

Bioenergetics Cumulative Contents

Rapid report

- Cyclic endoperoxides of β -carotene, potential pro-oxidants, as products of chemical quenching of singlet oxygen
J. Fiedor, L. Fiedor, R. Haeßner and H. Scheer 1

Reviews

- Ubiquinol oxidation in the cytochrome bc_1 complex: Reaction mechanism and prevention of short-circuiting
A.Y. Mulikidjanian 5
- The reactions catalysed by the mitochondrial uncoupling proteins UCP2 and UCP3
T.C. Esteves and M.D. Brand 35

Regular papers

- Improved survival of very high light and oxidative stress is conferred by spontaneous gain-of-function mutations in *Chlamydomonas*
B. Förster, C.B. Osmond and B.J. Pogson 45
- The *rpaC* gene product regulates phycobilisome–photosystem II interaction in cyanobacteria
S. Joshua and C.W. Mullineaux 58
- Modulation of photosynthetic electron transport in the absence of terminal electron acceptors: Characterization of the *rbcL* deletion mutant of tobacco
Y. Allahverdiyeva, F. Mamedov, P. Mäenpää, I. Vass and E.-M. Aro 69
- Role of transmembrane segment 5 of the plant vacuolar H^+ -pyrophosphatase
R.C. Van, Y.J. Pan, S.H. Hsu, Y.T. Huang, Y.Y. Hsiao and R.L. Pan 84

- A *nhaD* Na^+/H^+ antiporter and a *pcd* homologues are among the *Rhodothermus marinus* complex I genes
A.M.P. Melo, S.A.L. Lobo, F.L. Sousa, A.S. Fernandes, M.M. Pereira, G.O. Hreggvidsson, J.K. Kristjansson, L.M. Saraiva and M. Teixeira 95
- EPR characterisation of the triplet state in photosystem II reaction centers with singly reduced primary acceptor Q_A
W.O. Feikema, P. Gast, I.B. Klenina and I.I. Proskuryakov 105
- Energy coupling to nitrate uptake into the denitrifying cells of *Paracoccus denitrificans*
I. Kucera 113
- Circular dichroism of the peripheral chlorophylls in photosystem II reaction centers revealed by electrochemical oxidation
T.N. Kropacheva, M. Germano, G. Zucchelli, R.C. Jennings and H.J. van Gorkom 119
- Distinct characteristics of Ca^{2+} -induced depolarization of isolated brain and liver mitochondria
O. Vergun and I.J. Reynolds 127
- The size of the population of weakly coupled chlorophyll pigments involved in thylakoid photoinhibition determined by steady-state fluorescence spectroscopy
S. Santabarbara and R.C. Jennings 138
- Uncoupling protein 3 protects aconitase against inactivation in isolated skeletal muscle mitochondria
D.A. Talbot and M.D. Brand 150
- The human mitochondrial transport protein family. Identification and protein regions significant for transport function and substrate specificity
H. Wohlrab 157
- Effects of a transition from normoxia to anoxia on yeast cytochrome *c* oxidase and the mitochondrial respiratory chain: Implications for hypoxic gene induction
P.S. David and R.O. Poyton 169

The bacterial-like lactate shuttle components from heterotrophic <i>Euglena gracilis</i> <i>R. Jasso-Chávez, I. García-Cano, Á. Marín-Hernández, D. Mendoza-Cózatl, J.L. Rendón and R. Moreno-Sánchez</i>	181	The topology of superoxide production by complex III and glycerol 3-phosphate dehydrogenase in <i>Drosophila</i> mitochondria <i>S. Miwa and M.D. Brand</i>	214
<i>Rapid report</i>		Characterization of the core complex of <i>Rubrivivax gelatinosus</i> in a mutant devoid of the LH2 antenna <i>J.-L. Ranck, F. Halgand, O. Laprèvote and F. Reiss-Husson</i>	220
Remarkable substituent effect: β -aminosquamocin, a potent dual inhibitor of mitochondrial complexes I and III <i>R.A. Duval, E. Poupon, U. Brandt and R. Hocquemiller</i>	191	Structural and functional changes in heart mitochondria from sucrose-fed hypertriglyceridemic rats <i>K. Carvajal, M. El Hafidi, A. Marín-Hernández and R. Moreno-Sánchez</i>	231
<i>Review</i>		Kinetics of charge translocation in the passive downhill uptake mode of the Na^+/H^+ antiporter NhaA of <i>Escherichia coli</i> <i>D. Zuber, R. Krause, M. Venturi, E. Padan, E. Bamberg and K. Fendler</i>	240
Old and new data, new issues: The mitochondrial $\Delta\Psi$ <i>H. Tedeschi</i>	195	Photosynthesis and negative entropy production <i>R.C. Jennings, E. Engelmann, F. Garlaschi, A.P. Casazza and G. Zucchelli</i>	251
<i>Regular papers</i>		<i>Cumulative Contents</i>	256
Probing the FQR and NDH activities involved in cyclic electron transport around Photosystem I by the ‘afterglow’ luminescence <i>M. Havaux, D. Rumeau and J.-M. Ducruet</i>	203
