

AUTHOR INDEX

- Akerman, K.E.O. and Nicholls, D.G.
Intra-synaptosomal compartmentation of calcium during depolarization-induced calcium uptake across the plasma membrane (645) 41
- Al-Jobore, A. and Roufogalis, B.D.
Influence of EGTA on the apparent Ca^{2+} affinity of Mg^{2+} -dependent, Ca^{2+} -stimulated ATPase in the human erythrocyte membrane (645) 1
- Araki, K. and Rifkind, J.M.
The rate of osmotic hemolysis. A relationship with membrane bilayer fluidity (645) 81
- Arnold, K., Lösche, A. and Gawrisch, K.
 ^{31}P -NMR investigations of phase separation in phosphatidylcholine/phosphatidylethanolamine mixtures (645) 143
- Asano, A., see Sekiguchi, K. (645) 211
- Askari, A., see Huang, W.-H. (645) 54
- Barchi, R.L., see Cohen, S.A. (645) 253
- Barrantes, F.J., see Marsh, D. (645) 97
- Barrow, D.A. and Lentz, B.R.
A model for the effect of lipid oxidation on diphenyl-hexatriene fluorescence in phospholipid vesicles (645) 17
- Beaugé, L., see DiPolo, R. (645) 229
- Beffagna, N., Pesci, P. and Marrè, E.
Influence of magnesium in the homogenization medium on the state of a divalent cation-stimulated, diethylstilbestrol-sensitive adenylnucleotidyl phosphatase activity from pea stem microsomal preparations (645) 300
- Bentz, J., see Hammoudah, M.M. (645) 102
- Benz, R. and Conti, F.
Reversible electrical breakdown of squid giant axon membrane (645) 115
- Beutler, E., see Kondo, T. (645) 132
- Bossi, D., see Cittadini, A. (645) 177
- Bromm, B., see Ochs, G. (645) 243
- Calviello, G., see Cittadini, A. (645) 177
- Carchman, R.A., see Warner, W. (645) 346
- Castranova, V., Jones, G.S., Phillips, R.M., Peden, D. and VanDyke, K.
Abnormal responses of granulocytes in chronic granulomatous disease (645) 49
- Cederbaum, S.D., see Kruse, C.A. (645) 339
- Christiansson, A., Gutman, H., Wieslander, A. and Lindblom, G.
Effects of anesthetics on water permeability and lipid metabolism in *Acholeplasma laidlawii* membranes (645) 24
- Cittadini, A., Bossi, D., Dani, A.M., Calviello, G., Wolf, F. and Terranova, T.
Lack of effect of the Ca^{2+} ionophore A23187 on tumour cells (645) 177
- Cohen, S.A. and Barchi, R.L.
Glycoprotein characteristics of the sodium channel saxitoxin-binding component from mammalian sarcolemma (645) 253
- Conti, F., see Benz, R. (645) 115
- Copps, T.P., see Petkau, A. (645) 71
- Costello, M.J., see McIntosh, T.J. (645) 318
- Dale, G.L., see Kondo, T. (645) 132
- Dani, A.M., see Cittadini, A. (645) 177
- Dilger, J.P.
The thickness of monoolein lipid bilayers as determined from reflectance measurements (645) 357
- DiPolo, R. and Beaugé, L.
The effects of vanadate on calcium transport in dialyzed squid axons. Sidedness of vanadate-cation interactions (645) 229
- Ellory, J.C., see Young, J.D. (645) 157
- Fahn, S., see Floud, A. (645) 165
- Finkelstein, A., see Weaver, C.A. (645) 137
- Floud, A. and Fahn, S.
L-DOPA(L-3,4-dihydroxyphenylalanine) uptake by human red blood cells (645) 165
- Garrahan, P.J., see Larocca, J.N. (645) 10
- Gawrisch, K., see Arnold, K. (645) 143
- Georghiou, S. and Mukhopadhyay, A.K.
Phase transitions and cholesterol effects in phospholipid liposomes. A new method employing the enhancement of the 0-0 vibronic transition of pyrene (645) 365
- Goshima, K., see Wakabayashi, S. (645) 311
- Gutknecht, J. and Walter, A.
Hydroxyl ion permeability of lipid bilayer membranes (645) 161
- Gutman, H., see Christiansson, A. (645) 24
- Hammerman, M.R., see Hruska, K.A. (645) 351
- Hammoudah, M.M., Nir, S., Bentz, J., Mayhew, E., Stewart, T.P., Hui, S.W. and Kurland, R.J.
Interactions of La^{3+} with phosphatidylserine vesicles. Binding, phase transition, leakage, ^{31}P -NMR and fusion (645) 102

- Harlos, K., see Watts, A. (645) 91
- Heine, U., see Trams, E.G. (645) 63
- Hruska, K.A. and Hammerman, M.R.
Parathyroid hormone inhibition of phosphate transport in renal brush border vesicles from phosphate-depleted dogs (645) 351
- Huang, W.-H. and Askari, A.
(Na⁺ + K⁺)-ATPase. Phosphorylation-dependent cross-linking of the α -subunits in presence of Cu²⁺ and o-phenanthroline (645) 54
- Hui, S.W., see Hammoudah, M.M. (645) 102
- Inesi, G., see Kidd, P. (645) 124
- Iwashima, A., see Sempuku, K. (645) 226
- Jeffrey, K.R., see Siminovitch, D.J. (645) 270
- Jones, G.S., see Castranova, V. (645) 49
- Jones, S.E.M., see Young, J.D. (645) 157
- Kagan, B.L., see Weaver, C.A. (645) 137
- Kelly, K., see Petkau, A. (645) 71
- Kidd, P., Scales, D. and Inesi, G.
Structural and functional lability induced by diethyl ether on the sarcoplasmic reticulum membrane (645) 124
- Kolb-Bachofen, V.
Hepatic receptor for asialo-glycoproteins. Ultrastructural demonstration of ligand-induced microaggregation of receptors (645) 293
- Kondo, T., Dale, G.L. and Beutler, E.
Studies on glutathione transport utilizing inside-out vesicles prepared from human erythrocytes (645) 132
- Konisky, J., see Weaver, C.A. (645) 137
- Kruse, C.A., Spector, E.B., Cederbaum, S.D., Wisniewski, B.J. and Popják, G.
Microinjection of arginase into enzyme-deficient cells with the isolated glycoproteins of Sendai virus as fusogen (645) 339
- Kurland, R.J., see Hammoudah, M.M. (645) 102
- Kurland, R., see Ohki, S. (645) 170
- Kuroda, K., see Sekiguchi, K. (645) 211
- Larocca, J.N., Rega, A.F. and Garrahan, P.J.
Phosphorylation and dephosphorylation of the Ca²⁺ pump of human red cells in the presence of monovalent cations (645) 10
- Lau, A., McLaughlin, A. and McLaughlin, S.
The adsorption of divalent cations to phosphatidylglycerol bilayer membranes (645) 279
- Lauter, C.J., see Trams, E.G. (645) 63
- Lentz, B.R., see Barrow, D.A. (645) 17
- Liao, M.J. and Prestegard, J.H.
Structural properties of a Ca²⁺-phosphatidic acid complex. Small angle X-ray scattering and calorimetric results (645) 149
- Lindblom, G., see Christiansson, A. (645) 24
- Lösche, A., see Arnold, K. (645) 143
- Mannella, C.A.
Structure of the outer mitochondrial membrane. Analysis of X-ray diffraction from the plant membrane (645) 33
- Marrè, E., see Beffagna, N. (645) 300
- Marsh, D., Watts, A. and Barrantes, F.J.
Phospholipid chain immobilization and steroid rotational immobilization in acetylcholine receptor-rich membranes from *Torpedo marmorata* (645) 97
- Marsh, D., see Watts, A. (645) 91
- Mayhew, E., see Hammoudah, M.M. (645) 102
- McIntosh, T.J. and Costello, M.J.
Effects of n-alkanes on the morphology of lipid bilayers. A freeze-fracture and negative stain analysis (645) 318
- McLaughlin, A., see Lau, A. (645) 279
- McLaughlin, S., see Lau, A. (645) 279
- Meraldi, J.-P. and Schlitter, J.
A statistical mechanical treatment of fatty acyl chain order in phospholipid bilayers and correlation with experimental data. A. Theory (645) 183
- Meraldi, J.-P. and Schlitter, J.
A statistical mechanical treatment of fatty acyl chain order in phospholipid bilayers and correlation with experimental data. B. Dipalmitoyl-3-sn-phosphatidylcholine (645) 193
- Miller, K.W., see Smith, R.A. (645) 327
- Mukhopadhyay, A.K., see Georgiou, S. (645) 365
- Nicholls, D.G., see Akerman, K.E.O. (645) 41
- Nir, S., see Hammoudah, M.M. (645) 102
- Nishimura, H., see Sempuku, K. (645) 226
- Ochs, G., Bromm, B. and Schwarz, J.R.
A three-state model for inactivation of sodium permeability (645) 243
- Ohki, S. and Kurland, R.
Surface potential of phosphatidylserine monolayers. II. Divalent and monovalent ion binding (645) 170
- Ohnishi, S.-i., see Sekiguchi, K. (645) 211
- Peden, D., see Castranova, V. (645) 49
- Pesci, P., see Beffagna, N. (645) 300
- Petkau, A., Copps, T.P. and Kelly, K.
Superoxide dismutase within the bovine erythrocyte membrane (645) 71
- Phillips, R.M., see Castranova, V. (645) 49
- Popják, G., see Kruse, C.A. (645) 339
- Porter, E.G., see Smith, R.A. (645) 327
- Prestegard, J.H., see Liao, M.J. (645) 149
- Rega, A.F., see Larocca, J.N. (645) 10
- Rifkind, J.M., see Araki, K. (645) 81
- Roufogalis, B.D., see Al-Jobore, A. (645) 1
- Salem, N., Jr., see Trams, E.G. (645) 63
- Scales, D., see Kidd, P. (645) 124
- Schlitter, J., see Meraldi, J.-P. (645) 183

- Schlitter, J., see Meraldi, J.-P. (645) 193
- Schwarz, J.R., see Ochs, G. (645) 243
- Seeger, R. and Wachter, B.
 Rubescensylsin and Phalloysin release marker molecules from phospholipid cholesterol liposomes (645) 59
- Sekiguchi, K., Kuroda, K., Ohnishi, S.-i. and Asano, A.
 Virus-induced fusion of human erythrocyte ghosts. I. Effects of macromolecules on the final stages of the fusion reaction (645) 211
- Sempuku, K., Nishimura, H. and Iwashima, A.
 Photoinactivation of the thiamine transport system in *Saccharomyces cerevisiae* with 4-azido-2-nitrobenzoyl-thiamine (645) 226
- Shieh, D.D., see Yokono, S. (645) 237
- Siminovitch, D.J. and Jeffrey, K.R.
 Orientational order in the choline headgroup of sphingomyelin. A ^{14}N -NMR study (645) 270
- Smith, R.A., Porter, E.G. and Miller, K.W.
 The solubility of anesthetic gases in lipid bilayers (645) 327
- Spector, E.B., see Kruse, C.A. (645) 339
- Stewart, T.P., see Hammoudah, M.M. (645) 102
- Terranova, T., see Cittadini, A. (645) 177
- Trams, E.G., Lauter, C.J., Salem, N, Jr. and Heine, U.
 Exfoliation of membrane ecto-enzymes in the form of micro-vesicles (645) 63
- Ueda, I., see Yokono, S. (645) 237
- VanDyke, K., see Castranova, V. (645) 49
- Van Venetië, R. and Verkleij, A.J.
 Analysis of the hexagonal II phase and its relations to lipidic particles and the lamellar phase. A freeze-fracture study (645) 262
- Verkleij, A.J., see Van Venetië, R. (645) 262
- Wachter, B., see Seeger, R. (645) 59
- Wakabayashi, S. and Goshima, K.
 Comparison of kinetic characteristics of Na^+ - Ca^{2+} exchange in sarcolemma vesicles and cultured cells from chick heart (645) 311
- Walter, A., see Gutknecht, J. (645) 161
- Warner, W. and Carchman, R.A.
 Effects of ionophore A23187 on calcium fluxes from cultured adrenal cells (645) 346
- Watts, A., Harlos, K. and Marsh, D.
 Charge-induced tilt in ordered-phase phosphatidylglycerol bilayers. Evidence from X-ray diffraction (645) 91
- Watts, A., see Marsh, D. (645) 97
- Weaver, C.A., Kagan, B.L., Finkelstein, A. and Konisky, J.
 Mode of action of colicin Ib. Formation of ion-permeable membrane channels (645) 137
- Wieslander, Å., see Christiansson, A. (645) 24
- Wisniewski, B.J., see Kruse, C.A. (645) 339
