

Publisher's Note

Biochimica et Biophysica Acta (BBA) now publishes colour figures online free of charge!

BBA has been included in a new initiative from Elsevier called Colourful e-Products. This means that figures appearing in black and white in the printed version of the journal may now appear **in colour**, online, on ScienceDirect.

Scientists in many disciplines need to be able to publish their work in colour, but the cost of colour printing can be prohibitive. We realise that not all scientists have appropriate funds to cover the charges. This Colourful e-Products solution provides a welcome step forward, particularly now that scientists increasingly access information online.

Authors wishing to make use of this facility should ensure that the artwork is in an acceptable format (TIFF, EPS, or MS Office files) and at the correct resolution. Note that when the intent is to publish figures in colour online but in black and white in print, both colour and black and white artwork (file and/or hard copy) should be provided.

There is *no extra charge* for authors who take advantage of this new service. Further information on electronic artwork can be found at <http://authors.elsevier.com/artwork>.

To view the articles online, please access the journal from the ScienceDirect Web site at <http://www.sciencedirect.com>.
