

Corrigendum

Corrigendum to “The gross structure of the respiratory complex I:
A Lego-System”
[Biochim. Biophys. Acta 1608 (2004) 1–9]

Received 30 April 2004; accepted 6 May 2004

The above report contains two errors: Complex I from *Yarrowia lipolytica* was stained with ammonium molybdate and not with uranyl acetate (legend to Fig. 1). The angle between the peripheral and the membrane arm of the *Y. lipolytica* enzyme varies between 90° and 150° in intact particles and not up to 180° (p. 3). We apologize for any inconvenience caused by these errors.
