

SUBJECT INDEX

- Adenine nucleotides
Tight binding of — to beef-heart mitochondrial ATPase (Harris et al.) (314) 149
- ADP fluorescent analogue
Kinetic study of the binding of an — to mitochondrial ATPase (Tondre, Hammes) (314) 245
- Acidophilic thermophilic bacterium
Acidostability of an — (Yamazaki et al.) (314) 257
- Acidostability
— of an acidophilic thermophilic bacterium (Yamazaki et al.) (314) 257
- Alkylhydroxynaphthoquinones
Inhibition of the mitochondrial respiratory chain by —: Reversal on discharge of the energized state (Howland et al.) (314) 154
- ANDRY agent, see deactivation-accelerating agent (Renger) (314) 390
- Ascorbate oxidation
Role of the superoxide free radical ion in photosynthetic — and ascorbate-mediated photophosphorylation (Elstner, Kramer) (314) 340
- ATPase
Calcium ion control of platelet thrombosthenin — activity (Hanson et al.) (314) 382
- ATPase
Essential role of membrane — or coupling factor for anaerobic growth and anaerobic active transport in *Escherichia coli* (Yamamoto et al.) (314) 267
- ATPase
Kinetic study of the binding of an ADP fluorescent analogue to mitochondrial — (Tondre, Hammes) (314) 245
- ATPase
Tight binding of adenine nucleotides to beef-heart mitochondrial — (Harris et al.) (314) 149
- ATP formation
Kinetics of — and proton efflux by acid-base transition in chloroplasts (Nishizaki) (314) 312
- Bacteriochlorophyll
Monomolecular films of — and derivatives at an air-water interface: Surface and spectral properties (Reinach et al.) (314) 360
- Bioelectrical response
— of *Nitella flexilis* cell to illumination: A new possible state of plasmalemma in a plant cell (Volkov) (314) 83
- Bioluminescence
Similarities in the — from the Pennatulacea (Wampler et al.) (314) 104
- Bipyridylum quaternary salts
— and related compounds. V. Pulse radiolysis studies of the reaction of paraquat radical with oxygen. Implications for the mode of action of bipyridyl herbicides (Farrington et al.) (314) 372
- C-550
Photoreduction of — and oxidation of cytochrome b_{559} in chloroplasts: Dependence on the state of Photosystem II (Vermeglio, Mathis) (314) 57
- Chlorophyll a
— forms in *Phaeodactylum tricornutum*: Comparison with other diatoms and brown algae (Goedheer) (314) 191
- Chloroplasts
Kinetics of ATP formation and proton efflux by acid-base transition in — (Nishizaki) (314) 312
- Chloroplasts
Measurement of cyclic photophosphorylation in isolated — by determination of hydrogen ion consumption. An evaluation of the method using titration at constant pH (Lilley, Walker) (314) 354
- Chloroplast membranes
Purification of cytochrome b_6 . A tightly bound protein in — (Stuart, Wasserman) (314) 284
- Chloroplast stroma
Alkalization of the — caused by light-dependent proton flux into the thylakoid space (Heldt et al.) (314) 224
- Citrulline synthesis
Competition for energy between phosphoenolpyruvate synthesis and — in guinea-pig liver mitochondria (Bryła et al.) (314) 411
- CO-binding pigments
— and the functional terminal oxidase of the trypanosomatid hemoflagellate *Crithidia fasciculata* (Kusel, Storey) (314) 164
- Coupling factor
Essential role of membrane ATPase or — for anaerobic growth and anaerobic active transport in *Escherichia coli* (Yamamoto et al.) (314) 267

- Coupling factor CF₁
 Quantitative determination of — of chloroplasts (Strotmann et al.) (314) 202
- Cyanide
 Respiratory chain of *Azotobacter vinelandii*. II. The effect of — on cytochrome d (Kauffman, van Gelder) (314) 276
- Cytochrome b₆
 Purification of —. A tightly bound protein in chloroplast membranes (Stuart, Wasserman) (314) 284
- Cytochrome b₅₅₉
 Photoreduction of C-550 and oxidation of — in chloroplasts: Dependence on the state of Photosystem II (Vermeglio, Mathis) (314) 57
- Cytochrome c
 Reaction of — with one-electron redox reagents. I. Reduction of ferricytochrome c by the hydrated electron produced by pulse radiolysis (Lichtin et al.) (314) 117
- Cytochrome d
 Respiratory chain of *Azotobacter vinelandii*. II. The effect of cyanide on — (Kauffman, van Gelder) (314) 276
- Cytochrome P-450
 Spectral properties of — from microsomes isolated from control, phenobarbital- and naphthalene-treated houseflies (Capdevila et al.) (314) 93
- Deactivation-accelerating agent
 Studies on the mechanism of destabilization of the positive charges trapped in the photosynthetic water-splitting enzyme system Y by a — (Renger) (314) 390
- 3-(3,4-Dichlorophenyl)-1,1-dimethylurea
 Action of — on the water-splitting enzyme system Y of photosynthesis (Renger) (314) 113
- Electron spin resonance
 — characterization of Chromatium D hemes, non-heme irons and the components involved in primary photochemistry (314) 178
- Electron transfer
 — between the two photosystems in spinach chloroplasts (Bouges-Bocquet) (314) 250
- Electron transport chain
 Studies on the energy coupling sites of photophosphorylation. I. Separation of Site I and Site II by partial reactions of the chloroplast — (Gould, Izawa) (314) 211
- Electron transport pathway
 Site of KCN inhibition in the photosynthetic — (Izawa) (314) 328
- Energy coupling
 Studies on the — sites of photophosphorylation. I. Separation of Site I and Site II by partial reactions of the chloroplast electron transport chain (Gould, Izawa) (314) 211
- Energy transduction
 — in photosynthetic bacteria. VI. Respiratory sites of energy conservation in membranes from dark-grown cells of *Rhodospseudomonas capsulata* (Baccarini Meandri et al.) (314) 298
- Energy transfer
 — in photosynthesis (Colbow) (314) 320
- Fluorescence excitation spectra
 — and the relative numbers of pigment molecules in reaction centres from *Rhodospseudomonas spheroides* (Slooten) (314) 15
- Haems
 Electron spin resonance characterization of Chromatium D — non-haem irons and the components involved in primary photochemistry (Dutton, Leigh) (314) 178
- Inner membrane
 Fluorescent labelling of the mitochondrial — (Brocklehurst et al.) (314) 136
- Light-dependent proton flux
 Alkalization of the chloroplast stroma caused by — into the thylakoid space (Heldt et al.) (314) 224
- Linear dichroism
 Orientation of pigments and structural proteins in the photosynthetic membrane of spinach chloroplasts: A — study (Breton et al.) (314) 42
- Membrane ATPase
 Essential role of — or coupling factor for anaerobic growth and anaerobic active transport in *Escherichia coli* (Yamamoto et al.) (314) 267
- Mitochondrial inner membrane
 Fluorescent labelling of the — (Brocklehurst et al.) (314) 136
- Muscle mitochondria
 Effect of ruthenium red on oxidative phosphorylation and the calcium and magnesium content of skeletal — of normal and BIO 14.6 dystrophic hamsters (Thakar et al.) (314) 8
- Non-cyclic photophosphorylation
 Stoichiometry (ATP/2e⁻ ratio) of — in isolated spinach chloroplasts (Reeves, Hall) (314) 66
- Non-haem irons
 Electron spin resonance characterization of Chromatium D haems, — and the components involved in primary photochemistry (Dutton and Leigh) (314) 178
- O₂-evolving system

- Kinetic analysis of the oxidizing and reducing sides of the — of photosynthesis (Radmer, Kok) (314) 28
- Oxidative phosphorylation
Effect of ruthenium red on — and the calcium and magnesium content of skeletal muscle mitochondria of normal and BIO 14.6 dystrophic hamsters (Thakar et al.) (314) 8
- Paraquat
Bipyridylum quaternary salts and related compounds. V. Pulse radiolysis studies of the reaction of — radical with oxygen. Implications for the mode of action of bipyridyl herbicides (Farrington et al.) (314) 372
- Phosphoenolpyruvate synthesis
Competition for energy between — and citrulline synthesis in guinea-pig liver mitochondria (Bryla et al.) (314) 411
- Photophosphorylation
Measurement of cyclic — in isolated chloroplasts by determination of hydrogen ion consumption. An evaluation of the method using titration at constant pH (Lilley, Walker) (314) 354
- Photophosphorylation
Role of the superoxide free radical ion in photosynthetic ascorbate oxidation and ascorbate-mediated — (Elstner, Kramer) (314) 340
- Photophosphorylation
Stoichiometry ($\text{ATP}/2e^-$ ratio) of non-cyclic — in isolated spinach chloroplasts (Reeves, Hall) (314) 66
- Photophosphorylation
Studies on the energy coupling sites of —. I. Separation of Site I and Site II by partial reactions of the chloroplast electron transport chain (Gould, Izawa) (314) 211
- Photosynthesis
Action of 3-(3,4-dichlorophenyl)-1,1-dimethylurea on the water-splitting enzyme system Y of — (Renger) (314) 113
- Photosynthesis
Energy transfer in — (Colbow) (314) 320
- Photosynthesis
Kinetic analysis of the oxidizing and reducing sides of the O_2 -evolving system of — (Radmer, Kok) (314) 28
- Photosynthetic bacteria
Energy transduction in —. VI. Respiratory sites of energy conservation in membranes from dark-grown cells of *Rhodospseudomonas capsulata* (Baccarini Melandri et al.) (314) 298
- Photosynthetic CO_2 incorporation
— by isolated leaf cell protoplasts (Wegmann, Mühlbach) (314) 79
- Photosynthetic electron transport pathway
Site of KCN inhibition in the — (Izawa et al.) (314) 328
- Photosynthetic membrane
Orientation of pigments and structural proteins in the — of spinach chloroplasts: A linear dichroism study (Breton et al.) (314) 42
- Photosynthetic water-splitting enzyme system Y
Studies on the mechanism of destabilization of the positive charges trapped in the — by a deactivation-accelerating agent (Renger) (314) 390
- Photosystems
Electron transfer between the two — in spinach chloroplasts (Bouges-Bocquet) (314) 250
- Photosystem II
Photoreduction of C-550 and oxidation of cytochrome b_{559} in chloroplasts: Dependence on the state of — (Vermeglio, Mathis) (314) 57
- Pigments
Orientation of — and structural proteins in the photosynthetic membrane of spinach chloroplasts: A linear dichroism study (Breton et al.) (314) 42
- Plasmalemma
Bioelectrical response of the *Nitella flexilis* cell to illumination: A new possible state of — in a plant cell (Volkov) (314) 83
- Platelet thrombosthenin
Calcium ion control of — ATPase activity (Hanson et al.) (314) 382
- Potential changes
Light-induced — across the chloroplast enclosing membranes as expressions of primary events at the thylakoid membrane (Vredenberg et al.) (314) 261
- Primary photochemistry
Electron spin resonance characterization of Chromatium D haems, non-haem irons and the components involved in — (Dutton, Leigh) (314) 178
- Proton efflux
Kinetics of ATP formation and — by acid-base transition in chloroplasts (Nishizaki) (314) 312
- Pulse radiolysis
Reaction of cytochrome c with one-electron redox reagents. I. Reduction of ferricytochrome c by the hydrated electron produced by — (Lichtin et al.) (314) 117
- Pyruvate oxidation
Regulation of — in mitochondria isolated

- from foetal and adult rat liver (Berger, Hommes) (314) 1
- Reaction centres
- Fluorescence excitation spectra and the relative numbers of pigment molecules in — from *Rhodospseudomonas spheroides* (Slooten) (314) 15
- Respiratory chain
- of *Azotobacter vinelandii*. II. The effect of cyanide on cytochrome d (Kauffman, van Gelder) (314) 276
- Respiratory chain
- Inhibition of the mitochondrial — by alkylhydroxynaphthoquinones: Reversal on discharge of the energized state (Howland et al.) (314) 154
- Respiratory sites
- Energy transduction in photosynthetic bacteria. VI. — of energy conservation in membranes from dark-grown cells of *Rhodospseudomonas capsulata* (Baccarini Melandri et al.) (314) 298
- Site I
- Studies on the energy coupling sites of photophosphorylation. I. Separation of — and Site II by partial reactions of the chloroplast electron transport chain (Gould, Izawa) (314) 211
- Site II
- Studies on the energy coupling sites of photophosphorylation. I. Separation of Site I and — by partial reactions of the chloroplast electron transport chain (Gould, Izawa) (314) 211
- Structural proteins
- Orientation of pigments and — in the photosynthetic membrane of spinach chloroplasts: A linear dichroism study (Breton et al.) (314) 42
- Superoxide free radical
- Role of the — ion in photosynthetic ascorbate oxidation and ascorbate-mediated photophosphorylation (Elstner, Kramer) (314) 340
- Terminal oxidase
- CO-binding pigments and the functional — of the trypanosomatid hemoflagellate *Crithidia fasciculata* (Kusel, Storey) (314) 164
- Thrombosthenin
- Calcium ion control of platelet — ATPase activity (Hanson et al.) (314) 382
- Thylakoid membrane
- Light-induced potential changes across the chloroplast enclosing membranes as expressions of primary events at the — (Vredenberg et al.) (314) 261
- Thylakoid space
- Alkalization of the chloroplast stroma caused by light-dependent proton flux into the — (Heldt et al.) (314) 224
- Trypanosomatid hemoflagellate
- CO-binding pigments and the functional terminal oxidase of the — *Crithidia fasciculata* (Kusel, Storey) (314) 164
- Water-splitting enzyme system Y
- Action of 3-(3,4-dichlorophenyl)-1,1-dimethylurea on the — of photosynthesis (Renger) (314) 113
- Water-splitting enzyme system Y
- Studies on the mechanism of destabilization of the positive charges trapped in the photo synthetic — by a deactivation-accelerating agent (Renger) (314) 390

ERRATA

- p. 186, line 25 from bottom: change "¹IC-" into "¹⁴C-".
line 23 from bottom: change "10 500 + g" into "10 500 × g".
- p. 187, Eqn 6 should read:
$$\ln(100 - \% \text{ exchange}) = [-v(E+I)t/EI] + \ln 100$$
- p. 676, Figs 1 and 2 should be interchanged.
