

## SUBJECT INDEX

- Acetylcarnitine transferase  
Cellular energy metabolism during foetal development. III. Deficient acetyl-CoA synthetase, ——— and oxidation of acetate in the foetal bovine heart (Warsaw) (223) 409
- Acetyl-CoA synthetase  
Cellular energy metabolism during foetal development. III. Deficient ———, acetyl-carnitine transferase and oxidation of acetate in the foetal bovine heart (Warsaw) (223) 409
- 1-Actin  
Inhibition of the ATPase activity of the subfragment ——— complex by troponin plus tropomyosin, troponin B plus tropomyosin and troponin B (Parker et al.) (223) 453
- Actin-bound nucleotide exchange  
Effect of myosin on ——— in the presence and absence of ATP (Moos, Eisenberg) (222) 221
- Actomyosin  
Importance of sulphydryl groups for the calcium-sensitive response of natural ——— (Hartshorne, Daniel) (223) 214
- Adenine nucleotide translocator  
——— and the nucleotide specificity of oxidative phosphorylation (Souverijn et al.) (223) 31
- Antimycin  
Effect of ——— on the potato mitochondrial cytochrome b system (Bonner, Slater) (223) 349
- Antimycin  
High-energy forms of cytochrome b. I. The effect of ATP and ——— on cytochrome b in phosphorylating sub-mitochondrial particles (Slater et al.) (223) 354
- Antimycin  
High-energy forms of cytochrome b. II. The effect of ATP and ——— on cytochrome b in intact mitochondria (Wegdam et al.) (223) 365
- ATP  
High-energy forms of cytochrome b. I. The effect of ——— and antimycin on cytochrome b in phosphorylating sub-mitochondrial particles (Slater et al.) (223) 354
- ATP  
High-energy forms of cytochrome b. II. The effect of ——— and antimycin on cytochrome b in intact mitochondria (Wegdam et al.) (223) 365
- ATP-dependent long-chain fatty acid activation  
Dual localization and properties of ——— in rat liver mitochondria and the consequences for fatty acid oxidation (Van Tol, Hülsmann) (223) 416
- ATP exchange  
Effect of pH on gramicidin-mediated changes in light scattering, ion uptake, and ——— in digitonin particles (Meisner, Wenner) (223) 46
- ATP formation capacity  
Relation of post-illumination ——— ( $X_E$ ) to hydrogen ion accumulation in chloroplasts (Izawa) (223) 165
- ATPase activity  
Action of cations and anions on the respiration and ——— of submitochondrial particles (Pinto et al.) (223) 436
- ATPase activity  
Inhibition of the ——— of the subfragment 1-actin complex by troponin plus tropomyosin, troponin B plus tropomyosin and troponin B (Parker et al.) (223) 453
- ATPase activity  
——— of plasmodium actin polymer formed in the presence of  $Mg^{2+}$  (Totsuka, Hatano) (223) 189
- Bacteriochlorophyll  
Fluorescence lifetime of ——— and reaction center photooxidation in a photosynthetic bacterium (Borisov, Godik) (223) 441
- Bacteriochlorophyll  
pH-induced reversible changes in the absorption spectrum and photoactivity of ——— in photosynthetic bacteria chromatophores (Fujimori) (223) 444
- Bacteriochlorophyll-protein complexes  
Functional ——— from chromatophores of *Rhodospseudomonas spheroides* strain R-26 (Reed et al.) (223) 281
- Bongkreic acid  
Effect of adenine nucleotides and pH on the inhibition of oxidative phosphorylation by ——— (Kemp et al.) (223) 460
- Carnitine  
Effect of ——— and CoA on ketogenesis and citric acid cycle activity during long-chain fatty acid oxidation by isolated rat liver mitochondria (Van Tol) (223) 429
- Chloroplasts  
Interaction between electron transport components in ——— (Marsho, Kok) (223) 240
- Chloroplasts  
Light-dependent structural changes in the lamellar membranes of isolated spinach ———: Measurement by electron microscopy (Sundquist, Burris) (223) 115
- Chloroplasts  
Photosynthesis of isolated ———. V.

- Effect on fixation rate and metabolite transport from the chloroplasts caused by added fructose-1,6-diphosphatase (Bassham et al.) (223) 261
- Chloroplasts  
Relation of post-illumination ATP formation capacity ( $X_E$ ) to hydrogen ion accumulation in — (Izawa) (223) 165
- Chloroplasts  
Studies on the mechanism of delayed and stimulated delayed fluorescence of — (Kraan et al.) (223) 129
- Chloroplast cytochromes  
Contrasting requirement for plastocyanin in the photooxidation of — (Knaff, Arnon) (223) 201
- Chlorophyll  
—-pheophytin interactions (Norris et al.) (223) 446
- Chlorophyll a  
—-containing liposomes (Trosper et al.) (223) 403
- Chlorophyll a  
Enzymatic conversion of  $^{14}\text{C}$ -labelled — to  $^{14}\text{C}$ -labelled chlorophyll b (Ellsworth et al.) (223) 275
- Chlorophyll a  
—- fluorescence induction and changes in the electrical potential of the cellular membranes of green plant cells (Vredenberg) (223) 230
- Chlorophyll a  
Time-dependent quenching of — fluorescence from (pigment) system II by (pigment) system I of photosynthesis in *Chlorella* (Mohanty et al.) (223) 198
- Chlorophyll b  
Enzymatic conversion of  $^{14}\text{C}$ -labelled chlorophyll a to  $^{14}\text{C}$ -labelled — (Ellsworth et al.) (223) 275
- Chromatophores  
Differences in sensitivity to valinomycin and nonactin of various photophosphorylating and photoreducing systems of *Rhodospirillum rubrum* — (Gromet-Elhanan) (223) 174
- Chromatophores  
Functional bacteriochlorophyll-protein complexes from — of *Rhodospseudomonas spheroides* strain R-26 (Reed et al.) (223) 281
- Chromatophores  
pH-induced reversible changes in the absorption spectrum and photoactivity of bacteriochlorophyll in photosynthetic bacteria — (Fujimori) (223) 444
- Chromatophores  
Uncoupling and charge transfer in bacterial — (Montal et al.) (223) 183
- Citric acid cycle activity  
Effect of carnitine and CoA on ketogenesis and — during long-chain fatty acid oxidation by isolated rat liver mitochondria (Van Tol) (223) 429
- Coenzyme A  
Effect of carnitine and — on ketogenesis and citric acid cycle activity during long-chain fatty acid oxidation by isolated rat liver mitochondria (Van Tol) (223) 429
- Cytochromes  
Photooxidation of — in reaction center preparations from *Chromatium* and *Rhodospseudomonas viridis* (Case et al.) (223) 122
- Cytochrome b  
Effect of antimycin on the potato mitochondrial — system (Bonner, Slater) (223) 349
- Cytochrome b  
High-energy forms of cytochrome b. I. The effect of ATP and antimycin on — in phosphorylating sub-mitochondrial particles (Slater et al.) (223) 354
- Cytochrome b  
High-energy forms of cytochrome b. II. The effect of ATP and antimycin on — in intact mitochondria (Wegdam et al.) (223) 365
- Cytochrome P-450  
— in adrenal mitochondria of male and female rats (Ruhmann-Wennhold et al.) (223) 206
- Cytochrome P-450  
Two adrenal gland — entities evidenced by metyrapone-induced spectra (Sweat et al.) (223) 105
- Cytochrome system  
— of heterotrophically grown *Rhodospseudomonas spheroides* (Whale, Jones) (223) 146
- Cytoplasmic and mesosomic membrane  
Fractionation and purification of — systems of *Bacillus subtilis*. Study of some their oxidation and reduction properties associated with the respiratory chain, (Ferrandes et al.) (223) 292
- Digitonin particles  
Effect of pH on gramicidin-mediated changes in light scattering, ion uptake, and ATP-exchange in — (Meisner, Wenner) (223) 46
- Electrical potential  
Chlorophyll a fluorescence induction and changes in the — of the cellular membranes of green plant cells (Vredenberg) (223) 230
- Electron transfer particles  
Comparative study of thermal degradation of — and reconstituted respiratory chain. Relation of electron transfer to reactivation of submitochondrial particles (Luzikov et al.) (223) 16
- Electron transport  
— in mammalian nuclei. II. Oxidative enzymes in a large-scale preparation of bovine liver nuclei (Berezney et al.) (223) 61
- Electron transport  
Interaction between — components in chloroplasts (Marsho, Kok) (223) 240

- Electron transport  
 Light-induced reduction of pyridine nucleotide and its relation to light-induced ——— in whole cells of *Rhodospirillum rubrum* (Govindjee, Sysbesma) (223) 251
- Energy coupling  
 ——— in *Hydrogenomonas eutropha* (Ishaque, Aleem) (223) 388
- Energy metabolism  
 Cellular ——— during foetal development. III. Deficient acetyl-CoA synthetase, acetyl-carnitine transferase and oxidation of acetate in the foetal bovine heart (Warshaw) (223) 409
- Energy metabolism  
 Deficient ——— in streptomycin-dependent *Escherichia coli* (Coukell, Polgalse) (223) 439
- Energy transfer  
 ——— in the glutamate dehydrogenase-NADH binary complex, and its relation to the binding of cofactor (Summers, Yielding) (223) 374
- Fatty acid oxidation  
 Dual localization and properties of ATP-dependent long-chain fatty acid activation in rat liver mitochondria and the consequences for ——— (Van Tol, Hülsmann) (223) 416
- Fatty acid oxidation  
 Effect of carnitine and CoA on ketogenesis and citric acid cycle activity during long-chain ——— by isolated rat liver mitochondria (Van Tol) (223) 429
- Ferredoxin  
 ——— from fern and amaranthus: Two diverse plants with similar ferredoxins (Schürmann et al.) (223) 450
- Foetal development  
 Cellular energy metabolism during ———. III. Deficient acetyl-CoA synthetase, acetyl-carnitine transferase and oxidation of acetate in the foetal bovine heart (Warshaw) (223) 409
- Fructose-1,6-diphosphatase  
 Photosynthesis of isolated chloroplasts. V. Effect on fixation rate and metabolite transport from the chloroplasts caused by added ——— (Bassham et al.) (223) 261
- Glutamate dehydrogenase-NADH binary complex  
 Energy transfer in the ———, and its relation to the binding of cofactor (Summers, Yielding) (223) 374
- Gramicidin  
 Effect of pH on ——— -mediated changes in light scattering, ion uptake, and ATP exchange in digitonin particles (Meisner, Wenner) (223) 46
- GSH peroxidase  
 Role of ——— in protecting the membrane of rat liver mitochondria (Flohé, Zimmermann) (223) 210
- High-energy forms of cytochrome b  
 ———. I. The effect of ATP and antimycin on cytochrome b in phosphorylating sub-mitochondrial particles (Slater et al.) (223) 354
- High-energy forms of cytochrome b  
 ——— II. The effect of ATP and antimycin on cytochrome b in intact mitochondria (Wegdam et al.) (223) 365
- Hydrogenomonas eutropha*  
 Energy coupling in ——— (Ishaque, Aleem) (223) 388
- Ion uptake  
 Effect of pH on gramicidin-mediated changes in light scattering, ———, and ATP exchange in digitonin particles (Meisner, Wenner) (223) 46
- Juglone reductase  
 Quinone interaction with the respiratory chain-linked NADH dehydrogenase of beef heart mitochondria. I. ——— activity (Ruzicka, Crane) (223) 71
- Ketogenesis  
 Effect of carnitine and CoA on ——— and citric acid cycle activity during long-chain fatty acid oxidation by isolated rat liver mitochondria (Van Tol) (223) 429
- Liposomes  
 Chlorophyll a-containing ——— (Trosper et al.) (223) 463
- Lysosomal activity  
 Rapid and simple procedure to deplete rat-liver mitochondria of ——— (Loewenstein et al.) (223) 432
- Membranes  
 Characterization of a lipid-rich NADH dehydrogenase-containing particulate fraction obtained from *Micrococcus lysodeikticus* ——— (Nachbar, Salton) (223) 309
- Membranes  
 Chlorophyll a fluorescence induction and changes in the electrical potential of the cellular ——— of green plant cells (Vredenberg) (223) 230
- Membrane  
 Fractionation and purification of cytoplasmic and mesosomic ——— systems of *Bacillus subtilis*. Study of some of their oxidation and reduction properties associated with the respiratory chain (Ferrandes et al.) (223) 292
- Membranes  
 Fragmentation by detergents of the respiratory chain of *Micrococcus lysodeikticus* ——— (Gel'man et al.) (223) 321
- Membranes  
 Light-dependent structural changes in the lamellar ——— of isolated spinach chloroplasts: Measurement by electron microscopy (Sundquist, Burris) (223) 115
- Menaquinone-o  
 Enzymatic alkylation of ——— to menaquinones by microsomes from chick liver (Dialameh et al.) (223) 332
- Metyrapone  
 Two adrenal gland cytochrome P-450

- entities evidenced by ——— -induced spectra (Sweat et al.) (223) 105
- Microsomes
- Enzymatic alkylation of menaquinone-o to menaquinones by ——— from chick liver (Dialameh et al.) (223) 332
- Microsomes
- Isolation of NADH-cytochrome  $b_5$  oxidoreductase from rat liver ——— (Sargent et al.) (223) 339
- Mitochondria
- Cytochrome P-450 in adrenal ——— of male and female rats (Ruhmann-Wennhold et al.) (223) 206
- Mitochondria
- Dual localization and properties of ATP-dependent long-chain fatty acid activation in rat liver ——— and the consequences for fatty acid oxidation (Van Tol, Hülsmann) (223) 416
- Mitochondria
- Effect of carnitine and CoA on ketogenesis and citric acid activity during long-chain fatty acid oxidation by isolated rat liver ——— (Van Tol) (223) 429
- Mitochondria
- Energy conservation associated with cyanide-insensitive respiration in plant ——— (Wilson) (223) 383
- Mitochondria
- High-energy forms of cytochrome b. II. The effect of ATP and antimycin on cytochrome b in intact ——— (Wegdam et al.) (223) 365
- Mitochondria
- Oxidase systems of *Ascaris-muscle* ——— (Cheah, Chance) (223) 55
- Mitochondria
- Quinone interaction with the respiratory chain-linked NADH dehydrogenase of beef heart ———. I. Juglone reductase activity (223) 71 (Ruzicka, Crane) (223) 71
- Mitochondria
- Rapid and simple procedure to deplete rat-liver ——— of lysosomal activity (Loewenstein et al.) (223) 432
- Mitochondria
- Role of GSH peroxidase in protecting the membrane of rat liver ——— (Flohé, Zimmerman) (223) 210
- Mitochondria
- Simultaneous evaluation of phosphorylation efficiency of the three coupling sites of the respiratory chain in isolated ——— (Sottocasa, Sandri) (223) 36
- Mitochondrial cytochrome b system
- Effect of antimycin on the potato ——— (Bonner, Slater) (223) 349
- Molybdenum
- associated with NADH dehydrogenase in complex I (Albracht, Slater) (223) 457
- Myosin
- Effect of ——— on actin-bound nucleotide exchange in the presence and absence of ATP (Moos, Eisenberg) (223) 221
- NAD<sup>+</sup> reduction
- Relationship of the energy-linked transhydrogenase to energy-linked ——— in *Rhodospirillum rubrum* (Thomas et al.) (223) 204
- NADH-cytochrome  $b_5$  oxidoreductase
- Isolation of ——— from rat liver microsomes (Sargent et al.) (223) 339
- NADH dehydrogenase
- Characteristics of a lipid-rich ——— -containing particulate fraction obtained from *Micrococcus lysodeikticus* membranes (Nachbar, Salton) (223) 309
- NADH dehydrogenase
- Molybdenum associated with ——— in complex I (Albracht, Slater) (223) 457
- NADH dehydrogenase
- Quinone interaction with the respiratory chain-linked ——— of beef heart mitochondria. I. Juglone reductase activity (Ruzicka, Crane) (223) 71
- Nitrogen fixation
- Evidence from Mössbauer spectroscopy for the role of iron in ——— (Kelly, Lang) (223) 86
- Nonactin
- Differences in sensitivity to valinomycin and ——— of various photophosphorylating and photoreducing systems of *Rhodospirillum rubrum* chromatophores (Gromet-Elhanan) (223) 174
- Nuclear oxidative phosphorylation
- Substrate supply for ——— (Konings) (223) 398
- Nuclei
- Electron transport in mammalian ———. II. Oxidative enzymes in a large-scale preparation of bovine liver nuclei (Berezney et al.) (223) 61
- Oxidase systems
- of *Ascaris-muscle* mitochondria (Cheah, Chance) (223) 55
- Oxidation and reduction
- Fractionation and purification of cytoplasmic and mesosomic membrane systems of *Bacillus subtilis*. Study of some of their ——— properties associated with the respiratory chain (Ferrandes et al.) (223) 292
- Oxidative enzymes
- Electron transport in mammalian nuclei. II. ——— in a large-scale preparation of bovine liver nuclei (Berezney et al.) (223) 61
- Oxidative phosphorylation
- Adenine nucleotide translocator and the nucleotide specificity of ——— (Souverijn et al.) (223) 31
- Oxidative phosphorylation
- Effect of adenine nucleotides and pH on the inhibition of ——— by bongkrolic acid (Kemp et al.) (223) 460

- Oxidative phosphorylation  
 Substrate supply for nuclear ——— (Konings) (223) 398
- Pheophytin  
 Chlorophyll- ——— interactions (Norris et al.) (223) 446
- Phosphate ester  
 "Squiggle-H<sub>2</sub>O". An enquiry into the importance of solvation effects in ——— and anhydride reactions (George et al.) (223) 1
- Phosphorylation efficiency  
 Simultaneous evaluation of ——— of the three coupling sites of the respiratory chain in isolated mitochondria (Sottocasa, Sandri) (223) 36
- Photooxidation  
 Contrasting requirement for plastocyanin in the ——— of chloroplast cytochromes (Knaff, Arnon) (223) 201
- Photooxidation  
 ——— of cytochromes in reaction center preparations from *Chromatium* and *Rhodospirillum rubrum* (Case et al.) (223) 122
- Photooxidation  
 Fluorescence lifetime of bacteriochlorophyll and reaction center ——— in a photosynthetic bacterium (Borisov, Godik) (223) 441
- Photophosphorylating systems  
 Differences in sensitivity to valinomycin and nonactin of various ——— and photo-reducing systems of *Rhodospirillum rubrum* chromatophores (Gromet-Elhanan) (223) 174
- Photophosphorylation  
 ——— as a function of light intensity (Saha et al.) (223) 158
- Photosynthesis  
 ——— of isolated chloroplasts. V. Effect on fixation rate and metabolite transport from the chloroplasts caused by added fructose-1, 6-diphosphatase (Bassham et al.) (223) 261
- Photosynthesis  
 Time-dependent quenching of chlorophyll a fluorescence from (pigment) system II by (pigment) system I of ——— in *Chlorella* (Montany et al.) (223) 198
- Plasmodium actin  
 ATPase activity of ——— polymer formed in the presence of Mg<sup>2+</sup> (Totsuka, Hatano) (223) 189
- Plastocyanin  
 Contrasting requirement for ——— in the photooxidation of chloroplast cytochromes (Knaff, Arnon) (223) 201
- Quinone interaction  
 ——— with the respiratory chain-linked NADH dehydrogenase of beef heart mitochondria. I. Juglone reductase activity (Ruzicka, Crane) (223) 71
- Reaction center  
 Photooxidation of cytochromes in ——— preparations from *Chromatium* and *Rhodospirillum rubrum* (Case et al.) (223) 122
- Respiration  
 Action of cations and anions on the ——— and ATPase activity of submitochondrial particles (Pinto et al.) (223) 436
- Respiration  
 Energy conservation associated with cyanide-insensitive ——— in plant mitochondria (Wilson) (223) 383
- Respiratory chain  
 Comparative study of thermal degradation of electron transfer particles and reconstituted ———. Relation of electron transfer to reactivation of submitochondrial particles (223) 16 (Luzikov et al.)
- Respiratory chain  
 Fractionation and purification of cytoplasmic and mesosomal membrane systems of *Bacillus subtilis*. Study of some of their oxidation and reduction properties associated with the ——— (Ferrandes et al.) (223) 292
- Respiratory chain  
 Fragmentation by detergents of the ——— of *Micrococcus lysodeikticus* membranes (Gel'man et al.) (223) 321
- Respiratory chain  
 Simultaneous evaluation of phosphorylation efficiency of the three coupling sites of the ——— in isolated mitochondria (Sottocasa, Sandri) (223) 36
- Respiratory chain-linked NADH dehydrogenase  
 Quinone interaction with the ——— of beef heart mitochondria. I. Juglone reductase activity (Ruzicka, Crane) (223) 71
- Rhodospirillum rubrum*  
 Light-induced reduction of pyridine nucleotide and its relation to light-induced electron transport in whole cells of ——— (Govindjee, Sybesma) (223) 251
- "Squiggle-H<sub>2</sub>O"  
 ———. An enquiry into the importance of solvation effects in phosphate ester and anhydride reactions (George et al.) (223) 1
- Streptomycin-dependent *Escherichia coli*  
 Deficient energy metabolism in ——— (Coukell, Polglase) (223) 439
- Submitochondrial particles  
 Action of cations and anions on the respiration and ATPase activity of ——— (Pinto et al.) (223) 436
- Submitochondrial particles  
 Comparative study of thermal degradation of electron transfer particles and reconstituted respiratory chain. Relation of electron transfer to reactivation of ——— (Luzikov et al.) (223) 16
- Submitochondrial particles  
 High-energy forms of cytochrome b. I. The effect of ATP and antimycin on cytochrome b in phosphorylating ——— (Slater et al.) (223) 354
- Transhydrogenase  
 Relationship of the energy-linked ———

- to energy-linked  $\text{NAD}^+$  reduction in *Rhodospirillum rubrum* (Thomas et al.) (223) 204
- Tropomyosin**  
Inhibition of the ATPase activity of the subfragment 1-actin complex by troponin, plus ———, troponin B plus tropomyosin and troponin B (Parker et al.) (223) 453
- Troponin**  
Inhibition of the ATPase activity of the subfragment 1-actin complex by ——— plus tropomyosin, troponin B plus tropomyosin and troponin B (Parker et al.) (223) 453
- Troponin B**  
Inhibition of the ATPase activity of the subfragment 1-actin complex by troponin plus tropomyosin, ——— plus tropomyosin and troponin B (Parker et al.) (223) 453
- Uncoupling**  
——— and charge transfer in bacterial chromatophores (Montal et al.) (223) 183
- Valinomycin**  
Differences in sensitivity to ——— and nonactin of various photophosphorylating and photoreducing systems of *Rhodospirillum rubrum* chromatophores (Gromet-Elhanan) (223) 174
