

SUBJECT INDEX

Acetylcholine

The effect of — on the electrical activity of intestinal epithelial cells (Hardcastle, Eggenton) (298) 95

Acid secretion

Effects of the ATP analogue 5'-adenylyl methylenediphosphonate (AMP-PCP) on — in frog gastric mucosa (Kidder, III) (298) 732

Adenine transport

Adenine nucleotide metabolism of blood platelets. VIII. — into human platelets (Sixma et al.) (298) 460

5'-Adenylyl methylenediphosphonate

Effects of the ATP analogue — (AMP-PCP) on acid secretion in frog gastric mucosa (Kidder, III) (298) 732

ADP binding

— to sodium, potassium-activated ATPase (Kaniike et al.) (298) 901

Amino acids

Isolation of plasma membranes from Ehrlich ascites tumour cells. Influence of — on ($\text{Na}^+ + \text{K}^+$)-ATPase and K^+ -stimulated phosphatase. (Forte et al.) (298) 827

Amino acids

Synthesis of metabolism-resistant substrates for the transport system for cationic —; their stimulation of the release of insulin and glucagon, and of the urinary loss of amino acids related to cystinuria (Christensen, Cullen) (298) 932

Amino acid transport

Multiple transport systems for basic — in *Streptomyces hydrogenans* (Gross, Burkhardt) (298) 437

Amino acid uptake

Effects of chelating agents on the initial interaction of phytohaemagglutinin with lymphocytes and the subsequent stimulation of — (Whitney, Sutherland) (298) 790

Amphotericin B

The effects of the antibiotics gramicidin A, — and nystatin on the electrical properties of frog skeletal muscle (Leung, Eisenberg) (298) 718

Anaesthetics

The importance of the hydrophobic interactions of local — in the displacement of polyvalent cations from artificial lipid membranes (Fernández, Cerbón) (298) 8

Anions

Permeability of *Azotobacter vinelandii* to cations and — (Visser, Postma) (298) 333

Antibody

Release of macromolecular markers (enzymes) from liposomes treated with — and complement. An attempt at correlation with electron microscopic observations (Kataoka et al.) (298) 158

Antigens

Purification and characterization of HL-A — from human platelets, solubilized by the non-ionic detergent NP-40 (Dautigny et al.) (298) 783

ATP

— and Ca^{2+} binding by the Ca^{2+} pump protein of sarcoplasmic reticulum (Meissner) (298) 906

ATPase

ADP binding to sodium, potassium-activated — (Kaniike et al.) (298) 901

ATPase

Calcium-stimulated, ouabain-inhibited ATPase in a myocardial fraction enriched with sarcolemma (Stam, Jr et al.) (298) 927

ATPase

Differential effect of lithium on microsomal — in cortex, medulla and papilla of the rat kidney (Gutman et al.) (298) 284

ATPase

Localization and distribution of *Micrococcus lysodeikticus* membrane — determined by ferritin labelling (Oppenheim, Salton) (298) 297

ATPase

Study of human erythrocyte membrane using sodium deoxycholate. II. Effects of cold storage, EDTA and small deoxycholate concentrations on — activities (Philippot, Authier) (298) 887

ATP leakage

Yeast killer factor: — and coordinate inhibition of macromolecular synthesis in sensitive cells (Bussey, Sherman) (298) 868

Bicarbonate ion

Regulation by — of intramitochondrial citrate concentration in kidney mitochondria (Simpson, Angielski) (298) 115

Bilayers

Asymmetric lipid —. Response to multivalent ions (Montal) (298) 750

Bilayers

- Interacting spin label study of the fluidizing and condensing effects of cholesterol on lecithin — (Marsh, Smith) (298) 133
- Bilayers**
Interaction of bacterial lipopolysaccharide with phospholipid — and monolayers (Benedetto et al.) (298) 145
- Bilayer liposomes**
Single — prepared without sonication (Batzri, Korn) (298) 1015
- Black lipid membranes**
Fluorescence spectroscopy of planar —. Probe adsorption and quantum yield determination (Zingsheim, Haydon) (298) 755
- Brain**
Composition and synthesis of plasma membranes and smooth endoplasmic reticulum in isolated cells of newborn rat — (Hemminki) (298) 810
- Calcium**
Membrane coarctation by — as a regulator for bound enzymes (Horvath, Sovak) (298) 850
- Calcium influx**
Sodium-dependent — in dialyzed barnacle fibers (Dipolo) (298) 279
- Calcium ion-binding proteins**
Isolation of sarcoplasmic reticulum by zonal centrifugation and purification of Ca^{+2} -pump and — (Meissner et al.) (298) 246
- Calcium ions**
Ionic structure of phospholipid membranes, and binding of — (Seimiya, Ohki) (298) 546
- Calcium pump protein**
ATP and Ca^{2+} binding by the — of sarcoplasmic reticulum (Meissner) (298) 906
- Calcium-stimulated ATPase**
Ouabain-inhibited, in a myocardial fraction enriched with sarcolemma (Stam, Jr et al.) (298) 927
- Calcium transport**
— by rabbit skeletal muscle microsomes ("fragmented sarcoplasmic reticulum") (Katz, Repke) (298) 270
- Carrier**
Rectification phenoma in — -mediated ion transport (Stark) (298) 323
- Cations**
Importance of the hydrophobic interactions of local anaesthetics in the displacement of polyvalent — from artificial lipid membranes (Fernández, Cerbon) (298) 8
- Cations**
Movement of — connected with metabolism in *Azotobacter vinelandii* (Postma et al.) (298) 341
- Cations**
Permeability of *Azotobacter vinelandii* to — and anions (Visser, Postma) (298) 333
- Cell**
Sugar transport at the basal and lateral aspect of the small intestinal — (Bihler, Cybulsky) (298) 429
- Cell coat**
Studies on — macromolecules in normal and virus-transformed BHK₂₁/C18 cells (Chiarugi, Urbano) (298) 195
- Cell membrane**
Effect of different fatty acid and sterol composition on the erythritol flux through the — of *Acholeplasma laidlawii* (de Kruffy et al.) (298) 479
- Cells**
Effect of acetylcholine on the electrical activity of intestinal epithelial — (Hardcastle, Eggenton) (298) 95
- Cells**
Effect of alterations in fatty acid composition and cholesterol content on the non-electrolyte permeability of *Acholeplasma laidlawii* B — and derived liposomes (McElhaney et al.) (298) 500
- Cells**
Isolation and characterization of plasma membrane from cultured —. V. The chemical composition of plasma membrane isolated from chicken tumours initiated with virus-transformed cells (Perdue et al.) (298) 817
- Cells**
Membranes of *Tetrahymena*. III. The effect of temperature on membrane core structures and fatty acid composition of *Tetrahymena* — (Wunderlich et al.) (298) 39
- Cells**
Polypeptide composition of membranes derived from neuronal and glial — (Karls-son et al.) (298) 219
- Cells**
Yeast killer factor: ATP leakage and coordinate inhibition of macromolecular synthesis in sensitive — (Bussey, Sherman) (298) 868
- Cell surface**
Characterisation of *Escherichia coli* — by isoelectric equilibrium analysis (Sherbet, Lakshmi) (298) 50
- Cerebral cortex**
Isolation and properties of 5'-mononucleotidase from a membrane fraction of bovine — (Tanaka et al.) (298) 842
- Chloride transport**
Short-circuit current related to active —

- in frog cornea: effects of furosemide and ethacrynic acid (Candia) (298) 1011
- Cholesterol**
Effect of alterations in fatty acid composition and — content on the nonelectrolyte permeability of *Acholeplasma laidlawii* B cells and derived liposomes (McElhaney et al.) (298) 500
- Cholesterol**
Interacting spin label study of the fluidizing and condensing effects of — on lecithin bilayers (Marsh, Smith) (298) 133
- Cholinergic binding macromolecule**
Solubilization and properties of the soluble axonal — (Denburg) (298) 967
- Citrate**
Regulation by bicarbonate ion of intramitochondrial — concentration in kidney mitochondria (Simpson, Angielski) (298) 115
- Complement**
Release of macromolecular markers (enzymes) from liposomes treated with antibody and —. An attempt at correlation with electron microscopic observations (Kataoka et al.) (298) 158
- Cytochrome c**
Interaction of — with lipid monolayers (Morse II, Deamer) (298) 769
- Cytochrome oxidase membranes**
Optical analysis of electron micrographs of — (Maniloff et al.) (298) 180
- Diketocoriolin B**
Mechanism of action of — (Kunimoto et al.) (298) 513
- DNA synthesis mutants**
Significance of membrane alterations seen in — of *Escherichia coli* (Lazdunski, Shapiro) (298) 59
- Electroplax**
Modification of — excitability by veratridine (Bartels, Rosenberry) (298) 973
- Endoplasmic reticulum**
Composition and synthesis of plasma membranes and smooth — in isolated cells of newborn rat brain (Hemminki) (298) 810
- Enzyme**
Study of sex difference in — activities of rat liver plasma membranes (Solyom, Lauter) (298) 743
- Enzymes**
Membrane coarctation by calcium as a regulator for bound — (Horvath, Sovak) (298) 850
- Erythritol flux**
The effect of different fatty acid and sterol composition on the — through the cell membrane of *Acholeplasma laidlawii* (de Kruyff et al.) (298) 479
- Erythrocyte**
Tubular structures formed by pig — globoside in aqueous systems (Pinteric et al.) (298) 630
- Erythrocyte ghosts**
Characteristics of the permeability barrier of human — to non-electrolytes (Jung et al.) (298) 101
- Erythrocyte ghosts**
Effect of proteolytic digestion on glucose transport carrier of human — (Jung et al.) (298) 108
- Erythrocyte ghosts**
Glucose transport in white — and membrane-derived vesicles (Taverna, Langdon) (298) 422
- Erythrocyte ghosts**
New method for measuring glucose translocation through biological membranes and its application to human — (Taverna, Langdon) (298) 412
- Erythrocyte membrane**
Asymmetric inhibition by phlorizin of sulphate movements across the — (Lepke, Passow) (298) 529
- Erythrocyte membrane**
Study of human — using sodium deoxycholate. II. Effects of cold storage, EDTA and small deoxycholate concentrations on ATPase activities (Philippot, Authier) (298) 887
- Erythrocyte membrane proteins**
Effect of anionic surfactants, nonionic surfactants and neutral salts on the conformation of spin-labelled — (Kirkpatrick, Sandberg) (298) 209
- Erythrocytes**
Glycine transport by membrane vesicles from pigeon — (Lee et al.) (298) 446
- Erythrocytes**
Interaction of thallos ions with the cation transport mechanism in — (Skulskii et al.) (298) 702
- Erythrocytes**
Relationship between the transport of glucose and cations across cell membranes in isolated tissues. VIII. The effect of membrane stabilizers on the transport of K^+ , Na^+ and glucose in muscle, adipocytes and — (Clausen et al.) (298) 393
- Ethacrynic acid**
Short-circuit current related to active chloride transport in frog cornea: effects of furosemide and — (Candia) (298) 1011

Excitable membranes

Role of ion exchange processes in the mechanism of sodium conductance changes in — (Fishman et al.) (298) 710

Excitable membranes

Structure of — formed on the surface of protoplasmic drops isolated from *Nitella*. I. Conformation of surface membrane determined from the refractive index and from enzyme actions (Inoue et al.) (298) 653

Fat globule

Characterisation of the surface of bovine milk — membrane using microelectrophoresis (Newman, Harrison) (298) 798

Fatty acid

Effect of alterations in — composition and cholesterol content on the nonelectrolyte permeability of *Acholeplasma laidlawii* B cells and derived liposomes (McElhaney et al.) (298) 500

Fatty acid

Effect of different — and sterol composition on the erythritol flux through the cell membrane of *Acholeplasma laidlawii* (de Kruyff et al.) (298) 479

Fatty acid composition

Effect of changes in — of phospholipid species on the β -galactoside transport system of *Escherichia coli* K-12 (Kito et al.) (298) 69

Fatty acid composition

Membranes of *Tetrahymena*. III. The effect of temperature on membrane core structures and — of *Tetrahymena* cells (Wunderlich et al.) (298) 39

Fatty acids

Effect of proteins on the motion of spin-labelled — in mycoplasma membranes (Rottem, Samuni) (298) 32

Ferritin

Localization and distribution of *Micrococcus lysodeikticus* membrane ATPase determined by — labelling (Oppenheim, Salton) (298) 297

Furosemide

Short-circuit current related to active chloride transport in frog cornea: effects of — and ethacrynic acid (Candia) (298) 1011

 β -Galactoside transport

Effect of changes in fatty acid composition of phospholipid species on the — system of *Escherichia coli* K-12 (Kito et al.) (298) 69

Globoside

Tubular structures formed by pig erythrocyte — in aqueous systems (Pinteric et al.) (298) 630

Glucagon release

Synthesis of metabolism-resistant substrates for the transport system for cationic amino acids; their stimulation of the release of insulin and —, and of the urinary loss of amino acids related to cystinuria (Christensen, Cullen) (298) 932

Glucose translocation

New method for measuring — through biological membranes and its application to human erythrocyte ghosts (Taverna, Langdon) (298) 412

Glucose transport

— in white erythrocyte ghosts and membrane-derived vesicles (Taverna, Langdon) (298) 422

Glucose transport

Relationship between the transport of glucose and cations across cell membranes in isolated tissues. VIII. The effect of membrane stabilizers on the transport of K^+ , Na^+ and — in muscle, adipocytes and erythrocytes (Clausen et al.) (298) 393

Glucose transport

Studies on the mechanism of active intestinal — (Swaminathan, Eichholz) (298) 724

Glucose transport carrier

Effect of proteolytic digestion on — of human erythrocyte ghosts (Jung et al.) (298) 108

Glycine transport

— by membrane vesicles from pigeon erythrocytes (Lee et al.) (298) 446

Glycoproteins

Proteins and — in plasma membrane fraction of avian leukosis-sarcoma virus susceptible and resistant chicken embryo fibroblasts (Smith, Crittenden) (298) 608

Gramicidin A

The effects of the antibiotics —, amphotericin B, and nystatin on the electrical properties of frog skeletal muscle (Leung, Eisenberg) (298) 718

Haemolysin

The amphipathic nature of *Prymnesium parvum* — (Ulitzur) (298) 673

Hydrogen ion secretion

Oscillations of — and electrogenic properties in the isolated frog gastric mucosa (Flemström) (298) 369

Insulin release

Synthesis of metabolism-resistant substrates for the transport system for cationic amino acids; their stimulation of — and glucagon release, and of the urinary loss of amino acids related to cystinuria (Christensen, Cullen) (298) 932

- Ion pump**
Photosynthetic energy control of an electrogenic — at the plasmalemma of *Nitella translucens* (Vredenberg, Tonk) (298) 354
- Ion transport**
Rectification phenomena in carrier-mediated — (Stark) (298) 323
- Lactose synthetase specifier protein**
Maleyl- α -lactalbumin as — (Kitchen, Barman) (298) 861
- Lecithin**
Magnetic resonance studies on membrane and model membrane systems. III. Molecular motion in aqueous — dispersions (Horwitz et al.) (298) 1
- Lecithin bilayers**
Interacting spin label study of the fluidizing and condensing effects of cholesterol on — (Marsh, Smith) (298) 133
- Lipid bilayers**
Asymmetric —. Response to multivalent ions (Montal) (298) 750
- Lipid membranes**
Electrostatic interactions in the binding of fluorescent probes to — (Flanagan, Hesketh) (298) 535
- Lipid membranes**
Fluorescence spectroscopy of planar black —. Probe adsorption and quantum yield determination (Zingsheim, Haydon) (298) 755
- Lipid membranes**
Importance of the hydrophobic interactions of local anaesthetics in the displacement of polyvalent cations from artificial — (Fernández, Cerbón) (298) 8
- Lipid membranes**
Permeability of — to non-electrolytes (Lelievre, Rich) (298) 15
- Lipid monolayers**
Interaction of cytochrome c with — (Morse II, Deamer) (298) 769
- Lipopolysaccharide**
Interaction of bacterial — with phospholipid bilayers and monolayers (Benedetto et al.) (298) 145
- Liposomes**
Effect of alterations in fatty acid composition and cholesterol content on the nonelectrolyte permeability of *Acholeplasma laidlawii* B cells and derived — (McElhaney et al.) (298) 500
- Liposomes**
Release of macromolecular markers (enzymes) from — treated with antibody and complement. An attempt at correlation with electron microscopic observations (Kataoka et al.) (298) 158
- Lithium**
Differential effect of — on microsomal ATPase in cortex, medulla and papilla of the rat kidney (Gutman et al.) (298) 284
- Lymphocytes**
Effects of chelating agents on the initial interaction of phytohaemagglutinin with — and the subsequent amino acid uptake (Whitney, Sutherland) (298) 290
- Maleyl- α -lactalbumin**
— as lactose synthetase specifier protein (Kitchen, Barman) (298) 861
- Membrane**
Effect of different fatty acid and sterol composition on the erythritol flux through the cell — of *Acholeplasma laidlawii* (de Kruyff et al.) (298) 479
- Membrane**
Electron microscopy of *Bacillus subtilis* protoplast — after treatment with phospholipase A₂ and phospholipase C (Nanninga et al.) (298) 184
- Membrane**
Interrelationships between hydroxylamine inhibition of microsomal (Na⁺, K⁺)-ATPase and physicochemical changes in — organisation (Formby) (298) 291
- Membrane**
Magnetic resonance studies on — and model membrane systems. III. Molecular motion in aqueous lecithin dispersions (Horwitz et al.) (298) 1
- Membrane**
Significance of — alterations seen in DNA synthesis mutants of *Escherichia coli* (Lazdunski, Shapiro) (298) 59
- Membrane ATPase**
Localization and distribution of *Micrococcus lysodeikticus* — determined by ferritin labelling (Oppenheim, Salton) (298) 297
- Membrane-derived vesicles**
Glucose transport in white erythrocyte ghosts and — (Taverna, Langdon) (298) 422
- Membrane proteins**
Effect of anionic surfactants, nonionic surfactants and neutral salts on the conformation of spin-labelled erythrocyte — (Kirkpatrick, Sandberg) (298) 209
- Membranes**
Effect of proteins on the motion of spin-labelled fatty acids in mycoplasma — (Rottem, Samuni) (98) 32
- Membranes**
Importance of the hydrophobic interactions of local anaesthetics in the displacement of

- polyvalent cations from artificial lipid ——— (Fernández, Cerbón) (298) 8
- Membranes**
 - of *Tetrahymena*. III. The effect of temperature on membrane core structures and fatty acid composition of *Tetrahymena* cells (Wunderlich et al.) (298) 39
- Membranes**
 - New method for measuring glucose translocation through ——— and its application to human erythrocyte ghosts (Taverna, Langdon) (298) 412
- Membranes**
 - Optical analysis of electron micrographs of cytochrome oxidase ——— (Maniloff et al.) (298) 180
- Membranes**
 - Permeability of lipid ——— to non-electrolytes (Lelievre, Rich) (298) 15
- Membranes**
 - Polypeptide composition of ——— derived from neuronal and glial cells (Karlsson et al.) (298) 219
- Membranes**
 - Preparation of plasma ——— from isolated cells of newborn rat brain (Hemminki, Suovanemi) (298) 75
- Membranes**
 - Tetrodotoxin receptors in plasma ——— isolated from lobster nerve fibres (Barnola et al.) (298) 84
- Membranes**
 - Use of a PMR probe for studying the hydrophobic properties of *Micrococcus lysodeikticus* and membrane fractions (Green, Salton) (298) 664
- Membrane stabilizers**
 - Relationship between the transport of glucose and cations across cell membranes in isolated tissues. VIII. The effect of ——— on the transport of K^+ , Na^+ and glucose in muscle, adipocytes and erythrocytes (Clausen et al.) (298) 393
- Membrane transport**
 - Unstirred layer, source of biased Michaelis constant in ——— (Winne) (298) 27
- Membrane vesicles**
 - Glycine transport by ——— from pigeon erythrocytes (Lee et al.) (298) 446
- Metabolism**
 - Movement of cations connected with ——— in *Azotobacter vinelandii* (Postma et al.) (298) 341
- Microsomal ATPase**
 - Differential effect of lithium on ——— in cortex, medulla and papilla of the rat kidney (Gutman et al.) (298) 284
- Microsomal membranes**
 - Ouabain binding sites and the (Na^+, K^+) -ATPase of brain ——— (Harris et al.) (298) 680
- Microsomal (Na^+, K^+) -ATPase**
 - Interrelationships between hydroxylamine inhibition of ——— and physicochemical changes in membrane organization (Formby) (298) 291
- Microsomes**
 - Calcium transport by rabbit skeletal muscle ——— ("fragmented sarcoplasmic reticulum") (Katz, Repke) (298) 270
- Microsomes**
 - Phospholipid hydrolysis by phospholipases A_1 and A_2 in plasma membranes and ——— of rat liver (Newkirk, Waite) (298) 562
- Milk fat globule membrane**
 - Characterisation of the surface of bovine ——— using microelectrophoresis (Newman, Harrison) (298) 798
- Monolayers**
 - Interaction of bacterial lipopolysaccharide with phospholipid bilayers and ——— (Benedetto et al.) (298) 145
- Monolayers**
 - Interaction of cytochrome c with lipid ——— (Morse II, Deamer) (298) 769
- 5'-Mononucleotidase**
 - Isolation and properties of ——— from a membrane fraction of bovine cerebral cortex (Tanaka et al.) (298) 842
- Mucosa**
 - Oscillations of H^+ secretion and electrogenic properties in the isolated frog gastric ——— (Flemström) (298) 369
- Muscle**
 - Effects of the antibiotics gramicidin A, amphotericin B, and nystatin on the electrical properties of frog skeletal ——— (Leung, Eisenberg) (298) 718
- Mycoplasma membranes**
 - Protein binding to ——— (Rottem et al.) (298) 876
- Nystatin**
 - The effects of the antibiotics gramicidin A, amphotericin B, and ——— on the electrical properties of frog skeletal muscle (Leung, Eisenberg) (298) 718
- Oocyte**
 - Changes in specific sequestration of protein during transport into the developing ——— of the chicken (Cutting, Roth) (298) 951
- Ouabain**
 - binding sites and the (Na^+, K^+) -ATPase of brain microsomal membranes (Harris et al.) (298) 680

- Peptide utilization**
 — in *Escherichia coli*: Studies with peptides containing β -alanine residues (Payne) (298) 469
- Phosphatase**
 Isolation of plasma membranes from Ehrlich ascites tumour cells. Influence of amino acids on $(\text{Na}^+ + \text{K}^+)\text{-ATPase}$ and K^+ -stimulated — (Forte et al.) (298) 827
- Phospholipase A₂**
 Electron microscopy of *Bacillus subtilis* protoplast membrane after treatment with — and phospholipase C (Nanninga et al.) (298) 184
- Phospholipase C**
 Electron microscopy of *Bacillus subtilis* protoplast membrane after treatment with phospholipase A₂ and — (Nanninga et al.) (298) 184
- Phospholipases A₁ and A₂**
 Phospholipid hydrolysis by — in plasma membranes and microsomes of rat liver (Newkirk, Waite) (298) 562
- Phospholipid**
 Effect of changes in fatty acid composition of — species on the β -galactoside transport system of *Escherichia coli* K-12 (Kito et al.) (298) 69
- Phospholipid**
 — hydrolysis by phospholipases A₁ and A₂ in plasma membranes and microsomes of rat liver (Newkirk, Waite) (298) 562
- Phospholipid bilayers**
 Interaction of bacterial lipopolysaccharide with — and monolayers (Benedetto et al.) (298) 145
- Phospholipid membranes**
 Ionic structure of —, and binding of calcium ions (Seimiya, Ohki) (298) 546
- Photosynthetic membranes**
 Structure of — of *Euglena* using X-ray diffraction (Sadler et al.) (298) 620
- Phytohaemagglutinin**
 Effects of chelating agents on the initial interaction of — with lymphocytes and the subsequent stimulation of amino acid uptake (Whitney, Sutherland) (298) 790
- Plasmalemma**
 Photosynthetic energy control of an electrogenic ion pump at the — of *Nitella translucens* (Vredenberg, Tonk) (298) 354
- Plasma membrane**
 Isolation and characterization of — from cultured cells. V. The chemical composition of plasma membrane isolated from chicken tumours initiated with virus-transformed cells (Perdue et al.) (298) 817
- Plasma membrane**
 Isolation and properties of skeletal muscle — (Kidwai et al.) (298) 593
- Plasma membrane**
 Proteins and glycoproteins in — fractions of avian leukemia-sarcoma virus susceptible and resistant chicken embryo fibroblasts (Smith, Crittenden) (298) 608
- Plasma membranes**
 Composition and synthesis of — and smooth endoplasmic reticulum in isolated cells of newborn rat brain (Hemminki) (298) 810
- Plasma membranes**
 Isolation of — from Ehrlich ascites tumour cells. Influence of amino acids on $(\text{Na}^+ + \text{K}^+)\text{-ATPase}$ and K^+ -stimulated phosphatase (Forte et al.) (298) 827
- Plasma membranes**
 Phospholipid hydrolysis by phospholipases A₁ and A₂ in — and microsomes of rat liver (Newkirk, Waite) (298) 562
- Plasma membranes**
 Preparation of — from isolated cells of newborn rat brain (Hemminki, Suovaniemi) (298) 75
- Plasma membranes**
 Studies on —. XIX. Isolation and characterization of a plasma membrane fraction from calf thymocytes (van Blitterswijk et al.) (298) 577
- Plasma membranes**
 Study of sex difference in enzyme activities of rat liver — (Solyom, Lauter) (298) 743
- Plasma membranes**
 Tetrodotoxin receptors in — isolated from lobster nerve fibres (Barnola et al.) (298) 84
- Platelets**
 Adenine nucleotide metabolism of blood —. VIII. Transport of adenine into human platelets (Sixma et al.) (298) 460
- Platelets**
 Purification and characterization of HL-A antigens from human —, solubilized by the non-ionic detergent NP-40 (Dautigny et al.) (298) 783
- Polypeptide**
 — composition of membranes derived from neuronal and glial cells (Karlsson et al.) (298) 219
- Potassium transport**
 Relationship between the transport of glucose and cations across cell membranes in isolated tissues. VIII. The effect of membrane stabilizers on the — Na^+ transport and glucose transport in muscle, adipocytes and erythrocytes (Clausen et al.) (298) 393

- Propionate
 - Effects of — on sodium transport by the toad bladder. Evidence for a metabolic mode of action (Taylor et al.) (298) 376
- Protein
 - Changes in specific sequestration of — during transport into the developing oocyte of the chicken (Cutting, Roth) (298) 951
- Protein
 - Maleyl- α -lactalbumin as lactose synthetase specifier — (Kitchen, Barman) (298) 861
- Protein binding
 - to mycoplasma membranes (Rottem et al.) (298) 876
- Proteins
 - Effect of anionic surfactants, nonionic surfactants and neutral salts on the conformation of spin-labelled erythrocyte membrane — (Kirkpatrick, Sandberg) (298) 209
- Proteins
 - Effect of — on the motion of spin-labelled fatty acids in mycoplasma membranes (Rottem, Samuni) (298) 32
- Proteins
 - Isolation of sarcoplasmic reticulum by zonal centrifugation and purification of Ca^{2+} -pump and calcium ion-binding — (Meissner et al.) (298) 246
- Proteins
 - and glycoproteins in plasma membrane fractions of avian leukosis-sarcoma virus susceptible and resistant chicken embryo fibroblasts (Smith, Crittenden) (298) 608
- Protoplast membrane
 - Electron microscopy of *Bacillus subtilis* — after treatment with phospholipase A₂ and phospholipase C (Nanninga et al.) (298) 184
- Pteroylglutamic acid uptake
 - by the rat jejunum (Smith) (298) 124
- ⁸⁶Rubidium efflux
 - Uptake and — by human blood platelets (Baadenhuijsen et al.) (298) 690
- ⁸⁶Rubidium uptake
 - and efflux by human blood platelets (Baadenhuijsen et al.) (298) 690
- Sarcolemma
 - Calcium-stimulated, ouabain-inhibited ATPase in a myocardial fraction enriched with — (Stam, Jr et al.) (298) 927
- Sarcolemma
 - Chemical composition of — isolated from rabbit skeletal muscle (Madeira, Antunes-Madeira) (298) 230
- Sarcoplasmic reticulum
 - ATP and Ca^{2+} binding by the Ca^{2+} pump protein of — (Meissner) (298) 906
- Sarcoplasmic reticulum
 - Calcium transport by rabbit skeletal muscle microsomes ("fragmented —") (Katz, Repke) (298) 270
- Sarcoplasmic reticulum
 - Isolation of — by zonal centrifugation and purification of Ca^{2+} -pump and Ca^{2+} -binding proteins (Meissner et al.) (298) 246
- Sodium conductance
 - Role of ion exchange processes in the mechanism of — changes in excitable membranes (Fishman et al.) (298) 710
- Sodium-dependent calcium influx
 - in dialyzed barnacle fibers (Dipolo) (298) 279
- Sodium, potassium-activated ATPase
 - ADP binding to — (Kaniike et al.) (298) 901
- Sodium, potassium-ATPase
 - Comparison of the ouabain-sensitive — of normal and dystrophic skeletal muscle (Bray) (298) 239
- Sodium, potassium-ATPase
 - Interrelationships between hydroxylamine inhibition of microsomal — and physico-chemical changes in membrane organization (Formby) (298) 291
- Sodium, potassium-ATPase
 - Isolation of plasma membranes from Ehrlich ascites tumour cells. Influence of amino acids on — and K^{+} -stimulated phosphatase (Forte et al.) (298) 827
- Sodium, potassium-ATPase
 - Ouabain binding sites and the — of brain microsomal membranes (Harris et al.) (298) 680
- Sodium transport
 - Effects of propionate on — by the toad bladder. Evidence for a metabolic mode of action (Taylor et al.) (298) 376
- Sodium transport
 - Relationship between the transport of glucose and cations across cell membranes in isolated tissues. VIII. The effect of membrane stabilizers on K^{+} transport, — and glucose transport in muscle, adipocytes and erythrocytes (Clausen et al.) (298) 393
- Spermatozoa
 - Structural properties of the membrane of intact human —. A study with fluorescent probes (Mercado, Rosado) (298) 639
- Sterol
 - Effect of different fatty acid and — composition on the erythritol flux through the cell membrane of *Acholeplasma laidlawii* (de Kruffy et al.) (298) 479
- Sugar metabolism

- Increased rates of sugar transport in *Saccharomyces cerevisiae*. A result of — (Spoerl et al.) (298) 956
- Sugar transport
- Increased rates of — in *Saccharomyces cerevisiae* a result of sugar metabolism (Spoerl et al.) (298) 956
- Sugar transport
- at the basal and lateral aspect of the small intestinal cell (Bihler, Cybulsky) (298) 429
- Surfactants
- Effect of anionic —, nonionic surfactants and neutral salts on the conformation of spin-labelled erythrocyte membrane proteins (Kirkpatrick, Sandberg) (298) 209
- Tetrodotoxin receptors
- in plasma membranes isolated from lobster nerve fibres (Barnola et al.) (298) 84
- Thallous ions
- Interaction of — with the cation transport mechanism in erythrocytes (Skulskii et al.) (298) 702
- Tumour cells
- Isolation of plasma membranes from Ehrlich ascites —. Influence of amino acids on $(Na^+ + K^+)$ -ATPase and K^+ -stimulated phosphatase (Forte et al.) (298) 827
- Veratridine
- Modification of electroplax excitability by — (Bartels, Rosenberry) (298) 973
- Virus
- Studies on cell-coat macromolecules in normal — -transformed BHK_{21/C13} cells (Chiarugi, Urbano) (298) 195
- Virus-transformed cells
- Isolation and characterization of plasma membrane from cultured cells. V. The chemical composition of plasma membranes isolated from chicken tumours initiated with (Perdue et al.) (298) 817
- Yeast killer factor
- : ATP leakage and coordinate inhibition of macromolecular synthesis in sensitive cells (Bussey, Sherman) (298) 868
