

## Bioenergetics Cumulative Contents

### Rapid report

- Antenna ring around trimeric Photosystem I in chlorophyll *b* containing cyanobacterium *Prochlorothrix hollandica*  
*L. Bumba, O. Prasil and F. Vacha* 1

### Regular papers

- Weakened coupling of conserved arginine to the proterorhodopsin chromophore and its counterion implies structural differences from bacteriorhodopsin  
*R. Partha, R. Krebs, T.L. Caterino and M.S. Braiman* 6
- Transport and metabolism of D-lactate in Jerusalem artichoke mitochondria  
*A. Atlante, L. de Bari, D. Valenti, R. Pizzuto, G. Paventi and S. Passarella* 13
- Divergence of the mitochondrial electron transport chains from the green alga *Chlamydomonas reinhardtii* and its colorless close relative *Polytomella* sp.  
*R. van Lis, D. González-Halphen and A. Atteia* 23
- EPR kinetic studies of the S<sub>-1</sub> state in spinach thylakoids  
*M.R. Razeghifard, D. Kuzek and R.J. Pace* 35
- EPR properties of a *g*=2 broad signal trapped in an S<sub>1</sub> state in Ca<sup>2+</sup>-depleted Photosystem II  
*H. Mino and S. Itoh* 42
- An increase in the ATP levels occurs in cerebellar granule cells en route to apoptosis in which ATP derives from both oxidative phosphorylation and anaerobic glycolysis  
*A. Atlante, S. Giannattasio, A. Bobba, S. Gagliardi, V. Petragallo, P. Calissano, E. Marra and S. Passarella* 50

- Function of the 23 kDa extrinsic protein of Photosystem II as a manganese binding protein and its role in photoactivation  
*N. Bondarava, P. Beyer and A. Krieger-Liszkay* 63
- Substrate kinetics of the *Acanthamoeba castellanii* alternative oxidase and the effects of GMP  
*W. Jarmuszkiewicz, M. Czarna and F.E. Sluse* 71
- Control of cytochrome *b<sub>6</sub>f* at low and high light intensity and cyclic electron transport in leaves  
*A. Laisk, H. Eichelmann, V. Oja and R.B. Peterson* 79
- <sup>15</sup>N-labeling to determine chlorophyll synthesis and degradation in *Synechocystis* sp. PCC 6803 strains lacking one or both photosystems  
*D. Vavilin, D.C. Brune and W. Vermaas* 91
- Towards elucidating the energy of the first excited singlet state of xanthophyll cycle pigments by X-ray absorption spectroscopy  
*W.I. Gruszecki, H. Stiel, D. Niedzwiedzki, M. Beck, J. Milanowska, H. Lokstein and D. Leupold* 102
- Multiple proteins with single activities or a single protein with multiple activities: The conundrum of cell surface NADH oxidoreductases  
*D.-J.G. Scarlett, P.M. Herst and M.V. Berridge* 108
- Towards a spin coupling model for the Mn<sub>4</sub> cluster in Photosystem II  
*M.-F. Charlot, A. Boussac and G. Blondin* 120

### Review

- Characterization, structure and function of linker polypeptides in phycobilisomes of cyanobacteria and red algae: An overview  
*L.-N. Liu, X.-L. Chen, Y.-Z. Zhang and B.-C. Zhou* 133

## Regular Papers

- Distances between the b-subunits in the tether domain of F<sub>0</sub>F<sub>1</sub>-ATP synthase from *E. coli*  
S. Steigmiller, M. Börsch, P. Gräber and M. Huber 143
- Photosystem I lacking the PSI-G subunit has a higher affinity for plastocyanin and is sensitive to photodamage  
A. Zygadlo, P.E. Jensen, D. Leister and H.V. Scheller 154
- Quantitative mathematical expressions for accurate in vivo assessment of cytosolic [ADP] and  $\Delta G$  of ATP hydrolysis in the human brain and skeletal muscle  
S. Iotti, C. Frassinetti, A. Sabatini, A. Vacca and B. Barbiroli 164
- Species-specific modulation of the mitochondrial permeability transition by norbormide  
F. Ricchelli, F. Dabbeni-Sala, V. Petronilli, P. Bernardi, B. Hopkins and S. Bova 178
- Entropy-assisted stacking of thylakoid membranes  
E.-H. Kim, W.S. Chow, P. Horton and J.M. Anderson 187
- Interaction between subunit C (Vma5p) of the yeast vacuolar ATPase and the stalk of the C-depleted V<sub>1</sub> ATPase from *Manduca sexta* midgut  
Y.L. Chaban, S. Juliano, E.J. Boekema and G. Grüber 196
- Cellular energization protects the photosynthetic machinery against salt-induced inactivation in *Synechococcus*  
S.I. Allakhverdiev, V.V. Klimov and M. Hagemann 201
- Energetics of primary and secondary electron transfer in Photosystem II membrane particles of spinach revisited on basis of recombination-fluorescence measurements  
M. Grabolle and H. Dau 209
- Extinction coefficients and critical solubilisation concentrations of photosystems I and II from *Thermosynechococcus elongatus*  
F. Müh and A. Zouni 219
- Overexpression and characterization of dark-operative protochlorophyllide reductase from *Rhodobacter capsulatus*  
J. Nomata, L.R. Swem, C.E. Bauer and Y. Fujita 229
- EPR study of electron transport in the cyanobacterium *Synechocystis* sp. PCC 6803: Oxygen-dependent interrelations between photosynthetic and respiratory electron transport chains  
B.V. Trubitsin, V.V. Ptushenko, O.A. Koksharova, M.D. Mamedov, L.A. Vitukhnovskaya, I.A. Grigor'ev, A.Yu. Semenov and A.N. Tikhonov 238

- A cell-based model for the photoacclimation and CO<sub>2</sub>-acclimation of the photosynthetic apparatus  
I.A. Papadakis, K. Kotzabasis and K. Lika 250
- A four-subunit cytochrome *bc*<sub>1</sub> complex complements the respiratory chain of *Thermus thermophilus*  
D. Mooser, O. Maneg, C. Corvey, T. Steiner, F. Malatesta, M. Karas, T. Soulimane and B. Ludwig 262
- In intact leaves, the maximum fluorescence level ( $F_M$ ) is independent of the redox state of the plastoquinone pool: A DCMU-inhibition study  
S.Z. Tóth, G. Schansker and R.J. Strasser 275

## Review

- Modelling of the electron transfer reactions in Photosystem I by electron tunnelling theory: The phyloquinones bound to the PsaA and the PsaB reaction centre subunits of PS I are almost isoenergetic to the iron–sulfur cluster F<sub>X</sub>  
S. Santabarbara, P. Heathcote and M.C.W. Evans 283

## Regular Papers

- Photosynthetic activity of far-red light in green plants  
H. Pettai, V. Oja, A. Freiberg and A. Laisk 311
- Inhibitor studies on non-photochemical plastoquinone reduction and H<sub>2</sub> photoproduction in *Chlamydomonas reinhardtii*  
F. Mus, L. Cournac, V. Cardellini, A. Caruana and G. Peltier 322
- Extinction coefficients of cytochromes b559 and c550 of *Thermosynechococcus elongatus* and Cyt b559/PS II stoichiometry of higher plants  
O. Kaminskaya, J. Kern, V.A. Shuvalov and G. Renger 333
- Irreversible photoinhibition of photosystem II is caused by exposure of *Synechocystis* cells to strong light for a prolonged period  
S.I. Allakhverdiev, N. Tsvetkova, P. Mohanty, B. Szalontai, B.Y. Moon, M. Debreczeny and N. Murata 342
- Interruption of the Calvin cycle inhibits the repair of Photosystem II from photodamage  
S. Takahashi and N. Murata 352

|                                                                                                                                                                                                                                                      |     |                                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Coherent phase microscopy in cell biology: Visualization of metabolic states<br><i>V.P. Tychinsky, A.V. Kretushev, T.V. Vyshenskaya and A.N. Tikhonov</i>                                                                                            | 362 | Oligomerization of H <sup>+</sup> -pyrophosphatase and its structural and functional consequences<br><i>H. Mimura, Y. Nakanishi and M. Maeshima</i>                                    | 393 |
| Iron deficiency induces a chlorophyll <i>d</i> -binding Pcb antenna system around Photosystem I in <i>Acaryochloris marina</i><br><i>M. Chen, T.S. Bibby, J. Nield, A. Larkum and J. Barber</i>                                                      | 367 | Nucleotide binding affinities of the intact proton-translocating transhydrogenase from <i>Escherichia coli</i><br><i>T.
