

SUBJECT INDEX

- Antibiotics
Effects of ionophorous ——— in chloroplasts (Shavit *et al.*) (216) 208
- Antimycin
Reaction of ——— with a cytochrome *b* preparation active in reconstitution of the respiratory chain (Berden, Slater) (216) 237
- ATP
Function of ——— in calcium uptake by rat brain mitochondria (Tjioe *et al.*) (216) 270
- Azotobacter vinelandii
Oxidative phosphorylation in ———. Atebrin as a fluorescent probe for the energized state (Eilermann) (216) 231
- Azotobacter vinelandii
Phosphate potential generated by membrane fragments of ——— (Eilermann, Slater) (216) 226
- Bacteriochlorophyll
Electrostatic interaction between the reaction-center ——— derived from *Rhodospseudomonas spheroides* and mammalian cytochrome *c* and its effect on light-activated electron transport (Ke *et al.*) (216) 373
- Betaine aldehyde oxidation
Choline and ——— by rat liver mitochondria (Wilken *et al.*) (216) 305
- Biomembrane-produced energy
Conversion of ——— into electric form. I. Submitochondrial particles (Grinius *et al.*) (216) 1
- Biomembrane-produced energy
Conversion of ——— into electric form. II. Intact mitochondria (Bakeeva *et al.*) (216) 13
- Biomembrane-produced energy
Conversion of ——— into electric form. III. Chromatophores of *Rhodospirillum rubrum* (Isaev *et al.*) (216) 22
- Biomembrane-produced energy
Conversion of ——— into electric form. IV. General discussion (Liberman, Skulachev) (216) 30
- Calcium uptake
Function of ATP in ——— by rat brain mitochondria (Tjioe *et al.*) (216) 270
- Carbohydrate
Cyanide-induced transition from endogenous ——— to lipid oxidation as indicated by the carbon-13 content of respiratory CO₂ (Jacobson *et al.*) (216) 295
- Chloroplast
Characterization of ——— Photosystems 1 and 2 separated by a non-detergent method (Sane *et al.*) (216) 162
- Chloroplasts
Effects of ionophorous antibiotics in ——— (Shavit *et al.*) (216) 208
- Chloroplasts
Light-induced β -1,3-glucan breakdown associated with the differentiation of ——— in *Euglena gracilis* (Dwyer, Smillie) (216) 392
- Chloroplasts
Plastocyanin content of ——— from some higher plants estimated by a sensitive enzymatic assay (Plesničar, Bendall) (216) 192
- Chloroplasts
Redox potential of cytochromes b-559 and b-563 in spinach ——— (Fan, Cramer) (216) 200
- Chloroplasts
Spectrophotometric method for the quantitative estimation of intact (Class I) ——— (Karlstam, Albertsson) (216) 220
- Chloroplast cytochrome 559
Determination of the concentration and the redox potential of ——— (Hind, Nakatani) (216) 223
- Choline
—— and betaine aldehyde oxidation by rat liver mitochondria (Wilken *et al.*) (216) 305.
- Chromatium sp.
Haemoprotein content of ——— Strain D (Morita *et al.*) (216) 384
- Chromatophores
Conversion of biomembrane-produced energy into electric form. III. ——— of *Rhodospirillum rubrum* (Isaev *et al.*) (216) 22
- Cyanide
—— induced transition from endogenous carbohydrate to lipid oxidation as indicated by the carbon-13 content of respiratory CO₂ (Jacobson *et al.*) (216) 295
- Cytochrome 559
Determination of the concentration and the redox potential of chloroplast ——— (Hind, Nakatani) (216) 223
- Cytochrome b
Reaction of antimycin with a ——— preparation active in reconstitution of the respiratory chain (Berden, Slater) (216) 237
- Cytochromes b-559 and b-563
Redox potential of ——— in spinach chloroplasts (Fan, Cramer) (216) 200
- Cytochrome c
Electrostatic interaction between the reaction-center bacteriochlorophyll derived from *Rhodospseudomonas spheroides* and mammalian ——— and its effect on light-activated electron transport (Ke *et al.*) (216) 373
- Cytochrome c
Nature of complex formation between

- and cytochrome c peroxidase (Mochan) (216) 80
- Cytochrome o
Electron transport system of *Acetobacter suboxydans* with particular reference to —— (Daniel) (216) 328
- Cytochrome oxidase antibody
Studies on a ——, I. Immunochemistry (Mochan *et al.*) (216) 96
- Cytochrome oxidase antibody
Studies on a ——, II Inhibition kinetics (Mochan *et al.*) (216) 106
- Cytochrome c peroxidase
Nature of complex formation between cytochrome c and —— (Mochan), (216) 80
- Diazonium-1,2,4-triazole
Light-induced changes in resistivity of spinach chloroplasts toward modification with —— (Nakaya *et al.*) (216) 364
- 3-(3,4-Dichlorophenyl)-1,1-dimethylurea
Re-oxidation of the fluorescence quencher "Q" in the presence of —— (Bennoun) (216) 357
- Differentiation
Light-induced β -1,3-glucan breakdown associated with the —— of chloroplasts in *Euglena gracilis* (Dwyer, Smillie) (216) 392
- DT-diaphorase
One-electron-transfer reactions in biochemical systems. V. Difference in the mechanism of quinone reduction by the NADH dehydrogenase and the NAD(P)H dehydrogenase (——) (Iyanagi, Yamazaki) (216) 282
- Electron transfer
—— during sulphide and sulphite oxidation by *Thiobacillus concretivorus* (Moriarty, Nicholas) (216) 130
- Electron transport
Difference in 2-thenoyltrifluoroacetone sensitivity of —— with and against the redox potential gradient (216) 262 (Streichman, Avi-Dor)
- Electron transport
Electrostatic interaction between the reaction-center bacteriochlorophyll derived from *Rhodospseudomonas spheroides* and mammalian cytochrome c and its effect on light-activated —— (Ke *et al.*) (216) 373
- Electron transport particles
—— released upon lysis of spheroplasts of *Escherichia coli* B by Brij 58 (Birdsell, Cota-Robles) (216) 250
- Electron transport system
—— of *Acetobacter suboxydans* with particular reference to cytochrome o (Daniel) (216) 328
- Electrostatic interaction
—— between the reaction-center bacteriochlorophyll derived from *Rhodospseudomonas spheroides* and mammalian cytochrome c and its effect on light-activated electron transport (Ke *et al.*) (216) 373
- Energy transfer efficiency
Low-temperature (4–77°K) spectroscopy of *Chlorella*: Temperature dependence of —— (Cho, Govindjee) (216) 139
- Energy transfer efficiency
Low-temperature (4–77°K) spectroscopy of *Anacystis*: Temperature dependence of —— (Cho, Govindjee) (216) 151
- Energy utilization
—— by mammalian fast and slow muscle in doing external work (Awan, Goldspink) (216) 229
- Energy-yielding oxidation
—— of NADH by fumarate in submitochondrial particles of rat tissues (Wilson, Cascarano) (216) 54
- ESR study
—— of the light-induced interaction between porphyrins and quinones in amide solvents (Quinlan) (216) 441
- Evolution
Study on the —— of mitochondrial enzyme activities in hepatocyte during rat development (Lévy, Toury) (216) 318
- "Facilitated flux"
Studies on the —— of oxygen through haemoglobin solutions using a polarographic method (Rampazzo, Silvestroni) (216) 402
- Fluorescence quencher "Q"
Reoxidation of the —— in the presence of 3-(3,4-dichlorophenyl)-1,1-dimethylurea (Bennoun) (216) 357
- Fumarate
Energy-yielding oxidation of NADH by —— in submitochondrial particles of rat tissues (Wilson, Cascarano) (216) 54
- β -1,3-Glucan breakdown
Light-induced —— associated with the differentiation of chloroplasts in *Euglena gracilis* (Dwyer, Smillie) (216) 392
- α -Glycerophosphate shuttle
Role of the —— in the reoxidation of cytosolic NADH in Ehrlich ascites tumour cells (Dionisi *et al.*) (216) 71
- Haemoglobin
Studies on the "facilitated flux" of oxygen through —— solutions using a polarographic method (Rampazzo, Silvestroni) (216) 402
- Haemoprotein
—— content of *Chromatium* sp. Strain D (Morita *et al.*) (216) 384
- Hydroxylamine
Reduction of sulphite, nitrite and —— by an enzyme from baker's yeast (Prabhakararao, Nicholas) (216) 122
- Hydroxylation activity
Assay of —— in immunoprecipitates (Raftell, Powell) (216) 428
- Immunoprecipitates
Assay of hydroxylation in —— (Raftell, Powell) (216) 428
- Light-activated electron transport
Electrostatic interaction between the reaction-center bacteriochlorophyll derived from *Rhodospseudomonas spheroides* and mam-

- malian cytochrome c and its effect on ——— (Ke et al.) (216) 373
- Light-induced changes
——— in resistivity of spinach chloroplast toward modification with diazonium-1,2,4-triazole (Nakaya et al.) (216) 364
- Light-induced β -1,3-glucan breakdown
——— associated with the differentiation of chloroplasts in *Euglena gracilis* (Dwyer, Smillie) (216) 392
- Light-induced interaction
ESR study of the ——— between porphyrins and quinones in amide solvents (Quinlan) (216) 441
- Light-induced potential changes
Application of the voltage-clamp technique for measuring the quantum efficiency of ——— in *Nitella translucens* (Vredenberg) (216) 431
- Lipid oxidation
Cyanide-induced transition from endogenous carbohydrate to ——— as indicated by the carbon-13 content of respiratory CO_2 (Jacobson et al.) (216) 295
- Lipoamide dehydrogenase
Effect of phenothiazines and their sulfoxides on ——— (Millard) (216) 439
- Membrane-bound respiratory chain system
Properties of the ——— of *Halobacterium salinarum* (Cheah) (216) 43
- Mitochondria
Choline and betaine aldehyde oxidation by rat liver ——— (Wilken et al.) (216) 305
- Mitochondria
Conversion of biomembrane-produced energy into electric form. II. Intact ——— (Bakeeva et al.) (216) 13
- Mitochondria
Function of ATP in calcium uptake by rat brain ——— (Tjioe et al.) (216) 270
- Mitochondria
Sensitivity of dicarboxylate anion-exchange reactions to transport inhibitors in rat liver ——— (Robinson, Williams) (216) 63
- Mitochondrial enzymes
Study on the evolution of ——— activities in hepatocyte during rat development (Lévy, Toury) (216) 318
- Motility
Properties and function of respiratory chain of freshwater mussel spermatozoa in relation to ——— (Higashi, Kawai) (216) 274
- Muscle
Energy utilization by mammalian fast and slow in doing external work (Awan, Goldspink) (216) 229
- Myosin
Effects of substrate and substrate analogues on the trinitrophenylation of ——— (Mühlrad, Fábíán) (216) 422
- Myosin
Preparation and properties of smooth muscle ——— from horse esophagus (Yamaguchi et al.) (216) 411
- NADH
Energy-yielding oxidation of ——— by fumarate in submitochondrial particles of rat tissues (Wilson, Cascarano) (216) 54
- NADH
Role of the α -glycerophosphate shuttle in the reoxidation of cytosolic ——— in Ehrlich ascites tumour cells (Dionisi et al.) (216) 71
- NADH oxidase
Terminal oxidations in *Bacillus brevis* ATCC 10068. I. The measurement of the ——— activity of *Bacillus brevis* ATCC 10068 (Seddon, Fynn) (216) 435
- NAD(P)H dehydrogenase
One-electron-transfer reactions in biochemical systems. V. Difference in the mechanism of quinone reduction by the NADH dehydrogenase and the ——— (DT-diaphorase) (Iyanagi, Yamazaki) (216) 282
- Nitrate reduction
Oxidative phosphorylation coupled to oxygen uptake and ——— in *Micrococcus denitrificans* (John, Whatley) (216) 342
- Nitrite
Reduction of sulphite, ——— and hydroxylamine by an enzyme from baker's yeast (Prabhakararao, Nicholas) (216) 122
- Nitrogen fixation
Photostimulation of ——— in *Anabaena cylindrica* (Fay) (216) 353
- One-electron-transfer reactions
——— in biochemical systems. V. Difference in the mechanism of quinone reduction by the NADH dehydrogenase and the NAD(P)H dehydrogenase (DT-diaphorase) (Iyanagi, Yamazaki) (216) 282
- Oxidative phosphorylation
——— in *Azotobacter vinelandii*. Atebrin as a fluorescent probe for the energized state (Eilermann) (216) 231
- Oxidative phosphorylation
——— coupled to oxygen uptake and nitrate reduction on *Micrococcus denitrificans* (John, Whatley) (216) 342
- Oxygen
Studies on the "facilitated flux" of ——— through haemoglobin solutions using a polarographic method (Rampazzo, Silvestroni) (216) 402
- Oxygen uptake
Oxidative phosphorylation coupled to ——— and nitrate in *Micrococcus denitrificans* (John, Whatley) (216) 342
- Phenothiazines
Effect of ——— and their sulfoxides on lipoamide dehydrogenase (Millard) (216) 439
- Phosphate potential
——— generated by membrane fragments of *Azotobacter vinelandii* (Eilermann Slater) (216) 226
- Photostimulation
——— of nitrogen fixation in *Anabaena cylindrica* (Fay) (216) 353
- Photosystems 1 and 2

- Characterization of chloroplast ———
separated by a non-detergent method
(Sane et al.) (216) 162
- Plastocyanin
——— content of chloroplasts from higher
plants estimated by a sensitive enzymatic
assay (Plesničar, Bendall) (216) 192
- Polarographic method
Studies on the "facilitated flux" of oxygen
through haemoglobin solutions using a
——— (Rampazzo, Silvestroni) (216) 402
- Porphyrins
ESR study of the light-induced interaction
between ——— and quinones in amide
solvents (Quinlan) (216) 441
- Potential changes
Application of the voltage-clamp technique
for measuring the ——— of light-induced
potential changes in *Nitella translucens*
(Vredenberg) (216) 431
- Protein factor
Particle fractionation from spinach leaf
homogenates and diffusion of spinach
——— (Terpstra) (216) 179
- Quantum efficiency
Application of the voltage-clamp technique
for measuring the ——— of light-induced
potential changes in *Nitella translucens*
(Vredenberg) (216) 431
- Quinones
ESR study of the light-induced interaction
between porphyrins and ——— in amide
solvents (Quinlan) (216) 441
- Quinone reduction
One-electron-transfer reactions in biochemi-
cal systems. V. Difference in the mechanism
of ——— by the NADH dehydrogenase
and the NAD(P)H dehydrogenase (DT-
diaphorase) (Iyanagi, Yamazaki) (216) 282
- Redox potential gradient
Difference in 2-thenoyltrifluoroacetone sen-
sitivity of electron transport with and
against the ——— (Streichmann, Avi-Dor)
(216) 262
- Respiratory chain
Properties and function of ——— of
freshwater mussel spermatozoa in relation
to motility (Higashi, Kawai) (216) 274
- Respiratory chain
Reaction of antimycin with a cytochrome
b preparation active in reconstitution of the
——— (Berden, Slater) (216) 237
- Respiratory chain system
Properties of the membrane-bound ———
of *Halobacterium salinarum* (Cheah) (216) 43
- Respiratory CO₂
Cyanide-induced transition from endoge-
nous carbohydrate to lipid oxidation as
indicated by the carbon-13 content of
——— (Jacobson et al.) (216) 295
- Spheroplasts
Electron transport particles released upon
lysis of ——— of *Escherichia coli* B by
Brij 58 (Birdsell, Cota-Robles) (216) 250
- Spinach protein factor
Particle fractionation from spinach leaf
homogenates and diffusion of ———
(Terpstra) (216) 179
- Submitochondrial particles
Conversion of biomembrane-produced ener-
gy into electric form. I. ——— (Grinius
et al.) (216) 1
- Submitochondrial particles
Energy-yielding oxidation of NADH by
fumarate in ——— of rat tissues (Wilson,
Cascarano) (216) 54
- Sulphide
Electron transfer during ——— and sul-
phite oxidation by *Thiobacillus concretivorus*
(Moriarty, Nicholas) (216) 130
- Sulphite
Electron transfer during sulphide and
oxidation by *Thiobacillus concretivorus*
(Moriarty, Nicholas) (216) 130
- Sulphite
Reduction of ———, nitrite and hydroxyl-
amine by an enzyme from baker's yeast
(Prabhakararao, Nicholas) (216) 122
- Terminal oxidations
——— in *Bacillus brevis* ATCC 10068. I.
The measurement of the NADH oxidase
activity of *Bacillus brevis* ATCC 10068,
(Seddon, Fynn) (216) 435
- 2-Thenoyltrifluoroacetone sensitivity
Difference in ——— of electron transport
with and against the redox potential gra-
dient (Streichman, Avi-Dor) (216) 262
- Transport inhibitors
Sensitivity of dicarboxylate anion-exchange
reactions to ——— in rat liver mitochon-
dria (Robinson, Williams) (216) 63
- Trinitrophenylation
Effects of substrate and substrate analogues
on the ——— of myosin (Mühlrad, Fábíán)
(216) 422
- Voltage-clamp technique
Application of the ——— for measuring
the quantum efficiency of light-induced
potential changes in *Nitella translucens*
(Vredenberg) (216) 431
