

SUBJECT INDEX

- Active transport
 Induction of ——— of neutral amino acids in *Streptomyces hydrogenans* (Ring) (183) 375
- Adipose tissue
 Relationship between glucose transport and cation transport across cell membranes in isolated tissues. V. Stimulating effect of ouabain, K^+ -free medium and insulin on efflux of 3-O-methylglucose from epididymal ——— (Clausen) (183) 625
- Air-water interface
 Interaction energies of cholesterol and lecithin in spread mixed monolayers at the ——— (Joos, Demel) (183) 447
- L-Alanine transport
 Absence of an effect of vitamin B_6 deficiency on ——— across rabbit ileum in vitro (Chez et al.) (183) 244
- Amino acids
 Induction of active transport of neutral ——— in *Streptomyces hydrogenans* (Ring) (183) 375
- Amino acid binding
 Preferential ——— to isolated mucosal brush borders from hamster jejunum (Burns, Faust) (183) 642
- Amino acid transfer systems
 Stereochemical specificity of neutral ——— in rat small intestine (Danielset al.) (183) 637
- Amino acid transport
 ——— in adult diaphyseal bone: Contrast with amino acid transport mechanisms in fetal membranous bone (Hahn et al.) (183) 194
- Amino acid transport
 Cross-inhibition of basic ——— by neutral amino acids (Reiser, Christiansen) (183) 611
- Amino acid transport
 Nonmetabolizable ——— in rat liver slices (Tews, Harper) (183) 601
- Amino acid transport
 ——— in rat-liver slices during development (Tews, Harper) (183) 635
- Anaesthetic
 Membrane concentration of a local ——— (chlorpromazine) (Kwant, Seeman) (183) 530
- Anaesthetics
 Membrane expansion of erythrocyte ghost by tranquilizers and ——— (Seeman et al.) (183) 499
- Anaesthetics
 Membrane expansion of intact erythrocytes by ——— (Seeman et al.) (183) 490
- Anaesthetics
 Temperature dependence of erythrocyte membrane expansion by alcohol ———. Possible support for the partition theory of anaesthesia (Seeman) (183) 520
- Aorta
 Relationship between metabolic activity and cholesterol uptake by intima-media of the rabbit ——— (Jensen) (183) 204
- ATPase
 Comments on recent efforts to estimate the molecular weight of the (Na^+ - K^+) ——— (Kepner, Macey) (183) 241
- ATPase
 Dio 9 and chlorhexidine: Inhibitors of membrane-bound ——— and of cation transport in *Streptococcus faecalis* (Harold et al.) (183) 129
- ATPase
 Preparation of (Na^+ - K^+)-dependent ——— from human gastric mucosa (Mózsik, Øye) (183) 640
- ATPase
 Variability in ouabain-induced inhibition of human erythrocyte membrane (Na^+ - K^+) ——— (Schrier et al.) (183) 397
- Axons
 Maintenance of sodium transport in perfused ——— (Foster et al.) (183) 401
- Bone
 Amino acid transport in adult diaphyseal ———: Contrast with amino acid transport mechanisms in fetal membranous bone (Hahn et al.) (183) 194
- Brain esterases
 Redistribution of rat ——— during subcellular fractionation (Koeppen et al.) (183) 253
- Brain microsomes
 Light-scattering studies on rabbit ———. I. Evidence for osmotic behaviour (Kamino, Inouye) (183) 36
- Brain microsomes
 Light-scattering studies on rabbit ———. II. Effects of ATP and chelation of Mg^{2+} on microsomal contraction (Kamino) (183) 48
- Brush border
 Enzymatic distinction of rat intestinal cell ——— and endoplasmic reticular membranes (Clark et al.) (183) 233
- Brush borders
 Preferential amino acid binding to isolated mucosal ——— from hamster jejunum (Burns, Faust) (183) 642
- Calcium accumulation
 ——— in laying fowl intestine in vitro (Bar, Hurwitz) (183) 591
- Cation transport
 Dio 9 and chlorhexidine: Inhibitors of membrane-bound ATPase and of ——— in *Streptococcus faecalis* (Harold et al.) (183) 129
- Cation transport
 Relationship between glucose transport and ——— across cell membranes in isolated tissues. V. Stimulating effect of ouabain, K^+ -free medium and insulin on efflux of 3-O-methylglucose from epididymal adipose tissue (Clausen) (183) 625
- Cell membranes
 Improved, reproducible method of pre-

- paring rat liver plasma — in buffered isotonic sucrose (Berman et al.) (183) 10
- Cell membranes
- Number of sodium pumping sites in — (Baker, Willis) (183) 646
- Cell membranes
- Relationship between glucose transport and cation transport across — in isolated tissues. V. Stimulating effect of ouabain, K^+ -free medium and insulin on efflux of 3-O-methylglucose from epididymal adipose tissue (Clausen) (183) 625
- Cell wall fraction
- Composition of the — of the fungus, *Cordyceps militaris* (Marks et al.) (183) 58
- Chara corallina*
- Ionic fluxes in cells of — (Findlay et al.) (183) 565
- Chlorpromazine
- Membrane concentration of a local anaesthetic (—) (Kwant, Seeman) (183) 530
- Chlorpromazine
- Membrane expansion of the erythrocyte by both the neutral and ionized forms of — (Seeman, Kwant) (183) 512
- Cholesterol
- Interaction energies of — and lecithin in spread mixed monolayers at the air-water interface (Joos, Demel) (183) 447
- Cholesterol
- Mixed monolayers of phospholipids and — (Chapman et al.) (183) 458
- Cholesterol uptake
- Relationship between metabolic activity and — by intima-media of the rabbit aorta (Jensen) (183) 204
- Cordyceps militaris*
- Composition of the cell wall fraction of the fungus, — (Marks et al.) (183) 58
- Corticosterone biosynthesis
- Effect of ouabain on — and on potassium and sodium concentration in calf adrenal tissue *in vitro* (Wellen, Benraad) (183) 110
- L- α -Dipalmitoyl lecithin monolayers
- Interactions of — with Na^+ , K^+ or Li^+ , and its possible role in membrane phenomena (Vilallonga et al.) (183) 98
- Electroosmosis theory
- Evidence for the — of transport in the phloem (Bowling) (183) 230
- Endoplasmic reticular membranes
- Enzymatic distinction of rat intestinal cell brush border and — (Clark et al.) (183) 233
- Endothelial cells
- Vesicular transport across — (Tomlin) (183) 559
- Erythrocytes
- Effect of partial replacements of membrane cholesterol by other steroids on the osmotic fragility and glycerol permeability of — (Bruckdorfer et al.) (183) 334
- Erythrocytes
- Enzyme activities and ultrastructure of a membrane fraction from human — (Nilsson, Ronquist) (183) 1
- Erythrocytes
- Hydrational effect of leptazol and its theoretical connection with glucose deficiency in the haemolysis of rabbit — (Coldman, Good) (183) 346
- Erythrocyte
- Membrane expansion of the — by both the neutral and ionized forms of chlorpromazine (Seeman, Kwant) (183) 512
- Erythrocytes
- Membrane expansion of intact — by by anaesthetics (Seeman et al.) (183) 490
- Erythrocyte
- Temperature dependence of — membrane expansion by alcohol anaesthetics. Possible support for the partition theory of anaesthesia (Seeman) (183) 520
- Erythrocyte fragility
- Effect of membrane-strain rate and of temperature on — and critical haemolytic volume (Seeman et al.) (183) 476
- Erythrocyte ghost
- Membrane expansion of — by tranquilizers and anaesthetics (Seeman et al.) (183) 499
- Erythrocyte membrane
- Sulphanilic acid diazonium salt: A label for the outside of the human — (Berg) (183) 65
- Erythrocyte membrane
- Variability in ouabain-induced inhibition of human — (Na^+ - K^+)-ATPase (Schrier et al.) (183) 397
- Esterases
- Redistribution of rat brain — during subcellular fractionation (Koeppen et al.) (183) 253
- Glucose transport
- Ionic effects on — and metabolism by isolated mouse fat cells incubated with or without insulin. I. Lack of effect of medium Ca^{2+} , Mg^{2+} or PO_4^{3-} (Letarte, Renold) (183) 350
- Glucose transport
- Ionic effects on — and metabolism by isolated mouse fat cells incubated with or without insulin. II. Effect of replacement of K^+ and of ouabain (Letarte et al.) (183) 357
- Glucose transport
- Ionic effects on — and metabolism by isolated mouse fat cells incubated with or without insulin. III. Effects of replacement of Na^+ (Letarte, Renold) (183) 366
- Glucose transport
- Relationship between — and cation transport across cell membranes in isolated tissues. V. Stimulating effect of ouabain, K^+ -free medium and insulin on efflux of 3-O-methylglucose from epididymal adipose tissue (Clausen) (183) 625
- Glycerol permeability
- Effect of partial replacements of membrane cholesterol by other steroids on the osmotic

- fragility and ——— of erythrocytes (Bruckdorfer et al.) (183) 334
- Glycosidase activity
——— of bovine liver plasma membranes (Fleischer, Fleischer) (183) 265
- Haemolysis
Hydrational effect of leptazol and its theoretical connection with glucose deficiency in the ——— of rabbit erythrocytes (Coldman, Good) (183) 346
- Haemolytic volume
Effect of membrane-strain rate and of temperature on erythrocyte fragility and critical ——— (Seeman et al.) (183) 476
- Ileum
Interactions between leucine transport and lysine transport in rabbit ——— (Munck, Schultz) (183) 182
- Insulin
Ionic effects on glucose transport and metabolism by isolated mouse fat cells incubated with or without ———. I. Lack of effect of medium Ca^{2+} , Mg^{2+} or PO_4^{3-} (Letarte, Renold) (183) 350
- Insulin
Ionic effects on glucose transport and metabolism by isolated mouse fat cells incubated with or without ———. II. Effect of replacement of K^+ and of ouabain (Letarte et al.) (183) 357
- Insulin
Ionic effects on glucose transport and metabolism by isolated mouse fat cells incubated with or without ———. III. Effects of replacement of Na^+ (Letarte, Renold) (183) 366
- [^{125}I]Insulin
Passage of ——— across isolated mesentery. Effect of anti-insulin serum (Brachet, Rasio) (183) 162
- Insulin
Relationship between glucose transport and cation transport across cell membranes in isolated tissues. V. Stimulating effect of ouabain, K^+ -free medium and ——— on efflux of 3-O-methyl glucose from epididymal adipose tissue (Clausen) (183) 625
- Intestine
Calcium accumulation in laying fowl ——— in vitro (Bar, Hurwitz) (183) 591
- Intestine
Stereochemical specificity of neutral amino acid transfer systems in rat small ——— (Daniels et al.) (183) 637
- Intracellular potential
——— of regenerating liver (Humphrey, Maeno) (183) 236
- Ionic fluxes
——— in cells of *Chara corallina* (Findlay et al.) (183) 565
- Jejunum
Preferential amino acid binding to isolated mucosal brush borders from hamster ——— (Burns, Faust) (183) 642
- Lecithin
Interaction energies of cholesterol and ——— in spread mixed monolayers at the air-water interface (Joos, Demel) (183) 447
- Lecithin-water systems
Physical studies of phospholipids. XII. Nuclear magnetic resonance studies of molecular motion in some pure ——— (Vekslis et al.) (183) 434
- Leptazol
Hydrational effect of ——— and its theoretical connection with glucose deficiency in the haemolysis of rabbit erythrocytes (Coldman, Good) (183) 346
- Leucine transport
Interactions between ——— and lysine transport in rabbit ileum (Munck, Schultz) (183) 182
- Lipid-water interfaces
Nuclear magnetic resonance spectroscopic studies of procaine hydrochloride and tetracaine hydrochloride at ——— (Hauser et al.) (183) 466
- Lysine transport
Interactions between leucine transport and ——— in rabbit ileum (Munck, Schultz) (183) 182
- Lysolecithin
Optical activity of plasma membranes and its modification by ———, phospholipase A and phospholipase C (Gordon et al.) (183) 405
- Medulla slices
Effect of calcium, potassium and ouabain on the oxygen consumption of external ——— from dog kidney (De Jairala et al.) (183) 137
- Membrane-bound ATPase
Dio 9 and chlorhexidine: Inhibitors of ——— and of cation transport in *Streptococcus faecalis* (Harold et al.) (183) 129
- Membrane cholesterol
Effect of partial replacement of ——— by other steroids on the osmotic fragility and glycerol permeability of erythrocytes (Bruckdorfer et al.) (183) 334
- Membrane concentration
——— of a local anaesthetic (chlorpromazine) (Kwant, Seeman) (183) 530
- Membrane electrodes
Use of ——— in potentiometric titrations of living cells (Botré et al.) (183) 249
- Membrane expansion
——— of the erythrocyte by both the neutral and ionized forms of chlorpromazine (Seeman, Kwant) (183) 512
- Membrane expansion
——— of erythrocyte ghost by tranquilizers and anaesthetics (Seeman et al.) (183) 499
- Membrane expansion
——— of intact erythrocytes by anaesthetics (Seeman et al.) (183) 490
- Membrane expansion
Temperature dependence of erythrocyte

- by alcohol anaesthetics. Possible support for the partition theory of anaesthesia (Seeman) (183) 520
- Membrane protein and lipid
Synthesis and turnover of ——— in *Mycoplasma laidlawii* (Kahane, Razin) (183) 79
- Mesentery
Passage of [125 I]insulin across isolated ———. Effect of anti-insulin serum (Brachet, Rasio) (183) 162
- Microsomal contraction
Light-scattering studies on rabbit brain microsomes. II. Effects of ATP and chelation of Mg^{2+} on ——— (Kamino) (183) 48
- Microsomes
Light-scattering studies on rabbit brain ———. I. Evidence for osmotic behaviour (Kamino, Inouye) (183) 36
- Mitochondrial membrane proteins
Solubility of ——— in acidic organic solvents (Curtis) (183) 239
- Monolayers
Interaction energies of cholesterol and lecithin in spread mixed ——— at the air-water interface (Joos, Demel) (183) 447
- Monolayers
Mixed ——— of phospholipids and cholesterol (Chapman et al.) (183) 458
- Mucosal brush borders
Preferential amino acid binding to isolated ——— from hamster jejunum (Burns, Faust) (183) 642
- Muscle membrane
Estimation of the sodium and potassium equilibrium potentials in the ——— of the earthworm, *Pheretima hawayana* R. (Chang, Ritzmann) (183) 246
- Myelin
Physical studies of ———. II. Proton magnetic resonance and infrared spectroscopy (Jenkinson et al.) (183) 427
- Nucleosidediphosphate activity
——— in plasma membrane of rat liver (Wattiaux-De Coninck, Wattiaux) (181) 118
- Oxygen consumption
Dual effect of sodium on ——— in toad bladder (Hersey) (183) 155
- Oxygen consumption
Effect of calcium, potassium and ouabain on the ——— of external medulla slices from dog kidney (De Jairala et al.) (183) 137
- Pheophytin-protein-carbohydrate complex
Morphogenesis of the bacterial photosynthetic apparatus. III. The features of a ——— excreted by the mutant M 46 of *Rhodospirillum rubrum* (Schick, Drews) (183) 215
- Phloem
Evidence for the electroosmosis theory of transport in the ——— (Bowling) (183) 230
- Phosphatidylethanolamine
Liquid crystalline phases of hydrated ——— (Junger, Reinauer) (183) 304
- Phosphatidylinositol
Physical studies of phospholipids. XI. Ca^{2+} binding to monolayers of phosphatidylserine and ——— (Hauser et al.) (183) 320
- Phosphatidylserine
Physical studies of phospholipids. XI. Ca^{2+} binding to monolayers of ——— and phosphatidylinositol (Hauser et al.) (183) 320
- Phospholipase A
Optical activity of plasma membranes and its modification by lysolecithin, ——— and phospholipase C (Gordon et al.) (183) 405
- Phospholipase C
Optical activity of plasma membranes and its modification by lysolecithin, phospholipase A and ——— (Gordon et al.) (183) 405
- Phospholipids
Mixed monolayers of ——— and cholesterol (Chapman et al.) (183) 458
- Phospholipids
Physical studies of ———. XII. Nuclear magnetic resonance studies of molecular motion in some pure lecithin-water systems (Vekslis et al.) (183) 434
- Phospholipid micelles
Biochemical aspects of the visual process. IV. Aldehydes and cation permeability of artificial ——— (Daemen, Bonting) (183) 90
- Phospholipid monolayers
Adsorption of ribonuclease at the air-water interface and on ——— (Khaïat, Miller) (183) 309
- Phospholipid vesicles
Amino groups at the surfaces of ——— (Papahadjopoulos, Weiss) (183) 417
- Photosynthetic apparatus
Morphogenesis of the bacterial ———. III. The features of a pheophytin-protein-carbohydrate complex excreted by the mutant M 46 of *Rhodospirillum rubrum* (Schick, Drews) (183) 215
- Plasma cell membranes
Improved, reproducible method of preparing rat liver ——— in buffered isotonic sucrose (Berman et al.) (183) 10
- Plasma membrane
Characterization of the ——— of *Mycoplasma laidlawii*. V. Effects of selective removal of protein and lipid (Morowitz, Terry) (183) 276
- Plasma membrane
Characterization of the ——— of *Mycoplasma laidlawii*. VI. Potassium transport (Cho, Morowitz) (183) 295
- Plasma membranes
Glycosidase activity of bovine liver ——— (Fleischer, Fleischer) (183) 265
- Plasma membranes
Nucleosidediphosphate activity in ——— of rat liver, (Wattiaux-De Coninck, Wattiaux) (183) 118
- Plasma membranes
Optical activity of ——— and its modifi-

- cation by lysolecithin, phospholipase A and phospholipase C (Gordon et al.) (183) 405
- Potassium transport
- Characterization of the plasma membrane of *Mycoplasma laidlawii*. VI. ——— (Cho, Morowitz) (183) 295
- Potentiometric titrations
- Use of membrane electrodes in ——— of living cells, (Botré et al.) (183) 249
- Procaine hydrochloride
- Nuclear magnetic resonance spectroscopic studies of ——— and tetracaine hydrochloride at lipid-water interfaces (Hauser et al.) (183) 466
- Proton uptake
- Light-induced ——— in whole cells of *Dunaliella parva* (Ben-Amotz, Ginzburg) (183) 144
- Protoplasts
- Why do bacterial ——— burst in hypotonic solutions? (Corner, Marquis) (183) 544
- Regenerating liver
- Intracellular potential of ——— (Humphrey, Maeno) (183) 236
- Retina
- Active sodium extrusion in the isolated frog ——— (Buckser) (183) 394
- Ribonuclease
- Adsorption of ——— at the air-water interface and on phospholipid monolayers (Khaïat, Miller) (183) 309
- Sarcoplasmic reticulum
- Properties of particles prepared from ——— by deoxycholate, (Selinger et al.) (183) 19
- Sarcoplasmic reticulum membranes
- Calcium-binding properties of ——— (Cohen, Selinger) (183) 27
- Sodium extrusion
- Active ——— in the isolated frog retina (Buckser) (183) 394
- Sodium-potassium ATPase
- Comments on recent efforts to estimate the molecular weight of the ——— (Kepner, Macey) (183) 241
- Sodium-potassium ATPase
- Variability in ouabain-induced inhibition of human erythrocyte membrane ——— (Schrier et al.) (183) 397
- Sodium-potassium-dependent ATPase
- Preparation of ——— from human gastric mucosa (Mözsik, Øye) (183) 640
- Sodium pumping sites
- Number of ——— in cell membranes (Baker, Willis) (183) 646
- Sodium transport
- Maintenance of ——— in perfused axons (Foster et al.) (183) 401
- Sodium transport
- Slow cis-stimulation of ——— across isolated urinary bladders of the fresh-water turtle, *Pseudemys scripta* (Wyssbrod) (183) 577
- Sugar transport
- Intestinal ———: Ionic activation and chemical specificity (Bihler) (183) 169
- Sulphanilic acid diazonium salt
- : A label for the outside of the human erythrocyte membrane (Berg) (183) 65
- Tetracaine hydrochloride
- Nuclear magnetic resonance spectroscopic studies of procaine hydrochloride and ——— at lipid-water interfaces, (Hauser et al.) (183) 466
- Toad bladder
- Dual effect of sodium on oxygen consumption in ——— (Hersey) (183) 155
- Tranquilizers
- Membrane expansion of erythrocyte ghost by ——— and anaesthetics (Seeman et al.) (183) 499
- Urinary bladders
- Slow cis-stimulation of sodium transport across isolated ——— of the fresh-water turtle, *Pseudemys scripta* (Wyssbrod) (183) 577
- Vesicular transport
- across endothelial cells (Tomlin) (183) 559
- Visual process
- Biochemical aspects of the ———. IV. Aldehydes and cation permeability of artificial phospholipid micelles (Daemen, Bonting) (183) 90
- Vitamin B₆ deficiency
- Absence of an effect of ——— on L-alanine transport across rabbit ileum in vitro (Chez et al.) (183) 244
