

SUBJECT INDEX

- Acid efflux
 Kinetics of ——— from chloroplasts following the acid-base transition (Nishizaki, Jagendorf) (226) 172
- Acid to base phosphorylation
 ——— and membrane integrity in plastids of greening maize (Forger, III, Bogorad) (226) 383
- Actin-myosin interaction
 Effect of trypsin on the ——— (Goll et al.) (226) 433
- Adenine nucleotide levels
 ——— and photopigment synthesis in a growing photosynthetic bacterium (Fаница-Gaignier et al.) (226) 135
- Adrenal chromaffin granules
 Electron carriers of the bovine ——— (Flatmark et al.) (226) 9
- Adrenal medulla
 Improved method for the large-scale isolation of chromaffin granules from bovine ——— (Helle et al.) (226) 1
- Anabaena variabilis
 Increased content of cytochromes 554 and 562 in ——— cells grown in the presence of diphenylamine (Ogawa, Vernon) (226) 88
- ATPase
 Effect of hydroxylamine on microsomal ——— (Shamoo) (226) 285
- Azotobacter
 Electron transport system in nitrogen fixation by ———. III. Requirements for NADPH-supported nitrogenase activity (Benemann et al.) (226) 205
- Bacteriochlorophyll
 Cytochrome C553 and ——— interaction at 77°K in chromatophores and a subchromatophore preparation from Chromatium D (Dutton et al.) (226) 81
- Bacteriochlorophyll
 Oxidation-reduction potential dependence of the interaction of cytochromes, ——— and carotenoids at 77°K in chromatophores of Chromatium D and Rhodospseudomonas gelatinosa (Dutton) (226) 63
- Calcium exchange
 Mitochondrial calcium uptake in the perfused contracting rat heart and the influence of epinephrine on ——— (Horn et al.) (226) 459
- Carbon dioxide uptake
 Light-induced pH changes of Chlamydomonas reinhardtii: Dependence on ——— (Atkins, Graham) (226) 481
- Cardiolipin
 Tightly bound ——— in cytochrome oxidase (Awasthi et al.) (226) 42
- Carotenoids
 Oxidation-reduction potential dependence of the interaction of cytochromes, bacteriochlorophyll and ——— at 77°K in chromatophores of Chromatium D and Rhodospseudomonas gelatinosa (Dutton) (226) 63
- Carotenoid-deficient
 Spectral and photochemical properties of subchromatophore fractions derived from ——— Chromatium by Triton treatment (Ke, Chaney) (226) 341
- Cations
 Effects of various ——— on separation of the two photochemical systems by digitonin treatment (Ohki et al.) (226) 144
- Chlamydomonas reinhardtii
 Consumption of O₂ in the light by Chlorella pyrenoidosa and ——— (Bunt, Heeb) (226) 354
- Chlamydomonas reinhardtii
 Light-induced pH changes by cells of ———: Dependence on CO₂ uptake (Atkins, Graham) (226) 481
- Chlamydomonas reinhardtii
 Mutant strains of ——— with lesions on the oxidizing side of photosystem II (Epel, Levine) (226) 154
- Chlorella
 Magnetic field effect on the chlorophyll fluorescence in ——— (Geacintov et al.) (226) 486
- Chlorella
 Thermoluminescence in spinach chloroplasts and in ——— (Mar, Govindjee) (226) 200
- Chlorella pyrenoidosa
 Consumption of O₂ in the light by ——— and Chlamydomonas reinhardtii (Bunt, Heeb) (226) 354
- Chlorella pyrenoidosa
 Relationships between the photon distribution between the two photosystems, the concentration of System II reaction centers and the intersystem equilibrium constant in ——— (Delrieux, De Kouchkovsky) (226) 409
- Chloride transport
 ——— and photosynthesis in cells of Griffithsia (Lilley, Hope) (226) 161
- Chlorophyll fluorescence
 Magnetic field effect on the ——— in Chlorella (Geacintov et al.) (226) 486
- Chloroplasts
 Effects of monovalent cations on light energy distribution between two pigment systems of photosynthesis in isolated spinach ——— (Murata) (226) 422
- Chloroplasts
 Further evidence for stroma lamellae as a source of Photosystem I fractions from spinach ——— (Goodchild, Park) (226) 393

- Chloroplasts
 Kinetics of acid efflux from ——— follow-
 ing the acid-base transition (Nishizaki,
 Jagendorf) (226) 172
- Chloroplasts
 Low temperature photo-induced reactions
 in green leaves and ——— (Floyd et al.)
 (226) 103
- Chloroplasts
 Site of action of plastocyanin in isolated
 ——— (Avron, Shneyour) (226) 498
- Chloroplasts
 Studies on the enzyme systems involved in
 electron and energy transfer in isolated
 ———. I. Effect of endogenous phosphate
 on the photophosphorylation coupled with
 noncyclic electron transport in intact
 chloroplasts (Frackowiak, Kaniuga) (226)
 360
- Chloroplasts
 Thermoluminescence in spinach ——— and
 in *Chlorella* (Mar, Govindjee) (226) 200
- Chromaffin granules
 Electron carriers of the bovine adrenal
 ——— (Flatmark et al.) (226) 9
- Chromaffin granules
 Improved method for the large-scale isola-
 tion of ——— from bovine adrenal medulla
 (Helle et al.) (226) 1
- Chromatium D
 Cytochrome C553 and bacteriochlorophyll
 interaction at 77°K in chromatophores and
 a subchromatophore preparation from
 ——— (Dutton et al.) (226) 81
- Chromatium D
 Low potential photosystem in ———
 (Seibert et al.) (226) 189
- Chromatium D
 Oxidation-reduction potential dependence
 of the interaction of cytochromes, bacterio-
 chlorophyll and carotenoids at 77°K in
 chromatophores of ——— and *Rhodospheu-*
domonas gelatinosa (Dutton) (226) 63
- Chromatium
 Spectral and photochemical properties of
 subchromatophore fractions derived from
 carotenoid-deficient ——— by Triton treat-
 ment (Ke, Chaney) (226) 341
- Chromatophores
 Cytochrome C553 and bacteriochlorophyll
 interaction at 77°K in ——— and a sub-
 chromatophore preparation from *Chroma-*
tium D (Dutton et al.) (226) 81
- Chromatophores
 Oxidation-reduction potential dependence
 of the interaction of cytochromes, bacterio-
 chlorophyll and carotenoids at 77°K in
 ——— of *Chromatium D* and *Rhodospheu-*
domonas gelatinosa (Dutton) (226) 63
- Copper histidine
 Consecutive oxidation and reduction of
 cytochrome c in the presence of hydrogen
 peroxide and ——— (Davison, Hulett) (226)
 313
- Cytochromes
 Changes in respiratory control and ———
 in liver mitochondria during hibernation
 (Shug et al.) (226) 309
- Cytochromes
 Oxidation-reduced potential dependence of
 the interaction of ———, bacteriochloro-
 phyll and carotenoids at 77°K in chromato-
 phores of *Chromatium D* and *Rhodospheu-*
domonas gelatinosa (Dutton) (226) 63
- Cytochromes 554 and 562
 Increased content of ——— in *Anabaena*
variabilis cells grown in the presence of di-
 phenylamine (Ogawa, Vernon) (226) 88
- Cytochrome c
 Consecutive oxidation and reduction of ———
 in the presence of hydrogen peroxide and
 copper histidine (Davison, Hulett) (226) 313
- Cytochrome C553
 ——— and bacteriochlorophyll interaction
 at 77°K in chromatophores and a subchro-
 matophore preparation from *Chromatium*
D (Dutton et al.) (226) 81
- Cytochrome f
 Laser-induced reactions of P700 and ———
 in a blue-green alga, *Plectonema boryanum*
 (Hyama, Ke) (226) 320
- Cytochrome oxidase
 Tightly bound cardiolipin in ——— (Awat-
 thi et al.) (226) 42
- Diatom
 Modification of the absorption spectrum in
 the far red of a cultured in red light (Jupin,
 Giraud) (226) 98
- Duroquinone reductase
 Quinone interaction with the respiratory
 chain-linked NADH dehydrogenase of beef
 heart mitochondria. II. ——— activity
 (Ruzicka, Crane) (226) 221
- Electron and energy transfer
 Studies on the enzyme systems involved in
 ——— in isolated chloroplasts. I. Effect of
 endogenous phosphate on the photophos-
 phorylation coupled with noncyclic elec-
 tron transport in intact chloroplasts
 (Frackowiak, Kaniuga) (226) 360
- Electron carriers
 ——— of the bovine adrenal chromaffin
 granules (Flatmark et al.) (226) 9
- Electron transport
 Energy transduction in ——— (DeVault)
 (226) 193
- Electron transport
 Studies on the mechanism of inhibition of
 the mitochondrial ——— by antimycin. IV.
 Effect of surface-active agents on the anti-
 mycin-inhibition curve and availability of
 sulphhydryl groups of the heart-muscle prep-
 aration (Bryla et al.) (226) 213
- Electron transport system
 ——— in nitrogen fixation by *Azotobacter*.
 III. Requirements for NADPH-supported
 nitrogenase activity (Benemann et al.) (226)
 205

- Epinephrine
Mitochondrial calcium uptake in the perfused contracting rat heart and the influence of — on calcium exchange (Horn et al.) (226) 459
- Flavins
Acceptor specificity of — and flavoproteins. I. Techniques for anaerobic spectrophotometry (Dixon) (226) 241
- Flavins
Acceptor specificity of — and flavoproteins. II. Free flavins (Dixon) (226) 259
- Flavins
Acceptor specificity of — and flavoproteins. III. Flavoproteins (Dixon), (226) 269
- Flavoproteins
Acceptor specificity of flavins and —. I. Techniques for anaerobic spectrophotometry (Dixon) (226) 241
- Flavoproteins
Acceptor specificity of flavins and —. II. Free flavins (Dixon) (226) 259
- Flavoproteins
Acceptor specificity of flavins and —. III. Flavoproteins (Dixon) (226) 269
- Greening of etiolated bean leaves
——. I. The initial photoconversion process (Thorne) (226) 113
- Greening of etiolated bean leaves
——. II. Secondary and further photoconversion processes (Thorne) (226) 128
- Hibernation
Changes in respiratory control and cytochromes in liver mitochondria during — (Shug et al.) (226) 309
- Hydroxylamine
Effect of — on microsomal ATPase (Shamoo) (226) 285
- Light-induced pH changes
—— by cells of *Chlamydomonas reinhardtii*: Dependence on CO₂ uptake (Atkins, Graham) (226) 481
- Membrane
Acid to base phosphorylation and — integrity in plastids of greening maize (Forger, III, Bogorad) (226) 383
- Microsomal ATPase
Effect of hydroxylamine on — (Shamoo) (226) 285
- Mitochondria
Changes in respiratory control and cytochromes in liver — during hibernation (Shug et al.) (226) 309
- Mitochondria
Investigation on the penetration of oxaloacetate into rat liver — (Bohnensack, Kunz) (226) 33
- Mitochondria
Phosphate transport in rat-liver — (Hoek et al.) (226) 297
- Mitochondria
Quinone interaction with the respiratory chain-linked NADH dehydrogenase of beef heart —. II. Duroquinone reductase activity (Ruzicka, Crane) (226) 221
- Mitochondrial calcium uptake
—— in the perfused contracting rat heart and the influence of epinephrine on calcium exchange (Horn et al.) (226) 459
- Mitochondrial electron transport
Studies on the mechanism of inhibition of the — by antimycin. IV. Effect of surface-active agents on the antimycin-inhibition curve and availability of sulphydryl groups of the heart-muscle preparation (Bryła et al.) (226) 213
- Myosin-actin interaction
Effect of trypsin on the — (Goll et al.) (226) 433
- NADH dehydrogenase
Quinone interaction with the respiratory chain-linked — of beef heart mitochondria. III. Duroquinone reductase activity (Ruzicka, Crane) (226) 221
- Nitrogen fixation
Electron transport system in — by Electron transport system in — by Azotobacter. III. Requirements for NADPH-supported nitrogenase activity (Benemann et al.) (226) 205
- Nitrogenase activity
Electron transport system in nitrogen fixation by Azotobacter. III. Requirements for NADPH-supported — (Benemann et al.) (226) 205
- Oxaloacetate
Investigation on the penetration of — into rat liver mitochondria (Bohnensack, Kunz) (226) 33
- Oxidative phosphorylation
Activation energies for the ATP-driven reversal of — in submitochondrial particles (Schoorman Stekhoven et al.) (226) 20
- Oxygen production
3-(3,4-Dichlorophenyl)-1,1-dimethylurea-insensitive — in a cell-free preparation from *Phormidium luridum* that shows redox potential dependent coupling to one-electron oxidants (Diner, Mauzerall) (226) 492
- P₇₀₀
Experimental determination of the molar differential extinction coefficient of — (Ke et al.) (226) 53
- P₇₀₀
Laser-induced reaction of — and cytochrome f in a blue-green alga *Plectonema boryanum* (Hyama, Ke) (226) 320
- Phormidium luridum
3-(3,4-Dichlorophenyl)-1,1-dimethylurea-insensitive oxygen production in a cell-free preparation from — that shows redox potential dependent coupling to one-electron oxidants (Diner, Mauzerall) (226) 492
- Phosphate transport
—— in rat-liver mitochondria (Hoek et al.) (226) 297

- Photochemical systems**
Effects of various cations on separation of the two ——— by digitonin treatment (Ohki et al.) (226) 144
- Photoconversion process**
Greening of etiolated bean leaves. I. The initial ——— (Thorne) (226) 113
- Photoconversion processes**
Greening of etiolated bean leaves. II. Secondary and further ——— (Thorne) (226) 128
- Photo-induced reactions**
Low temperature ——— in green leaves and chloroplasts (Floyd et al.) (226) 103
- Photophosphorylation**
Studies on the enzyme systems involved in electron and energy transfer in isolated chloroplasts. I. Effect of endogenous phosphate on the ——— coupled with noncyclic electron transport in intact chloroplasts (Frackowiak, Kaniuga) (226) 360
- Photopigment synthesis**
Adenine nucleotide levels and ——— in a growing photosynthetic bacterium (Fanica-Gaignier et al.) (226) 135
- Photoreactions in System II**
Two ——— of plant photosynthesis (Knaff, Arnon) (226) 400
- Photosynthesis**
Effects of monovalent cations on light energy distribution between two pigment systems of ——— in isolated spinach chloroplasts (Murata) (226) 422
- Photosynthesis**
Chloride transport and ——— in cells of *Griffithsia* (Lilley, Hope) (226) 161
- Photosynthesis**
Two photoreactions in System II of plant ——— (Knaff, Arnon) (226) 400
- Photosynthetic bacterium**
Adenine nucleotide levels and photopigment synthesis in a growing ——— (Fanica-Gaignier et al.) (226) 135
- Photosynthetic phosphorylation**
Coupling factor for ——— from plastids of light- and dark-grown maize (Lockshin et al.) (226) 366
- Photosynthetic pigments**
Mutant strains of *Rhodopseudomonas spheroides* which form ——— aerobically in the dark. Growth characteristics and enzymic activities (Lascelles, Wertlieb) (226) 328
- Photosystem**
Low temperature ——— in *Chromatium D* (Seibert et al.) (226) 189
- Photosystem I**
Further evidence for stroma lamellae as a source of ——— fractions from spinach chloroplasts (Gooch, Park) (226) 393
- Photosystem II**
Mutant strains of *Chlamydomonas reinhardtii* with lesions on the oxidizing side of ——— (Epel, Levine) (226) 154
- Photosystems**
Relationships between the photon distribution between the two ———, the concentrations of System II reaction centers and the intersystem equilibrium constant in *Chlorella pyrenoidosa* (Delrieux, De Kouchkovsky) (226) 409
- Pigment systems**
Effects of monovalent cations on light energy distribution between two ——— of photosynthesis in isolated spinach chloroplasts (Murata) (226) 422
- Plastids**
Acid to base phosphorylation and membrane integrity in ——— of greening maize (Forger, III, Bogorad) (226) 383
- Plastids**
Coupling factor for photosynthetic phosphorylation from plastids of light- and dark-grown maize (Lockshin et al.) (226) 366
- Plastocyanin**
Site of action of ——— in isolated chloroplasts (Avron, Shneyour) (226) 498
- Plectonema boryanum**
Laser-induced reactions of P700 and cytochrome f in a blue-green alga, ——— (Hiyama, Ke) (226) 320
- Pteridines**
Subcellular localization of the ——— in strain R-26 of *Rhodopseudomonas spheroides* (Reed, Mayne) (226) 477
- Quinone interaction**
—— with the respiratory chain-linked NADH dehydrogenase of beef heart mitochondria. II. Duroquinone reductase activity (Ruzicka, Crane) (226) 221
- Redox potential dependent coupling**
3-(3,4-Dichlorophenyl)-1,1-dimethylurea-insensitive oxygen production in a cell-free preparation from *Phormidium luridum* that shows ——— to one-electron oxidants (Diener, Mauzerall) (226) 492
- Respiratory chain-linked NADH dehydrogenase**
Quinone interaction with the ——— of beef heart mitochondria. II. Duroquinone reductase activity (Ruzicka, Crane) (226) 221
- Respiratory control**
Changes in ——— and cytochromes in liver mitochondria during hibernation (Shug et al.) (226) 309
- Rhodopseudomonas gelatinosa***
Oxidation-reduction potential dependence of the interaction of cytochromes, bacteriochlorophyll and carotenoids at 77°K in *Chromatophores* of *Chromatium D* and ——— (Dutton) (226) 63
- Rhodopseudomonas spheroides***
Mutant strains of ——— which form photosynthetic pigments aerobically in the dark. Growth characteristics and enzymic activities (Lascelles, Wertlieb) (226) 328

- Rhodopseudomonas spheroides
 Subcellular localization of the pteridines in strain R-26 of ——— (Reed, Mayne) (226) 477
- Stroma lamellae
 Further evidence for ——— as a source of Photosystem I fractions from spinach chloroplasts (Goodchild, Park) (226) 393
- Subchromatophore fractions
 Spectral and photochemical properties of ——— derived from carotenoid-deficient Chromatium by Triton treatment (Ke, Chaney) (226) 341
- Submitochondrial particles
 Activation for the ATP-driven reversal of oxidative phosphorylation in ——— (Schuurmans Stekhoven et al.) (226) 20
- Thermoluminescence
 ——— in spinach chloroplasts and in Chlorella (Mar, Govindjee) (226) 200
- Troponin
 Effect of Ca^{2+} on the sulphhydryl reactivity of ———: Evidence for a Ca^{2+} -induced conformational charge (Fuchs) (226) 453
- Ubiquinone
 Optical absorption spectrum of half-reduced ——— (Land et al.) (226) 239
- Ubiquinone-1
 Electrochemical studies of the redox behaviour of ——— (Marcus, Hawley) (226) 234
