

## SUBJECT INDEX

- Acetone**  
Binding of  $\text{Ca}^{2+}$  to the cell membrane increased by volatile anesthetics (alcohols, ———, ether) which induce sensitization of nerve or muscle (Seeman et al.) (225) 185
- Acyl carnitines**  
Studies on the mechanism of haemolysis by ———, lysolecithins and acyl cholines (Cho, Proulx) (225) 214
- Acyl cholines**  
———, lysolecithins and acyl cholines (Cho, Proulx) (225) 214
- Acyl cholines**  
Studies on the mechanism of haemolysis by acyl carnitines, lysolecithins and ——— (Cho, Proulx) (225) 214
- Adipocyte ghosts**  
Lypolytic activity of ——— (Crum, Calvert) (225) 161
- Alcohols**  
Binding of  $\text{Ca}^{2+}$  to the cell membrane increased by volatile anesthetics (———, acetone, ether) which induce sensitization of nerve or muscle (Seeman et al.) (225) 185
- Alcohol anesthetics**  
Membrane concentrations of ——— (Seeman et al.) (225) 171
- Alkali metal ions**  
Effect of ——— on sugar transport in muscle: Interaction with the sugar carrier or indirect effect (Bihler, Sawh) (225) 56
- Amino acids**  
Relative permeability of lysosomes from *Tetrahymena pyriformis* to some ——— and dipeptides (Lee) (225) 108
- Amino acid transport**  
Development of ——— by the small intestine of the chick (Pratt Jr., Turner) (225) 113
- Amino acid transport**  
Further studies of ——— in rat liver slices (Crawhall, Davis) (225) 326
- Amino acid uptake**  
Patterns of neutral ——— along the rat small intestine (Baker, George) (225) 315
- $\delta$ -Aminolaevulinic acid**  
Inhibition of red cell and brain ATPase by ——— (Becker et al.) (225) 26
- Anesthetics**  
Binding of  $\text{Ca}^{2+}$  to the cell membrane is increased by volatile ——— (alcohols, acetone, ether) which induce sensitization of nerve or muscle (Seeman et al.) (225) 185
- Anesthetics**  
Membrane concentrations of alcohol ——— (Seeman et al.) (225) 171
- ATPases**  
Effect of temperature on  $\text{Mg}^{2+}$ - and  $(\text{Na}^+ + \text{K}^+)$ - ——— (Shamoo et al.) (225) 254
- ATPase**  
Inhibition of red cell and brain ——— by  $\delta$ -aminolaevulinic acid (Becker et al.) (225) 26
- ATPase**  
Stimulation of the phosphatase activity of  $(\text{Na}^+, \text{K}^+)$ - ——— preparations by ouabain (Pitts, Askari) (225) 388
- ATPase**  
Studies on the partial reactions catalyzed by the  $(\text{Na}^+ + \text{K}^+)$ -activated ———. I. Effects of simple anions and nucleoside triphosphates on the alkali-cation specificity of the p-nitrophenylphosphatase (Koyal et al.) (225) 11
- ATPase**  
Studies on the partial reactions catalyzed by the  $(\text{Na}^+ + \text{K}^+)$ -activated ———. II. Effects of oligomycin and other inhibitors on the p-nitrophenylphosphatase (Askari, Koyal) (225) 20
- Benzo(a)pyrene**  
Study on the mechanism of intestinal absorption of ——— (Rees et al.) (225) 96
- Bicarbonate**  
Movement of carbon dioxide and ——— across isolated frog skin (Smith et al.) (225) 77
- Bile salt**  
Reversible inhibition of intestinal active sugar transport by deconjugated ——— in vitro (Gracey et al.) (225) 308
- Bile salts**  
Uptake and efflux by everted intestinal sacs of micellar cholesterol in ——— and in non-ionic detergent (Watt, Simmonds) (225) 347
- Bimolecular lipid membrane**  
Sustained, coupled electrical and mechanical oscillations in a ——— in the presence of inorganic ions (Pant, Rosenberg) (225) 379
- Bioelectric potential**  
Temperature effects on *Valonia* ——— (Thorhaug) (225) 151
- Brain**  
Aspects of uptake of non-metabolites in slices of mouse ——— (Piccoli, Lajtha) (225) 356
- Calcium**  
Binding of ——— to the cell membrane increased by volatile anesthetics (alcohols, acetone, ether) which induce sensitization of nerve or muscle (Seeman et al.) (225) 185

- Calcium  
Net transport of ——— by toad bladder (Walser) (225) 64
- Calcium  
Sodium permeability of butanol-treated erythrocytes. The role of ——— (Burt, Green) (225) 46
- Carbon dioxide  
Movement of ——— and bicarbonate across isolated frog skin (Smith et al.) (225) 77
- Carcinogenesis  
Ionic transport through model membranes. I. Effects of accelerators of ——— (Horton, McClure) (225) 248
- Cation transport  
Relationship between glucose transport and ——— across cell membranes in isolated tissues. VI. The effect of insulin, ouabain, and metabolic inhibitors on the transport of 3-O-methylglucose and glucose in rat soleus muscles (Kohn, Clausen) (225) 277
- Cell membrane  
Binding of  $\text{Ca}^{2+}$  to the ——— increased by volatile anesthetics (alcohols, acetone, ether) which induces sensitization of nerve or muscle (Seeman et al.) (225) 185
- Cell membrane  
Interaction of 2,4-dinitrophenol with anaerobic  $\text{Rb}^+$  transport across the yeast ——— (Borst-Pauwels et al.) (225) 269
- Cell membranes  
Relationship between the transport of glucose and cations across ——— in isolated tissues. VI. The effect of insulin, ouabain, and metabolic inhibitors on the transport of 3-O-methylglucose and glucose in rat soleus muscles (Kohn, Clausen) (225) 277
- Cholesterol  
Uptake and efflux by everted intestinal sacs of micellar ——— in bile salts and in non-ionic detergent (Watt, Simmonds) (225) 347
- Cytochrome  $b_5$   
——— and cytochrome P-450 in liver cell fractions (Fleischer et al.) (225) 194
- Cytochrome P-450  
Cytochrome  $b_5$  and ——— in liver cell fractions (Fleischer et al.) (225) 194
- Deoxycholate  
Study of human red blood cell membrane using sodium ——— (Philippot) (225) 201
- 2,4-Dinitrophenol  
Interaction of ——— with anaerobic  $\text{Rb}^+$  transport across the yeast cell membrane (Borst-Pauwels et al.) (225) 269
- Dipeptides  
Relative permeability of lysosomes from *Tetrahymena pyriformis* to some amino acids and ——— (Lee) (225) 108
- Erythrocytes  
Effect of temperature on the competitive inhibition of sorbose transfer in human ——— by glucose (Levine et al.) (225) 291
- Erythrocytes  
Sodium permeability of butanol-treated ———. The role of calcium (Burt, Green) (225) 46
- Erythrocyte membrane  
Study of human ——— using sodium deoxycholate. I. Mechanism of the solubilization (Philippot) (225) 201
- Essential fatty acids  
——— and glucose permeability of lecithin membranes (Li-Fu Chen et al.) (225) 89
- Ether  
Binding of  $\text{Ca}^{2+}$  to the cell membrane is increased by volatile anesthetics (alcohols, acetone, ———) which induce sensitization of nerve or muscle (Seeman et al.) (225) 185
- D-[1- $^{14}\text{C}$ ]Glucosamine  
Metabolic studies of rat liver plasma membranes using ——— (Kawasaki, Yamashina) (225) 234
- Glucose  
Effect of temperature on the competitive inhibition of sorbose transfer in human erythrocytes by ——— (Levine et al.) (225) 291
- Glucose permeability  
Essential fatty acids and ——— of lecithin membranes (Li-Fu Chen et al.) (225) 89
- Glucose transport  
Effects of phlorizin on ——— into blood and lymph (Largis, Jacobs) (225) 301
- Glucose transport  
Relationship between ——— and cation transport across cell membranes in isolated tissues. VI. The effect of insulin, ouabain, and metabolic inhibitors on the transport of 3-O-methylglucose and glucose in rat soleus muscles (Kohn, Clausen) (225) 277
- Glutaraldehyde  
Effect of low concentrations of ——— on *Micrococcus lysodeikticus* membranes: Changes in the release of membrane-associated enzymes and membrane structure (225) 140
- Haemolysis  
Studies on the mechanism of ——— by acyl carnitines, lysolecithins and acyl cholines (Cho, Proulx) (225) 214
- Ionic permeability  
Molecular mechanisms of membrane ——— changes (Fishman et al.) (225) 1
- Ionic transport  
——— through model membranes. I. Effects of accelerators of carcinogenesis (Horton, McClure) (225) 248
- Inorganic ions  
Sustained, coupled electrical and mechanical oscillations in a bimolecular lipid membrane in the presence of ——— (Pant, Rosenberg) (225) 379
- Insulin  
Relationship between the transport of glucose and cations across cell membranes in isolated tissues. VI. The effect of ———, ouabain, and metabolic inhibitors on the

- transport of 3-O-methylglucose and glucose in rat soleus muscles (Kohn, Clausen) (225) 277
- Lecithin membranes  
Essential fatty acids and glucose permeability of ——— (Li-Fu Chen et al.) (225) 89
- Lecithin-water systems  
Structural changes in ———; Thermal-turbidimetric studies (Abramson) (225) 167
- L-Leucine  
Properties of the preferential uptake of ——— by isolated intestinal epithelial cells (Reiser, Christiansen) (225) 123
- Lipid membrane  
Sustained, coupled electrical and mechanical oscillations in a bimolecular ——— in the presence of inorganic ions (Pant, Rosenberg) (225) 379
- Lipid protein films  
New technique for investigating ——— (Fromherz) (225) 382
- Lipolytic activity  
——— of adipocyte ghosts (Crum, Calvert) (225) 161
- Lysolecithins  
Studies on the mechanism of haemolysis by acyl carnitines, ——— and acyl cholines (Cho, Proulx) (225) 214
- Lysosomes  
Relative permeability of ——— from Tetrahymena pyriformis to some amino acids and dipeptides (Lee) (225) 108
- Magnesium  
Uptake of ——— by KB cells (Beauchamp et al.) (225) 71
- Membranes  
Ionic transport through model ———. I. Effects of accelerators of carcinogenesis (Horton, McClure) (225) 248
- Membrane-associated enzymes  
Effect of low concentrations of glutaraldehyde on *Micrococcus lysodeikticus* membranes: Changes in the release of ——— and membrane structure (Ellar et al.) (225) 140
- Membrane growth  
Intercalation of permeases during ——— (Koch, Boniface) (225) 239
- Membrane ionic permeability  
Molecular mechanisms of ——— changes (Fishman et al.) (225) 1
- Membrane structure  
Effect of low concentrations of glutaraldehyde on *Micrococcus lysodeikticus* membranes: Changes in the release of membrane-associated enzymes and ——— (Ellar et al.) (225) 140
- 3-O-Methylglucose  
Relationship between the transport of glucose and cations across cell membranes in isolated tissues. VI. The effect of insulin, ouabain, and metabolic inhibitors on the transport of ——— and glucose in rat soleus muscles (Kohn, Clausen) (225) 277
- Mucosal anaerobiosis  
Intestinal transmural electrical activity: Selective effects of ——— and serosal anaerobiosis (Baker et al.) (225) 392
- p-Nitrophenylphosphatase  
Studies on the partial reactions catalyzed by the ( $\text{Na}^+ + \text{K}^+$ )-activated ATPase. I. Effects of simple anions and nucleoside triphosphates on the alkali-cation specificity of the ——— (Koyal et al.) (225) 11
- p-Nitrophenylphosphatase  
Studies on the partial reactions catalyzed by the ( $\text{Na}^+ + \text{K}^+$ )-activated ATPase. II. Effects of oligomycin and other inhibitors on the ——— (Askari, Koyal) (225) 20
- Non-metabolites  
Aspects of uptake of ——— in slices of mouse brain (Piccoli, Lajtha) (225) 356
- Oligomycin  
Studies on the partial reactions catalyzed by the ( $\text{Na}^+ + \text{K}^+$ )-activated ATPase. II. Effects of ——— and other inhibitors on the p-nitrophenylphosphatase (Askari, Koyal) (225) 20
- Ouabain  
Relationship between the transport of glucose and cations across cell membranes in isolated tissues. VI. The effect of insulin, ———, and metabolic inhibitors on the transport of 3-O-methylglucose and glucose in rat soleus muscles (Kohn, Clausen) (225) 277
- Palmitic acid  
In vitro uptake and kinetics of release of ——— and taurodeoxycholate from hamster small intestinal segments (Mishkin et al.) (225) 335
- Permeases  
Intercalation of ——— during membrane growth (Koch, Boniface) (225) 239
- Phlorizin  
Effects of ——— on glucose transport into blood and lymph (Largis, Jacobs) (225) 301
- Phosphatase activity  
Stimulation of the ——— of ( $\text{Na}^+, \text{K}^+$ )-ATPase preparations by ouabain (Pitts, Askari) (225) 388
- Phospholipase  $A_1$   
Identification of a ——— in plasma membranes of rat liver (Newkirk, Waite) (225) 224
- Plasma membranes  
Identification of a phospholipase  $A_1$  in ——— of rat liver (Newkirk, Waite) (225) 224
- Plasma membranes  
Metabolic studies of rat liver ——— using D-[1- $^{14}\text{C}$ ]glucosamine (Kawasaki, Yamashina) (225) 234
- Rubidium transport  
Interaction of 2,4-dinitrophenol with anaerobic ——— across the yeast cell membrane (Borst-Pauwels et al.) (225) 269

- Serosal anaerobiosis  
  Intestinal transmural electrical activity:  
    Selective effects of mucosal and ———  
    (Baker et al.), 225 (1971) 392
- Sodium permeability  
  ——— of butanol-treated erythrocytes. The  
    role of calcium (Burt, Green) (225) 46
- Sodium transport  
  ——— and impedance properties of the iso-  
    lated frog gastric mucosa at different O<sub>2</sub>  
    tensions (Flemström) (225) 35
- Sorbose transfer  
  Effect of temperature on the competitive in-  
    hibition of ——— in human erythrocytes by  
    glucose (Levine et al.) (225) 291
- Sugar carrier  
  Effect of alkali metal ions on sugar trans-  
    port in muscle: Interaction with the ———  
    or indirect effect (Bihler, Sawh) (225) 56
- Sugar transport  
  Effect of alkali metal ions on ——— in  
    muscle: Interaction with the sugar carrier  
    or indirect effect (Bihler, Sawh) (225) 56
- Sugar transport  
  Reversible inhibition of intestinal active  
    ——— by deconjugated bile salt in vitro  
    (Gracey et al.) (225) 308
- Taurodeoxycholate  
  In vitro uptake and kinetics of release of  
    palmitic acid and ——— from hamster  
    small intestinal segments (Mishkin et al.)  
    (225) 335
- Temperature  
  ——— effects on Valonia bioelectric poten-  
    tial (Thorhaug) (225) 151
- Transmural electrical activity  
  Intestinal ———: Selective effects of mu-  
    cosal and serosal anaerobiosis (Baker et al.)  
    (225) 392
- Valonia  
  Temperature effects on ——— bioelectric  
    potential (Thorhaug) (225) 151
- Water-lecithin systems  
  Structural changes in ———: Thermal-  
    turbidimetric studies (Abramson) (225)  
    167
