

## SUBJECT INDEX

- Actin  
— and myosin A from leucocytes (Tatsumi et al.) (305) 433
- F-Actin  
Instability of — under the influence of  $\beta$ -actinin (Maruyama) (305) 679
- Actomyosin  
Active streaming in — solutions (Opalata, Tirosh) (305) 684
- Adenine nucleotide translocation  
— in Jerusalem-artichoke mitochondria (Passam et al.) (305) 88
- Adenine nucleotide translocation  
— in yeast mitochondria. Effect of inhibitors of mitochondrial biogenesis on the ADP translocase (Lauquin, Vignais) (305) 534
- Adenine nucleotide translocator  
Comparison of ADP and ATP as substrates for the — in rat-liver mitochondria (Souverein et al.) (305) 185
- ADP  
Comparison of — and ATP as substrates for the adenine nucleotide translocator in rat-liver mitochondria (Souverein et al.) (305) 185
- ADP translocase  
Adenine nucleotide translocation in yeast mitochondria. Effect of inhibitors of mitochondrial biogenesis on the — (Lauquin, Vignais) (305) 534
- Adrenal chromaffin granules  
NADH(NADPH):(acceptor) oxidoreductase of the — (Terland, Flatmark) (305) 206
- Antimycin-insensitive mutants  
— of *Candida utilis*. I. Isolation and characterization of mutant 28 (Grimmelikhuijzen, Slater) (305) 67
- ATP  
Comparison of ADP and — as substrates for the adenine nucleotide translocator in rat-liver mitochondria (Souverein et al.) (305) 185
- ATP-magnesium complexes  
"pH stat" titration method for the determination of the thermodynamic quantities associated with the formation of — (Sari et al.) (305) 1
- ATP synthesis  
Kinetic study of in vivo — during mono- and bichromatic illumination of *Zea mays*:  
Red-far red antagonist effect (Michel, Thibault) (305) 390
- ATPase  
— activity of Jerusalem-artichoke mitochondria and submitochondrial particles (Passam, Palmer) (305) 80
- ATPase  
Membrane — of *Escherichia coli*. III. Release into solution, allotropic properties and reconstitution of membrane-bound ATPase (Roisin, Kepes) (305) 249
- ATPase  
Studies on the activation of purified mitochondrial — by phospholipids (Swanlung et al.) (305) 519
- Aurovertin  
Binding of — to mitochondria, and its effect on mitochondrial respiration (Bertina et al.) (305) 503
- Azotobacter vinelandii  
Respiratory chain of — (Kauffman, van Gelder) (305) 260
- Brown adipose tissue mitochondria  
Studies on the energy state of isolated —. A comparative study of cold-stressed and warm-readapted guinea pigs (Pedersen, Flatmark) (305) 219
- Calcium uptake  
Role of mitochondrial — in contraction and relaxation of the human myometrium (Batra) (305) 428
- Carbon monoxide-binding c-type cytochrome  
Soluble — from the marine bacterium *Beneckea natriegens* (Weston, Knowles) (305) 11
- Cation movements  
— and respiratory response in yeast mitochondria treated with high  $\text{Ca}^{2+}$  concentrations (Balcavage et al.) (305) 41
- Chlorophyll a  
Light-induced changes in the fluorescence yield of — in *Anacystis nidulans*. I Relationship of slow fluorescence changes with structural changes (Mohanty, Govindjee) (305) 95
- Chlorophyll  $a_1$   
Electron transport between plastoquinone and — in chloroplasts (Haehnel) (305) 618
- Chlorophyll b  
Identity of the 640-nm component observed in — absorption spectra in vivo (Lep-

- pink, Thomas) (305) 610
- Chloroplasts**  
Electron transport and photophosphorylation in — as a function of the electron acceptor. II. Acceptor-specific inhibition by KCN (Ouitrakul, Izawa) (305) 105
- Chloroplasts**  
Mobility of membrane particles — in (Wang, Packer) (305) 488
- Chloroplast**  
Oxidation-reduction potential of membrane-bound — plastocyanin and cytochrome *f* (Malkin et al.) (305) 675
- Chloroplast-bound**  
Evidence for the identity of P430 of Photosystem I and — iron-sulfur protein (Ke, Beinert) (305) 689
- Cold-stressed guinea pigs**  
Studies on the energy state of isolated brown adipose tissue mitochondria. A comparative study of — and warm-readapted guinea pigs (Pedersen, Flatmark) (305) 219
- Conformational change**  
Energy-linked — of the mitochondrial membrane measured with the  $\text{NH}_2$ -modifying reagent, acrolein (Hirose et al.) (305) 52
- Coppers**  
Biochemical and biophysical studies on cytochrome c oxidase. X. Spectral and potentiometric properties of the haemes and coppers (Tiesjema et al.) (305) 19
- Creatine kinase**  
Triple localization of — in heart and skeletal muscle cells of the rat: evidence for the existence of myofibrillar and mitochondrial isoenzymes (Scholte) (305) 413
- c-Type cytochrome**  
Soluble CO-binding — from the marine bacterium *Beneckea natriegens* (Weston, Knowles) (305) 11
- Cyanide-resistant respiration**  
— and a branched cytochrome system in Kinetoplastidae (Hill, Cross) (305) 590
- Cytochromes**  
Comparative study of — between virus-transformed and untransformed cells (Sato et al.) (305) 493
- Cytochromes**  
Low-temperature spectral properties of the respiratory chain — of mitochondria from *Crithidia fasciculata* (Kusel, Storey) (305) 570
- Cytochrome**  
Soluble CO-binding c-type — from the native bacterium *Beneckea natriegens* (Weston, Knowles) (305) 11
- Cytochrome c oxidase**  
Biochemical and biophysical studies on —. X. Spectral and potentiometric properties of the haemes and coppers (Tiesjema et al.) (305) 19
- Cytochrome d**  
Respiratory chain of *Azotobacter vinelandii*. I. Spectral properties of — (Kauffman, van Gelder) (305) 260
- Cytochrome *f***  
Oxidation-reduction potential of membrane-bound chloroplast plastocyanin and — (Malkin et al.) (305) 675
- Cytochrome system**  
Cyanide-resistant respiration and a branched — in Kinetoplastidae (Hill, Cross) (305) 590
- Electron paramagnetic resonance**  
— studies on phosphorylating particles from *Azotobacter vinelandii* (DerVartanian et al.) (305) 173
- Electron transport**  
— between plastoquinone and chlorophyll  $a_1$  in chloroplasts (Haehnel) (305) 618
- Energy migration mechanism**  
Fluorescence lifetime and — in Photosystem I of plants (Borisov, Il'ina) (305) 364
- Energy storing enzyme-product complex**  
Kinetic study of the — in the hydrolysis of ATP by heavy meromyosin (Yamada et al.) (305) 642
- Energy transfer**  
New evidence supporting — between photosynthetic units (Joliet et al.) (305) 317
- Enzymatic mechanochemistry**  
— I. Interaction of heavy meromyosin with "immobilized adenosine triphosphate" (Lamed et al.) (305) 163
- Fast decay**  
Isolation of a — in submillisecond *Chlorella* luminescence (Lumpkin, Hillel) (305) 281
- Ferredoxin**  
Function of reduced pyridine nucleotide — oxidoreductases in saccharolytic Clostridia (Ingemann et al.) (305) 268
- Fluorescence**  
Light-induced changes in the — yield of chlorophyll *a* in *Anacystis nidulans*. I. Relationship of slow fluorescence changes with structural changes (Mohanty, Govindjee) (305) 95
- Fluorescence lifetime**  
— and energy migration mechanism in Photosystem I of plants (Borisov, Il'ina) (305) 364
- Guinea pigs**

- Studies on the energy state of isolated brown adipose tissue mitochondria. A comparative study of cold-stressed and warm-readapted — (Pedersen, Flatmark) (305) 219
- Haemes**  
Biochemical and biophysical studies on cytochrome c oxidase. X. Spectral and potentiometric properties of the — and coppers (Tiesjema et al.) (305) 19
- Heavy meromyosin**  
Enzymatic mechanochemistry. I. The interaction of — with "immobilized adenosine triphosphate" (Lamed et al.) (305) 163
- Heavy meromyosin**  
Kinetic study of the energy storing enzyme-product complex in the hydrolysis of ATP by — (Yamada et al.) (305) 642
- Iron accumulation**  
Energy-dependent — by isolated rat liver mitochondria. I. General features (Romslo, Flatmark) (305) 29
- Isocitrate dehydrogenase**  
NAD-linked — activity in rat-liver mitochondria (Hoek et al.) (305) 669
- Isometric tension**  
Oxygen consumption rate in vascular smooth muscle: Relation to — (Paul et al.) (305) 474
- Light-induced spectral changes**  
— of P700 in the 800-nm region in *Anacystis* and spinach lamellae (Inoue et al.) (305) 483
- Luminescence**  
Isolation of a fast decay in submillisecond Chlorella — (Lumpkin, Hillel) (305) 281
- Membrane-bound ATPase**  
Membrane ATPase of *Escherichia coli*. II. Release into solution, allotropic properties and reconstitution of — (Roisin, Kepes) (305) 249
- Membrane particles**  
Mobility of — in chloroplasts (Wang, Packer) (305) 488
- Mitochondria**  
Adenine nucleotide translocation in Jerusalem-artichoke — (Passam et al.) (305) 88
- Mitochondria**  
ATPase activity of Jerusalem-artichoke — and submitochondrial particles (Passam, Palmer) (305) 80
- Mitochondria**  
Cation movements and respiratory response in yeast — treated with high  $\text{Ca}^{2+}$  concentrations (Balcavage et al.) (305) 41
- Mitochondria**  
Fractionation by sucrose density gradient centrifugation of membrane fragments derived by sonic disruption of beef heart — (Huang et al.) (305) 455
- Mitochondrial ATPase**  
Studies on the activation of purified — by phospholipids (Swanlung et al.) (305) 519
- Mitochondrial isoenzymes**  
Triple localization of creatine kinase in heart and skeletal muscle cells of the rat: evidence for the existence of myofibrillar and — (Scholte) (305) 413
- Mitochondrial membrane**  
Energy-linked conformational change of the — measured with the  $\text{NH}_2$ -modifying reagent, acrolein (Hirose et al.) (305) 52
- Mitochondrial respiration**  
Binding of aurovertin to mitochondria, and its effect on — (Bertina et al.) (305) 503
- Mitochondrial structure**  
Protective effect of nupercaine on — (Aleksandrowicz et al.) (305) 59
- Myofibrillar isoenzymes**  
Triple localization of creatine kinase in heart and skeletal muscle cells of the rat: evidence for the existence of — and mitochondrial isoenzymes (Scholte) (305) 413
- Myosin**  
Nucleotide complexes of — in glycerol-extracted muscle fibres (Marston) (305) 397
- Myosin A**  
Actin and — from leucocytes (Tatsumi et al.) (305) 433
- NAD-linked isocitrate dehydrogenase**  
— activity in rat-liver mitochondria (Hoek et al.) (305) 669
- NADH(NADPH):(acceptor) oxidoreductase**  
— activities of the bovine adrenal chromaffin granules (Terland et al.) (305) 206
- NADH oxidase**  
Function and the localization of ubiquinone in the — and succinate oxidase systems (King, Drews) (305) 230
- Nicotinamide dinucleotide phosphate (reduced)**  
Oxidation of — by submitochondrial particles from beef heart (Rydström et al.) (305)
- Nicotinamide hypoxanthine dinucleotide phosphate (reduced)**  
Oxidation of — by intact rat liver mitochondria (Tischler, Fisher) (305) 199
- Nitrogenase**  
Nitrogenase. IV. Simple method of purification to homogeneity of — components from *Azotobacter vinelandii* (Shah, Brill) (305) 445
- Nucleotide complexes**  
— of myosin in glycerol-extracted muscle fibres (Marston) (305) 397

- Nupercaine  
Protective effect of — on mitochondrial structure (Aleksandrowicz et al.) (305) 59
- Oxidase  
Function and the localization of ubiquinone in the NADH and succinate — systems of *Rhodopseudomonas palustris* (King, Drews) (305) 230
- Oxidation-reduction  
— potential of membrane-bound chloroplast plastocyanin and cytochrome *f* (Malin et al.) (305) 675
- Oxidative phosphorylation  
— and effects of aerobic conditions on *Rhodopseudomonas viridis* (Saunders, Jones) (305) 581
- Oxidative phosphorylation  
Uncoupling of — by a stable free radical and its diamagnetic homologue (Coleman) (305) 179
- Oxygen consumption rate  
— in vascular smooth muscle: Relation to isometric tension (Paul et al.) (305) 474
- Oxygen production  
Feedback controlling — in a cross-reaction between two photosystems in photosynthesis (Diner, Mauzerall) (305) 329
- P430  
Evidence for the identity of — of Photosystem I and chloroplast-bound iron-sulfur protein (Ke, Beinert) (305) 689
- P700  
Light-induced spectral changes of — in the 800-nm region in *Anacystis* and spinach lamellae (Inoue et al.) (305) 483
- pH dependence  
Change in — and sequential inhibition of photosynthetic activity in chloroplasts by unsaturated fatty acids (Siegenthaler) (305) 153
- "pH stat" titration  
— method for the determination of the thermodynamic quantities associated with the formation of ATP-magnesium complexes (Sari et al.) (305) 1
- Phospholipids  
Studies on the activation of purified mitochondrial ATPase by — (Swanlung et al.) (305) 519
- Phosphorylating particles  
EPR studies on — from *Azotobacter vinelandii* (DerVartanian et al.) (305) 173
- Phosphorylation  
Stoichiometry of reduction and — during illumination of intact chloroplasts (Heber) (305) 140
- Phosphorylation reaction  
Electron transport and phosphorylation in chloroplasts as a function of the electron acceptor. III. A dibromothymoquinone-insensitive — associated with Photosystem II (Izawa et al.) (305) 119
- Photochemical reaction centres  
Pigment content and molar extinction coefficients of — from *Rhodopseudomonas spheroides* (Straley et al.) (305) 597
- Photophosphorylation  
Electron transport and — in chloroplasts as a function of the electron acceptor. II. Acceptor-specific inhibition by KCN (Ouitrakul, Izawa) (305) 105
- Photophosphorylation  
Electron transport and — in chloroplasts as a function of the electron acceptor. III. A dibromothymoquinone-insensitive phosphorylation reaction associated with Photosystem II (Izawa et al.) (305) 119
- Photophosphorylation  
Lipophilicity and catalysis of —. II. Quinoid compounds as artificial carriers in cyclic photophosphorylation and photoreductions by Photosystem I (Hauska et al.) (305) 632
- Photoreductions  
Properties of — by Photosystem II in isolated chloroplasts. An energy-conserving step in the photoreduction of benzoquinones by Photosystem II in the presence of dibromothymoquinone (Trebst, Reimer) (305) 129
- Photosynthesis  
Feedback controlling oxygen production in a cross-reaction between two photosystems in — (Diner, Mauzerall) (305) 329
- Photosynthesis  
Turnover times of — and redox properties of the pool of electron carriers between the photosystems (Diner, Mauzerall) (305) 353
- Photosynthetic activity  
Change in pH dependence and sequential inhibition of — in chloroplasts by unsaturated fatty acids (Siegenthaler) (305) 153
- Photosynthetic mutants  
Reversion of *Scenedesmus* — (Raps) (305) 384
- Photosynthetic units  
New evidence supporting energy transfer between — (Joliot et al.) (305) 317
- Photosystems  
Feedback controlling oxygen production in a cross-reaction between two — in photosynthesis (Diner, Mauzerall) (305) 329

Photosystems

Turnover times of photosynthesis and redox properties of the pool of electron carriers between the — (Diner, Mauzerall) (305) 353

Photosystem I

Evidence for the identity of P430 of — and chloroplast-bound iron-sulfur protein (Ke, Beinert) (305) 689

Photosystem I

Fluorescence lifetime and energy migration mechanism in — of plants (Borisov, Il'ina) (305) 364

Photosystem I

Lipophilicity and catalysis of photophosphorylation. II. Quinoid compounds as artificial carriers in cyclic photophosphorylation and photoreductions by — (Hauska et al.) (305) 632

Photosystem I

Polycation inhibition of chloroplast — (Berg et al.) (305) 372

Photosystem II

Different types of quenching involved in — centres (Joliot, Joliot) (305) 302

Photosystem II

Properties of photoreductions by — in isolated chloroplasts. An energy-conserving step in the photoreduction of benzoquinones by Photosystem II in the presence of dibromothymoquinone (Trebst, Reimer) (305) 129

Plastoquinone

Electron transport between — and chlorophyll  $a_1$  in chloroplasts (Haehnel) (305) 618

Potentiometric properties

Biochemical and biophysical studies on cytochrome c oxidase. X. Spectral and — of the haemes and coppers (Tiesjema et al.) (305) 19

Pyridine nucleotide(reduced)-ferredoxin oxidoreductases

Function of — in saccharolytic Clostridia (Jungermann et al.) (305) 268

Quinoid compounds

Lipophilicity and catalysis of photophosphorylation. II. — as artificial carriers in cyclic photophosphorylation and photoreductions by Photosystem I (Hauska et

al.) (305) 632

Redox properties

Turnover times of photosynthesis and — of the pool of electron carriers between the photosystems (305) 353

Respiratory response

Cation movements and — in yeast mitochondria treated with high  $Ca^{2+}$  concentrations (Balcavage et al.) (305) 41

Smooth muscle

Oxygen consumption rate in vascular —: Relation to isometric tension (Paul et al.) (305) 474

Spermatozoa

Energy conservation capacity and morphological integrity of mitochondria in hypotonically treated rabbit epididymal — (Keyhani, Storey) (305) 557

Stable free radical

Uncoupling of oxidative phosphorylation by a — and its diamagnetic homologue (Coleman) (305) 179

Submitochondrial particles

Oxidation of nicotinamide dinucleotide phosphate by — from beef heart (Rydström et al.) (305)

Succinate oxidase

Function and the localization of ubiquinone in the NADH oxidase and — systems of *Rhodopseudomonas palustris* (King, Drews) (305) 230

T-jump thermoluminescence

Kinetic characterization of — in isolated chloroplasts (Malkin, Hardt) (305) 292

Ubiquinone

Function and the localization of — in the NADH and succinate oxidase systems of *Rhodopseudomonas palustris* (King, Drews) (305) 230

Virus-transformed cells

Comparative study of cytochromes between — and untransformed cells (Sato et al.) (305) 493

Warm-readapted guinea pigs

Studies on the energy state of isolated brown adipose tissue mitochondria. A comparative study of cold-stressed-guinea pigs and — (Pedersen, Flatmark) (305) 219
