

SUBJECT INDEX

- Acyl-coenzyme A dehydrogenase
Phosphorylation coupled to ———-linked oxidation of fatty acids by liver and heart mitochondria (Bremer, Davis) (275) 298
- Aging
——— of the photosynthetic apparatus. IV. Similarity between the effects of aging and unsaturated fatty acids on isolated spinach chloroplasts as expressed by volume changes (Siegenthaler) (275) 182
- ATP-ADP exchange reaction
Membrane ATPase of *Escherichia coli*. I. Ion dependence and ——— (Roisin, Kepes) (275) 333
- ATPase
Energy transduction in photosynthetic bacteria. IV. Light-dependent ——— in photosynthetic membranes from *Rhodospseudomonas capsulata* (Melandri et al.) (275) 383
- ATPase
Membrane ——— of *Escherichia coli*. I. Ion dependence and ATP-ADP exchange reaction (Roisin, Kepes) (275) 333
- ATPase
Membrane potential generation by two reconstituted mitochondrial systems: Liposomes inlaid with cytochrome oxidase or with ——— (Jasaitis et al.) (275) 485
- ATPase
Stimulation of ——— activity of 30-S dynein with microtubular protein (Ootakawa) (275) 464
- ATP hydrolysis
——— and electron transfer in the nitro- genase reaction with different combinations of the iron protein and the molybdenum-iron protein (Ljones, Burris) (275) 93
- Bacteriochlorophyll
Fluorescence of ——— as related to the photochemistry of chromatophores of photosynthetic bacteria (Suzuki, Takamiya) (275) 358
- Bacteriochlorophyll
Interaction of photoactive ——— with the primary electron acceptor in the reaction centre of *Ectothiorhodospira shaposhnikovii* (Kononenko et al.) (275) 130
- Bacteriochlorophylls
Temperature dependence of absorption and fluorescence spectra of ——— in vivo and in vitro (Goedheer) (275) 169
- Brown adipose tissue
Studies on the energy state of isolated ——— mitochondria. The cytochrome b complex as a probe of the energy state of the mitochondrial inner membrane (Pedersen, Flatmark) (275) 135
- Calcium ion-activated tension
Effects of Mg^{2+} on submaximum ——— in skinned fibers of frog skeletal muscle (Kerrick, Donaldson) (275) 117
- Calcium ion binding
——— and Ca^{2+} -sensitizing functions of cardiac native tropomyosin, troponin, and tropomyosin (Surendranath Reddy, Honig) (275) 453
- Carnitine
———: The carrier transporting fatty acyls into mitochondria by means of an electrochemical gradient of H^+ (Levitsky, Skulachev) (275) 33
- β -Carotene
——— film at a water-air interface (Leblanc, Orger) (275) 102
- Chlamydomonas reinhardtii*
Relationship of structure, composition and Triton X-100 fractionation of chloroplast lamellae in wild type and two non-photosynthetic mutant strains of ——— (Picaud) (275) 414
- Chlamydomonas reinhardtii*
Spectroscopic analysis of low-fluorescent mutants of ——— blocked in their water-splitting, oxygen-evolving apparatus (Epel et al.) (275) 395
- Chlorophyll
Electron spin resonance in ^{13}C -labelled ——— and ^{13}C -labelled algae (Norris et al.) (275) 161
- Chloroplasts
Aging of the photosynthetic apparatus. IV. Similarity between the effects of aging and unsaturated fatty acids on isolated spinach ——— as expressed by volume changes (Siegenthaler) (275) 182
- Chloroplasts
Two-phase kinetics of proton release from ——— by acid-base transition (Nishizaki) (275) 177
- Chloroplast fragments
Presence of P700 in ——— prepared by short time incubation with Triton X-100 (Esser) (275) 199
- Chloroplast lamellae
Relationship of structure, composition and Triton X-100 fractionation of ——— in wild type and two non-photosynthetic mutant strains of *Chlamydomonas reinhardtii* (Picaud) (275) 414
- Chromatophores
Fluorescence of bacteriochlorophyll as related to the photochemistry of ——— of

- photosynthetic bacteria (Suzuki, Takamiya) (275) 358
- Chromatophores
Kinetics of the fluorescence change and P870 bleaching in ——— from *Rhodospirillum rubrum* (Malkin, Silberstein) (275) 369
- Chromatophores
Permeability of *Rhodospirillum rubrum* ——— to thiocyanate and perchlorate as detected by light-induced fluorochrome fluorescence changes and photophosphorylation (Gromet-Elhanan) (275) 125
- Cytochrome aa_3
Biochemical and biophysical studies on ———. VIII. Effect of cyanide on the catalytic activity (Nicholls et al.) (275) 279
- Cytochrome b
Evidence for the occurrence in submitochondrial particles of a dual respiratory chain containing different forms of ——— (Norling et al.) (275) 18
- Cytochromes b
Reactions of ——— in the red alga *Porphyridium aeruginum* (Amesz et al.) (275) 442
- Cytochromes b
Spectral study of ——— in yeast mitochondria and intact cells (Sato et al.) (275) 288
- Cytochrome b
Studies on the energy state of isolated brown adipose tissue mitochondria. The ——— complex as a probe of the energy state of the mitochondrial inner membrane (Pedersen, Flatmark) (275) 135
- Cytochrome b_5
Soluble ——— from human erythrocytes (Passon et al.) (275) 51
- Cytochrome b_5 reductase
Soluble ——— from human erythrocytes (Passon, Hultquist) (275) 62
- Cytochrome c peroxidase
——— isolated from *Thiobacillus novellus* (Yamanaka) (275) 74
- Cytochrome f
'Autoreduction' — an unusual property of pure spinach ——— (Garewal, Wasserman) (275) 437
- Cytochrome oxidase
Membrane potential generation by two reconstituted mitochondrial systems: Liposomes inlaid with ——— or with ATPase (Jasaitis et al.) (275) 485
- Cytochrome oxidase
New purification procedure and molecular properties of *Pseudomonas* ——— (Kuronen, Ellfolk) (275) 308
- Cytochrome P450
Anaerobic-nitrate, symbiotic and aerobic growth of *Rhizobium japonicum*: Effects on ———, other haemoproteins, nitrate and nitrite reductases (Daniel, Appleby) (275) 347
- Delayed light emission
Stimulation of millisecond ——— by KCl and NaCl gradients as a means of investigating the ionic permeability properties of the thylakoid membranes (Barber) (275) 105
- 3,5-Di-tert-butyl-4-hydroxybenzylidene-malononitrile
———; a new powerful uncoupler of respiratory-chain phosphorylation (Murao-ka, Terada) (275) 271
- Dynein
Stimulation of ATPase activity of 30-S ——— with microtubular protein (Oto-kawa) (275) 464
- Ectothiorhodospira shaposhidovii
Interaction of photoactive bacteriochlorophyll with the primary electron acceptor in the reaction centre of ——— (Kononenko et al.) (275) 130
- Electrochemical gradient
Carnitine: The carrier transporting fatty acyls into mitochondria by means of an ——— of H^+ (Levitsky, Skulachev) (275) 33
- Electron acceptors
Oxidation-reduction potentials of the ——— in laccases and stellacyanin (Reinhammar) (275) 245
- Electron acceptors
——— in reaction centre preparations from photosynthetic bacteria (Slooten) (275) 208
- Electron spin resonance
——— in ^{13}C -labelled chlorophyll and ^{13}C -labelled algae (Norris et al.) (275) 161
- Electron transfer
ATP hydrolysis and ——— in the nitrogenase reaction with different combinations of the iron protein and the molybdenum-iron protein (Ljones, Burris) (275) 93
- Electron transfer
Energy-linked ——— reactions in *Rhodopseudomonas viridis* (Jones, Saunders) (275) 427
- Fatty acids
Aging of the photosynthetic apparatus. IV. Similarity between the effects of aging and unsaturated ——— on isolated spinach chloroplasts as expressed by volume changes (Siegenthaler) (275) 182
- Fatty acids
Phosphorylation coupled to acyl-coenzyme A dehydrogenase-linked oxidation of ——— by liver and heart mitochondria (Bremer, Davis) (275) 298
- Fatty acyl transport
Carnitine: The carrier transporting fatty acyls into mitochondria by means of an electrochemical gradient of H^+ (Levitsky, Skulachev) (275) 33
- Fluorescence
Temperature dependence of absorption and ——— spectra of bacteriochlorophylls in vivo and in vitro (Goedheer) (275) 169

- Fluorescence changes
 Permeability of *Rhodospirillum rubrum* chromatophores to thiocyanate and perchlorate as detected by light-induced fluorescence ——— and by photophosphorylation (Gromet-Elhanan) (275) 125
- Fuscin
 ———, an inhibitor of respiration and oxidative phosphorylation in ox-neck muscle mitochondria (Cheah) (275) 1
- Growth conditions
 Study of the effect of ——— on chemostat-grown *Klebsiella aerogenes* and kinetic changes of a 500-nm absorption band (Harrison) (275) 83
- Haem protein
 Preliminary characterization of a variant co-binding ——— from *Nitrosomonas* (Erickson, Hooper) (275) 231
- Ionic permeability
 Stimulation of millisecond delayed light emission by KCl and NaCl gradients as a means of investigating the ——— properties of the thylakoid membranes (Barber) (275) 105
- Klebsiella aerogenes*
 Study of the effect of growth conditions on chemostat-grown ——— and kinetic changes of a 500-nm absorption band (Harrison) (275) 83
- Laccases
 Oxidation-reduction potentials of the electron acceptors in ——— and stellacyanin (Reinhammar) (275) 245
- Liposomes
 Membrane potential generation by two reconstituted mitochondrial systems: ——— inlayed with cytochrome oxidase or with ATPase (Jasaitis et al.) (275) 485
- Magnesium ions
 Effects of ——— on submaximum Ca^{2+} -activating tension in skinned fibers of frog skeletal muscle (Kerrick, Donaldson) (275) 117
- Manganous ion
 Evidence for the transport of ——— against an activity gradient by mitochondria (275) 302 (Puskin, Gunter)
- Membranes
 Separation of voltage-dependent photoemfs and conductances in Rudin - Mueller ——— containing magnesium porphyrins (Hong, Mauzerall) (275) 479
- Membrane ATPase
 ——— of *Escherichia coli*. I. Ion dependence and ATP-ADP exchange reaction (Roisin, Kepes) (275) 333
- Membrane potential generation
 ——— by two reconstituted mitochondrial systems: Liposomes inlayed with cytochrome oxidase or with ATPase (Jasaitis et al.) (275) 485
- Mitochondria
 Carnitine: The carrier transporting fatty acyls into ——— by means of an electrochemical gradient of H^+ (Levitsky, Skulachev) (275) 33
- Mitochondria
 Effect of oncotic pressure on heart muscle ——— (Bakeeva et al.) (275) 319
- Mitochondria
 Evidence for the transport of manganous ion against an activity gradient by ——— (Puskin, Gunter) (275) 302
- Mitochondria
 Fuscin, an inhibitor of respiration and oxidative phosphorylation in ox-neck muscle ——— (Cheah) (275) 1
- Mitochondria
 Phosphorylation coupled to acyl-coenzyme A dehydrogenase-linked oxidation of fatty acids by liver and heart ——— (Bremer, Davis) (275) 298
- Mitochondria
 Preparation of intact plant ——— (Douce et al.) (275) 148
- Mitochondria
 Spectral study of cytochromes b in yeast ——— and intact cells (Sato et al.) (275) 288
- Mitochondria
 Studies on the energy state of isolated brown adipose tissue ———. The cytochrome b complex as a probe of the energy state of the mitochondrial inner membrane (Pedersen, Flatmark) (275) 135
- Mitochondrial systems
 Membrane potential generation by two reconstituted ———: Liposomes inlayed with cytochrome oxidase or with ATPase (Jasaitis et al.) (275) 485
- Molybdenum
 Comparative aspects of incorporation of vanadium, tungsten or ——— into protein of nitrate reductase of *Spinacea oleracea* L. leaves (Notton, Hewitt) (275) 355
- Molybdenum-iron protein
 ATP hydrolysis and electron transfer in the nitrogenase reaction with different combinations of the iron protein and the ——— (Ljones, Burris) (275) 93
- Muscle
 Effects of Mg^{2+} on submaximum Ca^{2+} -activated tension in skinned fibers of frog skeletal ——— (Kerrick, Donaldson) (275) 117
- Nitrate reductase
 Activation of ——— by oxidation (Jetschmann et al.) (275) 276
- Nitrate reductase
 Anaerobic-nitrate, symbiotic and aerobic growth of *Rhizobium japonicum*: Effects on cytochrome P 450, other haemoproteins, ——— and nitrite reductase (Daniel, Appleby) (275) 347
- Nitrate reductase
 Comparative aspects of incorporation of vanadium, tungsten or molybdenum into

- protein of — of *Spinacea oleracea* L. leaves (Notton, Hewitt) (275) 355
- Nitrite reductase**
Anaerobic-nitrate, symbiotic and aerobic growth of *Rhizobium japonicum*: Effects on cytochrome P450, other haemoproteins, nitrate reductase and — (Daniel, Appleby) (275) 347
- Nitrogenase**
ATP hydrolysis and electron transfer in the — reaction with different combinations of the iron protein and the molybdenum-iron protein (Ljones, Burris) (275) 93
- Nitrosomonas**
Preliminary characterization of a variant co-binding haem protein from — (Erickson, Hooper) (275) 231
- Oxidation-reduction potentials**
— of electron acceptors in laccases and stellacyanin (Reinhammar) (275) 245
- Oxidative phosphorylation**
Fuscin, an inhibitor of respiration and — in ox-neck muscle mitochondria (Cheah) (275) 1
- Oxygen-evolving apparatus**
Spectroscopic analysis of low-fluorescent mutants of *Chlamydomonas reinhardtii* blocked in their water-splitting — (Epel et al.) (275) 395
- P700**
Presence of — in chloroplast fragments prepared by short time incubation with Triton X-100 (Esser) (275) 199
- P870**
Isolation and partial characterization of a — reaction centre complex from wild type *Rhodospirillum rubrum* (Noël et al.) (275) 219
- Pasteur effect**
— in the in vitro vascularly perfused rat small intestine (Lamers, Hülsmann) (275) 491
- Permeability**
— of *Rhodospirillum rubrum* chromatophores to thiocyanate and perchlorate as detected by light-induced fluorochrome fluorescence changes and by photophosphorylation (Gromet-Elhanan) (275) 125
- Phosphorylation**
— coupled to acyl-coenzyme A dehydrogenase-linked oxidation of fatty acids by liver and heart mitochondria (Bremer, Davis) (275) 298
- Photophosphorylation**
Permeability of *Rhodospirillum rubrum* chromatophores to thiocyanate and perchlorate as detected by light-induced fluorochrome fluorescence changes and by — (Gromet-Elhanan) (275) 125
- Photoregeneration**
Intermediate in the — of squid rhodopsin (Suzuki et al.) (275) 260
- Photosynthetic apparatus**
Aging of the —. IV. Similarity between the effects of aging and unsaturated fatty acids on isolated spinach chloroplasts as expressed by volume changes (Siegenthaler) (275) 182
- Photosynthetic bacteria**
Electron acceptors in reaction centre preparations from — (Slooten) (275) 208
- Photosynthetic bacteria**
Fluorescence of bacteriochlorophyll as related to the photochemistry of chromatophores of — (Suzuki, Takamiya) (275) 358
- Photosynthetic membranes**
Energy transduction in photosynthetic bacteria. IV. Light-dependent ATPase in — from *Rhodospseudomonas capsulata* (Melandri et al.) (275) 383
- Photosystems I and II**
Reconstitution of — using spinach subchloroplast fragments fractionated by Triton treatment (Ke, Shaw) (275) 192
- Plant mitochondria**
Preparation of intact — (Douce et al.) (275) 148
- Porphyridium aeruginosum**
Reactions of cytochromes b in the red alga — (Amesz et al.) (275) 442
- Porphyrins**
Separation of voltage-dependent photoemfs and conductances in Rudin-Mueller membranes containing magnesium — (Hong, Mauzerall) (275) 479
- Primary electron acceptor**
Interaction of photoactive bacteriochlorophyll with the — in the reaction centre of *Ectothiorhodospira shaposhnikovii* (Kononenko et al.) (275) 130
- Proton release**
Two-phase kinetics of — from chloroplast by acid-base transition (Nishizaki) (275) 177
- Phytochrome**
Difference spectrum distortion in non-homogeneous pigment associations: Abnormal — spectra in vivo (Spruit, Spruit) (275) 401
- Reaction centre**
Electron acceptors in — preparations from photosynthetic bacteria (Slooten) (275) 208
- Reaction centre**
Interaction of photoactive bacteriochlorophyll with the primary electron acceptor in the — of *Ectothiorhodospira shaposhnikovii* (Kononenko et al.) (275) 130
- Reaction centre**
Isolation and partial characterization of a P₈₇₀ — complex from wild type *Rhodospirillum rubrum* (Noël et al.) (275) 219
- Respiration**
Fuscin, an inhibitor of — and oxidative phosphorylation in ox-neck muscle mitochondria (Cheah) (275) 1

- Respiratory chain
Evidence for the occurrence in submitochondrial particles of a dual ——— containing different forms of cytochrome b (Norling et al.) (275) 18
- Respiratory-chain phosphorylation
3,5-Di-tert-butyl-4-hydroxybenzylidene-malononitrile; a new powerful uncoupler of ——— (Muraoka, Terada) (275) 271
- Rhodospseudomonas capsulata
Energy transduction in photosynthetic bacteria. IV. Light-dependent ATPase in photosynthetic membranes from ——— (Melandri et al.) (275) 383
- Rhodospseudomonas viridis
Energy-linked electron transfer reaction in ——— (Jones, Saunders) (275) 427
- Rhodopsin
Intermediate in the photoregeneration of squid ——— (Suzuki et al.) (275) 260
- Rhodospirillum rubrum
Isolation and partial characterization of a P_{870} reaction centre complex from wild type ——— (Noël et al.) (275) 219
- Rhodospirillum rubrum
Kinetics of the fluorescence change and P_{870} bleaching in chromatophores from ——— (Malkin, Silberstein) (275) 369
- Rhodospirillum rubrum
Permeability of ——— chromatophores to thiocyanate and perchlorate as detected by light-induced fluorochrome fluorescence changes and by photophosphorylation (Gromet-Elhanan) (275) 125
- Rudin-Mueller membranes
Separation of voltage-dependent photoemfs and conductances in ——— containing magnesium porphyrins (Hong, Mauzerall) (275) 479
- Small intestine
Pasteur effect in the in vitro vascularly perfused rat ——— (Lamers, Hülsmann) (275) 491
- Stellacyanin
Oxidation-reduction potentials of the electron acceptors in laccases and ——— (Reinhammar) (275) 245
- Subchloroplast fragments
Reconstitution of Photosystems I and II using spinach ——— fractionated by Triton treatment (Ke, Shaw) (275) 192
- Submitochondrial particles
Evidence for the occurrence in ——— of a dual respiratory chain containing different forms of cytochrome b (Norling et al.) (275) 18
- Thiobacillus novellus
Cytochrome c peroxidase isolated from ——— (Yamanaka) (275) 74
- Thylakoid membranes
Stimulation of millisecond delayed light emission by KCl and NaCl gradients as a means of investigating the ionic permeability properties of the ——— (Barber) (275) 105
- Triton
Reconstitution of Photosystems I and II using spinach subchloroplast fragments fractionated by ——— treatment (Ke, Shaw) (275) 192
- Triton X-100
Presence of P_{700} in chloroplast fragments prepared by short time incubation with ——— (Esser) (275) 199
- Tropomyosin
 Ca^{2+} -binding and Ca^{2+} -sensitizing functions of cardiac native ———, troponin, and tropomyosin (Surendranath Reddy, Honig) (275) 453
- Troponin
 Ca^{2+} -binding and Ca^{2+} -sensitizing functions of cardiac native tropomyosin, ———, and tropomyosin (Surendranath Reddy, Honig) (275) 453
- Tungsten
Comparative aspects of incorporation of vanadium, ——— or molybdenum into protein of nitrate reductase of Spinacea oleracea L. leaves (Notton, Hewitt) (275) 355
- Ubiquinone
——— and related compounds. XX. Co-enzymatic activity of ubiquinone and related compounds (II) (Morimoto, Imada) (275) 10
- Vanadium
Comparative aspects of incorporation of ———, tungsten or molybdenum into protein of nitrate reductase of Spinacea oleracea L. leaves (Notton, Hewitt) (275) 355
- Water-splitting
Spectroscopic analysis of low-fluorescent mutants of Chlamydomonas reinhardtii blocked in their ——— oxygen-evolving apparatus (Epel et al.) (275) 395
