

# Author Index

Special Issue BBA 1058/1

- Ambler, R.P.  
Sequence variability in bacterial cytochromes *c* (1058) 42
- Arciero, D.M., see Hooper, A.B. (1058) 13
- Bartsch, R.G., Ferguson, S.J. and Williams, R.J.P.  
Foreword (1058) 1
- Bartsch, R.G.  
The distribution of soluble metallo-redox proteins in purple phototrophic bacteria (1058) 28
- Caffrey, M.S., see Cusanovich, M.A. (1058) 67
- Costa, C., see Moura, J.J.G. (1058) 61
- Cusanovich, M.A. and Caffrey, M.S.  
Biological electron transfer: progress and future directions (1058) 67
- Ferguson, S.J.  
The functions and synthesis of bacterial *c*-type cytochromes with particular reference to *Paracoccus denitrificans* and *Rhodobacter capsulatus* (1058) 17
- Ferguson, S.J., see Bartsch, R.G. (1058) 1
- Fukumori, Y., see Yamanaka, T. (1058) 48
- Gennis, R.B.  
Some recent advances relating to prokaryotic cytochrome *c* reductases and cytochrome *c* oxidases (1058) 21
- Hooper, A.B., Logan, M., Arciero, D.M. and McTavish, H.  
*c*-Cytochromes of the ammonia-oxidizing chemolithoautotrophic bacteria (1058) 13
- Hreggvidsson, G.O.  
Two structurally different cytochromes *c* from *Bacillus azotoformans*: on the evolution of Gram-positive bacteria (1058) 52
- Iwasaki, H., Yoshimura, T., Suzuki, S. and Shidara, S.  
Spectral properties of *Achromobacter xylosoxidans* cytochromes *c'* and their NO complexes (1058) 79
- Kamen, M.D.  
International workshop on non-mitochondrial cytochromes *c*. A short foreword with some history (1058) 3
- Kassner, R.J.  
Ligand binding properties of cytochromes *c'* (1058) 8
- Krogmann, D.W.  
The low-potential cytochrome *c* of cyanobacteria and algae (1058) 35
- LeGall, J., see Moura, J.J.G. (1058) 61
- Liu, M.-Y., see Moura, J.J.G. (1058) 61
- Logan, M., see Hooper, A.B. (1058) 13
- McTavish, H., see Hooper, A.B. (1058) 13
- Meyer, T.E.  
Evolution of cytochromes and photosynthesis (1058) 31
- Moore, G.R.  
Bacterial 4- $\alpha$ -helical bundle cytochromes (1058) 38
- Moura, I., see Moura, J.J.G. (1058) 61
- Moura, J.J.G., Costa, C., Liu, M.-Y., Moura, I. and LeGall, J.  
Structural and functional approach toward a classification of the complex cytochrome *c* system found in sulfate-reducing bacteria (1058) 61
- Nagano, T., see Yamanaka, T. (1058) 48
- Pettigrew, G.W.  
The cytochrome *c* peroxidase of *Paracoccus denitrificans* (1058) 25
- Salemme, F.R., see Weber, P.C. (1058) 83
- Shidara, S., see Iwasaki, H. (1058) 79
- Shoji, K., see Yamanaka, T. (1058) 48
- Smith, G.M. and Yu, L.P.  
High-resolution  $^1\text{H}$ - and  $^{15}\text{N}$ -NMR studies of *Rhodospirillum rubrum* cytochrome *c*<sub>2</sub> (1058) 75
- Suzuki, S., see Iwasaki, H. (1058) 79
- Van Beeumen, J.  
Primary structure diversity of prokaryotic diheme cytochromes *c* (1058) 56
- Weber, P.C., Wendoloski, J.J. and Salemme, F.R.  
Cooperative ligand reorientations in cytochrome *c*<sub>3</sub>: a molecular dynamics simulation (1058) 83
- Wendoloski, J.J., see Weber, P.C. (1058) 83
- Williams, R.J.P.  
Uncoupled and coupled electron transfer reactions (1058) 71
- Williams, R.J.P., see Bartsch, R.G. (1058) 1
- Wood, P.M.  
Why do *c*-type cytochromes exist? – Reprise (1058) 5
- Yamanaka, T., Nagano, T., Shoji, K. and Fukumori, Y.  
Cytochromes *c* of *Nitrobacter winogradskyi* and *Thiobacillus novellus*: structure, function and evolution (1058) 48
- Yoshimura, T., see Iwasaki, H. (1058) 79
- Yu, L.P., see Smith, G.M. (1058) 75
