATP sites in noncyclic ——— (Böhme, Trebst), (180) 137
- Photophosphorylation
Site-specific inactivation of the ——— reactions of *Anabaena variabilis* (Lee et al.), (180) 130
- Photosynthesis
——— by isolated chloroplasts. IV. Regulation by factors from leaf cells (Moore et al.), (180) 368
- Photosynthesis
Role of chloride ion in ———. III. The effect of artificial electron donors upon electron transport (Izawa et al.), (180) 388
- Photosynthesis
Role of chloride ion in ———. IV. Studies on the low temperature fluorescence emission spectrum (Heath, Hind), (180) 414
- Photosynthetic electron transport
——— induced by flashing light in the purple photosynthetic bacterium *Rhodospirillum rubrum* (Sybesma, Kok), (180) 410
- Photosynthetic electron transport system
Site of manganese function in ——— (Itoh et al.), (180) 509
- Photosynthetic materials
Electron spin resonance studies of free radicals derived from plastoquinone, α -tocopherol and γ -tocopherol and their relation to free radicals observed in ——— (Kohl et al.), (180) 536
- Photosynthetic mutant
Electron transfer components of wild-type and ——— strains of *Scenedesmus obliquus* D₃ (Powls et al.), (180) 490

- Photosynthetic sulphate reduction
 Mechanism of ——— by isolated chloroplasts (Schmidt, Trebst), (180) 529
- Plastoquinone
 Electron spin resonance studies of free radicals derived from ———, α - and γ -tocopherol and their relation to free radicals observed in photosynthetic materials (Kohl et al.), (180) 536
- Potassium ion
 Studies on the mechanism of the stimulation of glycolysis and respiration by ——— in *Saccharomyces cerevisiae* (Peña et al.), (180) 1
- Proton pump activity
 Biogenesis of chloroplast membranes. III. Light-dependent induction of ——— in whole cells and its correlation to cytochrome f photooxidation during greening of a *Chlamydomonas reinhardtii* mutant (γ -1) (Schuldiner, Ohad), (180) 165
- Redox states
 ——— of respiratory-chain components in rat-liver mitochondria. I. Effect of varying substrate concentration and of azide (Muraoka, Slater), (180) 221
- Redox states
 ——— of respiratory-chain components in rat-liver mitochondria. II. The 'crossover' on the transition from State 3 to State 4 (Muraoka, Slater), (180) 227
- Respiration
 Studies on the mechanism of the stimulation of glycolysis and ——— by potassium ion in *Saccharomyces cerevisiae* (Peña et al.), (180) 1
- Respiratory chain
 Effect of substrates on reconstitution of the mitochondrial ——— under various conditions (Luzikov et al.), (180) 429
- Respiratory chain
 Properties of electron transport particles from *Halobacterium cutirubrum*. The ——— system (Cheah), (180) 320
- Respiratory chain
 Redox states of ——— components in rat-liver mitochondria. I. Effect of varying substrate concentration and of azide (Muraoka, Slater), (180) 221
- Respiratory chain
 Redox states of ——— components in rat-liver mitochondria. II. The 'crossover' on the transition from State 3 to State 4 (Muraoka, Slater), (180) 227
- Respiratory cytochromes
 ——— of *Euglena gracilis* (Raison, Smillie), (180) 500
- Sarcotubular calcium transport
 Effect of some local anesthetic compounds of ——— (Wilcox, Fuchs), (180) 210
- Scenedesmus obliquus* D₃
 Electron transfer components of wild-type and photosynthetic mutant strains of ——— (Powls et al.), (180) 490
- Steroid 11 β -hydroxylation
 Studies on corticosteroidogenesis. VI. Pyruvate and malate supported ——— in rat adrenal gland mitochondria (Péron, Tsang), (180) 445
- 'Structural protein'
 Identification of denatured mitochondrial ATPase in ——— from beef heart mitochondria (Schatz, Saltzgaber), (180) 186
- Submitochondrial particles
 Effect of anions on oxidative phosphorylation in ——— (Christiansen et al.), (180) 207
- Succinate oxidase
 Electron transport in beef heart muscle preparation. The inhibition of ubiquinone-stimulated ——— activity by antimycin and a quinoline-N-oxide derivative (Fynn), (180) 244
- Succinate oxidation
 Inhibition by 2,4-dinitrophenol of the removal of oxaloacetate formed by the ——— by rat-liver and -heart mitochondria (Oestreich et al.), (180) 45
- Succinate oxidation
 Mechanism of inhibition by uncouplers of ——— in isolated mitochondria (Papa et al.), (180) 35
- Sulphate reduction
 Mechanism of photosynthetic ——— by isolated chloroplasts (Schmidt, Trebst), (180) 529
- Sulphite reductase
 ——— from baker's yeast: A haemoflavoprotein (Prabhakararao, Nicholas), (180) 253
- Superprecipitation
 Structural changes in myosin B during the process of ——— (Nihei, Yamamoto), (180) 178
- Tetramethyl-p-phenylenediamine
 Stoichiometry of oxidative phosphorylation with ——— in rat-liver mitochondria (Chamalaun, Tager), (180) 204
- Thylakoid membranes
 Reversible changes in the conformation of ——— accompanying chloroplast expansion or contraction (Murakami, Packer), (180) 420
- α -Tocopherol
 Distribution of ——— in beef heart mitochondria (Oliveira et al.), (180) 98
- α -Tocopherol
 Electron spin resonance studies of free radicals derived from plastoquinone, ——— and γ -tocopherol and their relation to free radicals observed in photosynthetic materials (Kohl et al.), (180) 536
- γ -Tocopherol
 Electron spin resonance studies of free radicals derived from plastoquinone, α -tocopherol and ——— and their relation to free radicals observed in photosynthetic materials (Kohl et al.), (180) 536
- Ubiquinone
 Electron transport in beef heart muscle

- preparation. The inhibition of ——— -stimulated succinate oxidase activity by antimycin and a quinoline-N-oxide derivative (Fynn), (180) 244
- Uncouplers of succinate oxidation
- Mechanism of inhibition by ——— in isolated mitochondria (Papa et al.), (180) 35
- Uncoupling
- Mechanism of ——— oxidative phosphorylation by 2-methyl-1,4-naphthoquinone (De Haan, Charles), (180) 417
- Uncoupling
- Thermal ——— in chloroplasts (Emmett, Walker), (180) 424
