

SUBJECT INDEX

- Actin
Alkylation of urea-denatured ——— with iodoacetate: Functional reorganization of actin (Mihashi) (267) 409
- Actomyosin
Effect of temperature on ——— (Hartshorne et al.) (267) 190
- Adenine nucleotide translocation
Oxidative phosphorylation in yeast. IX. Modification of the mitochondrial ——— system in the oxidative phosphorylation-deficient mutant op_1 (Kolarov et al.) (267) 465
- ADP
Effects of P_i and ——— on ATPase activity in chloroplasts (Carmeli, Lifshitz) (267) 86
- Anilinnaphthalene sulphonate
Nature of the energy-linked quantum yield change in ——— fluorescence in submitochondrial particles (Barrett-Bee, Radda) (267) 211
- Antimycin
———-sensitive cytochrome b component in beef-heart mitochondria (Berden, Oppendoes) (267) 7
- Antimycin binding
Influence of ubiquinone on the rate of ——— to submitochondrial particles (Nelson et al.) (267) 205
- Antimycin A
Reactions of b-cytochromes with ATP and ——— in pigeon heart mitochondria (Dutton et al.) (267) 15
- Antimycin A
Respiratory chain of plant mitochondria. XIII. Redox state changes of cytochrome b_{562} in mung bean seedling mitochondria treated with ——— (Storey) (267) 48
- ATP
Reactions of b-cytochromes with ——— and antimycin A in pigeon heart mitochondria (Dutton et al.) (267) 15
- ATP
Transient induced oscillations in the level of ——— in *Chlorella fusca* (Lewenstein, Bachofen) (267) 80
- ATP
Value of ΔG° for the hydrolysis of ——— (Rosing, Slater) (267) 275
- ATP complexes
Relaxation spectra of copper(II)-——— at low pH (Brundage et al.) (267) 258
- ATPase
Effects of P_i and ADP on ——— activity in chloroplasts (Carmeli, Lifshitz) (267) 86
- Bacterial photosynthesis
Characterization of primary reactants in ———. I. Comparison of the light-induced EPR signal ($g = 2.0026$) with that of a bacteriochlorophyll radical (McElroy et al.) (267) 363
- Bacteriochlorophyll
Oxidation-reduction potential dependence of pyrophosphate-induced cytochrome and ——— reactions in *Rhodospirillum rubrum* (Dutton, Baltscheffsky) (267) 172
- Bacteriochlorophyll radical
Characterization of primary reactants in bacterial photosynthesis. I. Comparison of the light-induced EPR signal ($g = 2.0026$) with that of a ——— (McElroy et al.) (267) 363
- b-cytochromes
Reactions of ——— with ATP and antimycin A in pigeon heart mitochondria (Dutton et al.) (267) 15
- Benzoquinone
Effect of oxygen and ——— concentration on the reversible spectrophotometric changes accompanying the photooxidation of porphyrins at low pH values (Quinlan) (267) 493
- Biogenesis
——— of chloroplast membranes. XI. Development of photophosphorylation and proton pump activities in greening *Chlamydomonas reinhardtii* y-1 as measured with an open-cell preparation (Wallach et al.) (267) 125
- Biogenesis
——— of chloroplast membranes. XII. Changes in the photosynthetic specific activity and the relationship between the light harvesting system and photosynthetic electron transfer chain during greening of *Chlamydomonas reinhardtii* y-1 cells (Bar-Nun et al.) (267) 138
- Blue-green algae
Photooxidation of 3',3'-diaminobenzidine by ——— and *Chlamydomonas reinhardtii* (Chua) (267) 179
- b-type cytochrome
Evidence for the presence of a ——— in the sulfate-reducing bacterium *Desulfovibrio gigas*, and its role in the reduction of fumarate by molecular hydrogen (Hatchikian, le Gall) (267) 479
- Carbon dioxide assimilation
Role of cyclic photophosphorylation in photosynthetic ——— by isolated chloroplasts (Schürmann et al.) (267) 111
- Chlamydomonas reinhardtii*
Photooxidation of 3',3'-diaminobenzidine by blue-green algae and ——— (Chua) (267) 179

- Chlamydomonas reinhardtii* y-1
Biogenesis of chloroplast membranes. XI. Development of photophosphorylation and proton pump activities in greening ——— as measured with an open-cell preparation (Wallach et al.) (267) 125
- Chlamydomonas reinhardtii* y-1
Biogenesis of chloroplast membranes. XII. Changes in the photosynthetic specific activity and the relationship between the light harvesting system and photosynthetic electron transfer chain during greening of ——— cells (Bar-Nun et al.) (267) 138
- Chlorella
Properties of a nitrate reductase of ——— (Solomonson, Vennesland) (267) 544
- Chlorella fusca*
Transient induced oscillations in the level of ATP in *Chlorella fusca* (Lewenstein, Bachofen) (267) 80
- Chlorophyll-lipid membranes
Polarised absorption spectroscopy of ——— (Cherry et al.) (267) 512
- Chlorophyllide
Circular dichroism and fluorescence changes accompanying the protochlorophyllide to ——— transformation in greening leaves and holochrome preparations (Schultz, Sauer) (267) 320
- Chlorophyllide holochrome
Circular dichroism studies on the structure and the photochemistry of protochlorophyllide and ——— (Mathis, Sauer) (267) 498
- Chloroplasts
Effect of artificial electron donor and acceptor systems on light-induced absorbance responses of cytochromes f and other pigments in intact ——— (Larkum, Bonner) (267) 149
- Chloroplasts
Effect of cold-storage of bean leaves on photosynthetic reactions of isolated ———. Inability to donate electrons to Photosystem II and relation to manganese content (Margulies) (267) 96
- Chloroplasts
Effects of P_i and ADP on ATPase activity in ——— (Carmeli, Lifshitz) (267) 86
- Chloroplasts
Evidence for the role of a bound ferredoxin as the primary electron acceptor of Photosystem I in spinach ——— (Evans et al.) (267) 530
- Chloroplasts
Influence of cytochrome b_{559} on the fluorescence yield of ——— at low temperature (Okayama, Butler) (267) 523
- Chloroplasts
Luminescence of isolated ——— induced by organic solvents (Hardt, Malkin) (267) 588
- Chloroplasts
Redox state of cytochrome b_{559} in spinach ——— (Erixon et al.) (267) 375
- Chloroplasts
Role of cyclic photophosphorylation in photosynthetic carbon dioxide assimilation by isolated ——— (Schürmann et al.) (267) 111
- Chloroplast membranes
Biogenesis of ———. XI. Development of photophosphorylation and proton pump activities in greening *Chlamydomonas reinhardtii* y-1 as measured with an open-cell preparation (Wallach et al.) (267) 125
- Chloroplast membranes
Biogenesis of ———. XII. Changes in the photosynthetic specific activity and the relationship between the light harvesting system and photosynthetic electron transfer chain during greening of *Chlamydomonas reinhardtii* y-1 cells (Bar-Nun et al.) (267) 138
- Chromatium chromatophores
Fast changes of enthalpy and volume on flash excitation of ——— (Callis et al.) (267) 348
- Circular dichroism
——— and fluorescence changes accompanying the protochlorophyllide to chlorophyllide transformation in greening leaves and holochrome preparations (Schultz, Sauer) (267) 320
- Circular dichroism
——— studies on the structure and the photochemistry of protochlorophyllide and chlorophyllide holochrome (Mathis, Sauer) (267) 498
- Clostridium pasteurianum*
Purification of the nitrogenase proteins from ——— (Tso et al.) (267) 600
- Cold-storage
Effect of ——— of bean leaves on photosynthetic reactions of isolated chloroplasts. Inability to donate electrons to Photosystem II and relation to manganese content (Margulies) (267) 96
- Copper(II)-ATP complexes
Relaxation spectra of ——— at low pH (Brundage et al.) (267) 258
- Cyclic photophosphorylation
Role of ——— in photosynthetic carbon dioxide assimilation by isolated chloroplasts (Schürmann et al.) (267) 111
- Cytochrome
Evidence for the presence of a b-type ——— in the sulfate-reducing bacterium *Desulfovibrio gigas*, and its role in the reduction of fumarate by molecular hydrogen (Hatchikian, le Gall) (267) 479
- Cytochrome
Oxidation-reduction potential dependence of pyrophosphate-induced ——— and bacteriochlorophyll reactions in *Rhodospirillum rubrum* (Dutton, Baltscheffsky) (267) 172
- Cytochromes
Reactions of b- ——— with ATP and antimycin A in pigeon heart mitochondria (P. L. Dutton et al.) (267) 15

- Cytochrome 558
Euglena gracilis ——— (Meyer, Cusanovich) (267) 383
- Cytochrome aa_3
 Biochemical and biophysical studies on ———. VII. The effect of cytochrome c on the oxidation-reduction potential of isolated cytochrome aa_3 (Muijsers et al.) (267) 216
- Cytochrome b
 Antimycin-sensitive ——— component in beef-heart mitochondria (Berden, Oppendoes) (267) 7
- Cytochromes b
 Spectral evidence of multiple ——— present in succinate:cytochrome c reductase (Yu et al.) (267) 300
- Cytochrome b_{559}
 Influence of ——— on the fluorescence yield of chloroplasts at low temperature (Okayama, Butler) (267) 523
- Cytochrome b_{559}
 Redox state of ——— in spinach chloroplasts (Erixon et al.) (267) 375
- Cytochrome b_{562}
 Respiratory chain of plant mitochondria. XIII. Redox state changes of ——— in mung bean seedling mitochondria treated with antimycin A (Storey) (267) 48
- Cytochrome c
 Biochemical and biophysical studies on cytochrome aa_3 . VII. The effect of ——— on the oxidation-reduction potential of isolated cytochrome aa_3 (Muijsers et al.) (267) 216
- Cytochrome c oxidase
 Cytochrome c reactivity in its complexes with mammalian ——— and yeast peroxidase (Mochan, Nicholls) (267) 309
- Cytochrome c reactivity
 ——— in its complexes with mammalian cytochrome c oxidase and yeast peroxidase (Mochan, Nicholls) (267) 309
- Cytochromes f
 Effect of artificial electron donor and acceptor systems on light-induced absorbance responses of ——— and other pigments in intact chloroplasts (Larkum, Bonner) (267) 149
- Cytochrome pigments
 Influence of oxygen and nitrate on the formation of the ——— of the aerobic and anaerobic respiratory chain of *Micrococcus denitrificans* (Sapshead, Wimpenny) (267) 388
- Desulphovibrio gigas*
 Evidence for the presence of a b-type cytochrome in the sulphate-reducing bacterium ———, and its role in the reduction of fumarate by molecular hydrogen (Hatchikian, le Gall) (267) 479
- 3',3'-Diaminobenzidine
 Photooxidation of ——— by blue-green algae and *Chlamydomonas reinhardtii* (Chua) (267) 179
- Effect of ——— on violaxanthin de-epoxidation and absorbance changes in the 500-nm region (Yamamoto, Kamite) (267) 538
- Electron discharge
 One-way ——— subsequent to the photochemical charge separation in Photosystem I (Ke) (267) 595
- Electron transfer chain
 Biogenesis of chloroplast membranes. XII. Changes in the photosynthetic specific activity and the relationship between the light harvesting system and photosynthetic ——— during greening of *Chlamydomonas reinhardtii* y-r cells (Bar-Nun et al.) (267) 138
- Electron transfer mechanism
 One-electron transfer reactions in biochemical systems. VI. Changes in ——— of lipamide dehydrogenase by modification of sulphhydryl groups (Nakamura, Yamazaki) (267) 249
- EPR spectroscopy
 Identification of an electron acceptor in reaction centers of *Rhodospseudomonas spheroides* by ——— (Feher et al.) (267) 222
- ESR signal
 Anomalous ——— from rapidly frozen liver microsomes (Ysebaert-Vanneste et al.) (267) 268
- EPR signal
 Characterization of primary reactants in bacterial photosynthesis. I. Comparison of the light-induced ——— ($g = 2.0026$) with that of a bacteriochlorophyll radical (McElroy et al.) (267) 363
- Ethylene glycol bis(β -aminoethyl ether)-N,N'-tetraacetic acid
 Twitches in the presence of ——— (Armstrong et al.) (267) 605
- Euglena gracilis*
 ——— cytochrome 558 (Meyer, Cusanovich) (267) 383
- $F_1 \cdot X$
 ———: complex between F_1 and OSCP (van de Stadt et al.) (267) 25
- F-actin
 Effects of tropomyosin, troponin and Ca^{2+} on the interaction between ——— and heavy meromyosin (Nakaoka) (267) 558
- F-actin
 Length distribution of ——— transformed from Mg-polymer (Kawamura, Maruyama) (267) 422
- Fatty acid composition
 Relation of unsaturated ——— of rat liver mitochondria to oscillation period, spin label motion, permeability and oxidative phosphorylation (Williams et al.) (267) 444
- Ferredoxin
 Evidence for the role of a bound ——— as the primary electron acceptor of Photosystem I in spinach chloroplasts (Evans et al.) (267) 530

- Flash excitation
Fast changes of enthalpy and volume on
—— of Chromatium chromatophores
(Callis et al.) (267) 348
- Fluorescence
Circular dichroism and —— changes accompanying the protochlorophyllide to chlorophyllide transformation in greening leaves and holochrome preparations (Schultz, Sauer) (267) 320
- Fluorescence
Nature of the energy-linked quantum yield change in anilinonaphthalene sulphonate —— in submitochondrial particles (Barret-Bee, Radda) (267) 211
- Fluorescence induction
Restorative effect of warming on the fluorescence intensity and —— of photosynthetic material at 77°K (Jacobs, Brody) (267) 341
- Fluorescence intensity
Restorative effect of warming on the —— and fluorescence induction of photosynthetic material at 77°K (Jacobs, Brody) (267) 341
- Fluorescence yield
Influence of cytochrome b_{559} on the —— of chloroplasts at low temperature (Okayama, Butler) (267) 523
- Glycolate oxidoreductase
—— in *Escherichia coli* (Lord) (267) 227
- Haem c
Redox potentials of the pyridine- —— system (Morton, Henderson) (267) 485
- Hydrolysis of ATP
Value of ΔG° for the —— (Rosing, Slater) (267) 275
- Imidazole
Photochemical phosphorylation of —— (Bishop) (267) 435
- Isorhodopsin
Biochemical aspects of the visual process. XIX. Formation of —— from photolyzed rhodopsin by bacterial action (Rotmans et al.) (267) 583
- α -Ketoglutarate
Inhibition of L(—)-palmitylcarnitine oxidation by —— in rat liver mitochondria (Olson, Allgyer) (267) 238
- Lipoamide dehydrogenase
One-electron transfer reactions in biochemical systems. VI. Changes in electron transfer mechanism of —— by modification of sulphydryl groups (Nakamura, Yamazaki) (267) 249
- Luminescence
—— of isolated chloroplasts induced by organic solvents (Hardt, Malkin) (267) 588
- Manganese
Effect of cold-storage of bean leaves on photosynthetic reactions of isolated chloroplasts. Inability to donate electrons to Photosystem II and relation to —— content (Margulies) (267) 96
- Magnetic field induced orientation
—— of photosynthetic systems (Geacintov et al.) (267) 65
- Menadiol
—— as an electron donor for reversed oxidative phosphorylation in submitochondrial particles (Taggart, Sanadi) (267) 439
- Meromyosin
Effects of tropomyosin, troponin and Ca^{2+} on the interaction between F-actin and heavy —— (Nakaoka) (267) 558
- Micrococcus denitrificans*
Influence of oxygen and nitrate on the formation of the cytochrome pigments of the aerobic and anaerobic respiratory chain of —— (Sapshead, Wimpenny) (267) 388
- Microsomes
Anomalous ESR signal from rapidly frozen liver —— (Ysebaert-Vanneste et al.) (267) 268
- Mitochondria
Antimycin-sensitive cytochrome b component in beef-heart —— (Berden, Oppendoes) (267) 7
- Mitochondria
Inhibition of L(—)-palmitylcarnitine oxidation by α -ketoglutarate in rat liver —— (Olson, Allgyer) (267) 238
- Mitochondria
New sensitive method for the spectral analysis of respiratory-chain components in —— (Muraoka et al.) (267) 291
- Mitochondria
Oxidative phosphorylation in yeast. VIII. Osmotic and permeability properties of —— isolated from wild-type yeast and from a respiration-deficient mutant (Klarov et al.) (267) 457
- Mitochondria
Reactions of b-cytochromes with ATP and antimycin A in pigeon heart —— (Dutton et al.) (267) 1
- Mitochondria
Relation of unsaturated fatty acid composition of rat liver —— to oscillation period, spin label motion, permeability and oxidative phosphorylation (Williams et al.) (267) 444
- Mitochondria
 Sr^{2+} uptake by bean (*Phaseolus vulgaris*) —— (Johnson, Wilson) (267) 398
- Mitochondrial
Oxidative phosphorylation in yeast. IX. Modification of the —— adenine nucleotide translocation system in the oxidative phosphorylation-deficient mutant op_1 (Klarov et al.) (267) 465
- NADH oxidase
Studies on stabilization of the oxidative phosphorylation system. II. Electron transfer dependent resistance of succinate oxidase and —— systems of submitochondrial particles to proteinases and cobra venom phospholipase (Luzikov, Romashina) (267) 37

- NAD(P)⁺
 — redox compartmentation in Ehrlich ascites tumour cells (Galeotti et al.) (267) 1
- Nitrate reductase
 Properties of a — of *Chlorella* (Solomonson, Vennesland) (267) 544
- Nitrogenase proteins
 Purification of the — from *Clostridium pasteurianum* (Tso et al.) (267) 600
- Organic solvents
 Luminescence of isolated chloroplasts induced by — (Hardt, Malkin) (267) 588
- OSCP
 F₁·X: A complex between F₁ and — (van de Stadt et al.) (267) 25
- Osmotic and permeability properties
 Oxidative phosphorylation in yeast. VIII. — of mitochondria isolated from wild-type yeast and from a respiration-deficient mutant (Kolarov et al.) (267) 457
- Oxidation-reduction potential
 Biochemical and biophysical studies on cytochrome aa₃. VII. The effect of cytochrome c on the — of isolated cytochrome aa₃ (Muijsers et al.) (267) 216
- Oxidation-reduction potential
 — dependence of pyrophosphate-induced cytochrome and bacteriochlorophyll reactions in *Rhodospirillum rubrum* (Dutton, Baltscheffsky) (267) 172
- Oxidative phosphorylation
 Menadiol as an electron donor for reversed — in submitochondrial particles (Taggart, Sanadi) (267) 439
- Oxidative phosphorylation
 Relation of unsaturated fatty acid composition of rat liver mitochondria to oscillation period, spin label motion, permeability and — (Williams et al.) (267) 444
- Oxidative phosphorylation
 Studies on stabilization of the — system. II. Electron transfer-dependent resistance of succinate oxidase and NADH oxidase systems of submitochondrial particles to proteinases and cobra venom phospholipase (Luzikov, Romashina) (267) 37
- Oxidative phosphorylation
 — in yeast. VIII. Osmotic and permeability properties of mitochondria isolated from wild-type yeast and from a respiration-deficient mutant (Kolarov et al.) (267) 457
- Oxidative phosphorylation
 — in yeast. IX. Modification of the mitochondrial adenine nucleotide translocation system in the oxidative phosphorylation-deficient mutant op₁ (Kolarov et al.) (267) 465
- P₇₀₀
 Difference spectra and extinction coefficients of — (Hiyama, Ke) (267) 160
- Palmitylcarnitine oxidation
 Inhibition of L(-)- — by α -ketoglutarate in rat liver mitochondria (Olson, Allgyer) (267) 238
- Permeability
 Relation of unsaturated fatty acid composition of rat liver mitochondria to oscillation period, spin label motion, — and oxidative phosphorylation (Williams et al.) (267) 444
- Permeability properties
 Oxidative phosphorylation in yeast. VIII. Osmotic and — of mitochondria isolated from wild-type yeast and from a respiration-deficient mutant (Kolarov et al.) (267) 457
- Peroxidase
 Cytochrome c reactivity in its complexes with mammalian cytochrome c oxidase and yeast — (Mochan, Nicholls) (267) 309
- Phospholipase
 Studies on stabilization of the oxidative phosphorylation system. II. Electron transfer-dependent resistance of succinate oxidase and NADH oxidase systems of submitochondrial particles to proteinase and cobra venom — (Luzikov, Romashina) (267) 37
- Photochemical charge separation
 One-way electron discharge subsequent to the — in Photosystem I (Ke) (267) 595
- Photochemical phosphorylation
 — of imidazole (Bishop) (267) 435
- Photochemistry
 Circular dichroism studies on the structure and the — of protochlorophyllide and chlorophyllide holochrome (Mathis, Sauer) (267) 498
- Photoconversion
 Kinetics of — of protochlorophyllide in etiolated bean leaves (Thorne, Boardman) (267) 104
- Photolyzed rhodopsin
 Biochemical aspects of the visual process. XIX. Formation of isorhodopsin from — by bacterial action (Rotmans et al.) (267) 583
- Photooxidation
 — of 3',3'-diaminobenzidine by blue-green algae and *Chlamydomonas reinhardtii* (Chua) (267) 179
- Photooxidation
 Effect of oxygen and benzoquinone concentration on the reversible spectrophotometric changes accompanying the — of porphyrins at low pH values (Quinlan) (267) 493
- Photophosphorylation
 Biogenesis of chloroplast membranes. XI. Development of — and proton pump activities in greening *Chlamydomonas reinhardtii* y-1 as measured with an open-cell preparation (Wallach et al.) (267) 125
- Photoreactive fragments
 Isolation and characteristics of small, soluble — of *Rhodospirillum rubrum* (Smith Jr. et al.) (267) 609
- Photosynthesis
 Characterization of primary reactants in

- bacterial ———. I. Comparison of the light-induced EPR signal ($g = 2.0026$) with that of a bacteriochlorophyll radical (McElroy et al.) (267) 363
- Photosynthetic carbon dioxide assimilation
Role of cyclic photophosphorylation in ——— by isolated chloroplasts (Schürmann et al.) (267) 111
- Photosynthetic material
Restorative effect of warming on the fluorescence intensity and fluorescence induction of ——— at 77°K (267) 341
- Photosynthetic systems
Magnetic field induced orientation of ——— (Geacintov et al.) (267) 65
- Photosystem I
One-way electron discharge subsequent to the photochemical charge separation in ——— (Ke) (267) 595
- Photosystem II
Effect of cold-storage of bean leaves on photosynthetic reactions of isolated chloroplasts. Inability to donate electrons to ——— and relation to manganese content (Margulies) (267) 96
- P_i
Effects of ——— and ADP on ATPase activity in chloroplasts (Carmeli, Lifshitz) (267) 86
- Plant mitochondria
Respiratory chain of ———. XIII. Redox state changes of cytochrome b_{562} in mung bean seedling mitochondria treated with antimycin A (Storey) (267) 48
- Polarised absorption spectroscopy
——— of chlorophyll-lipid membranes (Cherry et al.) (267) 512
- Porphyrins
Effect of oxygen and benzoquinone concentration on the reversible spectrophotometric changes accompanying the photooxidation of ——— at low pH values (Quinlan) (267) 493
- Primary electron acceptor
Evidence for the role of a bound ferredoxin as the ——— of Photosystem I in spinach chloroplasts (Evans et al.) (267) 530
- Proteinases
Studies on stabilization of the oxidative phosphorylation system. II. Electron transfer-dependent resistance of succinate oxidase and NADH oxidase systems of sub-mitochondrial particles to ——— and cobra venom phospholipase (Luzikov, Romashina) (267) 37
- Protochlorophyllide
Circular dichroism and fluorescence changes accompanying the ——— to chlorophyllide transformation in greening leaves and holochrome preparations (Schultz, Sauer) (267) 320
- Protochlorophyllide
Circular dichroism studies on the structure and the photochemistry of ——— and chlorophyllide holochrome (Mathis, Sauer) (267) 498
- Protochlorophyllide
Kinetics of photoconversion of ——— in etiolated bean leaves (Thorne, Boardman) (267) 104
- Proton pump
Biogenesis of chloroplast membranes. XI. Development of photophosphorylation and ——— activities in greening *Chlamydomonas reinhardtii* y-1 as measured with an open-cell preparation (Wallach et al.) (267) 125
- Pyridine-haem c
Redox potentials of the ——— system (Morton, Henderson) (267) 485
- Reaction centers
Identification of an electron acceptor in ——— of *Rhodospseudomonas spheroides* by EPR spectroscopy (Feher et al.) (267) 222
- Redox compartmentation
NAD(P)⁺ ——— in Ehrlich ascites tumour cells (Galeotti et al.) (267) 1
- Redox potentials
——— of pyridine-haem c system (Morton, Henderson) (267) 485
- Respiratory chain
Influence of oxygen and nitrate on the formation of the cytochrome pigments of the aerobic and anaerobic ——— of *Micrococcus denitrificans* (Sapshead, Wimpenny) (267) 388
- Respiratory chain
——— of plant mitochondria. XIII. Redox state changes of cytochrome b_{562} in mung bean seedling mitochondria treated with antimycin A (Storey) (267) 48
- Respiratory-chain components
New sensitive method for the spectral analysis of ——— in mitochondria (Muraoka et al.) (267) 291
- Rhodospseudomonas spheroides*
Identification of an electron acceptor in reaction centers of ——— by EPR spectroscopy (Feher et al.) (267) 222
- Rhodopsin
Biochemical aspects of the visual process. XIX. Formation of isorhodopsin from photolyzed ——— by bacterial action (Rotmans et al.) (267) 583
- Rhodospirillum rubrum*
Isolation and characteristics of small, soluble photoreactive fragments of ——— (Smith Jr. et al.) (267) 609
- Rhodospirillum rubrum*
Oxidation-reduction potential dependence of pyrophosphate-induced cytochrome and bacteriochlorophyll reactions in ——— (Dutton, Baltscheffsky) (267) 172
- Spectral analysis
New sensitive method for the ——— of respiratory-chain components in mitochondria (Muraoka et al.) (267) 291

- Spin label
Relation of unsaturated fatty acid composition of rat liver mitochondria to oscillation period, ——— motion, permeability and oxidative phosphorylation (Williams et al.) (267) 444
- Sr²⁺ uptake
——— by bean (*Phaseolus vulgaris*) mitochondria (Johnson, Wilson) (267) 398
- Submitochondrial particles
Menadiol as an electron donor for reversed oxidative phosphorylation in ——— (Taggart, Sanadi) (267) 439
- Submitochondrial particles
Studies on stabilization of the oxidative phosphorylation system. II. Electron transfer-dependent resistance of succinate oxidase and NADH oxidase systems of ——— to proteinases and cobra venom phospholipase (Luzikov, Romashina) (267) 37
- Succinate:cytochrome c reductase
Spectral evidence of multiple cytochromes b present in ——— (Yu et al.) (267) 300
- Succinate oxidase
Studies on stabilization of the oxidative phosphorylation system. II. Electron transfer-dependent resistance of ——— and NADH oxidase systems of submitochondrial particles to proteinases and cobra venom phospholipase (Luzikov, Romashina) (267) 37
- Sulphate-reducing bacterium
Evidence for the presence of a b-type cytochrome in the ——— *Desulphovibrio gigas*, and its role in the reduction of fumarate by molecular hydrogen (Hatchikian, le Gall) (267) 479
- Translocation
Oxidative phosphorylation in yeast. IX. Modification of the mitochondrial adenine nucleotide ——— system in the oxidative phosphorylation-deficient mutant *op₁* (Kolarov et al.) (267) 465
- Tropomyosin
Effects of ———, troponin and Ca²⁺ on the interaction between F-actin and heavy meromyosin (Nakaoka) (267) 558
- Troponin
Effects of tropomyosin, ——— and Ca²⁺ on the interaction between F-actin and heavy meromyosin (Nakaoka) (267) 558
- Ubiquinone
Influence of ——— on the rate of antimycin binding to submitochondrial particles (Nelson et al.) (267) 205
- Violaxanthin
Effect of dithiothreitol on ——— de-epoxidation and absorbance changes in the 500-nm region (Yamamoto, Kamite) (267) 538
