

## SUBJECT INDEX

- Acetyl phosphatase  
On the reaction sequence of the potassium-dependent — activity of the sodium pump (Dudding, Winter) (241) 650
- Acetyl phosphate  
— as a substitute for ATP in ( $\text{Na}^+$  +  $\text{K}^+$ )-dependent ATPase (Bond et al.) (241) 57
- Acidotic toad  
Excretion of  $\text{H}^+$  and  $\text{NH}_4^+$  by the urinary bladder of the — and the effect of short-circuit current on the excretion (Frazier, Vanatta) (241) 20
- Adenosine 3',5'-phosphate  
On the similarity of effects of aldosterone and — on sodium transport and glucose metabolism in toad bladder (Kirchberger et al.) (241) 876
- Alamethicin  
The aggregation of — (McMullen, Stirrup) (241) 807
- L-Alanine  
Competitive interactions between — and L-phenylalanine in rabbit ileum (Schultz, Markscheid-Kaspi) (241) 857
- Albumin-lecithin-cardiolipin  
Structural studies by X-ray diffraction of model protein-lipid membranes of serum — (Rand) (241) 823
- Aldosterone  
Further studies on the effect of — on glucose metabolism in toad bladder (Kirchberger et al.) (241) 861
- Aldosterone  
On the similarity of effects of — and adenosine 3',5'-phosphate on sodium transport and glucose metabolism in toad bladder (Kirchberger et al.) (241) 876
- Alloantigens  
Comparison of the carbohydrate portion of membrane H-2 — isolated from spleen cells and tumor cells (Muramatsu, Nathenson) (241) 195
- Alveolar macrophage  
Ion and macromolecular transport in the — (Robin et al.) (241) 117
- Alveolar macrophage  
Membrane transport in the rabbit —. The specificity and characteristics of amino acid transport systems (Tsan, Berlin) (241) 155
- Amiloride  
—,  $\text{Ca}^{2+}$  and oxygen consumption of the urinary bladders of toads (Cuthbert, Wong) (241) 713
- Amino acids  
Effect of substrate structure on coupling ratio for  $\text{Na}^+$ -dependent transport of — (Koser, Christensen) (241) 9
- Amino acid transport  
An inducible — system in *Neurospora crassa* (Wolfenbarger Jr., De Busk) (241) 677
- Amino acid transport  
Interaction of sugar transport and — in mammalian kidney (Genel et al.) (241) 779
- Amino acid transport systems  
Membrane transport in the rabbit alveolar macrophage. The specificity and characteristics of — (Tsan, Berlin) (241) 155
- Amino acid uptake  
Evaluation of kinetic parameters for — by cells: Effect of insulin on the accumulation of aminoisobutyrate and cycloleucine by isolated rat diaphragm muscle and chick embryo hearts (Manchester et al.) (241) 226
- Amino acid uptake  
Stimulation of basic — by specific neutral amino acids in isolated intestinal epithelial cells (Reiser, Christiansen) (241) 102
- Aminoisobutyrate  
Evaluation of kinetic parameters for uptake of amino acids by cells: Effect of insulin on the accumulation of — and cycloleucine by isolated rat diaphragm muscle and chick embryo hearts (Manchester et al.) (241) 226
- L-Aminoisobutyric acid transport  
L-proline transport and — in the isolated rat kidney glomerulus (Mackenzie, Scriver) (241) 725
- Aminopeptidase  
Studies on plasma membranes. XIII.  $\text{Co}^{2+}$ -activated —(s) in the globular units locally coating rat-liver plasma membranes (Emmelot, Visser) (241) 273
- Ammonium excretion  
Excretion of  $\text{H}^+$  and — by the urinary bladder of the acidotic toad and the effect of short-circuit current on the excretion (Frazier, Vanatta) (241) 20
- 1-Anilino-8-naphthalene-sulfonate  
On the location of — (ANS) in lipid model systems. An X-ray diffraction study (Lesslauer et al.) (241) 547
- Antidiuretic hormone  
Effect of hypertonic media on the reversal of the hydrosmotic action of — in frog urinary bladder (Ripoche et al.) (241) 716
- Aspartate transport  
Effects of heavy metals on renal — and the nature of solute movement in kidney cortex slices (Foulkes) (241) 815

- ATPase  
 Acetyl phosphate as a substitute for ATP in ( $\text{Na}^+ + \text{K}^+$ )-dependent ——— (Bond et al.) (241) 57
- ATPases  
 Calcium + magnesium-activated membrane ——— in human red cells and their possible relations to cation transport (Schatzmann, Rossi) (241) 379
- ATPase  
 Correlation between ( $\text{Na}^+ + \text{K}^+$ )-activated ——— activities and the rate of isotonic fluid transport of gallbladder epithelium (Van Os, Slegers) (241) 89
- ATPases  
 Different effects of oligomycin and dicyclohexylcarbodiimide on ——— from mammalian cells (Contessa, Bruni) (241) 334
- ATPase  
 Effects of monovalent cations on the magnesium + calcium dependent ——— of the erythrocyte membrane (Bond, Green) (241) 393
- ATPase  
 Identification of intact ATP bound to ( $\text{Na}^+ + \text{K}^+$ ) ——— (Shamoo, Brodsky) (241) 846
- ATPase  
 Interaction of N-ethylmaleimide and  $\text{Ca}^{2+}$  with human membrane ——— (Blostein, Burt) (241) 68
- ATPase  
 Purification and properties of ——— from the cytoplasmic membrane of *Bacillus megaterium* KM (Mirsky, Barlow) (241) 835
- ATPase  
 Solubilization of anion ——— from *Necturus oxyntic* cells (Wiebelhaus et al.) (241) 49
- ATPase  
 Studies on the partial reactions catalyzed by the ( $\text{Na}^+ + \text{K}^+$ )-activated ———. III. Relation of  $\text{K}^+$ -dependent p-nitrophenylphosphatase to  $\text{Na}^+$  transport in red cell ghosts (Askari, Rao) (241) 75
- Bilayer membranes  
 The action of polyene antibiotics on lipid ——— in the presence of several cations and anions (Van Zutphen et al.) (241) 310
- Bimolecular lipid membranes  
 Langmuir adsorption behavior with cation-induced voltages across ——— (Massey, McColloch) (241) 661
- Bladders  
 Amiloride,  $\text{Ca}^{2+}$  and oxygen consumption of the urinary ——— of toads (Cuthbert, Wong) (241) 713
- Bladder  
 Effect of hypertonic media on the reversal of the hydrosmotic action of antidiuretic hormone in frog urinary ——— (Ripoche et al.) (241) 716
- Bladder  
 Glycogen in isolated mucosal and serosal fractions of turtle ——— (LeFevre et al) (241) 628
- $\text{Ca}^{2+}$   
 Amiloride, ——— and oxygen consumption of the urinary bladders of toads (Cuthbert, Wong) (241) 713
- Calcium  
 Synergistic effects of a membrane protein (spectrin) and ——— on the sodium permeability of phospholipid vesicles (Juliano et al.) (241) 894
- Calcium-induced fusion  
 ——— of avian erythrocytes (Toister, Loyter) (241) 719
- Calcium ions  
 The control of membrane-bound ——— by ATP (Chau-Wong, Seeman) (241) 473
- Calcium + magnesium-activated membrane ATPases  
 ——— in human red cells and their possible relations to cation transport (Schatzmann, Rossi) (241) 379
- Cardiolipin-lecithin-serum albumin  
 Structural studies by X-ray diffraction of model protein lipid membranes of ——— (Rand) (241) 823
- Cation-induced voltages  
 Langmuir adsorption behavior with ——— across bimolecular lipid membranes (Massey, McColloch) (241) 661
- Cation permeability  
 ——— of liposomes as a function of the chemical composition of the lipid bilayers (Scarpa, De Gier) (241) 789
- Cation transport  
 Calcium + magnesium-activated membrane ATPases in human red cells and their possible relations to ——— (Schatzmann, Rossi) (241) 379
- Chlorella vulgaris  
 Characterization of the active hexose transport system of ——— (Komor, Tanner) (241) 170
- Chloride  
 Exchangeability of ——— in Ehrlich ascites tumor cells (Simonsen, Nielsen) (241) 522
- Chloroplasts  
 Permeability of pea ——— to alcohols and aldoses as measured by reflection coefficients (Wang, Nobel) (241) 200
- Chlorpromazine  
 The effects of ethanol and ——— on the passive membrane permeability to sodium (Seeman et al.) (241) 349
- Cholesterol  
 A comparative study of ——— and a cholesterol-like ESR probe in pure and mixed monomolecular films (Cadenhead, Katti) (241) 709
- Cycloleucine  
 Evaluation of kinetic parameters for uptake of amino acids by cells: Effect of insulin on the accumulation of aminoisobutyrate and ——— by isolated rat diaphragm muscle and chick embryo hearts (Manchester et al.) (241) 226

- Cytoplasmic membrane  
Purification and properties of ATPase from the — of *Bacillus megaterium* KM (Mirsky, Barlow) (241) 835
- Dicyclohexylcarbodiimide  
Different effects of oligomycin and — on ATPases from mammalian cells (Contessa, Bruni) (241) 334
- Electrical activity  
The effect of EDTA on the — of rat jejunum (Hardcastle, Eggenton) (241) 930
- Endoplasmic reticulum  
Lipid linkages in the — and in the mitochondrial membranes (Sauner, Lévy) (241) 97
- Epithelial cells  
Stimulation of basic amino acid uptake by specific neutral amino acids in isolated intestinal — (Reiser, Christiansen) (241) 102
- Erythrocytes  
Action of pure phospholipase A<sub>2</sub> and phospholipase C on human — and ghosts (Roelofsens et al.) (241) 925
- Erythrocytes  
Calcium-induced fusion of avian — (Toister, Loyter) (241) 719
- Erythrocytes  
The number of sodium: potassium pump sites on — from HK and LK lambs (Dunham, Hoffman) (241) 399
- Erythrocytes  
Properties of a carrier model for the transport of sugars by human — (241) 462
- Erythrocytes  
Structural comparisons of native and re-aggregated membranes from *Mycoplasma laidlawii* and — using a fluorescence probe (Metcalf et al.) (241) 422
- Erythrocytes  
Structural comparisons of native and re-aggregated membranes from *Mycoplasma laidlawii* and — by X-ray diffraction and nuclear magnetic resonance techniques (Metcalf et al.) (241) 412
- Erythrocyte ghosts  
Chemical, enzymological and permeability properties of human — prepared by hypotonic lysis in media of different osmolarities (Bramley et al.) (241) 752
- Erythrocyte ghosts  
Circular dichroism of biological membranes. I. Mitochondria and — (Urry et al.) (241) 600
- Erythrocyte ghosts  
Glucose transport carrier activities in extensively washed human — (Jung et al.) (241) 613
- Erythrocyte membrane  
Effects of monovalent cations on the magnesium + calcium-dependent ATPase of the — (Bond, Green) (241) 393
- Erythrocyte membranes  
The effect of phospholipase A upon the inter-  
action of 1-anilinonaphtalene-8-sulfonate with — (Weidekamm et al.) (241) 770
- Erythrocyte membrane  
Protein conformational transitions in the — (Graham, Wallach) (241) 180
- Erythrocyte membranes  
Pyrimidine nucleosides transport across human — (Lieu et al.) (241) 884
- Erythrocyte membranes  
Surface proteins of — (Carraway et al.) (241) 934
- Erythrocyte membrane ATPase  
Interaction of N-ethylmaleimide and Ca<sup>2+</sup> with human — (Blostein, Burt) (241) 68
- Erythrocyte membrane proteins  
Acetic acid as a solvent for — (Maddy, Kelly) (241) 290
- Ethanol  
The effects of — and chlorpromazine on the passive membrane permeability to sodium (Seeman et al.) (241) 349
- Excitatory transmitter  
Reversal potentials of L-glutamate and the — at the neuromuscular junction of the crayfish (Taraskevich) (241) 700
- Fatty acid  
The intestinal uptake and esterification, in vitro, of — as a diffusion limited process (Hoffman, Simmonds) (241) 331
- Fluid transport  
Correlation between (Na<sup>+</sup> + K<sup>+</sup>)-activated ATPase activities and the rate of isotonic — of gallbladder epithelium (Van Os, Slegers) (241) 89
- Fluoride transport  
Active —: Species and age effects with rodent intestine, in vitro (Parkins) (241) 507
- Forssman-antigenic reactivity  
Alterations of — and of monosaccharide composition in plasma membrane from polyoma-transformed hamster cells (Makita, Seyama) (241) 403
- Freezing  
Stabilization and inactivation of biological membranes during — in the presence of amino acids (Heber et al.) (241) 578
- Frog oocytes  
The effect of non-electrolyte osmolarity on —. I. Volume changes (Sigler, Janáček) (241) 528
- Frog oocytes  
The effect of non-electrolyte osmolarity on —. II. Intracellular potential (Sigler, Janáček) (241) 539
- Gallbladder epithelium  
Correlation between (Na<sup>+</sup> + K<sup>+</sup>)-activated ATPase activities and the rate of isotonic fluid transport of — (Van Os, Slegers) (241) 89
- Gastric mucosa isolated cells  
Electrical properties of *Necturus* — (Blum et al.) (241) 261
- Glucose metabolism  
Further studies on the effect of aldosterone

- on ——— in toad bladder (Kirchberger et al.) (241) 861
- Glucose metabolism  
On the similarity of effects of aldosterone and adenosine 3',5'-phosphate on sodium transport and ——— in toad bladder (Kirchberger et al.) (241) 876
- Glucose transport  
Evidence for mediated ——— in mammalian pancreatic  $\beta$ -cells (Hellman et al.) (241) 147
- Glucose transport carrier  
—— activities in extensively washed human erythrocyte ghosts (Jung et al.) (241) 613
- L-Glutamate  
Reversal potentials of ——— and the excitatory transmitter at the neuromuscular junction of the crayfish (Taraskevich) (241) 700
- Glycogen  
—— in isolated mucosal and serosal fractions of turtle bladder (LeFevre et al.) (241) 628
- Histidine transport  
Daily rhythmic change in the ——— by everted sacs of rat small intestine (Furuya, Yugari) (241) 245
- Hemolysis  
—— induced by *Prymnesium parvum* toxin. Kinetics and binding (Martin, Padilla) (241) 213
- Hexose transport system  
Characterization of the active ——— of *Chlorella vulgaris* (Komor, Tanner) (241) 170
- Hydrogen ion excretion  
Ammonium excretion and ——— by the urinary bladder of the acidotic toad and the effect of short-circuit current on the excretion (Frazier, Vanatta) (241) 20
- Insulin  
Evaluation of kinetic parameters for uptake of amino acids by cells: Effect of ——— on the accumulation of aminoisobutyrate and cycloleucine by isolated rat diaphragm muscle and chick embryo hearts (Manchester et al.) (241) 226
- Insulin release  
In vitro stimulation of ——— by non-metabolizable, transport-specific amino acids (Christensen et al.) (241) 341
- Intestinal uptake  
The ——— and esterification, in vitro, of fatty acid as a diffusion limited process (Hoffman, Simmonds) (241) 331
- Ion and macromolecular transport  
—— in the alveolar macrophage (Robin et al.) (241) 117
- Jejunum  
The effect of EDTA on the electrical activity of rat ——— (Hardcastle, Eggenton) (241) 930
- Kidney cortex slices  
Effects of heavy metals on renal aspartate transport and the nature of solute movement in ——— (Foulkes) (241) 815
- Lecithin-cardiolipin-serum albumin  
Structural studies by X-ray diffraction of model protein lipid membranes of ——— (Rand) (241) 823
- Lecithin vesicles  
 $^{19}\text{F}$  NMR of monofluorostearic acids in ——— (Birdsall et al.) (241) 693
- Lens  
Lysine transport and protein incorporation by the ——— (Cotlier) (241) 798
- Lipid  
Correlations between structure and spectroscopic properties in membrane model systems. Fluorescence of dansylated protein and dansylated ——— in protein-lipid-water phases (Shechter et al.) (241) 431
- Lipid bilayers  
Cation permeability of liposomes as a function of the chemical composition of the ——— (Scarpa, De Gier) (241) 789
- Lipid bilayer membranes  
The action of polyene antibiotics on ——— in the presence of several cations and anions (Van Zutphen et al.) (241) 310
- Lipid model systems  
On the location of 1-anilino-8-naphthalene-sulfonate (ANS) in ———. An X-ray diffraction study (Lesslauer et al.) (241) 547
- Liposomes  
Cation permeability of ——— as a function of the chemical composition of the lipid bilayers (Scarpa, De Gier) (241) 789
- Liposomes  
The consequences of inducing salt permeability in ——— (Singer, Bangham) (241) 687
- Lysine transport  
—— and protein incorporation by the lens (Cotlier) (241) 798
- Magnesium + Calcium-dependent ATPase  
Effects of monovalent cations on the ——— of the erythrocyte membrane (Bond, Green) (241) 393
- Membranes  
Circular dichroism of biological ———. I. Mitochondria and erythrocyte ghosts (Urry et al.) (241) 600
- Membranes  
Lipid linkages in the endoplasmic reticulum and in the mitochondrial ——— (Sauner, Lévy) (241) 97
- Membrane  
Protein conformational transitions in the erythrocyte ——— (Graham, Wallach) (241) 180
- Membranes  
Stabilization and inactivation of biological ——— during freezing in the presence of amino acids (Heber et al.) (241) 578
- Membranes  
Structural comparisons of native and reagent

- gregated ——— from *Mycoplasma laidlawii* and erythrocytes using a fluorescence probe (Metcalf et al.) (241) 422
- Membranes**  
 Structural comparisons of native and re-aggregated ——— from *Mycoplasma laidlawii* and erythrocytes by X-ray diffraction and nuclear magnetic resonance techniques (Metcalf et al.) (241) 412
- Membranes**  
 Surface proteins of erythrocyte ——— (Caraway et al.) (241) 934
- Membrane H-2 alloantigens**  
 Comparison of the carbohydrate portion of ——— isolated from spleen cells and tumor cells (Muramatsu, Nathenson) (241) 195
- Membrane ATPase**  
 Interaction of N-ethylmaleimide and  $\text{Ca}^{2+}$  with human erythrocyte ——— (Blostein, Burt) (241) 68
- Membrane-bound  $\text{Ca}^{2+}$**   
 The control of ——— by ATP (Chau-Wong, Seeman) (241) 473
- Membrane model systems**  
 Correlations between structure and spectroscopic properties in ———. Fluorescence of dansylated protein and dansylated lipid in protein-lipid-water phases (Shechter et al.) (241) 431
- Membrane permeability**  
 The effects of ethanol and chlorpromazine on the passive ——— to sodium (Seeman et al.) (241) 349
- Membrane proteins**  
 Acetic acid as a solvent for erythrocyte ——— (Maddy, Kelly) (241) 290
- Membrane proteins**  
 The inadequacy of 6 M guanidine hydrochloride as a dispersive agent for ——— (Maddy, Kelly) (241) 114
- Membrane proteins**  
 Immunochemistry and peptide mapping of *Micrococcus lysodeikticus* ——— (Fukui et al.) (241) 30
- Membrane protein**  
 Spectroscopic evidence for  $\beta$  structure in rat adipocyte plasma ——— (Avruch, Wallach) (241) 249
- Membrane protein**  
 Synergistic effects of a ——— (spectrin) and calcium on the sodium permeability of phospholipid vesicles (Juliano et al.) (241) 894
- Membrane transport**  
 ——— in the rabbit alveolar macrophage. The specificity and characteristics of amino acid transport systems (Tsan, Berlin) (241) 155
- Micrococcus lysodeikticus* membrane proteins**  
 Immunochemistry and peptide mapping of ——— (Fukui et al.) (241) 30
- Microsomal membranes**  
 The circular dichroism spectrum of ———. Magnesium-induced aggregation (Reinert, Davis) (241) 921
- Mitochondria**  
 Circular dichroism of biological membranes. I. ——— and erythrocyte ghosts (Urry et al.) (241) 600
- Mitochondrial membrane**  
 Disruption of ——— by acetone extraction (Hall, Crane) (241) 682
- Mitochondrial membranes**  
 Lipid linkages in the endoplasmic reticulum and in the ——— (Sauner, Lévy) (241) 97
- Monofluorostearic acids**  
 $^{19}\text{F}$  NMR of ——— in lecithin vesicles (Birdsall et al.) (241) 693
- Monomolecular films**  
 A comparative study of cholesterol and a cholesterol-like ESR probe in pure and mixed ——— (Cadenhead, Katti) (241) 709
- Mycoplasma laidlawii***  
 Structural comparisons of native and re-aggregated membranes from ——— and erythrocytes using a fluorescence probe (Metcalf et al.) (241) 422
- Mycoplasma laidlawii***  
 Structural comparisons of native and re-aggregated membranes from ——— and erythrocytes by X-ray diffraction and nuclear magnetic resonance techniques (Metcalf et al.) (241) 412
- Mycoplasma* membranes**  
 Incorporation of penicillinase into re-aggregated ——— (Rottem et al.) (241) 593
- Necturus* gastric mucosa isolated cells**  
 Electrical properties of ——— (Blum et al.) (241) 261
- Neuromuscular junction**  
 Reversal potentials of L-glutamate and the excitatory transmitter at the ——— of the crayfish (Taraskevich) (241) 700
- p-Nitrophenylphosphatase**  
 Studies on the partial reactions catalyzed by the ( $\text{Na}^+ + \text{K}^+$ )-activated ATPase. III. Relation of  $\text{K}^+$ -dependent ——— to  $\text{Na}^+$  transport in red cell ghosts (Askari, Rao) (241) 75
- Non-electrolyte osmolarity**  
 The effect of ——— on frog oocytes. I. Volume changes (Sigler, Janáček) (241) 528
- Non-electrolyte osmolarity**  
 The effect of ——— on frog oocytes. II. Intracellular potential (Sigler, Janáček) (241) 539
- Olfactory epithelium**  
 Isolation and some properties of plasma membranes from bovine ——— (Koyama et al.) (241) 42
- Oligomycin**  
 Different effects of ——— and dicyclohexylcarbodiimide on ATPase from mammalian cells (Contessa, Bruni) (241) 334
- Oocytes**  
 The effect of non-electrolyte osmolarity on frog ———. I. Volume changes (Sigler, Janáček) (241) 528

- Oocytes  
The effect of non-electrolyte osmolarity on frog ———. II. intracellular potential (Sigler, Janáček) (241) 539
- Pancreatic  $\beta$ -cells  
Evidence for mediated transport of glucose in mammalian ——— (Hellman et al.) (241) 147
- Penicillinase  
Incorporation of ——— into reaggregated mycoplasma membranes (Rottem et al.) (241) 593
- Permeability  
——— of pea chloroplasts to alcohols and aldoses as measured by reflection coefficients (Wang, Nobel) (241) 200
- Permeability  
Synergistic effects of a membrane protein (spectrin) and calcium on the sodium ——— of phospholipid vesicles (Juliano et al.) (241) 894
- L-Phenylalanine  
Competitive interactions between L-alanine and ——— in rabbit ileum (Schultz, Markscheid-Kaspi) (241) 857
- Phosphate transport  
——— in *Escherichia coli* (Medveczky, Rosenberg) (241) 494
- Phosphatidyl inositol  
Proton binding by ——— in aqueous dispersion (Wills et al.) (241) 483
- Phospholipase A  
The effect of ——— upon the interaction of 1-anilinophthalene-8-sulfonate with erythrocyte membranes (Weidekamm et al.) (241) 770
- Phospholipase A<sub>2</sub>  
Action of pure ——— and phospholipase C on human erythrocytes and ghosts (Roelofsen et al.) (241) 925
- Phospholipase C  
Action of pure phospholipase A<sub>2</sub> and ——— on human erythrocytes and ghosts (Roelofsen et al.) (241) 925
- Phospholipid membranes  
Na<sup>+</sup>-K<sup>+</sup> discrimination by "pure" ——— (Papahadjopoulos) (241) 254
- Phospholipid vesicles  
Synergistic effects of a membrane protein (spectrin) and calcium on the sodium permeability of ——— (Juliano et al.) (241) 984
- Plasma membrane  
Alterations of Forssman-antigenic reactivity and of monosaccharide composition in ——— from polyoma-transformed hamster cells (Makita, Seyama) (241) 403
- Plasma membranes  
Isolation of ——— from rat brain (Morgan et al.) (241) 737
- Plasma membranes  
Isolation and some properties of ——— from bovine olfactory epithelium (Koyama et al.) (241) 42
- Plasma membranes  
Studies on ———. XIII. Co<sup>2+</sup>-activated aminopeptidase(s) in the globular units locally coating rat-liver plasma membranes (Emmelot, Visser) (241) 273
- Plasma membrane protein  
Spectroscopic evidence for  $\beta$  structure in rat adipocyte ——— (Avruch, Wallach) (241) 249
- Polyoma-transformed hamster cells  
Alterations of Forssman-antigenic reactivity and of monosaccharide composition in plasma membrane from ——— (Makita, Seyama) (241) 403
- Polyene antibiotics  
The action of ——— on lipid bilayer membranes in the presence of several cations and anions (Van Zutphen et al.) (241) 310
- Potassium-dependent acetyl phosphatase  
On the reaction sequence of the ——— activity of the sodium pump (Dudding, Winter) (241) 650
- L-Proline transport  
——— and L-aminoisobutyric acid transport in the isolated rat kidney glomerulus (Mackenzie, Scriver) (241) 725
- Proline transport  
Temperature effects on the ——— system in *Saccharomyces chevalieri* (Schwencke, Magana-Schwencke) (241) 513
- Protein  
Correlations between structure and spectroscopic properties in membrane model systems. Fluorescence of dansylated ——— and dansylated lipid in protein-lipid-water phases (Shechter et al.) (241) 431
- Protein conformational transitions  
——— in the erythrocyte membrane (Graham, Wallach) (241) 180
- Protein incorporation  
Lysine transport and ——— by the lens (Cotlier) (241) 798
- Protein-lipid membranes  
Structural studies by X-ray diffraction of model ——— of serum albumin-lecithin-cardiolipin (Rand) (241) 823
- Prymnesium parvum toxin  
Hemolysis induced by ———. Kinetics and binding (Martin, Padilla) (241) 213
- Pyrimidine nucleosides transport  
——— across human erythrocyte membranes (Lieu et al.) (241) 884
- Retinal bilayer lipid membrane  
Light-induced electrical effects in a ——— (Kobamoto, Ti Tien) (241) 129
- Salt permeability  
The consequences of inducing ——— in liposomes (Singer, Bangham) (241) 687
- Sarcoplasmic reticulum membranes  
Proton nuclear magnetic resonance studies of ———. Correlation of the temperature-dependent Ca<sup>2+</sup> efflux with a reversible structural transition (Davis, Inesi) (241) 1
- Sarcoplasmic reticulum  
Characterization of ——— from skeletal muscle (Meissner, Fleischer) (241) 356
- Small intestine

- On the mechanism of mutual inhibition among sodium-dependent transport systems in the ———. A hypothesis (Semenza) (241) 637
- Sodium
- The effects of ethanol and chlorpromazine on the passive membrane permeability to ——— (Seeman et al.) (241) 349
- Sodium
- Synergistic effects of a membrane protein (spectrin) and calcium on the ——— permeability of phospholipid vesicles (Juliano et al.) (241) 894
- Sodium dependent transport of amino acids
- Effect of substrate structure on coupling ratio for ——— (Koser, Christensen) (241) 9
- Sodium-dependent transport systems
- On the mechanism of mutual inhibition among ——— in the small intestine. A hypothesis (Semenza) (241) 637
- Sodium inactivation
- Physicochemical model of ——— (Fishman, Volkenstein) (241) 697
- Sodium + potassium-activated enzyme system
- The effect of magnesium, ATP,  $P_i$ , and sodium on the inhibition of the ——— by g-strophanthin (Skou et al) (241) 443
- Sodium-potassium-ATPase
- Identification of intact ATP bound to ——— (Shamoo, Brodsky) (241) 846
- Sodium and potassium discrimination
- by "pure" phospholipid membranes (Papahadjopoulos) (241) 254
- Sodium:potassium pump sites
- The number of ——— on erythrocytes from HK and LK lambs (Dunham, Hoffman) (241) 399
- Sodium pump
- On the reaction sequence of the potassium-dependent acetyl phosphatase activity of the ——— (Dudding, Winter) (241) 650
- Sodium transport
- On the similarity of effects of aldosterone and adenosine 3',5'-phosphate on ——— and glucose metabolism in toad bladder (Kirchberger et al.) (241) 876
- Sodium transport
- Studies on the partial reactions catalyzed by the ( $Na^+$  +  $K^+$ )-activated ATPase. III. Relation of  $K^+$ -dependent p-nitrophenylphosphatase to ——— in red cell ghosts (Askari, Rao) (241) 75
- Spectrin
- Synergistic effects of a membrane protein (———) and calcium on the sodium permeability of phospholipid vesicles (Juliano et al.) (241) 894
- g-Strophanthin
- The effect of magnesium, ATP,  $P_i$ , and sodium on the inhibition of the sodium + potassium-activated enzyme system by ——— (Skou et al.) (241) 443
- Sugar carrier
- Studies on the ——— in skeletal muscle: Modification of carrier mobility by nitrogen mustard in vitro (Ilse) (241) 704
- Sugar transport
- Interaction of ——— and amino acid transport in mammalian kidney (Genel et al.) (241) 779
- Sugar transport
- Properties of a carrier model for the ——— by human erythrocytes (Geck) (241) 462
- Sugar transport
- Regulation of ——— in muscle: Effect of increased external potassium in vitro (Bihler, Sawh) (241) 302
- Transport-specific amino acids
- In vitro stimulation of insulin release by non-metabolizable, ——— (Christensen et al.) (241) 341
- Urinary bladder
- Excretion of  $H^+$  and  $NH_4^+$  by the ——— of the acidotic toad and the effect of short-circuit current on the excretion (Frazier Vanatta) (241) 20
- Zymogen granules
- The behavior of isolated ———: pH-dependent release and reassociation of protein (Rothman) (241) 567
