

SUBJECT INDEX

- Actomyosin
 Calcium sensitivity of ——— in solution (Abe et al.) (245) 245
- Adenine nucleotide
 ——— control of heart mitochondrial oscillations (Gooch, Packer) (245) 17
- Anabaena variabilis
 Pyruvate:ferredoxin oxidoreductase and its activation by ATP in the blue-green alga ——— (Leach, Carr) (245) 165
- ATP
 Effect of ——— on the EPR spectrum at 20° K of phosphorylating submitochondrial particles (Albracht, Slater) (245) 508
- ATP
 Pyruvate:ferredoxin oxidoreductase and its activation by ——— in the blue-green alga Anabaena variabilis (Leach, Carr) (245) 165
- ATPase
 Oxidative phosphorylation in Azotobacter vinelandii. Effect of inhibitors and uncouplers on P/O ratio, trypsin-induced ——— and ADP-stimulated respiration (Eilermann et al.) (245) 305
- Azotobacter vinelandii
 Oxidative phosphorylation in ———. Effect of inhibitors and uncouplers on P/O ratio, trypsin-induced ATPase and ADP-stimulated respiration (Eilermann et al.) (245) 305
- Azotobacter vinelandii
 Respiratory control in ——— membranes (Jones et al.) (245) 54
- Bacteriochlorophyll
 Dichroism of ——— in cells of the photosynthetic bacterium Rhodospseudomonas palustris (Morita, Miyazaki) (245) 151
- Blue-green algae
 Methyl viologen-catalyzed Mehler reaction and catalase activity in ——— and Chlamydomonas reinhardi (Chua) (245) 277
- Blue-green alga
 P 700-chlorophyll a-protein of a ——— (Dietrich Jr., Thornber) (245) 482
- Bongkreikic acid
 Effect of ——— on the Ca²⁺-stimulated oxidation in rat-liver mitochondria and its relation to the efflux of intramitochondrial adenine nucleotides (Out et al.) (245) 299
- Brassica oleracea
 Water-soluble chlorophyll protein of ——— var. Botrys (cauliflower) (Murata et al.) (245) 208
- Calcium receptor site
 Ion exchange properties of the ——— of troponin (Fuchs) (245) 221
- Calcium sensitivity
 ——— of actomyosin in solution (Abe et al.) (245) 245
- Calcium-stimulated oxidation
 Effect of bongkreikic acid on the ——— in rat-liver mitochondria and its relation to the efflux of intra-mitochondrial adenine nucleotides (Out et al.) (245) 299
- Carbonylcyanide m-chlorophenylhydrazone
 Actions of ——— on electron transport and fluorescence of isolated chloroplasts (Homann) (245) 129
- Cardiac myofibrils
 Purification of ——— with Triton X-100 (Solaro et al.) (245) 259
- Catalase activity
 Methyl viologen-catalyzed Mehler reaction and ——— in blue-green algae and Chlamydomonas reinhardi (Chua) (245) 277
- Cations
 Net movements of monovalent and bivalent ———, and their relation to energy metabolism, in slices of hepatoma 3924 A and of a mammary tumour (Van Rossum et al.) (245) 263
- Chlamydomonas reinhardi
 Methyl viologen-catalyzed Mehler reaction and catalase activity in blue-green algae and ——— (Chua) (245) 277
- Chlorophyll
 Water-soluble ——— protein of Brassica oleracea var. Botrys (cauliflower) (Murata et al.) (245) 208
- Chlorophyll a-P700
 ———-protein of a blue-green alga (Dietrich Jr., Thornber) (245) 482
- Chloroplasts
 Actions of carbonylcyanide m-chlorophenylhydrazone on electron transport and fluorescence of isolated ——— (Homann) (245) 129
- Chloroplasts
 Characterization of three classes of ——— obtained by counter-current distribution (Larsson et al.) (245) 425
- Chloroplasts
 Control of excitation transfer in photosynthesis. V. Correlation of membrane structure to regulation of excitation transfer between two pigment systems in isolated spinach ——— (Murata) (245) 365
- Chloroplasts
 Evidence for a two-directional hydrogen ion transport in ——— of Euglena gracilis (Kahn) (245) 144
- Chloroplasts
 Light-induced absorbance changes in Fraction 1 particles prepared from spinach ——— by French-press treatment (Murata, Fork) (245) 356
- Chloroplasts
 Multiple sites of DCIP reduction by soni-

- cated oat ——— : Role of plastocyanin (Lien, Bannister) (245) 465
- Chloroplasts
Phosphorylation by intact bundle sheath ——— from maize (Anderson et al.) (245) 253
- Chloroplasts
Photochemical systems in mesophyll and bundle sheath ——— of C₄ plants (Anderson et al.) (245) 398
- Chloroplasts
Photoreduction of C-550 in ——— and its inhibition by lipase (Butler, Okayama) (245) 237
- Chloroplasts
Rapid delayed luminescence from ——— : Kinetic analysis of components; the relationship to the O₂ evolving system (Zankel) (245) 373
- Chloroplasts
Studies on the delayed light emission in spinach ———. I. Nature of two phases in development of the millisecond delayed light emission during intermittent illumination (Itoh et al.) (245) 109
- Chloroplasts
Studies on the delayed light emission in spinach ———. II. Participation of primary electron donor and acceptor of Photoreaction II in producing the delayed light emission (Itoh et al.) (245) 121
- Chloroplast lamellae
Localization of photophosphorylation and proton transport activities in various regions of the ——— (Arntzen et al.) (245) 409
- Chromaffin granule
Biochemical studies of the ———. I. Distribution of chromogranin A and dopamine- β -hydroxylase activity in the membrane and water-soluble granule fractions (Helle) (245) 80
- Chromaffin granule
Biochemical studies of the ———. II. Properties of membrane-bound and water-soluble forms of chromogranin A and dopamine- β -hydroxylase activity (Helle) (245) 94
- Chromogranin A
Biochemical studies of the chromaffin granule. I. Distribution of ——— and dopamine- β -hydroxylase activity in the membrane and water-soluble granule fractions (Helle) (245) 80
- Chromogranin A
Biochemical studies of the chromaffin granule. II. Properties of membrane-bound and water-soluble forms of ——— and dopamine- β -hydroxylase activity (Helle) (245) 94
- Cytochrome b
Effect of ²H₂O on energy-dependent oxidation-reduction of ——— (Wikström) (245) 512
- Cytochrome b-559
Photooxidation of ——— in leaves and chloroplasts at room temperature (Hiller et al.) (245) 439
- Cytochrome c
Lysosomal hemochromes and digestion of ——— by the lysosomal protease system (Hanes, Tappel) (245) 42
- Cytochrome c₃
———. A class of electron transfer haem proteins found in both photosynthetic and sulphate-reducing bacteria (Meyer et al.) (245) 453
- Cytochrome C-550
Photoreduction of ——— in chloroplasts and its inhibition by lipase (Butler, Okayama) (245) 237
- Cytochrome oxidase
Studies of the electron transport chain of extremely halophilic bacteria. V. Mode of action of salts on ——— (Lieberman, Lanyi) (245) 21
- DCIP reduction
Multiple sites of ——— by sonicated oat chloroplasts: Role of plastocyanin (Lien, Bannister) (245) 465
- Delayed light emission
Studies on the ——— in spinach chloroplasts. I. Nature of two phases in development of the millisecond delayed light emission during intermittent illumination (Itoh et al.) (245) 109
- Delayed light emission
Studies on the ——— in spinach chloroplasts. II. Participation of primary electron donor and acceptor of Photoreaction II in producing the delayed light emission (Itoh et al.) (245) 121
- Delayed light emission
Studies on the ——— in spinach chloroplasts. II. Participation of primary electron donor and acceptor of Photoreaction II in producing the delayed light emission (Itoh et al.) (245) 121
- Deuterium oxide
Effect of ——— on energy-dependent oxidoreduction of cytochrome b (Wikström) (245) 512
- Dopamine- β -hydroxylase
Biochemical studies of the chromaffin granule. I. Distribution of chromogranin A and ——— activity in the membrane and water-soluble granule fractions (Helle) (245) 80
- Dopamine- β -hydroxylase
Biochemical studies of the chromaffin granule. II. Properties of membrane-bound and water-soluble forms of chromogranin A and ——— activity (Helle) (245) 94
- Durohydroquinone
Reduction of mitochondrial components by ——— (Boveris et al.) (245) 1
- Electron carriers
——— of the noradrenaline storage vesicles from bovine splenic nerves (Flatmark et al.) (245) 249
- Electron donor
Effect of preillumination wavelength on the deactivation of oxidized forms of the Photo-

- system II ——— (Lemasson, Barbieri) (245) 386
- Electron donor
- Hydrazine as an ——— to the water-oxidation site in photosynthesis (Heath) (245) 160
- Electron transfer haem proteins
- Cytochrome c_3 . A class of ——— found in both photosynthetic and sulphate-reducing bacteria (Meyer et al.) (245) 453
- Electron transport
- Actions of carbonylcyanide *m*-chlorophenylhydrazine on ——— and fluorescence of isolated chloroplasts (Homann) (245) 129
- Electron transport
- Influence of pH on the inhibition of oxidative phosphorylation and ——— by triethyltin (Coleman, Palmer) (245) 313
- Electron transport chain
- Studies of the ——— of extremely halophilic bacteria. V. Mode of action of salts on cytochrome oxidase (Lieberman, Lanyi) (245) 21
- Energy-dependent oxidoreduction
- Effect of $^2\text{H}_2\text{O}$ on ——— of cytochrome *b* (Wikström) (245) 512
- Energy metabolism
- Net movements of monovalent and bivalent cations, and their relation to ——— in slices of hepatoma 3924 A and of a mammary tumour (Van Rossum et al.) (245) 263
- EPR
- studies at 20°K on the mitochondrial respiratory chain (Albracht, Slater) (245) 503
- EPR spectrum
- Effect of ATP on the ——— at 20°K of phosphorylating submitochondrial particles (Albracht, Slater) (245) 508
- Euglena gracilis*
- Evidence for a two-directional hydrogen ion transport in chloroplasts of ——— (Khan) (245) 144
- Excitation transfer
- Control of excitation transfer in photosynthesis. V. Correlation of membrane structure to regulation of ——— between two pigment systems in isolated spinach chloroplasts (Murata) (245) 365
- Ferredoxin
- Magnetic susceptibility of spinach ——— from 77–250°K: A measurement of the antiferromagnetic coupling between the two iron atoms (Palmer et al.) (245) 201
- Ferredoxin
- Oxidation-reduction potentials of parsley ——— and its selenium-containing homolog (Fee et al.) (245) 196
- Ferredoxin
- Properties of parsley ——— and its selenium-containing homolog (Fee, Palmer) (245) 175
- Ferredoxin
- Pyruvate: ——— oxidoreductase and its activation by ATP in the blue-green alga *Anabaena variabilis* (Leach, Carr) (245) 165
- Fluorescence
- Actions of carbonylcyanide *m*-chlorophenylhydrazine on electron transport and ——— of isolated chloroplasts (Homann) (245) 129
- Fraction 1 particles
- Light-induced absorbance changes in ——— prepared from spinach chloroplasts by French-press treatment (Murata, Fork) (245) 356
- Gramicidin
- Changes in mitochondrial ultrastructure induced by ——— plus protamine (Popinigis et al.) (245) 70
- Haemochromes
- Lysosomal ——— and digestion of cytochrome *c* by the lysosomal protease system (Hanes, Tappel) (245) 42
- Halophilic bacteria
- Studies of the electron transport chain of extremely ———. V. Mode of action of salts on cytochrome oxidase (Lieberman, Lanyi) (245) 21
- Hydrazine
- as an electron donor to the water-oxidation site in photosynthesis (Heath) (245) 160
- Ion exchange
- properties of the calcium receptor site of troponin (Fuchs) (245) 221
- Ion transport
- Evidence for a two-directional hydrogen ——— in chloroplasts of *Euglena gracilis* (Khan) (245) 144
- Light-induced absorbance changes
- in Fraction 1 particles prepared from spinach chloroplasts by French-press treatment (Murata, Fork) (245) 356
- Light reactions
- Action spectra of the three ——— in photosynthesis (Knaff, McSwain) (245) 105
- Luminescence
- Rapid delayed ——— from chloroplasts: Kinetic analysis of components; the relationship to the O_2 evolving system (Zankel) (245) 373
- Lysosomal haemochromes
- and digestion of cytochrome *c* by the lysosomal protease system (Hanes, Tappel) (245) 42
- Magnetic susceptibility
- of spinach ferredoxin from 77°–250°K: A measurement of the antiferromagnetic coupling between the two iron atoms (Palmer et al.) (245) 201
- Mehler reaction
- Methyl viologen-catalyzed ——— and catalase activity in blue-green alga and *Chlamydomonas reinhardtii* (Chua) (245) 277
- Membrane
- Biochemical studies of the chromaffin granule. I. Distribution of chromogranin A and dopamine- β -hydroxylase activity in the ——— and water-soluble granule fractions (Helle) (245) 80

- Membrane
Energy-linked nicotinamide adenine dinucleotide transhydrogenase in ——— particles from *Escherichia coli* (Fisher, Sanadi) (245) 34
- Membranes
Respiratory control in *Azotobacter vinelandii* ——— (Jones et al.) (245) 54
- Membrane structure
Control of excitation transfer in photosynthesis. V. Correlation of ——— to regulation of excitation transfer between two pigment systems in isolated spinach chloroplasts (Murata) (245) 365
- Mitochondria
Degradation and restoration of ——— upon deaeration and subsequent aeration of aerobically grown *Saccharomyces cerevisiae* cells (Luzikov et al.) (245) 321
- Mitochondria
Effect of bongkreikic acid on the Ca^{2+} -stimulated oxidation in rat-liver ——— and its relation to the efflux of intra-mitochondrial adenine nucleotides (Out et al.) (245) 299
- Mitochondria
Influence of adenosine and Nagarse on palmitoyl-CoA synthetase in rat heart and liver ——— (De Jong) (245) 288
- Mitochondria
Studies on yeast ———: Some properties of mitochondria isolated from *Saccharomyces carlsbergensis* grown in normal glucose medium (Ghosh, Bhattacharyya) (245) 335
- Mitochondrial
EPR studies at 20° K on the ——— respiratory chain (Albracht, Slater) (245) 503
- Mitochondrial components
Reduction of ——— by durohydroquinone (Boveris et al.) (245) 1
- Mitochondrial NADH dehydrogenase
Simple method for the purification of the ——— (Huang, Pharo) (245) 240
- Mitochondrial oscillations
Adenine nucleotide control of heart ——— (Gooch, Packer) (245) 17
- Mitochondrial ultrastructure
Changes in ——— induced by gramicidin plus protamine (Popinigis et al.) (245) 70
- Muscle
On the reconstitution of rabbit myosin from fast and slow ——— (Kim, Mommaerts) (245) 230
- Mycobacterium flavum* 301
Respiratory system of the aerobic, nitrogen-fixing, Gram-positive bacterium, ——— (Erickson) (245) 63
- Myofibrils
Purification of cardiac ——— with Triton X-100 (Solaro et al.) (245) 259
- Myosin
On the reconstitution of rabbit ——— from fast and slow muscle (Kim, Mommaerts) (245) 230
- NADH dehydrogenase
Simple method for the purification of the mitochondrial ——— (Huang, Pharo) (245) 240
- Nicotinamide adenine dinucleotide transhydrogenase
Energy-linked ——— in membrane particles from *Escherichia coli* (Fisher, Sanadi) (245) 34
- Noradrenaline storage vesicles
Electron carriers of the ——— from bovine splenic nerves (Flatmark et al.) (245) 249
- Oxidation levels
Measurement of steady-state values of respiration rate and ——— of respiratory pigments at low oxygen tensions. A new technique (Degn, Wohlrab) (245) 347
- Oxidation-reduction potentials
——— of parsley ferredoxin and its selenium-containing homolog (Fee et al.) (245) 196
- Oxidative phosphorylation
——— in *Azotobacter vinelandii*. Effect of inhibitors and uncouplers on P/O ratio, trypsin-induced ATPase and ADP-stimulated respiration (Eilermann et al.) (245) 305
- Oxidative phosphorylation
Influence of pH on the inhibition of ——— and electron transport by triethyltin (Coleman, Palmer) (245) 313
- Oxidoreduction
Effect of $^2\text{H}_2\text{O}$ on energy-dependent ——— of cytochrome b (Wikström) (245) 512
- Oxygen evolving system
Rapid delayed luminescence from chloroplasts: Kinetic analysis of components; the relationship to the ——— (Zankel) (245) 373
- Palmitoyl-CoA synthetase
Influence of adenosine and Nagarse on ——— in rat heart and liver mitochondria (De Jong) (245) 288
- P700-chlorophyll a
———protein of a blue-green alga (Dietrich Jr., Thornber) (245) 482
- Phosphorylating submitochondrial particles
Effect of ATP on the EPR spectrum at 20° K of ——— (Albracht, Slater) (245) 508
- Phosphorylation
——— by intact bundle sheath chloroplasts from maize (Anderson et al.) (245) 253
- Photochemical systems
——— in mesophyll and bundle sheath chloroplasts of C_4 plants (Anderson et al.) (245) 398
- Photooxidation
——— of cytochrome b-559 in leaves and chloroplasts at room temperature (Hiller et al.) (245) 439
- Photophosphorylation
Localization of ——— and proton transport activities in various regions of the chloroplast lamellae (Arntzen et al.) (245) 409
- Photoreaction II
Studies on the delayed light emission in spinach chloroplasts. II. Participation of

- primary electron donor and acceptor of
 ——— in producing the delayed light emission (Itoh et al.) (245) 121
- Photoreduction
 ——— of C-550 in chloroplasts and its inhibition by lipase (Butler, Okayama) (245) 273
- Photosynthesis
 Action spectra of the three light reactions in ——— (Knaff, McSwain) (245) 105
- Photosynthesis
 Hydrazine as an electron donor to the water-oxidation site in ——— (Heath) (245) 160
- Photosystem II
 Effect of preillumination wavelength on the deactivation of oxidized forms of the ——— electron donor (Lemasson, Barbieri) (245) 386
- Pigment systems
 Control of excitation transfer in photosynthesis. V. Correlation of membrane structure to regulation of excitation transfer between two ——— in isolated spinach chloroplasts (Murata) (245) 365
- Plastocyanin
 Multiple sites of DCIP reduction by sonicated oat chloroplasts: Role of ——— (Lien, Bannister) (245) 465
- Protamine
 Changes in mitochondrial ultrastructure induced by gramicidin plus ——— (Popinigis et al.) (245) 70
- Proton transport
 Localization of photophosphorylation and ——— activities in various regions of the chloroplast lamellae (Arntzen et al.) (245) 409
- Pyruvate:ferredoxin oxidoreductase
 ——— and its activation by ATP in the blue-green alga *Anabaena variabilis* (Leach, Carr) (245) 165
- Respiration rate
 Measurement of steady-state values of ——— and oxidation levels of respiratory pigments at low oxygen tensions. A new technique (Degn, Wohlrab) (245) 347
- Respiratory chain
 EPR studies at 20° K on the mitochondrial ——— (Albracht, Slater) (245) 503
- Respiratory control
 ——— in *Azotobacter vinelandii* membranes (Jones et al.) (245) 54
- Respiratory pigments
 Measurement of steady-state values of respiration rate and oxidation levels of ——— at low oxygen tensions. A new technique (Degn, Wohlrab) (245) 347
- Respiratory system
 ——— of the aerobic, nitrogen-fixing, Gram-positive bacterium, *Mycobacterium flavum* 301 (Erickson) (245) 63
- Rhodospseudomonas palustris
 Dichroism of bacteriochlorophyll in cells of the photosynthetic bacterium ——— (Morita, Miyazaki) (245) 151
- Rhodopsin
 Reduction of ——— with sodium borohydride under non-bleaching conditions (Zorn) (245) 216
- Saccharomyces carlsbergensis
 Studies on yeast mitochondria: Some properties of mitochondria isolated from ——— grown in normal glucose medium (Ghosh, Bhattacharyya) (245) 335
- Saccharomyces cerevisiae
 Degradation and restoration of mitochondria upon deaeration and subsequent aeration of aerobically grown ——— cells (Luzikov et al.) (245) 321
- Selenium
 Oxidation-reduction potentials of parsley ferredoxin and its ——— -containing homolog (Fee et al.) (245) 196
- Selenium
 Properties of parsley ferredoxin and its ——— containing homolog (Fee, Palmer) (245) 175
- Submitochondrial particles
 Effect of ATP on the EPR spectrum at 20° K of phosphorylating ——— (Albracht, Slater) (245) 508
- Triethyltin
 Influence of pH on the inhibition of oxidative phosphorylation and electron transport by ——— (Coleman, Palmer) (245) 313
- Troponin
 Ion exchange properties of the calcium receptor site of ——— (Fuchs) (245) 221

TITLES OF RELATED PAPERS IN OTHER SECTIONS

The following papers that have recently appeared in other sections of BIOCHIMICA ET BIOPHYSICA ACTA may be of interest to the readers of this specialized section:

BBA-PROTEIN STRUCTURE

- Purification and properties of cytochrome *c*₃ of *Desulfovibrio vulgaris*, Miyazaki (BBA 35914)
 by T. YAGI AND K. MARUYAMA (Shizuoka) 243 (1971) 214
- Purification and properties of cytochromes *c* from trypanosomatids (BBA 35911)
 by G. C. HILL, W.E. GUTTERIDGE AND N. W. MATHEWSON (New Brunswick, N.J. and London) 243 (1971) 225
