SUBJECT INDEX

- Absorption
 ——— of aliphatic hydrocarbons by rats (Albro, Fishbein) (219) 437
 Acetylcholine proteolipid receptor
 Acetylcholinesterase and ———: Two different components of electroplax membranes (De Robertis, Fiszler de Plazas) (219) 388
 Acetylcholinesterase
 ——— and acetylcholine proteolipid receptor: Two different components of electroplax membranes (De Robertis, Fiszler de Plazas) (219) 388
 Active Na^+ and Cl^- transport
 ——— by the isolated chick chorioallantoic membrane (Moriarty, Hogben) (219) 463
 Adenosine
 Reversal by ——— of ADP inhibition of platelet ($\text{Na}^+ + \text{K}^+$)-ATPase (Moake et al.) (219) 484
 ADP inhibition
 Reversal by adenosine of ——— of platelet ($\text{Na}^+ + \text{K}^+$)-ATPase (Moake et al.) (219) 484
 β -Alanine permeaseless mutant
 Isolation and properties of a ——— of *Pseudomonas fluorescens* (Hechtman, Scriven) (219) 428
 Albumin
 Binding of serum ——— to phospholipid liposomes (Sweet, Zull) (219) 253
 Amiloride
 Effects of ——— on respiration of the urinary bladder, intestine and sartorius muscle of toads (Parisi, Bentley) (219) 234
 Amino acid absorption
 ——— in the mammalian colon (Binder) (219) 503
 α -Aminoisobutyric acid
 Uptake of ——— by cultured human fibroblasts (Mahoney, Rosenberg) (219) 500
 Anesthetics
 Effect of local ——— on phospholipid bilayers (Ohki) (219) 18
 1-Anilino-8-naphtalene sulfonate
 Correlations between structure and spectroscopic properties in membrane model systems. Tryptophan and ——— fluorescence in protein-lipid-water phases (Gulik-Krzywicki et al.) (219) 1
 Anion translocation
 Mechanism of ——— and pH equilibration in erythrocytes (Scarpa et al.) (219) 179
 Antibiotics
 Structural effects in the action of ——— on the ion permeability of lipid bilayers. II. Kinetics of tyrocidine B (Goodall) (219) 28
 Antibiotics
 Structural effects in the action of ——— on the ion permeability of lipid bilayers. III. Gramicidins "A" and "S", and lipid specificity (Goodall) (219) 471
 Antibiotic, filipin
 Studies on the mechanism of action of calciferol. IV. Interaction of the polyene ———, with intestinal mucosal membranes from vitamin D-treated and vitamin D-deficient chicks (Wong et al.) (219) 61
 Antigens
 Active potassium transport and the L and M ——— of sheep and goat red cells (Ellory, Tucker) (219) 160
 Bacteriochlorophyll
 Variations of NADH oxidase activity and ——— contents during membrane differentiation in *Rhodospirillum rubrum* (Oelze, Drews) (219) 131
 Bilayers
 Effect of local anesthetics on phospholipid ——— (Ohki) (219) 18
 Bilayers
 Structural effects in the action of antibiotics on the ion permeability of lipid ———. II. Kinetics of tyrocidine B (Goodall) (219) 28
 Bilayers
 Structural effects in the action of antibiotics on the ion permeability of lipid ———. III. Gramicidins "A" and "S", and lipid specificity (Goodall) (219) 471
 Bimolecular phospholipid membranes
 Electrooptical phenomena in ——— (Berestovsky et al.) (219) 263
 Biogenic amines
 Mechanism of transport and storage of ———. III. Effects of sodium and potassium ions on kinetics of 5-hydroxytryptamine and norepinephrine transport by rabbit synaptosomes (Bogdanski et al.) (219) 189
