## SUBJECT INDEX

- Acetylene reduction  
   — with physiological electron donors by extracts and particulate fractions from nitrogen-fixing *Azotobacter chroococcum* (Yates, Daniel) (197) 161  
*Anabaena variabilis*  
   Properties of — cells grown in the presence of diphenylamine (Ogawa et al.) (197) 302  
 Anion transport  
   Effect of uncouplers on the — in rat-liver mitochondria (Lofrumento et al.) (197) 104  
 ATP levels  
   Measurements of — of intact *Azotobacter vinelandii* under different conditions (Knowles, Smith) (197) 152  
*Azotobacter chroococcum*  
   Acetylene reduction with physiological electron donors by extracts and particulate fractions from nitrogen-fixing — (Yates, Daniel) (197) 161  
*Azotobacter vinelandii*  
   Measurements of ATP levels of intact — under different conditions (Knowles, Smith) (197) 152  
 Carotenoid absorption band shift  
   Sizes of the photosynthetic energy-transducing units in purple bacteria determined by single flash yield, titration by antibiotics and — (Nishimura) (197) 69  
 Carotenoid-deficient mutants  
   P700 oxidation and energy transfer in normal maize and in — (Faludi-Daniel et al.) (197) 60  
 Chloramphenicol  
   Electron transport systems of heart muscle and yeast: Site of inhibition by — (Mackler, Haynes) (197) 317  
 Chlorophyll a  
   — forms in partially purified photosynthetic reaction centers (Ogawa, Vernon) (197) 332  
 Chlorophyll a fluorescence  
   Effects of divalent metal ions on — in isolated spinach chloroplasts (Murata et al.) (197) 250  
 Chloroplasts  
   Effects of divalent metal ions on chlorophyll a fluorescence in isolated spinach — (Murata et al.) (197) 250  
 Chloroplast  
   — inorganic pyrophosphatase (El-Badry, Bassham) (197) 308  
 Chloroplasts  
   Photoreduction of 2,6-dichlorophenolindophenol by — with exogenous  $Mn^{2+}$  as electron donor (Izawa) (197) 328  
 Chloroplasts  
   Salt-induced light emission from — (Barber, Kraan) (197) 49  
 Chromatium  
   Nitrogen fixation system of photosynthetic bacteria. I. Preparation and properties of a cell-free extract from — (Winter, Arnon) (197) 170  
 Chromatophore  
   Light- and chemically induced oxidation-reduction reactions in — fractions of *Rhodospirillum rubrum* (Fowler, Sybesma) (197) 276  
 Cytochromes  
   Levels of — in rat-brain mitochondria during post-natal development (Chepelinsky, Rodríguez de Lores Arnaiz) (197) 321  
 Cytochromes  
   Occurrence of both a-type and o-type — as the functional terminal oxidases in *Rhodopseudomonas spheroides* (Sasaki et al.) (197) 284  
 Cytochrome c oxidase  
   Anaerobic interaction of ferrocyclochrome c with the "ferric" and "oxygenated" forms of purified —. XVI. Cytochrome oxidase and its derivatives (Lemberg, Cutler) (197) 1  
 Cytoplasmic membrane  
   Further studies on the NADH oxidase of the — of *Mycobacterium tuberculosis*

- (Kearney, Goldman) (197) 197
- Cytoplasmic reducing equivalents  
 Reoxidation of ——— in Ehrlich ascites tumour cells (Galeotti et al.) (197) 11
- 2,6-Dichlorophenolindophenol  
 Photoreduction of ——— by chloroplasts with exogenous  $Mn^{2+}$  as electron donor (Izawa) (197) 328
- Diphenylamine  
 Properties of *Anabaena variabilis* cells grown in the presence of ——— (Ogawa et al.) (197) 302
- Diphenylamine  
 Properties of partially purified photosynthetic reaction centers from *Scenedesmus* mutant 6E and *Anabaena variabilis* grown in the presence of ——— (Ogawa, Vernon) (197) 292
- Electron donors  
 Acetylene reduction with physiological ——— by extracts and particulate fractions from nitrogen-fixing *Azotobacter chroococcum* (Yates, Daniel) (197) 161
- Electron transport systems  
 ——— of heart muscle and yeast: Site of inhibition by chloramphenicol (Mackler, Haynes) (197) 317
- Energy metabolism  
 Control of ——— in platelets. A comparison of aerobic and anaerobic metabolism in washed rat platelets (Detwiler, Zivkovic) (197) 117
- Energy-transducing units  
 Sizes of the photosynthetic ——— in purple bacteria determined by single flash yield, titration by antibiotics and carotenoid absorption band shift (Nishimura) 197 (1970) 69
- Energy transfer  
 P700 oxidation and ——— in normal maize and in carotenoid-deficient mutants (Faludi-Daniel et al.) (197) 60
- Ferredoxin  
 Combined preparation of ———, ferredoxin-NADP<sup>+</sup> reductase and plastocyanin from spinach leaves (Borchert, Wessels) (197) 78
- Ferredoxin-NADP<sup>+</sup> reductase  
 Combined preparation of ferredoxin, ——— and plastocyanin from spinach leaves (Borchert, Wessels) (197) 78
- Ferrocyclochrome c  
 Anaerobic interaction of ——— with the "ferric" and "oxygenated" forms of purified cytochrome c oxidase. XVI. Cytochrome oxidase and its derivatives (Lemberg, Cutler) (197) 1
- Flavin mononucleotide  
 Photoreactions of ——— and a flavoprotein with zwitterionic buffers (Yamazaki, Tolbert) (197) 90
- Flavoprotein  
 Photoreactions of flavin mononucleotide and a ——— with zwitterionic buffers (Yamazaki, Tolbert) (197) 90
- Glutamate  
 Demonstration in vitro of competition between added NADH and ——— for oxidation by liver mitochondria (Lumeng, Davis) (197) 93
- Glutathione peroxidase  
 Cellular localisation of ——— and its release from mitochondria during swelling (Green, O'Brien) (197) 31
- Haemoproteins  
 Membrane-bound carbon monoxide-reactive ——— in the extreme halophiles (Cheah) (197) 84
- Halophiles  
 Membrane-bound carbon monoxide-reactive haemoproteins in the extreme ——— (Cheah) (197) 84
- Inorganic pyrophosphatase  
 Chloroplast ——— (El-Badry, Bassham) (197) 308
- Laccase  
 Reduction of fungal ——— at high pH (Fee et al.) (197) 136
- Light emission  
 Salt-induced ——— from chloroplasts (Barber, Kraan) (197) 49
- Lipolysis  
 Oligomycin effects on ——— and the oxidative metabolism of brown fat cells (Fain et al.) (197) 40
- Manganese  
 Sites of function of ——— within photosystem II. Roles in oxygen evolution and system II (Cheniae, Martin) (197) 219
- Menaquinone (MK-6)  
 ——— in the sulphate-reducing obligate anaerobe, *Desulfovibrio* (Maroc et al.) (197) 87
- Metal ions  
 Effects of divalent ——— on chlorophyll a fluorescence in isolated spinach chloroplasts (Murata et al.) (197) 250
- Microsomal preparations  
 Comparative study of palmitoyl-CoA synthetase activity in rat-liver, heart and gut mitochondrial preparations and ——— (De Jong, Hülsmann) (197) 127
- Mitochondria  
 Cellular localisation of glutathione peroxidase and its release form ——— during swelling (Green, O'Brien) (197) 31
- Mitochondria  
 Demonstration in vitro of competition between added NADH and glutamate for oxidation by liver ——— (Lumeng, Davis) (197) 93
- Mitochondria  
 Effect of uncouplers on the anion transport in rat-liver ——— (Lofrumento et al.) (197) 104
- Mitochondria  
 Kinetics of changes in the redox state of ubiquinone on the transition from State 4 to State 3 in rat-liver ——— (Veldsema-

- Currie, Slater) (197) 113
- Mitochondria  
Levels of cytochromes in rat-brain ——— during post-natal development (Chepelinsky, Rodriguez de Lores Arnaiz) (197) 321
- Mitochondria  
Nature of the stimulation by uncouplers of the efflux of  $\alpha$ -oxoglutarate from rat liver ——— (Meyer et al.) (197) 97
- Mitochondria  
Structural and respiratory effects of Agkistrodon piscivorus phospholipase A on rat liver mitochondria (Augustyn et al.) (197) 185
- Mitochondrial preparations  
Comparative study of palmitoyl-CoA synthetase activity in rat-liver, heart and gut ——— and microsomal preparations (De Jong, Hülsmann) (197) 127
- Mycobacterium tuberculosis  
Further studies on the NADH oxidase of the cytoplasmic membrane of ——— (Kearney, Goldman) (197) 197
- Myosin  
Effect of L-thyroxine on the primary structure of cardiac ——— (Thyrum et al.) (197) 335
- NADH  
Demonstration in vitro of competition between added ——— and glutamate for oxidation by liver mitochondria (Lumeng, Davis) (197) 93
- NADH oxidase  
Further studies on the ——— of the cytoplasmic membrane of Mycobacterium tuberculosis (Kearney, Goldman) (197) 197
- Nitrogen fixation system  
—— of photosynthetic bacteria. I. Preparation and properties of a cell-free extract from Chromatium (Winter, Arnon) (197) 170
- Nitrogen fixation system  
—— of photosynthetic bacteria. II. Chromatium nitrogenase activity linked to photochemically generated assimilatory power (Yoch, Arnon) (197) 180
- Nitrogenase  
Nitrogen fixation system of photosynthetic bacteria. II. Chromatium ——— activity linked to photochemically generated assimilatory power (Yoch, Arnon) (197) 180
- Oligomycin  
—— effects on lipolysis and the oxidative metabolism of brown fat cells (Fain et al.) (197) 40
- Oligomycin  
Effect of ——— on proton translocation in submitochondrial particles (Papa et al.) (197) 100
- Oxidases  
Occurrence of both a-type and o-type cytochromes as the functional terminal ——— in Rhodopseudomonas spheroides (Sasaki et al.) (197) 284
- Oxidation-reduction potentials  
—— of photosynthetic intermediates (Amesz et al.) (197) 324
- Oxidation-reduction reactions  
Light- and chemically induced ——— chromatophore fractions of Rhodospirillum rubrum (Fowler, Sybesma) (197) 276
- Oxidative metabolism  
Oligomycin effects on lipolysis and the ——— of brown fat cells (Fain et al.) (197) 40
- Oxidative phosphorylation  
—— in Azotobacter vinelandii particles. Phosphorylation sites and respiratory control (Eilermann et al.) (197) 25
- $\alpha$ -Oxoglutarate  
Nature of the stimulation by uncouplers of the efflux of ——— from rat-liver mitochondria (Meyer et al.) (197) 97
- Oxygen evolution  
Sites of function of manganese within photosystem II. Roles in ——— and system II (Cheniae, Martin) (197) 219
- Oxygen-reducing system  
A light-dependent ——— from Anabaena variabilis (Honeycutt, Krogmann) (197) 267
- Palmitoyl-CoA synthetase  
Comparative study of ——— activity in rat-liver, heart and gut mitochondrial and microsomal preparations (De Jong, Hülsmann) (197) 127
- Phospholipase A  
Structural and respiratory effects of Agkistrodon piscivorus ——— on rat liver mitochondria (Augustyn et al.) (197) 185
- Phosphorylation  
Site of ——— associated with photosystem I (Hauska et al.) (197) 206
- Phosphorylation sites  
Oxidative phosphorylation in Azotobacter vinelandii particles. ——— and respiratory control (Eilermann et al.) (197) 25
- Photoreduction  
—— of 2,6-dichlorophenolindophenol by chloroplasts with exogenous  $Mn^{2+}$  as electron donor (Izawa) (197) 328
- Photosynthesis  
Comparison studies on the effects of ultraviolet irradiation on ——— (Mantai et al.) (197) 257
- Photosynthesis  
Improvement in separation of photosystem I and photosystem II particles of ——— obtained by digitonin treatment (Ohki, Takamiya) (197) 240
- Photosynthetic bacteria  
Nitrogen fixation system of ———. I. Preparation and properties of a cell-free extract from Chromatium (Winter, Arnon) (197) 170
- Photosynthetic bacteria  
Nitrogen fixation system of ———. II. Chromatium nitrogenase activity linked to photochemically generated assimilatory

- power (Yoch, Arnon) (197) 180
- Photosynthetic energy-transducing units  
 Sizes of the ——— in purple bacteria determined by single flash yield, titration by antibiotics and carotenoid absorption band shift (Nishimura) (197) 69
- Photosynthetic intermediates  
 Oxidation-reduction potentials of ——— (Amesz et al.) (197) 324
- Photosynthetic reaction centers  
 Chlorophyll *a* forms in partially purified ——— (Ogawa, Vernon) (197) 332
- Photosynthetic reaction centers  
 Properties of partially purified ——— from *Scenedesmus* mutant 6E and *Anabaena variabilis* grown in the presence of diphenylamine (Ogawa, Vernon) (197) 292
- Photosystem I  
 Improvement in separation of ——— and photosystem II particles of photosynthesis obtained by digitonin treatment (Ohki, Takamiya) (197) 240
- Photosystem I  
 Site of phosphorylation associated with ——— (Hauska et al.) (197) 206
- Photosystem II  
 Improvement in separation of photosystem I and ——— particles of photosynthesis obtained by digitonin treatment (Ohki, Takamiya) (197) 240
- Photosystem II  
 Sites of function of manganese within ———. Roles in oxygen evolution and system II (Cheniae, Martin) (197) 219
- Plastocyanin  
 Combined preparation of ferredoxin, ferredoxin-NADP<sup>+</sup> reductase and ——— from spinach leaves (Borchert, Wessels) (197) 78
- Platelets  
 Control of energy metabolism in ———. A comparison of aerobic and anaerobic metabolism in washed rat platelets (Detwiler, Zivkovic) (197) 117
- P700 oxidation  
 ——— and energy transfer in normal maize and in carotenoid-deficient mutants (Faludi-Daniel et al.) (197) 60
- Pyrophosphatase  
 Chloroplasts inorganic ——— (El-Badry, Bassham) (197) 308
- Redox state  
 Kinetics of changes in the ——— of ubiquinone on the transition from State 4 to State 3 in rat-liver mitochondria (Veldsema-Currie, Slater) (197) 113
- Reducing equivalents  
 Reoxidation of cytoplasmic ——— in Ehrlich ascites tumour cells (Galeotti et al.) (197) 11
- Respiratory control  
 Oxidative phosphorylation in *Azotobacter vinelandii* particles. Phosphorylation sites and ——— (Eilermann et al.) (197) 25
- Respiratory effects  
 Structural and ——— of *Agkistrodon piscivorus* phospholipase A on rat liver mitochondria (Augustyn et al.) (197) 185
- Submitochondrial particles  
 Effects of oligomycin on proton translocation in ——— (Papa et al.) (197) 100
- Submitochondrial particles  
 Electron spin resonance measurements on ubiquinone-depleted and ubiquinone-replenished ——— (Bäckström et al.) (197) 108
- Sulphate-reducing obligate anaerobe  
 Menaquinone (MK-6) in the ———, *Desulfovibrio* (Maroc et al.) (197) 87
- Sulphide oxidation  
 Products of ——— in extracts of *Thiobacillus concretivorus* (Moriarty, Nicholas) (197) 143
- Thiobacillus concretivorus*  
 Products of sulphide oxidation in extracts of ——— (Moriarty, Nicholas) (197) 143
- L-Thyroxine  
 Effect of ——— on the primary structure of cardiac myosin (Thyrum et al.) (197) 335
- Ubiquinone  
 Electron spin resonance measurements on ———-depleted and ubiquinone-replenished submitochondrial particles (Bäckström et al.) (197) 108
- Ubiquinone  
 Kinetics of changes in the redox state of ——— on the transition from State 4 to State 3 in rat-liver mitochondria (Veldsema-Currie, Slater) (197) 113
- Ultraviolet irradiation  
 Comparison studies on the effects of ——— on photosynthesis (Mantai et al.) (197) 257
- Uncouplers  
 Effect of ——— on the anion transport in rat-liver mitochondria (Lofrumento et al.) (197) 104
- Uncouplers  
 Nature of the stimulation by ——— of the efflux of  $\alpha$ -oxoglutarate from rat-liver mitochondria (Meyer et al.) (197) 97
