

AUTHOR INDEX

- Acker, S., see Sauer, K. (545) 466
- Akimenko, V.K., Golovchenko, N.P. and Medentsev, A.G.
The absence of energy conservation coupled with electron transfer via the alternative pathway in cyanide-resistant yeast mitochondria (545) 398
- Amesz, J., see Rijgersberg, C.P. (545) 473
- Anderson, J.M., see Dunkley, P.R. (545) 175
- Asadov, A.A., see Shuvalov, V.A. (545) 296
- Avi-Dor, Y., Rott, R. and Schnaiderman, R.
The effect of antibiotics on the photocycle and protoncycle of purple membrane suspensions (545) 15
- Barber, J., see Butler, W.L. (545) 309
- Barber, J., see Nakatani, H.Y. (545) 24
- Barber, J., see Searle, G.F.W. (545) 496
- Barber, J., see Searle, G.F.W. (545) 508
- Bashford, C.L., Chance, B. and Prince, R.C.
Oxonal dyes as monitors of membrane potential. Their behavior in photosynthetic bacteria (545) 46
- Bashford, C.L., Prince, R.C., Takamiya, K.-I. and Dutton, P.L.
Electrogenic events in the ubiquinone-cytochrome *b/c*₂ oxidoreductase of *Rhodospseudomonas sphaeroides* (545) 223
- Beddard, G.S., Fleming, G.R., Porter, G., Searle, G.F.W. and Synowiec, J.A.
The fluorescence decay kinetics of *in vivo* chlorophyll measured using low intensity excitation (545) 165
- Bianco, P. and Haladjian, J.
Study of cytochromes *c*₃ from *Desulfovibrio vulgaris* (Hildenborough) and *Desulfovibrio desulfuricans* (Norway) by differential pulse polarography and spectroelectrochemical method (545) 86
- Bickel-Sandkötter, S., see Strotman, H. (545) 122
- Bigon, E., see Bruni, A. (545) 404
- Blankenship, R.E. and Parson, W.W.
The involvement of iron and ubiquinone in electron transfer reactions mediated by reaction centers from photosynthetic bacteria (545) 429
- Blasie, J.K., see Erecińska, M. (545) 352
- Boos, K.S., see Strotman, H. (545) 122
- Breton, J., see Paillotin, G. (545) 249
- Briantais, J.-M., see Vernotte, C. (545) 519
- Bruni, A., Pitotti, A., Palatini, P., Dabbeni-Sala, F. and Bigon, E.
*F*₁-ATPase from different submitochondrial particles (545) 404
- Butler, W.L., Tredwell, C.J., Malkin, R. and Barber, J.
The relationship between the lifetime and yield of the 735 nm fluorescence of chloroplasts at low temperature (545) 309
- Caplan, S.R., see Garty, H. (545) 365
- Chance, B., see Bashford, C.L. (545) 46
- Clayton, R.K., Rafferty, C.N. and Vermiglio, A.
The orientations of transition moments in reaction centers of *Rhodospseudomonas sphaeroides* computed from data of linear dichroism and photoselection measurements (545) 58
- Clayton, R.K., see Rafferty, C.N. (545) 106
- Clore, G.M., see Denis, M. (545) 483
- Croze, E., see Horton, P. (545) 188
- Dabbeni-Sala, F., see Bruni, A. (545) 404
- Demeter, S., see Ke, B. (545) 265
- Denis, M. and Clore, G.M.
A temperature-induced absorption band centred in the region of 666 nm related to the configuration of the active site in frozen cytochrome oxidase (545) 483
- Dose, K., see Müller, H.W. (545) 77
- Dunkley, P.R. and Anderson, J.M.
The light-harvesting chlorophyll *a/b*-protein complex from barley thylakoid membranes. Polypeptide composition and characterization of an oligomer (545) 175
- Dutton, P.L., see Bashford, C.L. (545) 223
- Eckstein, F., see Strotman, H. (545) 122
- Edelman, K., see Strotman, H. (545) 122
- Eisenbach, M., see Garty, H. (545) 365
- Erecińska, M., Wilson, D.F. and Blasie, J.K.
Studies of the orientation of the mitochondrial redox carriers. III. Orientation

- of the g_x and g_y axes of the hemes of cytochrome oxidase with respect to the plane of the membrane in orientated membrane multilayers (545) 352
- Essig, A., see Lau, Y.-T. (545) 215
- Etienne, A.L., see Vernotte, C. (545) 519
- Fiechtner, M.D. and Kassner, R.J.
Isolation of *Desulfuromonas acetoxidans* cytochrome c-551.5 from the mixed culture 'Chloropseudomonas ethylica' (545) 424
- Fleming, G.R., see Beddard, G.S. (545) 165
- Gallagher, A., see Ryrie, I.J. (545) 1
- Garab, G.I., Paillotin, G. and Joliot, P.
Flash-induced scattering transients in the 10 μ s—5 s time range between 450 and 540 nm with *Chlorella* cells (545) 445
- Garty, H., Eisenbach, M., Shulman, R. and Caplan, S.R.
Light-induced pH changes in sub-bacterial particles of *Halobacterium halobium*. Effects of ionophores (545) 365
- Gavrikova, E.V., see Vinogradov, A.D. (545) 141
- Golovchenko, N.P., see Akimenko, V.K. (545) 398
- Gomez-Lojero, C., see Ho, K.K. (545) 236
- Grivennikova, V.G., see Vinogradov, A.D. (545) 141
- Haladjian, J., see Bianco, P. (545) 86
- Herczeg, T., see Lehocski, E. (545) 376
- Ho, K.K., Ulrich, E.L., Krogmann, D.W. and Gomez-Lojero, C.
Isolation of photosynthetic catalysts from cyanobacteria (545) 236
- Holmes, R.P. and Stewart, P.R.
The isolation of coupled mitochondria from *Physarum polycephalum* and their response to Ca^{2+} (545) 94
- Horton, P. and Croze, E.
Characterization of two quenchers of chlorophyll fluorescence with different midpoint oxidation-reduction potentials in chloroplasts (545) 188
- Huber, S.C.
Effect of pH on chloroplast photosynthesis. Inhibition of O_2 evolution by inorganic phosphate and magnesium (545) 131
- Hunter, C.N. and Jones, O.T.G.
The incorporation of reaction centers into membranes from a bacteriochlorophyll-less mutant of *Rhodopseudomonas sphaeroides* (545) 325
- Hunter, C.N. and Jones, O.T.G.
The kinetics of flash-induced electron flow in bacteriochlorophyll-less membranes of *Rhodopseudomonas sphaeroides* reconstituted with reaction centers (545) 339
- Joliot, P., see Garab, G.I. (545) 445
- Jones, O.T.G., see Hunter, C.N. (545) 325
- Jones, O.T.G., see Hunter, C.N. (545) 339
- Kassner, R.J., see Fiechtner, M.D. (545) 424
- Katoh, S., see Satoh, K. (545) 454
- Ke, B., Demeter, S., Zamaraev, K.I. and Khairutdinov, R.F.
Charge recombination in Photosystem I at low temperatures. Kinetics of electron tunneling (545) 265
- Ke, B., see Mohanty, B.C. (545) 285
- Khairutdinov, R.F., see Ke, B. (545) 265
- Krogman, D.W., see Ho, K.K. (545) 236
- Lang, M.A., see Lau, Y.-T. (545) 215
- Lanne, B., Malmström, B.G. and Vänngård, T.
The influence of pH on the EPR and redox properties of cytochrome c oxidase in detergent solution and in phospholipid vesicles (545) 205
- Lau, Y.-T., Lang, M.A. and Essig, A.
Evaluation of the rate of basal oxygen consumption in the isolated frog skin and toad bladder (545) 215
- Lehocski, E., Herczeg, T. and Szalay, L.
Dichlorophenylurea-resistant oxygen evolution in *Chlorella* after cerulenin treatment (545) 376
- Lüstorff, J., see Strotman, H. (545) 122
- Malkin, R., see Butler, W.L. (545) 309
- Malmström, B.G., see Lanne, B. (545) 205
- Mathis, P., see Sauer, K. (545) 466
- Mayne, B.C., see Mohanty, P. (545) 285
- Medentsev, A.G., see Akimenko, V.K. (545) 398
- Minski, M.J., see Nakatani, H.Y. (545) 24
- Mohanty, P., Mayne, B.C. and Ke, B.
Further characterization of a Photosystem II particle isolated from spinach chloroplasts by Triton treatment. Delayed light emission (545) 285
- Müller, H.W., Schmitt, M., Schneider, E. and Dose, K.
Immunological and reconstitution studies on the adenosine triphosphatase complex from *Rhodospirillum rubrum* (545) 77
- Murata, N., see Ono, T.A. (545) 69

- Nakatani, H.Y., Barber, J. and Minski, M.J.
The influence of the thylakoid membrane surface properties on the distribution of ions in chloroplasts (545) 24
- Ono, T.A. and Murata, N.
Temperature dependence of the photosynthetic activities in the thylakoid membranes from the blue-green alga *Anacystis nidulans* (545) 69
- Paillotin, G., see Garab, G.I. (545) 445
- Paillotin, G., Vermeiglio, A. and Breton, J.
Orientation of reaction center and antenna chromophores in the photosynthetic membrane of *Rhodospseudomonas viridis* (545) 249
- Palatini, P., see Bruni, A. (545) 404
- Parson, W.W., see Blankenship, R.E. (545) 429
- Pitotti, A., see Bruni, A. (545) 404
- Porter, G., see Beddard, G.S. (545) 165
