Comparison of the genes coding for the light-harvesting complexes in strains R26, R26.1 and WT. – indicates that the sequence was found identical with that of the WT (2.4.1 genome from NCBI ID: NC_007493).

		R26	R26.1
LH1	α (PufA)	–	Val22 → Ala
	β (PufB)	Leu30 → Pro	Leu30 → Pro
