

## SUBJECT INDEX

- Acetazolamide  
 Mechanism of acid secretory inhibition by  
 ——— (Hersey, High) (233) 604
- Acholeplasma laidwaii  
 Electron microscopy of solubilized ———  
 membrane proteins reaggregated with My-  
 coplasma pneumoniae glycolipids (Cole et  
 al.) (233) 76
- Acid secretory inhibition  
 Mechanism of ——— by acetazolamide  
 (Hersey, High) (233) 604
- Active transport  
 ——— of glutamate in Streptomyces hydro-  
 genans. I. Studies on uptake and pool size,  
 and their interrelationship (Gross, Ring)  
 (233) 652
- Agglutination of erythrocytes  
 ——— by calcium phosphate sols (Luly et  
 al.) (233) 730
- Alanine transport  
 Distinction between galactose and phenyl-  
 alanine effects on ——— in rabbit ileum  
 (Frizzell, Schultz) (233) 485
- Amino acids  
 Selective diffusion of neutral ——— across  
 lipid bilayers (Klein et al.) (233) 420
- Amino acid absorption  
 Rates of absorption of a dipeptide and the  
 equivalent free ——— in various mamma-  
 lian species (Lis et al.) (233) 453
- Amino acid accumulation  
 Cation gradients, ATP and ——— in Ehr-  
 lich ascites cells (Potashner, Johnstone)  
 (233) 91
- Amino acid transport  
 Effects of  $\text{Ca}^{2+}$  and  $\text{Mg}^{2+}$  upon ——— in rat  
 renal cortex slices (Brown, Michael) (233)  
 215
- Amino acid transport  
 ——— in Neurospora crassa. IV. Properties  
 and regulation of a methionine transport  
 system (Pall) (233) 201
- Amino acid uptake  
 Inhibition of ——— by ATP in isolated  
 intestinal epithelial cells (Reiser, Chris-  
 tiansen) (233) 480
- p*-Aminohippurate transport  
 Role of fatty acid metabolism on renal  
 ——— in vitro (Maxild) (233) 434
- p*-Aminohippuric acid  
 Renal uptake of ——— in vitro. Effects of  
 palmitate and L-carnitine (Barac-Nieto)  
 (233) 446
- $\alpha$ -Aminoisobutyric acid  
 Transport of ——— in rabbit detrusor  
 muscle. I. General characterization of the  
 uptake in vitro (Osman, Paton) (233) 666
- Artificial lipidic membranes  
 Transient conductance changes induced by  
 pressure in ——— (Parisi, Rivas) (233) 469
- Aspartate transport  
 Effect of unsaturated fatty acids on ———  
 in Staphylococcus aureus and on staphylo-  
 coccocal lipid monolayers (Gale, Llewellyn)  
 (233) 237
- ATPase  
 Asymmetric distribution of ouabain-sensi-  
 tive ——— activity in rat intestinal mucosa  
 (Fujita et al.) (233) 404
- ATPase  
 Binding of ATP to brain microsomal ———.  
 Determination of the APT-binding capacity  
 and the dissociation constant of the enzyme-  
 ATP complex as a function of  $\text{K}^+$  concen-  
 tration (Nørby, Jensen). (233) 104
- ATPase  
 Binding of ouabain to  $\text{Na}^+$ - $\text{K}^+$ -dependent  
 ——— treated with phospholipase (Tani-  
 guchi, Iida) (233) 831
- ATPase  
 Characterization of  $(\text{Na}^+ + \text{K}^+)$ - ———  
 isolated from embryonic chick hearts and  
 cultured chick heart cells (Sperelakis, Lee)  
 (233) 562
- ATPase  
 Effect of hydroxylamine on transport  
 ——— (Sachs et al.) (233) 117
- ATPase  
 Effect of urea, sodium and calcium on micro-  
 somal ——— activity in different parts of  
 the kidney (Gutman, Katzper-Shamir) (233)  
 133
- ATPase  
 Isolation of an ——— from the membrane  
 complex of the hens' egg (Haaland et al.)  
 (233) 137
- ATPase  
 Specificity of the ATP-binding site of  
 $(\text{Na}^+ + \text{K}^+)$ -activated ——— from brain  
 microsomes (Jensen, Nørby) (233) 395
- ATPase  
 Steady state kinetics of soluble and mem-  
 brane-bound mitochondrial ——— (Ham-  
 mes, Hilborn) (233) 580
- ATPase  
 Preparation and properties of an isolated  
 plant membrane fraction enriched in  $(\text{Na}^+$ -  
 $\text{K}^+)$ -stimulated ——— (Lai, Thompson),  
 (233) 84
- ATPase  
 Purification and characterization of  $(\text{Na}^+$   
 $+ \text{K}^+)$ - ———. I. The influence of deter-  
 gents on the activity of  $(\text{Na}^+ + \text{K}^+)$ -  
 ATPase in preparations from the outer

- medulla of rabbit kidney (Jørgensen, Skou) (233) 366
- ATPase  
Purification and characterization of ( $\text{Na}^+$  +  $\text{K}^+$ )- ———. II. Preparation by zonal centrifugation of highly active ( $\text{Na}^+$  +  $\text{K}^+$ )-ATPase from the outer medulla of rabbit kidneys (Jørgensen et al.) (233) 381
- ATPase  
Functional properties of ——— bound to and solubilized from the membrane complex of the hen's egg (Etheredge et al.) (233) 145
- ATPase activity  
Relationship between g-strophanthin-binding capacity and ——— in plasma-membrane fragments from ox brain (Hansen) (233) 122
- ATP accumulation  
Cation gradients, amino acid and ——— in Ehrlich ascites cells (Potashner, Johnstone) (233) 91
- ATP-binding capacity  
Binding of ATP to brain microsomal ATPase. Determination of the ——— and the dissociation constant of the enzyme-ATP complex as a function of  $\text{K}^+$  concentration (Nørby, Jensen) (233) 104
- ATP dependence  
——— of the  $\text{Ca}^{2+}$ -induced increase in  $\text{K}^+$  permeability observed in human red cells (Lew) (233) 327
- Benzyl alcohol  
Binding of ——— to erythrocyte membranes (Colley et al.) (233) 720
- Bi-ionic potentials  
——— of bovine lens capsules and collodion membranes (Takeguchi, Nagaki) (233) 753
- Bilayers  
Selective diffusion of neutral amino acids across lipid ——— (Klein et al.) (233) 420
- Bilayer liposomes  
Single ——— (Johnson et al.) (233) 820
- Bilayer membranes  
Physical properties of ——— formed from a synthetic saturated phospholipid in n-decane (Redwood et al.) (233) 1
- Biomembranes  
Mechanism of non-electrolyte permeation through lipid bilayers and through ——— (De Gier et al.) (233) 610
- Bladder  
Effect on *p*-nitrophenyl phosphate on the short-circuiting current in the turtle ——— (Shamoo) (233) 409
- Brush border  
Histidine influx across ——— of rabbit ileum (Chez et al.) (233) 222
- Brush border  
Localization of fatty acid reesterification in the ——— region of intestinal absorptive cells (Robins et al.) (233) 550
- Calcium  
Effect of urea, sodium and ——— on microsomal ATPase activity in different parts of the kidney (Gutman, Katzper-Shamir) (233) 133
- Calcium adsorption  
Monolayer characteristics and ——— to cerebroside and cerebroside sulphate orientated at the air-water interface (Quinn, Sherman) (233) 734
- Calcium phosphate sols  
Agglutination of erythrocytes by ——— (Luly et al.) (233) 730
- L-Carnitine  
Renal uptake of *p*-aminohippuric acid in vitro. Effects of palmitate and ——— (Barac-Nieto) (233) 446
- Carrier mechanism  
Site of energy coupling in the ——— for  $\beta$ -galactoside transport (Wong et al.) (233) 176
- Cation gradients  
———, ATP and amino acid accumulation in Ehrlich ascites cells (Potashner, Johnstone) (233) 91
- Cation movements  
Intracellular sodium and potassium concentrations and net ——— in *Chlorella pyrenoidosa* (Shieh, Barber) (233) 594
- Cell envelope  
——— in *Proteus vulgaris* P 18. Isolation and characterization of the peptidoglycan component (Fleck et al.) (233) 489
- Cell membranes  
——— of a marine pseudomonad, *Pseudomonas* BAL-31: Physical, chemical and biochemical properties (Franklin et al.) (233) 521
- Cerebroside  
Monolayer characteristics and calcium adsorption to ——— and cerebroside sulphate orientated at the air-water interface (Quinn, Sherman) (233) 734
- Cerebroside sulphate  
Monolayer characteristics and calcium adsorption to cerebroside and ——— orientated at the air-water interface (Quinn, Sherman) (233) 734
- Charophytes  
Quantization of a flux ratio in ———? (Findlay et al.) (233) 155
- Chlorella pyrenoidosa*  
Intracellular sodium and potassium concentrations and net cation movements in ——— (Shieh, Barber) (233) 594
- Chloride  
Effect of luminal pH on the absorption of water, sodium and ——— by rat intestine in vivo (Rousseau, Sladen) (233) 591
- Chromatophores  
*Thiocapsa floridana*; a cytological, physical and chemical characterization. II. Physical and chemical characteristics of isolated and reconstituted ——— (Takacs, Holt) (233) 278
- Chromatophore membranes  
*Thiocapsa floridana*; a cytological, physical and chemical characterization. I. Cytology

- of whole cells and isolated ——— (Takacs, Holt) (233) 258
- Colloid membranes
  - Bi-ionic potentials of bovine lens capsules and ——— (Takeguchi, Nakagaki) (233) 753
- Conductance changes
  - Transient ——— induced by pressure in artificial lipidic membranes (Parisi, Rivas) (233) 469
- Cytochrome  $b_5$ 
  - Preparation of antisera against ——— and NADPH-cytochrome c reductase from rat liver microsomes (Raftell, Orrenius) (233) 358
- n*-Decane
  - Physical properties of bilayer membranes formed from a synthetic saturated phospholipid in ——— (Redwood et al.) (233) 1
- Dimethyl sulphoxide
  - Effect of ——— on nucleoside transport in L-cells (Collings, Roberts) (233) 459
- Dimethylsulphoxide
  - Effect of ——— on the permeability of the lysosomal membrane (Lee) (233) 619
- Dipeptide absorption
  - Rates of ——— and the equivalent free amino acid absorption in various mammalian species (Lis et al.) (233) 453
- Electron microscopy
  - Uranyl salts as fixatives for ———. Study of the membrane ultrastructure and phospholipid loss in Bacilli (Silva et al.) (233) 513
- Endoplasmic reticulum
  - Preparation and properties of plasma membrane and ——— fragments from isolated rat fat cells (Avruch, Wallach) (233) 334
- Endoplasmic reticular membranes
  - Different properties of glucose-6-phosphatase and related enzymes in rough and smooth ——— (Stetten, Gosh) (233) 163
- Energy coupling
  - Site of ——— in the carrier mechanism for  $\beta$ -galactoside transport (Wong et al.) (233) 176
- L-Epinephrine
  - Nuclear magnetic resonance study of the interaction of ——— with phospholipid vesicles (Hammes, Tallman) (233) 17
- Erythrocytes
  - Agglutination of ——— by calcium phosphate sols (Luly et al.) (233) 730
- Erythrocytes
  - Glycine transport by pigeon ———: Calculation of glycine accumulation ratios by numerical intergration of entry and exit equations (Vidaver) (233) 231
- Erythrocytes
  - Properties of the water dissolved membrane proteins of human ——— (Hamaguchi, Cleve) (233) 320
- Erythrocyte membrane
  - Radioactive label for the ——— (Sears et al.) (233) 716
- Erythrocyte membranes
  - Binding of benzyl alcohol to ——— (Colley et al.) (233) 720
- Erythrocyte membranes
  - Characterization of microvesicles produced by shearing of human ——— (Schrier et al.) (233) 26
- Erythrocyte membranes
  - Role of unstirred layers in control of sugar movements across ——— (Naftalin) (233) 635
- Fatty acids
  - Effect of unsaturated ——— on aspartate transport in *Staphylococcus aureus* and on staphylococcal lipid monolayers (Gale, Llewellyn) (233) 237
- Fatty acid metabolism
  - Role of ——— on renal transport of *p*-aminohippurate in vitro (Maxild) (233) 434
- Fatty acid reesterification
  - Localization of ——— in the brush border region of intestinal absorptive cells (Robins et al.) (233) 550
- Flux ratio
  - Quantization of a ——— in charophytes? (Findley et al.) (233) 155
- Folate-methotrexate interactions
  - Model system for the study of heteroexchange diffusion: ——— in L1210 leucemia and Ehrlich ascites tumour cells (Goldman) (233) 624
- Galactose
  - Distinction between ——— and phenylalanine effects on alanine transport in rabbit ileum (Frizzell, Schultz) (233) 485
- $\beta$ -Galactoside transport
  - Effects of phloretin and synthetic oestrogens on ——— in *Escherichia coli* (Batt, Schachter) (233) 189
- $\beta$ -Galactoside transport
  - Site of energy coupling in the carrier mechanism for ——— (Wong et al.) (233) 176
- Glucose-6-phosphatase
  - Different properties of ——— and related enzymes in rough and smooth endoplasmic reticular membranes (Stetten, Ghosh) (233) 163
- Glutamate
  - Active transport of ——— in *Streptomyces hydrogenans*. I. Studies on uptake and pool size, and their interrelationship (Gross, Ring) (233) 652
- Glycine transport
  - by pigeon red cells: Calculation of glycine accumulation ratios by numerical intergration of entry and exit rate equations (Vidaver) (233) 231
- Glycolipids
  - Electron microscopy of solubilized *Acholeplasma laidwii* membrane proteins reaggregated with *Mycoplasma pneumoniae* ——— (Cole et al.) (233) 76
- Gram-positive bacteria
  - Membrane transitions in ——— (Ashe, Steim) (233) 810

- Heteroexchange diffusion  
 Model system for the study of ———: Methotrexate-folate interactions in L1210 leukemia and Ehrlich ascites tumour cells (Goldman) (233) 624
- Hexosamines  
 Membranes of animal cells. VIII. Distribution of sialic acid, ——— and sialidase in the L cell (Glick et al.) (233) 247
- Histidine influx  
 ——— across brush border of rabbit ileum (Chez et al.) (233) 222
- Histidine uptake  
 Effect of phospholipase and trypsin on ——— by mouse brain slices (Kirschmann et al.) (233) 644
- Hydroxylamine  
 Effect of ——— on transport ATPase (Sachs et al.) (233) 117
- Ileum  
 Histidine influx across brush border of rabbit ——— (Chez et al.) (233) 222
- Interface  
 Monolayer characteristics and calcium adsorption to cerebroside and cerebroside sulphate orientated at the air-water ——— (Quinn, Sherman) (233) 734
- Intestine  
 Effect of luminal pH on the absorption of water,  $\text{Na}^+$  and  $\text{Cl}^-$  by rat ——— in vivo (Rousseau, Sladen), (233) 591
- Intestine  
 Relationship between concentration and uptake by rat small ———, in vitro, for two micellar solutes (Hoffman, Yeoh) (233) 49
- Intestinal epithelial cells  
 Inhibition of amino acid uptake by ATP in isolated ——— (Reiser, Christiansen) (233) 480
- Lecithin  
 Preparation of immunologically responsive liposomes with phosphonyl and phosphinyl analogs of ——— (Kinsky et al.) (233) 815
- Lecithin-cholesterol-water  
 Water diffusion in lecithin-water and ——— lamellar phases at  $22^\circ$  (Gary-Bobo et al.) (233) 243
- Lecithin-water  
 Water diffusion in ——— and lecithin-cholesterol-water lamellar phases at  $22^\circ$  (Gary-Bobo et al.) (233) 243
- Lens capsules  
 Bi-ionic potentials of bovine ——— and collodion membranes (Takeguchi, Nakagaki) (233) 753
- Leucocidin  
 Action of phospholipids and ——— on the *p*-nitrophenyl phosphatase of the leucocyte membrane (Woodin, Wieneke) (233) 702
- Leucocyte membrane  
 Action of phospholipids and leucocidin on the *p*-nitrophenyl phosphatase of the ——— (Woodin, Wieneke) (233) 702
- Lipid bilayers  
 Mechanism of non-electrolyte permeation through ——— and through biomembranes (De Gier et al.) (233) 610
- Lipid bilayers  
 Selective diffusion of neutral amino acids across ——— (Klein et al.) (233) 420
- Lipid monolayers  
 ———. Interactions with staphylococcal  $\alpha$ -toxin (Buckelew Jr. and Colacicco) (233) 7
- Lipid monolayers  
 Effect of unsaturated fatty acids on aspartate transport in *Staphylococcus aureus* and on *staphylococcus* ——— (Gale, Llewellyn) (233) 237
- Liposomes  
 Preparation of immunologically responsive ——— with phosphonyl and phosphinyl analogs of lecithin (Kinsky et al.) (233) 815
- Liposomes  
 Single bilayer ——— (Johnson et al.) (233) 820
- Lysosomal membrane  
 Effect of dimethylsulphoxide on the permeability of the ——— (Lee) (233) 619
- Membrane  
 Functional properties of ATPases bound to and solubilized from the ——— complex of the hen's egg (Etheredge et al.) (233) 145
- Membrane  
 Isolation of an ATPase from the ——— complex of the hen's egg (Haaland et al.) (233) 137
- Membrane fatty acids  
 Correlation between the saturation of ——— and the presence of membrane fracture faces after osmium fixation (James, Branton) (233) 504
- Membrane fraction  
 Preparation and properties of an isolated plant ——— enriched in ( $\text{Na}^+$ - $\text{K}^+$ )-stimulated ATPase (Lai, Thompson) (233) 84
- Membrane fracture faces  
 Correlation between the saturation of membrane fatty acids and the presence of ——— after osmium fixation (James, Branton) (233) 504
- Membrane models  
 Optical properties of ——— at arbitrary angles of incidence (Simons, Ciddor) (233) 296
- Membrane permeability  
 Phospholipid-protein interactions: ——— correlated with monolayer "penetration" (Kimelberg, Papahadjopoulos) (233) 805
- Membrane proteins  
 Electron microscopy of solubilized *Acholeplasma laidlawii* ——— reaggregated with *Mycoplasma pneumoniae* glycolipids (Cole et al.) (233) 76
- Membrane proteins  
 Properties of the water dissolved ——— of human erythrocytes (Hamaguchi, Cleve) (233) 320
- Membrane proteins  
 Separation of ——— by polyacrylamide gel electrophoresis (Ray, Marinetti) (233) 787

- Membrane structure**  
 ———: Reactivity of tryptophan, tyrosine and lysine in proteins of the microsomal membrane (Khandwala, Kasper) (233) 348
- Membrane thickness**  
 Study of ——— by energy transfer (Peters) (233) 465
- Membrane transitions**  
 ——— in Gram-positive bacteria (Ashe, Steim) (233) 810
- Membrane ultrastructure**  
 Uranyl salts as fixatives for electron microscopy. Study of the ——— and phospholipid loss in *Bacilli* (Silva et al.) (233) 513
- Membranes**  
 Transient conductance changes induced by pressure in artificial lipidic ——— (Parisi, Rivas) (233) 469
- Membranes of animal cells**  
 ———. VIII. Distribution of sialic acid, hexosamines and sialidase in the L cell (Glick et al.) (233) 247
- Methionine transport system**  
 Amino acid transport in *Neurospora crassa*. IV. Properties and regulation of a ——— (Pall) (233) 201
- Methotrexate-folate interactions**  
 Model system for the study of heteroexchange diffusion: ——— in L1210 leucemia and Ehrlich ascites tumour cells (Goldman) (233) 624
- Microsomes**  
 Exchange of phospholipids between ——— and inner and outer mitochondrial membranes of rat liver (Blok et al.) (233) 61
- Microsomes**  
 Preparation of antisera against cytochrome  $b_5$  and NADPH-cytochrome *c* reductase from rat liver ——— (Raftell, Orrenius) (233) 358
- Microsomes**  
 Specificity of the ATP-binding site of ( $\text{Na}^+ + \text{K}^+$ )-activated ATPase from brain ——— (Jensen, Nørby) (233) 395
- Microsomes**  
 Resolution of fragments of plasma and sarcotubular membranes in heart muscle ——— (Wheeldon, Gan) (233) 37
- Microsomal ATPase**  
 Binding of ATP to brain ———. Determination of the ATP-binding capacity and the dissociation constant of the enzyme-ATP complex as a function of  $\text{K}^+$  concentration (Nørby, Jensen) (233) 104
- Microsomal ATPase**  
 Effect of urea, sodium and calcium on ——— activity in different parts of the kidney (Gutman, Katzper-Shamir) (233) 133
- Microsomal membrane**  
 Membrane structure: The reactivity of tryptophan, tyrosine and lysine in proteins of the ——— (Khandwala, Kasper) (233) 348
- Microvesicles**  
 Characterization of ——— produced by shearing of human erythrocyte membranes (Schrier et al.) (233) 26
- Mitochondrial ATPase**  
 Steady state kinetics of soluble and membrane-bound ——— (Hammes, Hilborn) (233) 580
- Mitochondrial membranes**  
 Exchange of phospholipids between microsomes and inner and outer ——— of rat liver (Blok et al.) (233) 61
- Model membrane system**  
 Interaction between oestradiol and progesterone in aqueous solutions and in a ——— (Heap et al.) (233) 307
- Mycoplasma pneumoniae**  
 Electron microscopy of solubilized *Acholeplasma laidwii* membrane proteins reassociated with ——— glycolipids (Cole et al.) (233) 76
- Myometrium**  
 Studies on smooth muscle plasma membrane. I. Isolation and characterization of plasma membrane from rat ——— (Kidwai et al.) (233) 538
- NADPH-cytochrome *c* reductase**  
 Preparation of antisera against cytochrome  $b_5$  and ——— from rat liver microsomes (Raftell, Orrenius) (233) 358
- Nerve impulse conduction**  
 Physical basis of ———: The irreversible thermodynamic analysis of the active state (Schmidt) (233) 765
- Neutral amino acids**  
 Selective diffusion of ——— across lipid bilayers (Klein et al.) (233) 420
- p*-Nitrophenyl phosphate**  
 Effect on ——— on the short-circuiting current in the turtle bladder (Shamoo) (233) 409
- p*-Nitrophenyl phosphatase**  
 Action of phospholipids and leucocidin on the ——— of the leucocyte membrane (Woodin, Wieneke) (233) 702
- Non-electrolyte permeation**  
 Mechanism of ——— through lipid bilayers and through biomembranes (De Gier et al.) (233) 610
- Nuclear membranes**  
 ——— from mammalian liver. III. Fatty acids (Stadler, Kleinig) (233) 315
- Nucleoside phosphatases**  
 Immunochemical studies of detergent-soluble ——— in rat liver plasma membranes (Blomberg, Perlmann) (233) 53
- Nucleoside transport**  
 Effect of dimethyl sulphoxide on ——— in L-cells (Collings, Roberts) (233) 459
- Nucleoside transport**  
 ——— by Novikoff rat hepatoma cells growing in suspension culture. Specificity and mechanism of transport reactions and relationship to nucleoside incorporation into nucleic acids (Plagemann) (233) 688

- Oestradiol  
Interaction between ——— and progesterone in aqueous solutions and in a model membrane system (Heap et al.) (233) 307
- Oestrogens  
Effects of phloretin and synthetic ——— on  $\beta$ -galactoside transport in *Escherichia coli* (Batt, Schachter) (233) 189
- Ouabain  
Binding of ——— to  $\text{Na}^+$ - $\text{K}^+$ -dependent ATPase treated with phospholipase (Tani-guchi, Iida) (233) 831
- Ouabain-sensitive ATPase  
Asymmetric distribution of ——— activity in rat intestinal mucosa (Fujita et al.) (233) 404
- Palmitate  
Renal uptake of *p*-aminohippuric acid in vitro. Effects of ——— and L-carnitine (Barac-Nieto) (233) 446
- Peptidoglycan  
Cell envelope in *Proteus vulgaris* P 18. Isolation and characterization of the ——— component (Fleck et al.) (233) 489
- Permeability  
Effect of dimethylsulphoxide on the ——— of the lysosomal membrane (Lee) (233) 619
- Phenylalanine  
Distinction between galactose and ——— effects on alanine transport in rabbit ileum (Frizzell, Schultz) (233) 485
- Phloretin  
Effects of ——— and synthetic oestrogens on  $\beta$ -galactoside transport in *Escherichia coli* (Batt, Schachter) (233) 189
- Phospholipase  
Effect of ——— and trypsin on histidine uptake by mouse brain slices (Kirschmann et al.) (233) 644
- Phospholipase C  
Complete purification and some properties of ——— from *Bacillus cereus* (Zwaal et al.) (233) 474
- Phospholipid  
Physical properties of bilayer membranes formed from a synthetic saturated ——— in *n*-decane (Redwood et al.) (233) 1
- Phospholipid  
Uranyl salts as fixatives for electron microscopy. Study of the membrane ultrastructure and ——— loss in *Bacilli* (Silva et al.) (233) 513
- Phospholipids  
Exchange of ——— between microsomes and inner and outer mitochondrial membranes of rat liver (Blok et al.) (233) 61
- Phospholipid-protein interactions  
———: Membrane permeability correlated with monolayer "penetration" (Kimelberg, Papahadjopoulos) (233) 805
- Phospholipid vesicles  
Nuclear resonance study of the interaction of L-epinephrine with ——— (Hammes, Tallman) (233) 17
- Phospholipids  
Action of ——— and leucocidin on the *p*-nitrophenyl phosphatase of the leucocyte membrane (Woodin, Wieneke) (233) 702
- Phosphonyl and phosphinyl analogs of lecithin  
Preparation of immunologically responsive liposomes with ——— (Kinsky et al.) (233) 815
- Plasma membrane  
Preparation and properties of ——— and endoplasmic reticulum fragments from isolated rat fat cells (Avruch, Wallach) (233) 334
- Plasma membrane  
Studies on smooth muscle ———. I. Isolation and characterization of plasma membrane from rat myometrium (Kidwai et al.) (233) 538
- Plasma-membrane fragments  
Relationship between *g*-strophanthin-binding capacity and ATPase activity in ——— from ox brain (Hansen) (233) 122
- Plasma membranes  
Immunochemical studies of detergent-soluble nucleoside phosphatases in rat liver ——— (Blomberg, Perlmann) (233) 53
- Plasma membranes  
Resolution of fragments of sarcotubular and ——— in heart muscle microsomes (Wheel-don, Gan) (233) 37
- Polysorbate 80-hexadecane interface  
Interfacial barriers to the transport of sterols and other organic compounds at the aqueous ——— (Bikhazi, Higuchi) (233) 676
- Potassium  
Intracellular sodium and ——— concentrations and net cation movements in *Chlorella pyrenoidosa* (Shih, Barber) (233) 594
- Potassium permeability  
ATP dependence of the  $\text{Ca}^{2+}$ -induced increase in ——— observed in human red cells (Lew) (233) 827
- Progesterone  
Interaction between oestradiol and ——— in aqueous solutions and in a model membrane system (Heap et al.) (233) 307
- Protein-phospholipid interactions  
———: Membrane permeability correlated with monolayer "penetration" (Kimelberg, Papahadjopoulos) (233) 805
- Proteus vulgaris*  
Cell envelope in ——— P 18. Isolation and characterization of the peptidoglycan component (Fleck et al.) (233) 489
- Pseudomonas* BAL-31  
Cell membranes of a marine pseudomonad, ———: Physical, chemical and biochemical properties (Franklin et al.) (233) 521
- Renal cortex slices  
Effects of  $\text{Ca}^{2+}$  and  $\text{Mg}^{2+}$  upon amino acid transport in rat ——— (Brown, Michael) (233) 215
- Sarcotubular membranes  
Resolutions of fragments of plasma and

- in heart muscle microsomes (Wheeldon, Gan) (233) 37
- Short-circuiting current  
Effect on *p*-nitrophenyl phosphate on the  
——— in the turtle bladder (Shamoo) (233) 409
- Sialic acid  
Membranes of animal cells. VIII. Distribution of ———, hexosamines and sialidase in the L cell (Glick et al.) (233) 247
- Sialidase  
Membranes of animal cells. VIII. Distribution of sialic acid, hexosamines and ——— in the L cell (Glick et al.) (233) 247
- Small intestine  
Relationship between concentration and uptake by rat ———, in vitro, for two micellar solutes (Hoffman, Yeoh) (233) 49
- Sodium  
Effect of luminal pH on the absorption of water, ——— and chloride by rat intestine in vivo (Rousseau, Sladen) (233) 591
- Sodium  
Effect of urea, ——— and calcium on microsomal ATPase activity in different parts of the kidney (Gutman, Katzper-Shamir) (233) 133
- Sodium  
Intracellular ——— and potassium concentrations and net cation movements in *Chlorella pyrenoidosa* (Shieh, Barber) (233) 594
- (Sodium + potassium)-activated ATPase  
Specificity of the ATP-binding site of ——— from brain microsomes (Jensen, Nørby) (233) 395
- (Sodium + potassium)-ATPase  
Characterization of ——— isolated from embryonic chick hearts and cultured chick heart cells (Sperelakis, Lee) (233) 562
- (Sodium + potassium)-ATPase  
Purification and characterization of ———. I. The influence of detergents on the activity of (Na<sup>+</sup> + K<sup>+</sup>)-ATPase in preparations from the outer medulla of rabbit kidney (Jørgensen, Skou) (233) 366
- (Sodium + potassium)-ATPase  
Purification and characterization of ———. II. Preparation by zonal centrifugation of highly active (Na<sup>+</sup> + K<sup>+</sup>)-ATPase from the outer medulla of rabbit kidneys (Jørgensen et al.) (233) 381
- Sodium-potassium-dependent ATPase  
Binding of ouabain to ——— treated with phospholipase (Taniguchi, Iida) (233) 831
- (Sodium-potassium)-stimulated ATPase  
Preparation and properties of an isolated plant membrane fraction enriched in ——— (Lai, Thompson) (233) 84
- Staphylococcus aureus  
Effect of unsaturated fatty acids on aspartate transport in ——— and on staphylococcal lipid monolayers (Gale, Llewellyn) (233) 237
- Sterols  
Interfacial barriers to the transport of ——— and other organic compounds at the aqueous polysorbate 80-hexadecane interface (Bikhazi, Higuchi) (233) 676
- Streptomyces hydrogenans  
Active transport of glutamate in ———. I. Studies on uptake and pool size, and their interrelationship (Cross, Ring) (233) 652
- g*-Strophanthin-binding capacity  
Relationship between ——— and ATPase activity in plasma-membrane fragments from ox brain (Hansen) (233) 122
- Sugar movements  
Role of unstirred layers in control of ——— across erythrocyte membranes (Naftalin) (233) 635
- Thiocapsa floridana  
———; cytological, physical and chemical characterization. I. Cytology of whole cells and isolated chromatophore membranes (Takacs, Holt) (233) 258
- Thiocapsa floridana  
———; cytological, physical and chemical characterization. II. Physical and chemical characteristics of isolated and reconstituted chromatophores (Takacs, Holt) (233) 278
- $\alpha$ -Toxin  
Lipid monolayers. Interactions with staphylococcal ——— (Buckelew Jr. and Colacicco) (233) 7
- Transport  
Interfacial barriers to the ——— of sterols and other organic compounds at the aqueous polysorbate 80-hexadecane interface (Bikhazi, Higuchi) (233) 676
- Transport ATPase  
Effect of hydroxylamine on ——— (Sachs et al.) (233) 117
- Trypsin  
Effect of phospholipase and ——— on histidine uptake by mouse brain slices (Kirschmann et al.) (233) 644
- Uptake  
Relationship between concentration and ——— by rat small intestine, in vitro, for two micellar solutes (Hoffman, Yeoh) (233) 49
- Urea  
Effect of ———, sodium and calcium on microsomal ATPase activity in different parts of the kidney (Gutman, Katzper-Shamir) (233) 133
- Water  
Effect of luminal pH on the absorption of ———, Na<sup>+</sup> and Cl<sup>-</sup> by rat intestine in vivo (Rousseau, Sladen) (233) 591
- Water diffusion  
——— in lecithin-water and lecithin-cholesterol-water lamellar phases at 22° (Gary-Bobo et al.) (233) 243
