

## SUBJECT INDEX

- Acetazolamide  
 Production of a hydrogen ion gradient across the isolated frog skin. Quantitative aspects and effect of ——— (Emilio et al.) (203) 394
- Acetylcholine receptor  
 Affinity oxidation of the reduced ——— (Bartels et al.) (203) 568
- Acetylcholinesterase activity  
 Effect of proteolytic enzymes on ———, the sodium pump and choline transport in human erythrocytes (Martin) (203) 182
- Active transport  
 ——— of myo-inositol and its relation to the sugar transport system in hamster small intestine (Caspary, Crane) (203) 308
- Active transport  
 Theory of transport phenomena in biological membranes. II. The ——— of the ions (Volkenstein, Fishman) (203) 10
- ADP-ATP exchange reaction  
 Some properties of the ——— in turtle bladder microsomes (Shamoo et al.) (203) 495
- Amino acids  
 Comparison of inhibition of steady state, net transport, and exchange fluxes of ——— in brain slices (Blasberg et al.) (203) 464
- Amino acid transfer  
 Anaerobic glucose stimulation of ——— in everted small intestine of the rat (De la Noüe) (203) 360
- Amino acid transport  
 ——— in *Neurospora crassa*. II. Properties of a basic amino acid transport system (Pall) (203) 139
- Amino acid transport  
 Temperature dependence of ——— in Ehrlich ascites cells: With results which bear on the A-L distinction (Jacquez et al.) (203) 150
- Amylase secretion  
 Effect of calcium on ——— by rat parotid slices (Selinger, Naim) (203) 335
- Anaerobic glucose stimulation  
 ——— of amino acid transfer in everted small intestine of the rat (De la Noüe) (203) 360
- Antibiotics  
 Structural effects in the action of ——— on the ion permeability of lipid bilayers. I. Tyrocidine B (Goodall) (203) 28
- [ $\gamma$ - $^{32}\text{P}$ ]ATP  
 Phosphoproteins of plasma membranes isolated from rat liver. Phosphorylation by ——— (Blat, Harel) (203) 271
- ATP-dependent calcium uptake  
 ——— by microsomal preparations from rat parotid and submaxillary glands (Selinger et al.) (203) 326
- ATPase  
 Differential inhibitory effects of chloramphenicol on the synthesis of membrane ——— and cytoplasmic enzymes of *Micrococcus lysodeikticus* (Vambutas, Salton) (203) 94
- ATPase  
 Effects of calcium on the ——— activity of electric tissue extracts (Wins, Dargent-Salée) (203) 342
- ATPase  
 Effect of proteases on membrane ——— from two lactic acid bacteria (Neujahr) (203) 261
- ATPase  
 Intermediary complexes formed by sodium + potassium-dependent ——— (Shamoo et al.) (203) 484
- ATPase  
 Partial purification of a soluble sodium + potassium-dependent ——— from rabbit kidney (Towle, Copenhaver Jr.) (203) 124
- ATPase  
 Separation and partial purification of membrane-bound sodium + potassium-dependent  $\text{Mg}^{2+}$ - ——— and  $(\text{Na}^+ + \text{K}^+)$ -independent  $\text{Mg}^{2+}$ -ATPase from frog skeletal muscle (Boegman et al.) (203) 506
- ATPase  
 Sodium + potassium-dependent ——— in the isolated mucosal cells of turtle bladder (Shamoo, Brodsky) (203) 111
- Calcium  
 Effect of ——— on amylase secretion by rat parotid slices (Selinger, Naim) (203) 335
- Calcium  
 Effect of ——— on the ATPase activity of electric tissue extracts (Wins, Dargent-Salée) (203) 342
- Calcium-binding protein  
 Interaction of vitamin D-dependent ——— with lysolecithin: Possible relevance to calcium transport (Wasserman) (203) 176
- Calcium transport  
 Interaction of vitamin D-dependent calcium-binding protein with lysolecithin: Possible relevance to ——— (Wasserman) (203) 176
- Calcium uptake  
 ATP-dependent ——— by microsomal preparations from rat parotid and submaxillary glands (Selinger et al.) (203) 326
- Carotenoid pigments  
 ——— and stability of the cell membrane of *Sarcina lutea* (Mathews-Roth, Krinsky) (203) 357

## Catecholamines

- Action of beta adrenergic site stimulating ——— on isolated frog skin (McAfee) (203) 104

## Cellular membranes

- : Membrane marker enzyme activities in synchronized mouse leukemic cells L5178Y (Bosmann) (203) 256

## Chloramphenicol

- Differential inhibitory effects of ——— on the synthesis of membrane ATPase and cytoplasmic enzymes of *Micrococcus lysodeikticus* (Vambutas, Salton) (203) 94

## Chlorides

- Periodic variations of the electrochemical potential difference of ——— during spontaneous oscillations of the membrane potential of *Nitella* (Lefebvre, Gillet) (203) 575

## Chloride transport

- Interactions between lysine transport, sodium transport and ——— in rat jejunum (Munck) (203) 424

## Chloroplasts

- Ion and water transport in *Limonium*. V. The ionic status of ——— in the leaf of *Limonium vulgare* in relation to the activity of the salt glands (Larkum, Hill) (203) 133

## Choline transport

- Effect of proteolytic enzymes on acetylcholinesterase activity, the sodium pump and ——— in human erythrocytes (Martin) (203) 182

## Copper

- Effect of ——— on isolated frog skin (Ferreira) (203) 555

## Cycloheximide

- Inhibition of potassium and phosphate uptake in yeast by ——— (Reilly et al.) (203) 583

## Detergents

- Separation of membrane components produced by anionic ——— and maintained after the latter's removal (Emmelot, Vaz Dias) (203) 172

## Dielectric dispersion

- Anomalous ——— in bimolecular lipid membranes (Coster, Simons) (203) 17

## Differentiation

- Effect of light intensity and of oxygen pressure on the ——— of membranes in *Rhodospirillum rubrum* (Oelze, Drews) (203) 189

## Dithiothreitol

- Effect of lyophilization and ——— on vesicles of skeletal and cardiac muscle sarcoplasmic reticulum (Sreter et al.) (203) 354

## Electrical potential differences

- Effect of secretin on ——— in the pancreatic duct (Way, Diamond) (203) 298

## Electric tissue extracts

- Effects of calcium on the ATPase activity of ——— (Wins, Dargent-Salée) (203) 342

## Electron microscopy

- Hydrocarbon-soluble protein-lipid com-

plex: Characterization by chemical analysis, ultracentrifugation and ——— (Lesslauer et al.) (203) 199

## Erythrocytes

- Effects of proteolytic enzymes on acetylcholinesterase activity, the sodium pump and choline transport in human ——— (Martin) (203) 182

## Erythrocytes

- Temperature jump relaxations in aqueous saline suspensions of human ——— (Owen et al.) (203) 77

## Erythrocytes

- Water permeability of ——— (Blum, Forster) (203) 410

## Erythrocyte ghosts

- Influence of alkali metals on the incorporation of labelled phosphate into ATP in ——— (Dawson, Whittam) (203) 590

## Erythrocyte membrane

- Protein components of the ——— and their molecular weights (Demus, Mehl) (203) 291

## Frog skin

- Action of theophylline on the isolated ——— (*Rana temporaria*) (Kristensen) (203) 579

## Frog skin

- Effect of copper on isolated ——— (Ferreira) (203) 555

## Frog skin

- Production of a hydrogen ion gradient across the isolated ———. Quantitative aspects and effect of acetazolamide (Emílio et al.) (203) 394

## Gastric mucosa

- Active sodium transport in isolated frog ——— during hypoxia (Flemström, Öbrink) (203) 184

## Gel electrophoresis

- patterns of the proteins of organelles isolated from bovine liver (Zahler et al.) (203) 283

## Glomerular basement membrane

- Structural changes in the protein and carbohydrate components of ——— in aminonucleoside nephrosis (Kefalides, Forsell-Knott) (203) 62

## Glucose stimulation

- Anaerobic ——— of amino acid transfer in everted small intestine of the rat (De la Noüe) (203) 360

## Glycine transport system

- Distinct, Na<sup>+</sup>-dependent ——— in avian small intestine (Nelson, Lerner) (203) 434

## Histidine uptake

- and exchange in S37 ascites tumour cells (Matthews et al.) (203) 457

- Hydrocarbon-soluble protein-lipid complex ———: Characterization by chemical analysis, ultracentrifugation and electron microscopy (Lesslauer et al.) (203) 199

## Hydrogen ion gradient

- Production of a ——— across the isolated

- frog skin. Quantitative aspects and effect of acetazolamide (Emilio et al.) (203) 394
- myo-Inositol
- Active transport of ——— and its relation to the sugar transport system in hamster small intestine (Caspary, Crane) (203) 308
- Inositol transport
- in *Schizosaccharomyces pombe* (Cheneval et al.) (203) 348
- Intestine
- Influence of blood supply on lipid uptake from micellar solutions by the rat small intestine (Sylvén) (203) 365
- Intestine
- Variation in tissue resistance in rat small intestine: Its relationship to observed potential changes (Cotterell, Kohn) (203) 179
- Ions
- Theory of transport phenomena in biological membranes. II. The active transport of the ——— (Volkenstein, Fishman) (203) 10
- Ion permeability
- Structural effect in the action of antibiotics on the ——— of lipid bilayers. I. Tyrocidine B (Goodall) (203) 28
- Ion sorption
- and the potential profile near a model lecithin membrane (Gillespie) (203) 47
- Ion and water transport
- in *Limonium*. V. The ionic status of chloroplasts in the leaf of *Limonium vulgare* in relation to the activity of the salt glands (Larkum, Hill) (203) 133
- Kinetics
- of the accelerated intestinal valine transport in 2-day-old rats (Reiser et al.) (203) 351
- Lecithin membrane
- Ion sorption and the potential profile near a model ——— (Gillespie) (203) 47
- Lecithin micelles
- Observations by nuclear magnetic resonance of the interactions of water with ——— in carbon tetrachloride solution (Henrikson) (203) 228
- Light intensity
- Effect of ——— and of oxygen pressure on the differentiation of membranes in *Rhodospirillum rubrum* (Oelze, Drews) (203) 189
- Lipid
- Hydrocarbon-soluble protein- ——— complex: Characterization by chemical analysis, ultracentrifugation and electron microscopy (Lesslauer et al.) (203) 199
- Lipid bilayers
- Structural effects in the action of antibiotics on the ion permeability of ———. I. Tyrocidine B (Goodall) (203) 28
- Lipid membranes
- Anomalous dielectric dispersion in bimolecular ——— (Coster, Simons) (203) 17
- Lipid membranes
- Thickness of bimolecular ——— (Simons) (203) 209
- Lipid membrane
- Transient permeability of a model ——— to sodium (Petkau, Chelack) (203) 34
- Lipid monolayers
- Discrimination of sodium and potassium by ——— from epithelial cells (Fernández et al.) (203) 586
- Lipid-protein interactions
- Study of ——— in membranes by fluorescent probes (Wallach et al.) (203) 67
- Lipid uptake
- Influence of blood supply on ——— from micellar solutions by the rat small intestine (Sylvén) (203) 365
- Lyophilization
- Effect of ——— and dithiothreitol on vesicles of skeletal and cardiac muscle sarcoplasmic reticulum (Sreter et al.) (203) 354
- Lysine transport
- Interactions between ———, sodium transport and chloride transport in rat jejunum (Munck) (203) 424
- Lysolecithin
- Interaction of vitamin D-dependent calcium-binding protein with ———: Possible relevance to calcium transport (Wasserman) (203) 176
- Marker enzyme
- Cellular membranes: Membrane ——— activities in synchronized mouse leukemic cells L5178Y (Bosmann) (203) 256
- Membranes
- Carbohydrate composition of the plasma ——— of rat ascites hepatoma (Shimizu, Funakoshi) (203) 167
- Membrane
- Carotenoid pigments and stability of the cell ——— of *Sarcina lutea* (Mathews-Roth, Krinsky) (203) 357
- Membrane
- Comparison of insoluble mitochondrial ——— proteins from glucose repressed and derepressed *Saccharomyces carlsbergensis* (Kaplan, Criddle) (203) 249
- Membranes
- Effect of light intensity and of oxygen pressure on the differentiation of ——— in *Rhodospirillum rubrum* (Oelze, Drews) (203) 189
- Membrane
- Ion sorption and the potential profile near a model lecithin ——— (Gillespie) (203) 47
- Membrane
- Monactin does not influence potassium permeability in the squid axonal ——— (Stillman et al.) (203) 338
- Membrane
- Protein components of the erythrocyte ——— and their molecular weights (Demus, Mehl) (203) 291
- Membrane
- Relation between phospholipase action and release of NADH dehydrogenase from

- mitochondrial ——— (Awasthi et al.) (203) 233
- Membrane
- Steady-state distribution of phosphate across the ——— of the Ehrlich ascites tumour cell (Levinson) (203) 317
- Membrane
- Structural changes in the protein and carbohydrate components of glomerular basement ——— in aminonucleoside nephrosis (Kefalides, Forsell-Knott) (203) 62
- Membranes
- Study of lipid-protein interactions in ——— by fluorescent probes (Wallach et al.) (203) 67
- Membranes
- Theory of transport phenomena in biological ———. I. The passive transport and resting potential (Volkenstein, Fishman) (203) 1
- Membranes
- Theory of transport phenomena in biological ———. II. The active transport of the ions (Volkenstein, Fishman) (203) 10
- Membranes
- Thickness of bimolecular lipid ——— (Simons) (203) 209
- Membrane
- Transient permeability of a model lipid ——— to sodium (Petkau, Chelack) (203) 34
- Membrane ATPase
- Differential inhibitory effects of chloramphenicol on the synthesis of ——— and cytoplasmic enzymes of *Micrococcus lysodeikticus* (Vambutas, Salton) (203) 94
- Membrane ATPase
- Effect of proteases on ——— from two lactic acid bacteria (Neujahr) (203) 261
- Membrane components
- Separation of ——— produced by anionic detergents and maintained after the latter's removal (Emmelot, Vaz Dias) (203) 172
- Membrane composition
- Modification of ——— in growing photosynthetic bacteria (Steiner et al.) (203) 571
- Membrane marker enzyme
- Cellular membranes: ——— activities in synchronized mouse leukemic cells (Bosmann) (203) 256
- Membrane parameters
- Potassium-sodium dependence of the ——— of *Nitella translucens* (Williams, Hogg) (203) 170
- Membrane potential
- Periodic variations of the electrochemical potential difference of chlorides during spontaneous oscillations of the ——— of *Nitella* (Lefebvre, Gillet) (203) 575
- Membrane protein
- Incorporation of [ $^{14}\text{C}$ ]glycine into *Micrococcus lysodeikticus* ——— and effects of protein synthesis inhibitors (Vambutas, Salton) (203) 83
- Methionine
- Cations, transport and exchange diffusion of ——— in Ehrlich ascites cells (Potashner, Johnstone) (203) 445
- $\alpha$ -Methylglucoside transport mechanism
- in yeast: Evidence for transport-associated phosphorylation (Van Steveninck) (203) 376
- Microsomal preparations
- ATP-dependent calcium uptake by ——— from rat parotid and submaxillary glands (Selinger et al.) (203) 326
- Microsomes
- Some properties of the ADP-ATP exchange reaction in turtle bladder ——— (Shamoo et al.) (203) 495
- Mitochondrial membrane
- Relation between phospholipase action and release of NADH dehydrogenase from ——— (Awasthi et al.) (203) 233
- Mitochondrial membrane proteins
- Comparison of insoluble ——— from glucose repressed and derepressed *Saccharomyces carlsbergensis* (Kaplan, Criddle) (203) 249
- Monactin
- does not influence potassium permeability in the squid axonal membrane (Stillman et al.) (203) 338
- Mucosal cells
- Sodium-potassium-dependent ATPase in the isolated ——— of turtle bladder (Shamoo, Brodsky) (203) 111
- NADH dehydrogenase
- Relation between phospholipase action and release of ——— from mitochondrial membrane (Awasthi et al.) (203) 233
- Nephrosis
- Structural changes in the protein and carbohydrate components of glomerular basement membrane in aminonucleoside ——— (Kefalides, Forsell-Knott) (203) 62
- Nuclear magnetic resonance
- Observations by ——— of the interactions of water with lecithin micelles in carbon tetrachloride solution (Henrikson) (203) 228
- Nuclear membrane
- Isolation of ——— from a large scale preparation of bovine liver nuclei (Berezney et al.) (203) 531
- Nuclear membranes
- Lipid composition of ——— isolated from bovine liver (Keenan et al.) (203) 547
- Oxygen pressure
- Effect of light intensity and of ——— on the differentiation of membranes in *Rhodospirillum rubrum* (Oelze, Drews) (203) 189
- Permeability
- Monactin does not influence potassium ——— in the squid axonal membrane (Stillman et al.) (203) 338
- Phosphate steady-state distribution
- across the membrane of the Ehrlich ascites tumour cell (Levinson) (203) 317

- Phosphate uptake**  
Inhibition of potassium uptake and ——— in yeast by cycloheximide (Reilly et al.) (203) 583
- Phospholipase**  
Relation between ——— action and release of NADH dehydrogenase from mitochondrial membrane (Awasthi et al.) (203) 233
- Phospholipid dispersions**  
Ultrasonic attenuation measurements in ——— (Hammes, Roberts) (203) 220
- Phosphoproteins**  
——— of plasma membranes isolated from rat liver. Phosphorylation by [ $\gamma$ - $^{32}$ P]ATP (Blat, Harel) (203) 271
- Phosphorylation**  
Phosphoproteins of plasma membranes isolated from rat liver. ——— by [ $\gamma$ - $^{32}$ P]ATP (Blat, Harel) (203) 271
- Photosynthetic bacteria**  
Modification of membrane composition in growing ——— (Steiner et al.) (203) 571
- Plasma membranes**  
Carbohydrate composition of the ——— of rat ascites hepatoma (Shimizu, Funakoshi) (203) 167
- Plasma membranes**  
Phosphoproteins of ——— isolated from rat liver. Phosphorylation by [ $\gamma$ - $^{32}$ P]ATP (Blat, Harel) (203) 271
- Potassium**  
——— dependence of the membrane parameters of *Nitella translucens* (Williams, Hogg) (203) 170
- Potassium**  
Discrimination of sodium and ——— by lipid monolayers from epithelial cells (Fernández et al.) (203) 586
- Potassium permeability**  
Monactin does not influence ——— in the squid axonal membrane (Stillman et al.) (203) 338
- Potassium uptake**  
Inhibition of ——— and phosphate uptake in yeast by cycloheximide (Reilly et al.) (203) 583
- Potential differences**  
Effect of secretin on electrical ——— in the pancreatic duct (Way, Diamond) (203) 298
- Proteases**  
Effect of ——— on membrane ATPase from two lactic acid bacteria (Neujahr) (203) 261
- Protiens**  
Comparison of insoluble mitochondrial membrane ——— from glucose repressed and derepressed *Saccharomyces carlsbergensis* (Kaplan, Criddle) (203) 249
- Protein**  
Hydrocarbon-soluble ——— -lipid complex: Characterization by chemical analysis, ultracentrifugation and electron microscopy (Lesslauer et al.) (203) 199
- Protein components**  
——— of the erythrocyte membrane and their molecular wieghts (Demus, Mehl) (203) 291
- Proteins of organelles**  
Gel electrophoresis patterns of the ——— isolated from bovine liver (Zahler et al.) (203) 283
- Protein-lipid interactions**  
Study of ——— in membranes by fluorescent probes (Wallach et al.) (203) 67
- Protein synthesis inhibitors**  
Incorporation of [ $^{14}$ C]glycine into *Micrococcus lysodeikticus* membrane protein and effects of ——— (Vambutas, Salton) (203) 83
- Resting potential**  
Theory of transport phenomena in biological membranes. I. The passive transport and ——— (Volkenstein, Fishman) (203) 1
- Salt glands**  
Ion and water transport in *Limonium*. V. The ionic status of chloroplasts in the leaf of *Limonium vulgare* in relation to the activity of the ——— (Larkum, Hill) (203) 133
- Secretin**  
Effect of ——— on electrical potential differences in the pancreatic duct (Way, Diamond) (203) 298
- Sodium**  
——— dependence of the membrane parameters of *Nitella translucens* (Williams, Hogg) (203) 170
- Sodium**  
Discrimination of ——— and potassium lipid monolayers from epithelial cells (Fernández et al.) (203) 586
- Sodium**  
Transient permeability of a model lipid membrane to ——— (Petkau, Chelack) (203) 34
- Sodium + potassium-dependent ATPase**  
Intermediary complexes formed by ——— (Shamoo et al.) (203) 484
- Sodium + potassium-dependent ATPase**  
——— in the isolated mucosal cells of turtle bladder (Shamoo, Brodsky) (203) 111
- Sodium + potassium-dependent ATPase**  
Partial purification of a soluble ——— from rabbit kidney (Towle, Copenhaver Jr.) (203) 124
- Sodium + potassium-dependent  $Mg^{2+}$ -ATPase**  
Separation and partial purification of membrane-bound ——— and ( $Na^+$  +  $K^+$ )-independent  $Mg^{2+}$ -ATPase from frog skeletal muscle (Boegman et al.) (203) 506
- Sodium pump**  
Effect of proteolytic enzymes on acetylcholinesterase activity, the ——— and choline transport in human erythrocytes (Martin) (203) 182
- Sodium transport**  
Active ——— in isolated frog gastric mucosa during hypoxia (Flemström, Öbrink) (203) 184
- Sodium transport**  
Interactions between lysine transport,

- and chloride transport in rat jejunum  
(Munck) (203) 424
- Sugar transport
- Active transport of myo-inositol and its  
relation to the ——— system in hamster  
small intestine (Caspary, Crane) (203) 308
- Sugar uptake
- in acutely denervated levator ani  
muscle of rat (Bergamini et al.) (203) 344
- Theophylline
- Action of ——— on the isolated skin of the  
frog (*Rana temporaria*) (Kristensen) (203)  
579
- Tissue resistance
