

AUTHOR INDEX

- Akino, T. and Tsuda, M.
Characteristics of phospholipids in microvillar membranes of octopus photoreceptor cells (556) 61
- Alouf, J.E., see Launay, J.-M. (556) 278
- Andrietti, F., Esposito, G., Faelli, A., Burlini, N. and Tosco, M.
The calculated glucose concentration profile in the intercellular spaces of everted jejunum of rat (556) 175
- Baianu, I.C. and Burge, R.E.
An X-ray study of the cytoplasmic membranes of two Gram-positive bacteria (556) 322
- Borghgraef, R., see De Smedt, H. (556) 479
- Bösch, C., see Lauterwein, J. (556) 244
- Bourguet, J., see Parisi, M. (556) 509
- Branton, D., see Kramer, R.M. (556) 219
- Brodsky, W.A., Cabantchik, Z.I., Davidson, N., Ehrenspeck, G., Kinne-Saffran, E.M. and Kinne, R.
Localization and characterization of transport-related elements in the plasma membrane of turtle bladder epithelial cells (556) 490
- Brown, L.R., see Lauterwein, J. (556) 244
- Broza, R., see Gad, A.E. (556) 181
- Burge, R.E., see Baianu, I.C. (556) 322
- Burlini, N., see Andrietti, F. (556) 175
- Cabantchik, Z.I., see Brodsky, W.A. (556) 490
- Cathcart, M.K. and Culp, L.A.
Initial studies of the molecular organization of the cell-substrate adhesion site (556) 331
- Ceuterick, F., see De Smedt, H. (556) 479
- Chang, B.C. and Huang, L.
Synthesis and characterization of a new fluorescent phospholipid (556) 52
- Chap, H.J., see Perret, B. (556) 434
- Charalampous, F.C.
Levels and distributions of phospholipids and cholesterol in the plasma membrane of neuroblastoma cells (556) 38
- Chevalier, J., see Parisi, M. (556) 509
- Culp, L.A., see Cathcart, M.K. (556) 331
- D'Alessandro, J.S., see Lange, Y. (556) 388
- Davidson, N., see Brodsky, W.A. (556) 490
- Demel, R.A., see Jackson, R.L. (556) 369
- De Smedt, H., Borghgraef, R., Ceuterick, F. and Heremans, K.
Pressure effects on lipid-protein interactions in $(\text{Na}^+ + \text{K}^+)\text{-ATPase}$ (556) 479
- Devés, R. and Krupka, R.M.
A simple experimental approach to the determination of carrier transport parameters for unlabeled substrate analogs (556) 524
- Devés, R. and Krupka, R.M.
A general kinetic analysis of transport: Tests of the carrier model based on predicted relations among experimental parameters (556) 533
- Douste-Blazy, L., see Perret, B. (556) 434
- Ehrenspeck, G., see Brodsky, W.A. (556) 490
- Esposito, G., see Andrietti, F. (556) 175
- Evstigneeva, R.P., see Zaslavsky, B.Y. (556) 314
- Eytan, G.D., see Gad, A.E. (556) 181
- Faelli, A., see Andrietti, F. (556) 175
- Fairbanks, G., see Sauberman, N. (556) 292
- Fortier, N.L., see Sauberman, N. (556) 292
- Fosset, M., see Romey, G. (556) 344
- Gad, A.E., Broza, R. and Eytan, G.D.
Calcium induced fusion of proteoliposomes and protein-free liposomes. Effect of their phosphatidylethanolamine content on the structure of fused vesicles (556) 181
- Garcia-Sancho, J., Sanchez, A. and Herreros, B.
Stimulation of monovalent cation fluxes by electron donors in the human red cell membrane (556) 118

- Haug, A., see Yang, L.L. (556) 265
- Hayashi, H., see Kikuta, Y. (556) 354
- Heremans, K., see De Smedt, H. (556) 479
- Herreros, B., see Garcia-Sancho, J. (556) 118
- Hirayama, B., see Kippen, I. (556) 161
- Huang, L., see Chang, B.C. (556) 52
- Hui, S.W., see Stewart, T.P. (556) 1
- Iyer, R.
Variant forms of matrix protein in *Escherichia coli* B/r bearing N plasmids (556) 86
- Jackson, R.L., Pattus, F. and Demel, R.A.
Interaction of plasma apolipoproteins with lipid monolayers (556) 369
- Jacques, Y., see Romey, G. (556) 344
- Jayakumar, A., Singh, M. and Prasad, R.
An inducible proline transport system in *Candida albicans* (556) 144
- Kajdos, I., see Rabon, E. (556) 469
- Kannagi, R. and Koizumi, K.
Effect of different physical states of phospholipid substrates on partially purified platelet phospholipase A₂ activity (556) 423
- Kikuta, Y., Hayashi, H. and Saito, Y.
Effects of changes in sodium electrochemical potential gradient on p-aminohippurate transport in newt kidney (556) 354
- Kinne, R., see Brodsky, W.A. (556) 490
- Kinne-Saffran, E.M., see Brodsky, W.A. (556) 490
- Kippen, I., Hirayama, B., Klinenberg, J.R. and Wright, E.M.
Transport of p-aminohippuric acid, uric acid and glucose in highly purified rabbit renal brush border membranes (556) 161
- Klinenberg, J.R., see Kippen, I. (556) 161
- Koizumi, K., see Kannagi, R. (556) 423
- Korenman, S.G., see Krall, J.F. (556) 105
- Krall, J.F. and Korenman, S.G.
Smooth muscle cell sarcolemma. Purification and properties of plasma membranes from the rat uterus (556) 105
- Kramer, R.M. and Branton, D.
Retention of lipid asymmetry in membranes on polylysine-coated polyacrylamide beads (556) 219
- Krupka, R.M., see Devés, R. (556) 524
- Krupka, R.M., see Devés, R. (556) 533
- Kruuv, J., see Rule, G.S. (556) 399
- Lange, Y., D'Alessandro, J.S. and Small, D.M.
The affinity of cholesterol for phosphatidylcholine and sphingomyelin (556) 388
- Launay, J.-M. and Alouf, J.E.
Biochemical and ultrastructural study of the disruption of blood platelets by streptolysin O (556) 278
- Lauterwein, J., Bösch, C., Brown, L.R. and Wüthrich, K.
Physicochemical studies of the protein-lipid interactions in melittin-containing micelles (556) 244
- Lazdunski, M., see Romey, G. (556) 344
- Lepock, J.R., see Rule, G.S. (556) 399
- Lugtenberg, B., see Van Alphen, L. (556) 233
- McNamara, P.D., Pepe, L.M. and Segal, S.
Sodium-gradient dependence of proline and glycine uptake in rat renal brush-border membrane vesicles (556) 151
- Morselt, H., see Scherphof, G. (556) 196
- Narasimhulu, S.
Constraint on the substrate cytochrome P-450 binding reaction in bovine adrenocortical microsomes at physiological temperature (556) 457
- O'Connor, R.J., see Sauberman, N. (556) 292
- Oldfield, E., see Skarjune, R. (556) 208
- Ossipov, N.N., see Zaslavsky, B.Y. (556) 314
- Papahadjopoulos, D., see Stewart, T.P. (556) 1
- Parisi, M., Bourguet, J., Ripoche, P. and Chevalier, J.
Simultaneous minute by minute determination of unidirectional and net water fluxes in frog urinary bladder: A reexamination of the two barriers in series hypothesis (556) 509
- Pattus, F., see Jackson, R.L. (556) 369
- Pepe, L.M., see McNamara, P.D. (556) 151
- Perret, B., Chap, H.J. and Douste-Blazy, L.
Asymmetric distribution of arachidonic acid in the plasma membrane of human platelets. A determination using purified phospholipases and a rapid method for membrane isolation (556) 434
- Piatigorsky, J., see Zelenka, P. (556) 447
- Portis, A.R., Jr., see Stewart, T.P. (556) 1
- Prasad, R., see Jayakumar, A. (556) 144
- Rabon, E., Kajdos, I. and Sachs, G.
Induction of a chloride conductance in gastric vesicles by limited trypsin or chymotrypsin digestion or ageing (556) 469

- Regts, J., see Scherphof, G. (556) 196
- Reszelbach, R., see Zelenka, P. (556) 447
- Ripoche, P., see Parisi, M. (556) 509
- Roghozhin, S.V., see Zaslavsky, B.Y. (556) 314
- Romey, G., Jacques, Y., Schweitz, H., Fosset, M. and Lazdunski, M.
The sodium channel in non-impulsive cells. Interaction with specific neurotoxins (556) 344
- Roozemon, R.C. and Urli, D.C.
Lipid composition and microviscosity of subcellular fractions from rabbit thymocytes. Differences in the microviscosity of plasma membranes from subclasses of thymocytes (556) 17
- Rule, G.S., Kruuv, J. and Lepock, J.R.
Membrane lipid fluidity as rate limiting in the concanavalin A mediated agglutination of pyBHK cells (556) 399
- Sachs, G., see Rabon, E. (556) 469
- Saito, Y., see Kikuta, Y. (556) 354
- Sanchez, A., see Garcia-Sancho, J. (556) 118
- Sauberman, N., Fortier, N.L., Fairbanks, G., O'Connor, R.J. and Snyder, L.M.
Red cell membrane in hemolytic disease. Studies on variables affecting electrophoretic analysis (556) 292
- Schaeffer, B.E. and Zadunaisky, J.A.
Stimulation of chloride transport by fatty acids in corneal epithelium and relation to changes in membrane fluidity (556) 131
- Scherphof, G., Morselt, H., Regts, J. and Wilschut, J.C.
The involvement of the lipid phase transition in the plasma-induced dissolution of multilamellar phosphatidylcholine vesicles (556) 196
- Schweitz, H., see Romey, G. (556) 344
- Sebyakin, Y.L., see Zaslavsky, B.Y. (556) 314
- Segal, S., see McNamara, P.D. (556) 151
- Simon, I.
Differences in membrane unsaturated fatty acids and electron spin resonance in different types of myeloid leukemia cells (556) 408
- Singh, M., see Jayakumar, A. (556) 144
- Skarjune, R. and Oldfield, E.
Physical studies of cell surface and cell membrane structure. Deuterium nuclear magnetic resonance investigation of deuterium-labelled N-hexadecanoylgalactosylceramides (cerebrosides) (556) 208
- Small, D.M., see Lange, Y. (556) 388
- Stewart, T.P., Hui, S.W., Portis, A.R., Jr. and Papahadjopoulos, D.
Complex phase mixing of phosphatidylcholine and phosphatidylserine multilamellar membrane vesicles (556) 1
- Sugár, I.P.
A theory of the electric field-induced phase transition of phospholipid bilayers (556) 72
- Snyder, L.M., see Sauberman, N. (556) 292
- Tosco, M., see Andrietti, F. (556) 175
- Tsuda, M., see Akino, T. (556) 61
- Uehara, S. and Uyemura, K.
Isolation of neuronal plasma membranes from the crayfish, *Procambarus clarkii*, with an aqueous two phase polymer system followed by sucrose density gradient centrifugation (556) 96
- Urli, D.C., see Roozemon, R.C. (556) 17
- Uyemura, K., see Uehara, S. (556) 96
- Van Alphen, L., Van Alphen, W., Verkleij, A. and Lugtenberg, B.
Architecture of the outer membrane of *Escherichia coli* K12. IV. Relationship between outer membrane particles and aqueous pores (556) 233
- Van Alphen, W., see Van Alphen, L. (556) 233
- Verkleij, A., see Van Alphen, L. (556) 233
- Volkova, L.V., see Zaslavsky, B.Y. (556) 314
- Wilschut, J.C., see Scherphof, G. (556) 196
- Wright, E.M., see Kippen, I. (556) 161
- Wüthrich, K., see Lauterwein, J. (556) 244
- Yang, L.L. and Haug, A.
Purification and partial characterization of a procaryotic glycoprotein from the plasma membrane of *Thermoplasma acidophilum* (556) 265
- Zadunaisky, J.A., see Schaeffer, B.E. (556) 131
- Zaslavsky, B.Y., Ossipov, N.N., Rogozhin, S.V., Sebyakin, Y.L., Volkova, L.V. and Evstigneeva, R.P.
Action of surface-active substances on biological membranes. IV. Hemolytic and membrane-perturbing action of a homologous series of β -D-glucopyranosyl-1-alkylphosphates (556) 314
- Zelenka, P., Reszelbach, R. and Piatigorsky, J.
Developmental changes in proteins of purified membranes of chicken lenses and evidence for contamination by cytoplasmic δ -crystallin (556) 477
