Biochimica et Biophysica Acta 893 (1987) 452–469

Optical characterization of intermediates in the water-splitting enzyme system... (BBA42611)

Ö. Saygin and H.T. Witt

p. 467, left-hand column, lines 6–9 should read:

II). This step might be located as indicated in Scheme II because manganese reduction takes place according to the suggested intermediate in this transition.
