

## SUBJECT INDEX

- Acetazolamide  
 Inhibitory effect of ——— on the active bicarbonate and chloride transport mechanisms across short-circuited turtle bladders (Gonzalez) (193) 146
- Acetazolamide  
 ——— sensitive short-circuiting current versus mucosal bicarbonate concentration in turtle bladders (Gonzalez, Schilb) (193) 419
- $\alpha$ -Adrenergic inhibitor  
 ——— of sodium transport: The interaction of vasopressin and cyclic AMP (Watlington) (193) 394
- Adrenocorticotropin  
 Effect of polypeptide hormones on lipid monolayers. II. The effect of insulin analogues, vasopressin, oxytocin, thyrocalcitonin, ———, and 3',5'-cyclic AMP on calcium uptake by monomolecular films of monooctadecyl phosphate (Kafka, Pak) (193) 117
- Amino acid structure  
 Features of ——— enhancing or obstructing cosubstrate reactivity of sodium in transport (Christensen et al.) (193) 228
- $\alpha$ -Aminoisobutyric acid transport  
 Sodium and potassium electrochemical potential gradients and the ——— in Ehrlich ascites tumour cells (Jacquez, Schafer) (193) 368
- 3',5'-cyclic AMP  
 $\alpha$ -Adrenergic inhibition of sodium transport: The interaction of vasopressin and ——— (Watlington) (193) 394
- 3',5'-cyclic AMP  
 Effect of polypeptide hormones on lipid monolayers. II. The effect of insulin analogues, vasopressin, oxytocin, thyrocalcitonin, adrenocorticotropin, and ——— on calcium uptake by monomolecular films of monooctadecyl phosphate (Kafka, Pak) (193) 117
- Anaesthetics  
 Action of ——— on phospholipid membranes (Johnson, Bangham) (193) 92
- Anaesthetic  
 Displacement of membrane calcium by a local ——— (chlorpromazine) (Kwant, Seeman) (193) 338
- Antidiuretic hormone-like action  
 Mechanism of the ——— of hypertonic media on the frog urinary bladder (Ripoche et al.) (193) 231
- Aromatic compounds  
 Molecular orbital description of the partitioning of ——— between polar and non-polar phases (Rogers, Cammarata) (193) 22
- ATPase  
 Deoxycholate stimulation of goldfish intestinal (sodium-potassium) ——— and its relation to digoxin binding (Ellory, Smith) (193) 137
- ATPase  
 Effect of dehydration, starvation and sodium deprivation on microsomal ——— in the kidney (Gutman, Beyth) (193) 475
- ATPase  
 Molecular structure in phospholipid essential to active sodium-potassium-magnesium-dependent phosphatase of bovine cerebral cortex (Tanaka, Sakamoto) (193) 384
- Bicarbonate  
 Accelerating effect of serosal ——— on sodium transport in short-circuited turtle bladders (Gonzalez et al.) (193) 403
- Bicarbonate  
 Acetazolamide-sensitive short-circuiting current versus ——— concentration in turtle bladders (Gonzalez, Schilb) (193) 419
- Bicarbonate and chloride transport  
 Inhibitory effect of acetazolamide on the active ——— mechanisms across short-circuited turtle bladders (Gonzalez) (193) 146
- Bilayer membranes  
 Tetraphenylborate conductance through lipid ——— (Le Blanc, Jr.) (193) 350
- Bladders  
 Accelerating effect of serosal bicarbonate on sodium transport in short-circuited turtle ——— (Gonzalez et al.) (193) 403
- Bladders  
 Acetazolamide-sensitive short-circuiting current versus bicarbonate concentration in turtle ——— (Gonzalez, Schilb) (193) 419
- Bladder  
 Effect of propionate and other organic anions on sodium transport across toad ——— (Singer et al.) (193) 430
- Bladders  
 Inhibitory effect of acetazolamide on the active bicarbonate and chloride transport mechanism across short-circuited turtle ——— (Gonzalez) (193) 146
- Bladder  
 Mechanism of the "antidiuretic hormone-like" action of hypertonic media on the frog urinary ——— (Ripoche et al.) (193) 231
- Brush border  
 Studies on the organization of the ——— in intestinal epithelial cells. VI. Glucose binding to isolated intestinal brush borders

- and their subfractions (Eichholz et al.) (193) 179
- Brush border membrane  
Evidence for an intermediate step in carrier-mediated sugar translocation across the — of hamster small intestine (Caspary et al.) (193) 168
- Calcium uptake  
Effect of polypeptide hormones on lipid monolayers. II. The effect of insulin analogues, vasopressin, oxytocin, thyrocalcitonin, adrenocorticotropin, and 3',5'-cyclic AMP — by monomolecular films of monoctadecyl phosphate (Kafka, Pak) (193) 117
- Carnitine  
Erythrocytes lysis by long-chain acyl esters of — (Cho, Proulx) (193) 30
- Cerebral cortex  
Molecular structure in phospholipid essential to activate sodium-potassium-magnesium-dependent ATPase and potassium-magnesium-dependent phosphatase of bovine — (Tanaka, Sakamoto) (193) 384
- Chara corallina  
Electro-osmosis in — and Nitella translucens cells (Barry, Hope) (193) 124
- Chloride and bicarbonate transport  
Inhibitory effect of acetazolamide on the active — mechanisms across short-circuited turtle bladders (Gonzalez) (193) 146
- Chlorpromazine  
Displacement of membrane calcium by a local anaesthetic (—) (Kwant, Seeman) (193) 338
- Cholesterol absorption  
— by jejunum and ileum (Feldman, Henderson) (193) 221
- Clay particles  
Orientation of — sorbed on bacteria possessing different ionogenic surfaces (Marshall) (193) 472
- Cytochrome c  
Impermeability of the outer mitochondrial membrane to —. I. Studies on whole mitochondria (Wojtczak, Zaluska) (193) 64
- Cytochrome c  
Interaction between — and purified phospholipids (Hart et al.) (193) 308
- Cytoplasmic membrane  
Separation and properties of outer membrane and — in *Escherichia coli* (Miura, Mizushima) (193) 268
- Digoxin binding  
Deoxycholate stimulation of goldfish intestinal (sodium-potassium)-ATPase and its relation to — (Ellory, Smith) (193) 137
- Electron microscope study  
— of the disruption of erythrocyte membranes (Haggis) (193) 237
- Electron microscopy  
Use of small angle X-ray diffraction to investigate disordering of membranes during preparation for —. I. Osmium tetroxide and potassium permanganate (Moretz et al.) (193) 1
- Electron microscope study of the disruption of — (Haggis) (193) 237
- Erythrocyte membrane  
Fluorescence changes of ethidium bromide on binding to — and mitochondrial membrane (Gitler et al.) (193) 478
- Erythrocyte membrane  
Human —. Uptake of progesterone and chemical alterations (DeVenuto et al.) (193) 36
- Escherichia coli*  
Intracellular pH of — (Kashket, Wong) (193) 212
- Escherichia coli*  
Isolation and properties of mutants of — with increased phosphorylation of thiomethyl- $\beta$ -galactoside (Kashket, Wilson) (193) 294
- Ethidium bromide  
Fluorescence changes of — on binding to erythrocyte and mitochondrial membranes (Gitler et al.) (193) 478
- Folic acid transport  
Characteristics of — in the L1210 leukemia cell (Lichtenstein et al.) (193) 456
- Glucose binding  
Studies on the organization of the brush border in intestinal epithelial cells. VI. — to isolated intestinal brush borders and their subfractions (Eichholz et al.) (193) 179
- Glucose-6-phosphatase  
Activation in vitro of —, inorganic pyrophosphate-glucose phosphotransferase and related enzymes. Relationship to microsomal membrane structure (Stetten et al.) (193) 260
- Illite and montmorillonite  
Orientation of — sorbed on bacteria possessing different ionogenic surfaces (Marshall) (193) 472
- Inorganic pyrophosphate-glucose phosphotransferase  
Activation in vitro of glucose-6-phosphatase, — and related enzymes. Relation-

- ship to microsomal membrane structure (Stetten et al.) (193) 260
- Insulin analogues**  
Effect of polypeptide hormones on lipid monolayers. II. The effect of —, vasopressin, oxytocin, thyrocalcitonin, adrenocorticotropin, and 3',5'-cyclic AMP on calcium uptake by monomolecular films of monooctadecyl phosphate (Kafka, Pak) (193) 117
- Ion exchange**  
Chemistry of — in monomolecular layers of lipids (Santis, Rojas) (193) 319
- Ion-selective properties**  
— of some lipid systems and their relation to biological membranes (Botré et al.) (193) 333
- Lipid bilayer membranes**  
Tetraphenylborate conductance through — (Le Blanc, Jr.) (193) 350
- Lipid films**  
Chemistry of ion exchange in monomolecular — (Santis, Rojas) (193) 319
- Lipid monolayers**  
Effect of polypeptide hormones on —. III. The effect of insulin analogues, vasopressin, oxytocin, thyrocalcitonin, adrenocorticotropin, and 3',5'-cyclic AMP on calcium uptake by monomolecular films of monooctadecyl phosphate (Kafka, Pak) (193) 117
- Lipid-protein interaction**  
— in monolayers. Effect of conformation of poly-L-lysine on stearic acid monolayers (Shah) (193) 217
- Lipid systems**  
Ion-selective properties of some — and their relation to biological membranes (Botré et al.) (193) 333
- Liposomes**  
Potassium permeability of single compartment — with and without valinomycin (Johnson, Bangham) (193) 82
- Membranes**  
Ion-selective properties of some lipid systems and their relation to biological — (Botré et al.) (193) 333
- Membranes**  
Use of small angle X-ray diffraction to investigate disordering of — during preparation for electron microscopy. I. Osminum tetroxide and potassium permanganate (Moretz et al.) (193) 1
- Membranes**  
Use of small angles X-ray diffraction to investigate disordering of — during preparation for electron microscopy. II. Aldehydes (Moretz et al.) (193) 12
- Membrane calcium**  
Displacement of — by a local anaesthetic (chlorpromazine) (Kwant, Seeman) (193) 338
- Membrane fractions**  
Characterization of two different — isolated from the first stellar nerves of the squid *Dosidicus gigas* (Camejo et al.) (193) 247
- Membrane phospholipids**  
Participation of soluble liver proteins in the exchange of — (Wirtz, Zilversmit) (193) 105
- Membrane reformation**  
Selective reaggregation of solubilized mycoplasma membrane proteins and the kinetics of — (Razin et al.) (193) 277
- Microsomal ATPase**  
Effect of dehydration, starvation and sodium deprivation on — in the kidney (Gutman, Beyth) (193) 475
- Microsomal membrane structure**  
Activation in vitro of glucose-6-phosphatase, inorganic pyrophosphate-glucose phosphotransferase and related enzymes. Relationship to — (Stetten et al.) (193) 260
- Mitochondria**  
Osmotic nature of the ion-induced swelling of rat-liver — (Rottenberg, Solomon) (193) 48
- Mitochondrial membranes**  
Energy-dependent protein conformational transitions in — (Graham, Wallach) (193) 225
- Mitochondrial membrane**  
Fluorescence changes of ethidium bromide on binding to erythrocyte membrane and — (Gitler et al.) (193) 478
- Mitochondrial membrane**  
Impermeability of the outer — to cytochrome c. I. Studies on whole mitochondria (Wojtczak, Zaluska) (193) 64
- Mitochondrial membrane**  
Protein turnover of the inner and outer — of rat liver (De Bernard et al.) (193) 58
- Molecular orbital**  
— description of the partitioning of aromatic compounds between polar and nonpolar phases (Rogers, Cammarata) (193) 22
- Monomolecular layers**  
Chemistry of ion exchange in — of lipids (Santis, Rojas) (193) 319
- Montmorillonite and illite**  
Orientation of — sorbed on bacteria possessing different ionogenic surfaces (Marshall) (193) 472
- Murein**  
Electron microscopic contrasting of — with uranyl and chromium salts (Heilmann, Preusser) (193) 215
- Mycoplasma membrane proteins**  
Selective reaggregation of solubilized — and the kinetics of membrane reformation (Razin et al.) (193) 277
- Nitella translucens**  
Electro-osmosis in *Chara corallina* and — cells (Barry, Hope) (193) 124

- 5'-Nucleotidase  
Enrichment of ——— in membrane fragments isolated from *Acanthamoeba* sp. (Schultz, Thompson) (193) 203
- Outer membrane  
Separation and properties of ——— and cytoplasmic membrane in *Escherichia coli* (Miura, Mizushima) (193) 268
- Oxytocin  
Effect of polypeptide hormones on lipid monolayers. II. The effect of insulin analogues, vasopressin, ———, thyrocalcitonin, adrenocorticotropin, and 3',5'-cyclic AMP on calcium uptake by monomolecular films of monooctadecyl phosphate (Kafka, Pak) (193) 117
- Permeability  
Seasonal changes in the ——— of the isolated vesical epithelium of *Testudo hermanni hermanni* Gmelin (Gilles-Baillien) (193) 129
- Phosphate transport  
——— in *Bacillus cereus* (Rosenberg et al.) (193) 159
- Phospholipids  
Interaction between cytochrome c and purified ——— (Hart et al.) (193) 308
- Phospholipid  
Molecular structure in ——— essential to activate sodium-potassium-magnesium-dependent ATPase and potassium-magnesium-dependent phosphatase of bovine cerebral cortex (Tanaka, Sakamoto) (193) 384
- Phospholipid membranes  
Action of anaesthetics on ——— (Johnson, Bangham) (193) 92
- Plasma membrane  
Gel filtration of marker enzymes of ——— and endoplasmic reticulum from rat liver (Nakai et al.) (193) 468
- Poly-L-lysine  
Protein-lipid interaction in monolayers. Effect of conformation of ——— on stearic acid monolayers (Shah) (193) 217
- Polypeptide hormones  
Effect of ——— on lipid monolayers. II. The effect of insulin analogues, vasopressin, oxytocin, thyrocalcitonin, adrenocorticotropin, and 3',5'-cyclic AMP on calcium uptake by monomolecular films of monooctadecyl phosphate (Kafka, Pak) (193) 117
- Potassium-magnesium-dependent phosphatase  
Molecular structure in phospholipid essential to activate sodium-potassium-magnesium-dependent ATPase and ——— of bovine cerebral cortex (Tanaka, Sakamoto) (193) 384
- Potassium permeability  
——— of single compartment liposomes with and without valinomycin (Johnson, Bangham) (193) 82
- Potassium and sodium electrochemical potential  
——— gradients and the transport of  $\alpha$ -aminoisobutyric acid in Ehrlich ascites tumour cells (Jacquez, Schafer) (193) 368
- Progesterone  
Human erythrocyte membrane. Uptake of ——— and chemical alterations (DeVenuto et al.) (193) 36
- Proline transport  
——— by *Pseudomonas aeruginosa* (Kay, Gronlund) (193) 444
- Propionate  
Effect of ——— and other organic anions on sodium transport across toad bladder (Singer et al.) (193) 430
- Protein-lipid interaction  
——— in monolayers. Effect of conformation of poly-L-lysine on stearic acid monolayers (Shah) (193) 217
- Protein turnover  
——— of the inner and outer mitochondrial membrane of rat liver (De Bernard et al.) (193) 58
- Sarcoplasmic reticulum fragments  
Effect of diethyl ether and thymol on the ultrastructural and biochemical properties of purified ——— from skeletal muscle (Greaser et al.) (193) 73
- Short-circuiting current  
Acetazolamide-sensitive ——— versus mucosal bicarbonate concentration in turtle bladders (Gonzalez, Schilb) (193) 419
- Sodium-potassium ATPase  
Deoxycholate stimulation of goldfish intestinal ——— and its relation to digoxin binding (Ellory, Smith) (193) 137
- Sodium and potassium electrochemical potential  
——— gradients and the transport of  $\alpha$ -aminoisobutyric acid in Ehrlich ascites tumour cells (Jacquez, Schafer) (193) 368
- Sodium-potassium-magnesium-dependent ATPase  
Molecular structure in phospholipid essential to activate ——— and potassium-magnesium-dependent phosphatase of bovine cerebral cortex (Tanaka, Sakamoto) (193) 384
- Sodium transport  
Accelerating effect of serosal bicarbonate on ——— in short-circuited turtle bladders (Gonzalez et al.) (193) 403
- Sodium transport  
 $\alpha$ -Adrenergic inhibition of ———: The interaction of vasopressin and cyclic AMP (Watlington) (193) 394
- Sodium transport  
Effect of propionate and other organic anions on ——— across toad bladder (Singer et al.) (193) 430
- Sodium transport  
Features of amino acid structure enhancing or obstructing cosubstrate reactivity of ——— (Christensen et al.) (193) 228
- Squid  
Characterization of two different membrane fractions isolated from the first stellar

- nerves of the ——— *Dosidicus gigas* (Camejo et al.) (193) 247
- Stearic acid monolayers  
Protein-lipid interaction in monolayers.  
Effect of conformation of poly-L-lysine on ——— (Shah) (193) 217
- Stellar nerves  
Characterization of two different membrane fractions isolated from the first ——— of the squid *Dosidicus gigas* (Camejo et al.) (193) 247
- Sugar translocation  
Evidence for an intermediate step in carrier-mediated ——— across the brush border membrane of hamster small intestine (Caspary et al.) (193) 168
- Sugar transport  
Testosterone and ——— in levator ani muscle of rat (Bergamini) (193) 193
- Testosterone  
——— and sugar transport in levator ani muscle of rat (Bergamini) (193) 193
- Testudo hermanni hermanni*  
Seasonal changes in the permeability of the isolated vesical epithelium of ——— Gmelin (Gilles-Baillien) (193) 129
- Tetraphenylborate  
——— conductance through lipid bilayer membranes (Le Blanc, Jr.) (193) 350
- Thiomethyl- $\beta$ -galactoside  
Isolation and properties of mutants of *Escherichia coli* with increased phosphorylation of ——— (Kashket, Wilson) (193) 294
- Thyrocaltitonin  
Effect of polypeptide hormones on lipid monolayers. II. The effect of insulin analogues, vasopressin, oxytocin, ———, adrenocorticotropin, and 3',5'-cyclic AMP on calcium uptake by monomolecular films of monooctadecyl phosphate (Kafka, Pak) (193) 117
- Urinary bladder  
Effect of valinomycin on isolated ——— of *Pseudemys scripta*. I. Effect on electrical parameters under aerobic conditions (Wyssbrod) (193) 361
- Valinomycin  
Effect of ——— on isolated urinary bladder of *Pseudemys scripta*. I. Effect on electrical parameters under aerobic conditions (Wyssbrod) (193) 361
- Valinomycin  
Potassium permeability of single compartment liposomes with and without ——— (Johnson, Bangham) (193) 82
- Vasopressin  
 $\alpha$ -Adrenergic inhibition on sodium transport: The interaction of ——— and cyclic AMP (Watlington) (193) 394
- Vasopressin  
Effect of polypeptide hormones on lipid monolayers. II. The effect of insulin analogues, ———, oxytocin, thyrocaltitonin, adrenocorticotropin, and 3',5'-cyclic AMP on calcium uptake by monomolecular films of monooctadecyl phosphate (Kafka, Pak) (193) 117
- Vesical epithelium  
Seasonal changes in the permeability of the isolated ——— of *Testudo hermanni hermanni* Gmelin (Gilles-Baillien) (193) 129
- X-ray diffraction  
Use of small angle ——— to investigate disordering of membranes during preparation for electron microscopy. I. Osmium tetroxide and potassium permanganate (Moretz et al) (193) 1
- X-ray diffraction  
Use of small angle ——— to investigate disordering of membranes during preparation for electron microscopy. II. Aldehydes (Moretz et al.) (193) 12
