Regular Papers

Deletion of the gene encoding the Photosystem II 33 kDa protein from *Synechocystis* sp. PCC 6803 does not inactivate water-splitting but increases vulnerability to photoinhibition
S.R. Mayes, K.M. Cook, S.J. Self, Z. Zhang and J. Barber (U.K.)

1

Ultrafast pump-probe spectroscopy of bacteriochlorophyll *c* antennae in bacteriochlorophyll *a*-containing chlorosomes from the green photosynthetic bacterium *Chloroflexus aurantiacus*
S. Lin, H. Van Amerongen and W.S. Struve (U.S.A.)

13

Direct evidence of the metal-free nature of sirohydrochlorin in desulfoviridin
K.K. Lai, I. Moura, M.Y. Liu, J. LeGall and K.T. Yue (U.S.A., Portugal)

25

Origin of the 77 K variable fluorescence at 758 nm in the cyanobacterium *Spirulina platensis*
V.V. Shubin, S.D.S. Murthy, N.V. Karapetyan and P. Mohanty (India)

28

Apparent destabilization of the S_1 state related to herbicide resistance in a cyanobacterium mutant
D. Kirilovsky, J.-M. Ducruet and A.-L. Etienne (France)

37

Heterogeneity among Photosystem I
P. Svensson, E. Andreasson and P.-Å. Albertsson (Sweden)

45

Photoactivation of the water-oxidizing complex of Photosystem II core complex depleted of functional Mn
N. Tamura, H. Kamachi, N. Hokari, H. Masumoto and H. Inoué (Japan)

51

Structure and energy transfer of the phycobiosome in a linker protein replacement mutant of cyanobacterium *Synechococcus* 7942
R.P. Bhalarao, T. Gillbro and P. Gustafsson (Sweden)

59

Light 2 directed changes in the effective absorption cross-section of Photosystem II in *Synechocystis* 27170 are related to modified action on the donor side of the reaction center
A.F. Post, M. Mimuro and Y. Fujita (The Netherlands, Japan)

67

Why is inorganic phosphate necessary for uncoupling of oxidative phosphorylation by Cd^{2+} in rat liver mitochondria?

H. Koike, Y. Shinohara and H. Terada (Japan) 75

The chloroplast β -subunit allows assembly of the *Escherichia coli* F_0 portion of the energy transducing adenosine triphosphatase

A.L. Munn, P.R. Whitfeld, W. Bottomley, G.S. Hudson, D.A. Jans, F. Gibson and G.B. Cox (Australia) 82

Preparation and characterisation of Photosystem II core particles with and without bound bicarbonate

S.J. Bowden, B.J. Hallahan, S.V. Ruffle, M.C.W. Evans and J.H.A. Nugent (U.K.) 89

Localization of polypeptides in isolated chlorosomes from green phototrophic bacteria by immuno-gold labeling electron microscopy

W. Wüllink, J. Knudsen, J.M. Olson, T.E. Redlinger and E.F.J. Van Bruggen (The Netherlands, Denmark, U.S.A.) 97

β -Carotene within the isolated Photosystem II reaction centre: photooxidation and irreversible bleaching of this chromophore by oxidised P680

A. Telfer, J. De Las Rivas and J. Barber (U.K.) 106

Structure-function relationships of domains of the δ subunit in *Escherichia coli* adenosine triphosphatase

J. Mendel-Hartvig and R.A. Capaldi (U.S.A.) 115

Antenna organization of *Rhodospseudomonas acidophila*: a study of the excitation migration
G. Deinum, S.C.M. Otte, A.T. Gardiner, T.J. Aartsma, R.J. Cogdell and J. Ames (The Netherlands, U.K.)

125

Review

Biochemical and biophysical properties of thylakoid acyl lipids

M.S. Webb and B.R. Green (Canada) 133

Regular Papers

Spectroscopic studies of the nickel-substituted *Desulfovibrio vulgaris* Hildenborough rubredoxin: implication for the nickel site in hydrogenases

<i>I. Mus-Veteau, D. Diaz, J. Gracia-Mora, B. Guigliarelli, G. Chottard and M. Bruschi (France, Mexico)</i>	159	Synaptin/synaptophysin, p65 and SV2: their presence in adrenal chromaffin granules and sympathetic large dense core vesicles	
Mitochondrial bioenergetics as affected by DDT		<i>T. Schmidle, R. Weiler, C. Desnos, D. Scherman, R. Fischer-Colbrie, E. Floor and H. Winkler (Austria, France, U.S.A.)</i>	251
<i>A.J.M. Moreno and V.M.C. Madeira (Portugal)</i>	166	Oxidative inhibition of red blood cell ATPases by glyceraldehyde	
Improved UV-visible spectra of the S-transitions in the photosynthetic oxygen-evolving system		<i>M.L. Mira, F. Martinho, M.S. Azevedo and C.F. Manso (Portugal)</i>	257
<i>J. Lavergne (France)</i>	175	Modified bacterial reaction centers. 4. The borohydride treatment reinvestigated: comparison with selective exchange experiments at binding sites $B_{A,B}$ and $H_{A,B}$	
Phosphorylation and dephosphorylation reactions in chromatophores of <i>Chromatium vinosum</i> and <i>Chromatium tepidum</i>		<i>A. Struck, A. Müller and H. Scheer (Germany)</i>	262
<i>T. Nozawa, M. Ohta, M. Hatano and M.T. Madigan (Japan, U.S.A.)</i>	189	Kinetic modelling of exciton migration in photosynthetic systems. (1) Effects of pigment heterogeneity and antenna topography on exciton kinetics and charge separation yields	
Structural studies of cytochrome <i>c</i> -554 from <i>Chloroflexus aurantiacus</i> by resonance Raman spectroscopic techniques		<i>M. Beauregard, I. Martin and A.R. Holzwarth (Germany)</i>	271
<i>G. Heibel, K. Griebenow and P. Hildebrandt (F.R.G.)</i>	196	Distribution of control of oxidative phosphorylation in mitochondria oxidizing NAD-linked substrates	
The rotenone-insensitive reduction of quinones and nitrocompounds by mitochondrial NADH:ubiquinone reductase		<i>R. Moreno-Sánchez, S. Devars, F. López-Gómez, A. Uribe and N. Corona (Mexico)</i>	284
<i>D.A. Bironaite, N.K. Čenas and J.J. Kulys (Lithuania)</i>	203	Respiration in non-phosphorylating yeast mitochondria. Roles of non-ohmic proton conductance and intrinsic uncoupling	
An extended dynamic model of oxidative phosphorylation		<i>R. Ouhabi, M. Rigoulet, J.-L. Lavie and B. Guérin (France)</i>	293
<i>B. Korzeniewski and W. Froncisz (Poland)</i>	210	Proton pumping inorganic pyrophosphatase of pea stem submitochondrial particles	
Total immobilization of the extrinsic 33 kDa protein in spinach Photosystem II membrane preparations. Protein stoichiometry and stabilization of oxygen evolution		<i>A. Vianello, M. Zancani, E. Braidot, E. Petrussa and F. Macrì (Italy)</i>	299
<i>I. Enami, M. Kaneko, N. Kitamura, H. Koike, K. Sonoike, Y. Inoue and S. Katoh (Japan)</i>	224	Kinetic relationships between structural changes in the thylakoid membranes and photosystems organization	
<i>Rapid Report</i>		<i>G. Braun and S. Malkin (Israel)</i>	303
Directed mutagenesis of the gene <i>psaB</i> of Photosystem I of the cyanobacterium <i>Anabaena variabilis</i> ATCC 29413		Does the xanthophyll cycle take part in the regulation of fluidity of the thylakoid membrane?	
<i>M. Toelge, K. Ziegler, I. Maldener and W. Lockau (Germany)</i>	233	<i>W.I. Gruszecki and K. Strzalka (Poland)</i>	310
<i>NC-IUB: Nomenclature of electron-transfer proteins</i>	vii	<i>Rapid Report</i>	
<i>Regular Papers</i>		Photosynthetic energy storage in cyanobacterial cells adapted to light-states 1 and 2. A laser-induced optoacoustic study	
Picosecond fluorescence kinetics of the D_1 - D_2 -cyt- <i>b</i> -559 Photosystem II reaction center complex. Energy transfer and primary charge separation processes		<i>C.W. Mullineaux, S. Griebenow and S.E. Braslavsky (Germany)</i>	315
<i>T.A. Roelofs, M. Gilbert, V.A. Shuvalov and A.R. Holzwarth (Germany)</i>	237	<i>Erratum</i>	319
The influence of quenching by open reaction centres on the Photosystem II fluorescence emission spectrum		<i>Cumulative Contents, Vol. 1060</i>	321
<i>R.C. Jennings, G. Zucchelli and F.M. Garlaschi (Italy)</i>	245	<i>Author Index</i>	323
