

Bioenergetics Cumulative Contents

<i>Introduction</i>	1	Proton-coupled electron transfer at the Q _o -site of the bc ₁ complex controls the rate of ubihydroquinone oxidation	
<i>Editorial</i>	2	A.R. Crofts (USA)	77
<i>Proton-coupled Electron Transfer in Model and Biological Systems</i>		Modulation of the free energy of the primary quinone acceptor (Q _A) in reaction centers from <i>Rhodobacter sphaeroides</i> : contributions from the protein and protein–lipid(cardiolipin) interactions	
Proton-coupled electron transfer: a unifying mechanism for biological charge transport, amino acid radical initiation and propagation, and bond making/breaking reactions of water and oxygen		L. Rinyu, E.W. Martin, E. Takahashi, P. Maróti and C.A. Wraight (Hungary, USA)	93
C.J. Chang, M.C.Y. Chang, N.H. Damrauer and D.G. Nocera (USA)	13	Surface-mediated proton-transfer reactions in membrane-bound proteins	
Theoretical studies of proton-coupled electron transfer reactions		P. Ädelroth and P. Brzezinski (Sweden)	102
S. Hammes-Schiffer and N. Iordanova (USA)	29	The function and characteristics of tyrosyl radical cofactors	
Theory and simulation of proton-coupled electron transfer, hydrogen-atom transfer, and proton translocation in proteins		C.W. Hoganson and C. Tommos (USA, Sweden)	116
R.I. Cukier (USA)	37	<i>Photosynthetic Water Oxidation</i>	
Important roles of tyrosines in Photosystem II and cytochrome oxidase		Water, water everywhere, and its remarkable chemistry	
P.E.M. Siegbahn and M.R.A. Blomberg (Sweden)	45	J. Barber (UK)	123
Thermodynamics and kinetics of proton-coupled electron transfer: stepwise vs. concerted pathways		The evolutionary development of the protein complement of Photosystem 2	
J.M. Mayer and I.J. Rhile (USA)	51	J. Raymond and R.E. Blankenship (USA)	133
Electron tunneling in rhenium-modified <i>Pseudomonas aeruginosa</i> azurins		The water-oxidation complex in photosynthesis	
J.E. Miller, A.J. Di Bilio, W.A. Wehbi, M.T. Green, A.K. Museth, J.R. Richards, J.R. Winkler and H.B. Gray (USA)	59	K. Sauer and V.K. Yachandra (USA)	140
Intraprotein electron transfer and proton dynamics during photoactivation of DNA photolyase from <i>E. coli</i> : review and new insights from an “inverse” deuterium isotope effect		The first spectroscopic model for the S ₁ state multiline signal of the OEC	
M. Byrdin, V. Sartor, A.P.M. Eker, M.H. Vos, C. Aubert, K. Brettel and P. Mathis (France, The Netherlands)	64	W.-Y. Hsieh, K.A. Campbell, W. Gregor, R. David Britt, D.W. Yoder, J.E. Penner-Hahn and V.L. Pecoraro (USA)	149
Novel cyanide inhibition at cytochrome c ₁ of <i>Rhodobacter capsulatus</i> cytochrome bc ₁		Recent pulsed EPR studies of the Photosystem II oxygen-evolving complex: implications as to water oxidation mechanisms	
A. Osyczka, C.C. Moser and P.L. Dutton (USA)	71	R.D. Britt, K.A. Campbell, J.M. Peloquin, M.L. Gilchrist, C.P. Aznar, M.M. Dicus, J. Robblee and J. Messinger (USA)	158
		Water oxidation in PSII—H atom abstraction revisited	
		R.J. Pace and K.A. Åhrling (Australia)	172
		Reconstitution of the photosystem II Ca ²⁺ binding site	
		K.A. Vander Meulen, A. Hobson and C.F. Yocum (USA)	179

Time-resolved oxygen production by PSII: chasing chemical intermediates <i>J. Clausen, R.J. Debus and W. Junge (Germany, USA)</i>	184	Active site structure of the <i>aa₃</i> quinol oxidase of <i>Acidianus ambivalens</i> <i>T.K. Das, C.M. Gomes, T.M. Bandejas, M.M. Pereira, M. Teixeira and D.L. Rousseau (USA, Portugal)</i>	306
Coupling of electron and proton transfer in oxidative water cleavage in photosynthesis <i>G. Renger (Germany)</i>	195	FTIR studies of internal proton transfer reactions linked to inter-heme electron transfer in bovine cytochrome <i>c</i> oxidase <i>B.H. McMahon, M. Fabian, F. Tomson, T.P. Causgrove, J.A. Bailey, F.N. Rein, R.B. Dyer, G. Palmer, R.B. Gennis and W.H. Woodruff (USA)</i>	321
Tyrosyl radicals in Photosystem II <i>I. Pujols-Ayala and B.A. Barry (USA)</i>	205	The influence of subunit III of cytochrome <i>c</i> oxidase on the D pathway, the proton exit pathway and mechanism-based inactivation in subunit I <i>J.P. Hosler (USA)</i>	332
Photosynthetic water oxidation: the role of tyrosine radicals <i>J.H.A. Nugent, R.J. Ball and M.C.W. Evans (UK)</i>	217	Proton pathways, ligand binding and dynamics of the catalytic site in haem-copper oxygen reductases: a comparison between the three families <i>M.M. Pereira and M. Teixeira (Portugal)</i>	340
The stable tyrosyl radical in Photosystem II: why D? <i>A.W. Rutherford, A. Boussac and P. Faller (France)</i>	222	Time-resolved step-scan Fourier transform infrared investigation of heme-copper oxidases: implications for O ₂ input and H ₂ O/H ⁺ output channels <i>C. Koutsoumpakis, E. Pinakoulaki, S. Stavarakis, V. Daskalakis and C. Varotsis (Greece)</i>	347
Protein dynamics and reactions of Photosystem II <i>A. Ehrenberg (Sweden)</i>	231	A cooperative model for proton pumping in cytochrome <i>c</i> oxidase <i>S. Papa, N. Capitanio and G. Capitanio (Italy)</i>	353
Dioxygen Reduction and Proton Pumping by Respiratory Oxidases		Control of cytochrome <i>c</i> oxidase activity by nitric oxide <i>M. Brunori, A. Giuffrè, E. Forte, D. Mastronicola, M.C. Barone and P. Sarti (Italy)</i>	365
The contributions of G.T. (Jerry) Babcock to our understanding of cytochrome oxidase <i>G. Palmer (USA)</i>	235	Tryptophan or tyrosine? On the nature of the amino acid radical formed following hydrogen peroxide treatment of cytochrome <i>c</i> oxidase <i>D.A. Svistunenko, M.T. Wilson and C.E. Cooper (UK)</i>	372
Cytochrome <i>c</i> oxidase: 25 years of the elusive proton pump <i>M. Wikström (Finland)</i>	241	The mixed valence state of the oxidase binuclear centre: how <i>Thermus thermophilus</i> cytochrome <i>ba₃</i> differs from classical <i>aa₃</i> in the aerobic steady state and when inhibited by cyanide <i>P. Nicholls and T. Soulimane (UK, Switzerland)</i>	381
The use of stable isotopes and spectroscopy to investigate the energy transducing function of cytochrome <i>c</i> oxidase <i>B. Schmidt, W. Hillier, J. McCracken and 2S. Ferguson-Miller (USA)</i>	248	The bacterial cytochrome <i>cbb₃</i> oxidases <i>R.S. Pitcher and N.J. Watmough (UK)</i>	388
Intermediate forms of cytochrome oxidase observed in transient kinetic experiments and those visited in the catalytic cycle <i>B.C. Hill (Canada)</i>	256	The possible role of cytochrome <i>c</i> oxidase in stress-induced apoptosis and degenerative diseases <i>B. Kadenbach, S. Arnold, I. Lee and M. Hüttemann (Germany, USA)</i>	400
Time-resolved optical absorption studies of cytochrome oxidase dynamics <i>Ó. Einarsson and I. Szundi (USA)</i>	263	<i>Author Index</i>	409
Interaction of cytochrome <i>c</i> with cytochrome oxidase: two different docking scenarios <i>O. Maneg, F. Malatesta, B. Ludwig and V. Drosou (Germany, Italy)</i>	274	<i>Cumulative Contents</i>	412
UV optical absorption by protein radicals in cytochrome <i>c</i> oxidase <i>D.A. Proshlyakov (USA)</i>	282		
Resonance Raman characterization of the P intermediate in the reaction of bovine cytochrome <i>c</i> oxidase <i>T. Ogura and T. Kitagawa (Japan)</i>	290		
Implications of ligand binding studies for the catalytic mechanism of cytochrome <i>c</i> oxidase <i>M. Fabian, L. Skultety, D. Jancura and G. Palmer (USA)</i>	298
