

SUBJECT INDEX

- Absorbance**
 Light-induced changes of fluorescence and ——— in spinach chloroplasts at -40°C (Amesz et al) (325) 472
- Actin**
 Does ATP cause relaxation by binding to ——— or its regulatory proteins? (Weber, Bremel) (325) 333
- Antimycin**
 Cytochrome b spectrum of plant mitochondria and its response to ATP and ——— (Passam et al) (325) 54
- Ascorbate**
 The mechanism of the oxidation of ——— and Mn^{2+} by chloroplasts The role of the radical superoxide (Epel, Neumann) (325) 520
- ATP**
 Cytochrome b spectrum of plant mitochondria and its response to ——— and antimycin (Passam et al) (325) 54
- ATP**
 Does ——— cause relaxation by binding to actin or its regulatory proteins? (Weber, Bremel) (325) 333
- ATPase**
 Affinities of ATP for the dinitrophenol-induced ——— (Verdouw, Bertina) (325) 385
- ATPase**
 Effects of ruthenium red on Ca^{2+} uptake and ——— of sarcoplasmic reticulum of rabbit skeletal muscle (Vale, Carvalho) (325) 29
- Atractyloside**
 ——— inhibition of adenine nucleotide transport in cauliflower mitochondria (Jung, Hanson) (325) 189
- b-type cytochromes**
 ——— of bovine heart mitochondria absorption spectra, enzymatic properties, and distribution in the electron transfer complexes (Davis et al) (325) 341
- Bacteriochlorophyll**
 Absorption changes of carotenoids and ——— in energized chromatophores of *Rhodospirillum rubrum* (Barsky, Samuilov) (325) 454
- Bacteriochlorophyll**
 Effect of oxidation-reduction potential on light-induced cytochrome and ——— reactions in chromatophores from the photosynthetic green bacterium *Chlorobium* (Knaff et al) (325) 94
- Bacteriochlorophyll**
 Shifts of ——— and carotenoid absorbance bands linked to cytochrome c-555 photooxidation in *Chromatium* (Case, Parson) (325) 441
- Black lipid membranes**
 Determination of chlorophyll porphyrin ring orientation in ——— by photovoltage spectroscopy (Weller Jr, Tien) (325) 433
- Brown adipose tissue**
 Energy-dependent redox reactions of two b-type cytochromes in ——— mitochondria (Flatmark, Pedersen) (325) 16
- C-550**
 ——— in photosystem II subchloroplast particles (Kitajima, Butler) (325) 558
- C550**
 Light-induced oxidation-reduction reactions in a cell-free preparation from the blue-green alga *Nostoc muscorum*. The role of cytochrome f, cytochrome b_{558} , ———, and P700 in noncyclic electron transport (Knaff) (325) 284
- Calcium ion transport**
 Energy-dependent iron accumulation by isolated rat liver mitochondria II Relationship to the active ——— (Romslo, Flatmark) (325) 38
- Calcium ion uptake**
 Effects of ruthenium red on ——— and ATPase of sarcoplasmic reticulum of rabbit skeletal muscle (Vale, Carvalho) (325) 29
- Carotenoid absorbance bands**
 Shifts of bacteriochlorophyll and ——— linked to cytochrome c-555 photooxidation in *Chromatium* (Case, Parson) (325) 441
- Carotenoids**
 Absorption changes of ——— and bacteriochlorophyll in energised chromatophores of *Rhodospirillum rubrum* (Barsky, Samuilov) (325) 454
- Carotenoid shifts**
 Kinetic and redox potentiometric resolution of the ——— in *Rhodopseudomonas spheroides* chromatophores their relationship to electric field alterations in electron transport and energy coupling (Jackson, Dutton) (325) 102
- Chlorophyll**
 Determination of ——— porphyrin ring

- orientation in black lipid membranes by photovoltage spectroscopy (Weller Jr, Tien) (325) 433
- Chlorophyll a_2
Kinetics of the fluorescence yield of ——— in spinach chloroplasts at liquid nitrogen temperature during and following a 16 μ s flash (Den Haan et al) (325) 120
- Chlorophyll a fluorescence
Induction of ——— in isolated spinach chloroplasts at liquid nitrogen temperature (Murata et al) (325) 463
- Chloroplast
Effect of oxidizing treatment on ——— Photosystem II reactions (Malkin, Knaff) (325) 336
- Chloroplasts
Effect of dithionite on fluorescence and luminescence of ——— (Velthuys, Ames) (325) 126
- Chloroplasts
Effects of electron transport inhibitors on millisecond delayed light emission from ——— (Felker et al.) (325) 193
- Chloroplasts
Effects of tetraphenylboron on energy-linked reactions in spinach ——— (Fiolet, van Dam) (325) 230
- Chloroplasts
Induction of chlorophyll a fluorescence in isolated spinach ——— at liquid nitrogen temperature (Murata et al) (325) 463
- Chloroplasts
Kinetics of the fluorescence yield of chlorophyll a_2 in spinach ——— at liquid nitrogen temperature during and following a 16 μ s flash (Den Haan et al) (325) 120
- Chloroplasts
On the decarboxylation of α -keto acids by isolated ——— (Elstner, Heupel) (325) 182
- Chloroplasts
Rapid fluorescence changes observed in ———: Their relationship to the O_2 evolving system (Zankel) (325) 138
- Chloroplast membranes
Polypeptides of stacked and unstacked *Chlamydomonas reinhardtii* ——— and their relation to Photosystem II activity (Levine, Duram) (325) 565
- Chloroplast structure
Composition of the photosystems and ——— in extreme shade plants (Anderson et al) (325) 573
- Choline oxidation
Uncoupler-stimulated ——— by rat-liver mitochondria (De Ridder et al) (325) 397
- Chromatophores
Absorption changes of carotenoids and bacteriochlorophyll in energised ——— of *Rhodospirillum rubrum* (Barsky, Samuilov) (325) 454
- Chromatophores
Effect of oxidation-reduction potential on light-induced cytochrome and bacteriochlorophyll reactions in ——— from the photosynthetic green bacterium *Chlorobium* (Knaff et al) (325) 94
- Cytochrome a_3
Influence of pH on the synthesis of the oxidase (——) in *Bacillus coagulans*, a thermophilic microorganism capable of "respiratory adaptation" (Frade, Char) (325) 424
- Cytochrome b
—— spectrum of plant mitochondria and its response to ATP and antimycin (Passam et al) (325) 54
- Cytochrome b_6
Uncoupler-dependent decrease in midpoint potential of chloroplast ——— (Bohme, Cramer) (325) 275
- Cytochrome b_{558}
Light-induced oxidation-reduction reactions in a cell-free preparation from the blue-green alga *Nostoc muscorum*: The role of cytochrome f , ———, C550, and P700 in noncyclic electron transport (Knaff) (325) 284
- Cytochrome b -like pigment
New ——— with a peak at 567 nm and a low redox potential in denitrifying bacteria (Gray et al) (325) 72
- Cytochromes b -type
Energy-dependent redox reactions of two ——— in brown adipose tissue mitochondria (Flatmark, Pedersen) (325) 16
- Cytochrome C
—— involved in the reductive decomposition of organic mercurials. Purification of cytochrome C -I from mercury-resistant *Pseudomonas* and reactivity of cytochromes C from various kinds of bacteria (Furukawa, Tonomura) (325) 413
- Cytochrome c oxidase
Biochemical and biophysical studies on ———. XI. Reaction with azide (Wever et al) (325) 1
- Cytochrome c oxidase
Biochemical and biophysical studies on ———. XII. Kinetics of azide binding (Wever et al) (325) 8
- Cytochrome c -551
Oxidation mechanisms of thiosulphate and

- sulphide in *Chlorobium thiosulphatophilum*. Roles of ——— and cytochrome c-553 (Kusai, Yamanaka) (325) 304
- Cytochrome c-553
Oxidation mechanisms of thiosulphate and sulphide in *Chlorobium thiosulphatophilum*. Roles of cytochrome c-551 and ——— (Kusai, Yamanaka) (325) 304
- Cytochrome c-555
Shifts of bacteriochlorophyll and carotenoid absorbance bands linked to ——— photo-oxidation in *Chromatium* (Case, Parson) (325) 441
- Cytochrome f
Light-induced oxidation-reduction reactions in a cell-free preparation from the blue-green alga *Nostoc muscorum*. The role of ———, cytochrome b₅₅₈, C550, and P700 in noncyclic electron transport (Knafl) (325) 284
- Deactivation
——— of oxygen precursors in presence of 3(3,4-dichlorophenyl)-1,1-dimethylurea and phenylurethane (Bouges-Bocquet et al) (325) 247
- Decarboxylation
On the ——— of α -keto acids by isolated chloroplasts (Elstner, Heupel) (325) 182
- Denitrifying bacteria
New cytochrome b-like pigment with a peak at 567 nm and a low redox potential in ——— (Gray et al.) (325) 72
- Dinitrophenol-induced ATPase
Affinities of ATP for the ——— (Verdouw, Bertina) (325) 385
- Electron paramagnetic resonance signal II
——— in spinach chloroplasts. I. Kinetic analysis for untreated chloroplasts (Babcock, Sauer) (325) 483
- Electron paramagnetic resonance signal II
——— in spinach chloroplasts. II. Alternative spectral forms and inhibitor effects on kinetics of signal II in flashing light (Babcock, Sauer) (325) 504
- Electron transfer complexes
b-type cytochromes of bovine heart mitochondria: absorption spectra, enzymatic properties, and distribution in the ——— (Davis et al) (325) 341
- Electron transport
Light-induced oxidation-reduction reactions in a cell-free preparation from the blue-green alga *Nostoc muscorum*. The role of cytochrome f, cytochrome b₅₅₈, C550, and P700 in noncyclic ——— (Knafl) (325) 284
- Electron transport
Kinetic and redox potentiometric resolution of the carotenoid shifts in *Rhodospseudomonas spheroides* chromatophores. their relationship to electric field alterations in ——— and energy coupling (Jackson, Dutton) (325) 102
- Electron transport
Studies on ——— associated with Photosystem I. III. The reduction sites of various Hill oxidants in the photosynthetic electron transport system (Kimimura, Katoh) (325) 167
- Electron transport
Studies on the energy coupling sites of photophosphorylation. III. The different effects of methylamine and ADP plus phosphate on ——— through coupling sites I and II in isolated chloroplasts (Gould, Ort) (325) 157
- Electron transport inhibitors
Effects of ——— on millisecond delayed light emission from chloroplasts (Felker et al.) (325) 193
- Energy conservation
——— in membranes of mutants of *Escherichia coli* defective in oxidative phosphorylation (Nieuwenhuis et al) (325) 62
- Energy coupling
Kinetic and redox potentiometric resolution of the carotenoid shifts in *Rhodospseudomonas spheroides* chromatophores. their relationship to electric field alterations in electron transport and ——— (Jackson, Dutton) (325) 102
- Energy-linked reactions
Effects of tetraphenylboron on ——— in spinach chloroplasts (Fiolet, van Dam) (325) 230
- Energy transfer inhibitors
Inorganic sulphate and selenate as ——— of photophosphorylation (Pick, Avron) (325) 297
- Exciton transfer
Intersystem ——— in isolated chloroplasts (Briantais et al) (325) 530
- Extreme shade plants
Composition of the photosystems and chloroplast structure in ——— (Anderson et al) (325) 573
- Fluorescence
Effect of dithionite on ——— and luminescence of chloroplasts (Velthuis, Amesz) (325) 126
- Fluorescence
Light-induced changes of ——— and absorbance in spinach chloroplasts at —40°C (Amesz et al) (325) 472
- Fluorescence changes
Rapid ——— observed in chloroplasts

- Their relationship to the O_2 evolving system (Zankel) (325) 138
- Fluorescence yield
- Kinetics of the — of chlorophyll a_2 in spinach chloroplasts at liquid nitrogen temperature during and following a $16 \mu s$ flash (Den Haan et al.) (325) 120
- Fluorescence yield
- NH_4Cl activation of the — in CO_2 -starved *Chlorella pyrenoidosa* (Slovacek, Bannister) (325) 114
- Fuscin
- , an inhibitor of mitochondrial thiol-dependent transport-linked functions (Vignais, Vignais) (325) 357
- Glutamate transport
- Kinetic study of — in rat liver mitochondria (Meyer, Vignais) (325) 375
- Inhibitor effects
- Electron paramagnetic resonance signal II in spinach chloroplasts. II. Alternative spectral forms and — on kinetics of signal II in flashing light (Babcock, Sauer) (325) 504
- Inorganic pyrophosphatase
- and photosynthesis by isolated chloroplasts. Characterisation of chloroplast pyrophosphatase and its relation to the response to exogenous pyrophosphate (Schwenn et al.) (325) 586
- Inorganic pyrophosphatase
- and photosynthesis by isolated chloroplasts II. The controlling influence of orthophosphate (Lilley et al.) (325) 596
- Iron accumulation
- Energy-dependent — by isolated rat liver mitochondria II. Relationship to the active Ca^{2+} transport (Romslo, Flatmark) (325) 38
- Low-temperature photoreactions
- Oxidation-reduction potential dependence of — of chloroplast Photosystem II (Bearden, Malkin) (325) 266
- Luminescence
- Effect of dithionite on fluorescence and — of chloroplasts (Velthuys, Amesz) (325) 126
- Luminescence
- Kinetics of — in the 10^{-6} – 10^{-4} -s range in *Chlorella* (Lavorel) (325) 213
- Manganese ion
- The mechanism of the oxidation of ascorbate and — by chloroplasts The role of the radical superoxide (Epel, Neumann) (325) 520
- Mercury-resistant *Pseudomonas*
- Cytochrome C involved in the reductive decomposition of organic mercurials Purification of cytochrome C-I from — and reactivity of cytochrome C from various kinds of bacteria (Furukawa, Tonomura) (325) 413
- Midpoint potential
- Uncoupler-dependent decrease in — of chloroplast cytochrome b_6 (Bohme, Cramer) (325) 275
- Mitochondria
- Atractyloside inhibition of adenine nucleotide transport in cauliflower — (Jung, Hanson) (325) 189
- Mitochondrial metabolism
- in porphyric rat liver (Miyahara et al.) (325) 47
- NAD(P)
- Oxidoreduction state of free — and mass-action ratio of total nicotinamide nucleotides in isolated rat liver mitochondria (Hoek, Tager) (325) 197
- Nicotinamide nucleotides
- Oxidoreduction state of free (NAD)P and mass-action ratio of total — in isolated rat liver mitochondria (Hoek, Tager) (325) 197
- Nitrate reduction
- Sulphide oxidation linked to the — and nitrite in *Thiobacillus denitrificans* (Ami-nuddin, Nicholas) (325) 81
- Organic mercurials
- Cytochrome C involved in the reductive decomposition of — Purification of cytochrome C-I from mercury-resistant *Pseudomonas* and reactivity of cytochromes C from various kinds of bacteria (Furukawa, Tonomura) (325) 413
- Orthophosphate
- Inorganic pyrophosphatase and photosynthesis by isolated chloroplasts. II. The controlling influence of — (Lilley et al.) (325) 596
- Oxidase
- Influence of pH on the synthesis of the — (cytochrome a_3) in *Bacillus coagulans*, a thermophilic microorganism capable of "respiratory adaptation" (Frade, Chaux) (325) 424
- Oxidation-reduction potential
- dependence of low-temperature photoreactions of chloroplast Photosystem II (Bearden, Malkin) (325) 266
- Oxidation-reduction potential
- Effect of — on light-induced cytochrome and bacteriochlorophyll reactions in chromatophores from the photosynthetic green bacterium *Chlorobium* (Knaff et al.) (325) 94

Oxidation-reduction reactions

Light-induced ——— in a cell-free preparation from the blue-green alga *Nostoc muscorum*. The role of cytochrome *f*, cytochrome *b*₅₅₈, C550, and P700 in noncyclic electron transport (Knaff) (325) 284

Oxidative metabolism

Effect of K⁺ deficiency on ——— in Ehrlich ascites tumour cells (Moroff, Gordon) (325) 406

Oxidative phosphorylation

Energy conservation in membranes of mutants of *Escherichia coli* defective in ——— (Nieuwenhuis et al.) (325) 62

Oxygen evolving system

Rapid fluorescence changes observed in chloroplasts. Their relationship to the ——— (Zankel) (325) 138

Oxygen precursors

Deactivation of ——— in presence of 3(3,4-dichlorophenyl)-1,1-dimethylurea and phenylurethane (Bouges-Bocquet et al.) (325) 247

P700

Light-induced oxidation-reduction reactions in a cell-free preparation from the blue-green alga *Nostoc muscorum*. The role of cytochrome *f*, cytochrome *b*₅₅₈, C550, and ——— in noncyclic electron transport (Knaff) (325) 284

Plastocyanin

Polylysine-enhanced effectiveness of ——— in Photosystem I (Brand, San Pietro) (325) 255

Plastoquinone

Optical and kinetic properties of semireduced ——— and ubiquinone. Electron acceptors in photosynthesis (Bensasson, Land) (325) 175

Photooxidation

Quantum yield of reaction center ——— in subchloroplast fragments enriched with Photosystem I (Borisov, Il'ina) (325) 240

Photophosphorylation

Inorganic sulphate and selenate as energy transfer inhibitors of ——— (Pick, Avron) (325) 297

Photophosphorylation

Studies on the energy coupling sites of ———. III The different effects of methylamine and ADP plus phosphate on electron transport through coupling sites I and II in isolated chloroplasts (Gould, Ort) (325) 157

Photosynthesis

On the nature of the deactivator of the water-splitting system in ——— (Vater) (325) 149

Photosynthesis

Optical and kinetic properties of semireduced plastoquinone and ubiquinone. Electron acceptors in ——— (Bensasson, Land) (325) 175

Photosynthetic green bacterium

Effect of oxidation-reduction potential on light-induced cytochrome and bacteriochlorophyll reactions in chromatophores from the ——— *Chlorobium* (Knaff et al.) (325) 94

Photosystem I

Polylysine-enhanced effectiveness of plastocyanin in ——— (Brand, San Pietro) (325) 255

Photosystem I

Quantum yield of reaction center photooxidation in subchloroplast fragments enriched with ——— (Borisov, Il'ina) (325) 240

Photosystem I

Studies on electron transport associated with ———. III. The reduction sites of various Hill oxidants in the photosynthetic electron transport system (Kimimura, Kato) (325) 167

Photosystem II

Back reaction in the primary electron transfer couple of ——— of photosynthesis (Butler et al.) (325) 539

Photosystem II

C-550 in ——— subchloroplast particles (Kitajima, Butler) (325) 558

Photosystem II

Effect of oxidizing treatment on chloroplast ——— reactions (Malkin, Knaff) (325) 336

Photosystem II

Oxidation-reduction potential dependence of low-temperature photoreactions of chloroplast ——— (Bearden, Malkin) (325) 266

Photosystem II

Polypeptides of stacked and unstacked *Chlamydomonas reinhardtii* chloroplast membranes and their relation to ——— activity (Levine, Duram) (325) 565

Photosystem II

Properties of photoreductions by ——— in isolated chloroplasts. III The effect of uncouplers on phenylenediamine shuttles across the membrane in the presence of dibromothymoquinone (Trebst, Reimer) (325) 546

Photosystems

Composition of the ——— and chloroplast structure in extreme shade plants (Anderson et al.) (325) 573

Porphyric rat liver

Mitochondrial metabolism in ——— (Miyahara et al) (325) 47

Porphyrin ring orientation

Determination of chlorophyll ——— in black lipid membranes by photovoltage spectroscopy (Weller Jr, Tien) (325) 433

Potassium ion deficiency

Effect of ——— on oxidative metabolism in Ehrlich ascites tumour cells (Moroff, Gordon) (325) 406

Primary electron transfer

The back reaction in the ——— couple of Photosystem II of photosynthesis (Butler et al) (325) 539

Pyrophosphatase

Inorganic pyrophosphatase and photosynthesis by isolated chloroplasts. I. Characterisation of chloroplast ——— and its relation to the response to exogenous pyrophosphate (Schwenn et al.) (325) 586

Quantum yield

——— of reaction center photooxidation in subchloroplast fragments enriched with Photosystem I (Borisov, Il'ina) (325) 240

Reaction center

Quantum yield of ——— photooxidation in subchloroplast fragments enriched with Photosystem I (Borisov, Il'ina) (325) 240

Redox potentiometric

Kinetic and ——— resolution of the carotenoid shifts in *Rhodospseudomonas spheroides* chromatophores their relationship to electric field alterations in electron transport and energy coupling (Jackson, Dutton) (325) 102

Rhodopsin photolysis

Biochemical aspects of the visual process XXIII Sulfhydryl groups and ——— (De Grip et al) (325) 315

Rhodopsin sulfhydryl groups

Kinetics of reaction of the ——— (Kimble, Ostroy) (325) 323

Sarcoplasmic reticulum

Effects of ruthenium red on Ca^{2+} uptake and ATPase of ——— of rabbit skeletal muscle (Vale, Carvalho) (325) 29

Sulphide

Oxidation mechanisms of thiosulphate and ——— in *Chlorobium thiosulphatophilum*. Roles of cytochrome c-551 and cytochrome c-553 (Kusai, Yamanaka) (325) 304

Sulphide oxidation

——— linked to the nitrate reduction and nitrite in *Thiobacillus denitrificans* (Aminuddin, Nicholas) (325) 81

Sulphydryl groups

Biochemical aspects of the visual process. XXIII ——— and rhodopsin photolysis (De Grip et al) (325) 315

Superoxide

The mechanism of the oxidation of ascorbate and Mn^{2+} by chloroplasts: The role of the radical ——— (Epel, Neumann) (325) 520

Thermophilic microorganism

Influence of pH on the synthesis of the oxidase (cytochrome a_3) in *Bacillus coagulans*, a ——— capable of "respiratory adaptation" (Frade, Chaix) (325) 424

Thiosulphate

Oxidation mechanisms of ——— and sulphide in *Chlorobium thiosulphatophilum*. Roles of cytochrome c-551 and cytochrome c-553 (Kusai, Yamanaka) (325) 304

Transport-linked functions

Fuscin, an inhibitor of mitochondrial thiol-dependent ——— (Vignais, Vignais) (325) 357

Ubiquinone

Optical and kinetic properties of semireduced plastoquinone and ———: Electron acceptors in photosynthesis (Bensasson, Land) (325) 175

Uncoupler

———stimulated choline oxidation by rat-liver mitochondria (De Ridder et al) (325) 397

Uncouplers

Properties of photoreductions by Photosystem II in isolated chloroplasts III The effect of ——— on phenylenediamine shuttles across the membrane in the presence of dibromothymoquinone (Trebst, Reimer) (325) 546

Visual process

Biochemical aspects of the ——— XXIII. Sulfhydryl groups and rhodopsin photolysis (De Grip et al) (325) 315

Water-splitting system

On the nature of the deactivator of the ——— in photosynthesis (Vater) (325) 149
