### Regular Papers

Fura-2 transport in toad urinary bladder epithelium: effects of antidiuretic hormone, colchicine and osmotic gradients

*M. Parisi, R. Dorr, R. Bonnet, M. Borgnia and J.P. Rossi (Argentina, France)*

1

Transmembrane mobility and distribution of phospholipids in the membrane of mouse  $\beta$ -thalassaemic red blood cells

*P. Müller, A. Zachowski, Y. Beuzard and P.F. Devaux (France)*

7

Effects of high pressure on the channel gated by the quisqualate-sensitive glutamate receptor of locust muscle and its blockade by ketamine; a single-channel analysis

*A.G. Macdonald, R.L. Ramsey, J. Drewry and P.N.R. Usherwood (UK)*

13

The state of association of Band 3 of the human erythrocyte membrane: evidence of a hexamer

*P. Wong (Canada)*

21

Influence of hydroxylation and conjugation in cross-inhibition of bile acid transport across the human trophoblast basal membrane

*M.A. Serrano, P. Bravo, M.Y.A. El-Mir and J.J.G. Marin (Spain)*

28

Biosynthesis and initial processing of the cardiac sarcolemmal  $\text{Na}^+/\text{Ca}^{2+}$  exchanger

*L.V. Hryshko, D.A. Nicoll, J.N. Weiss and K.D. Philipson (USA)*

35

Interaction of hydrophobic peptides with model membranes: slow binding to membranes and not subtle variations in pore structure is responsible for the gradual release of entrapped solutes

*G. Saberwal and R. Nagaraj (India)*

43

Topography of tetrahydrocannabinol in model membranes using neutron diffraction

*P. Martel, A. Makriyannis, T. Mavromoustakos, K. Kelly and K.R. Jeffrey (Canada, USA)*

51

In vitro cytostatic effect of TNF (Tumor Necrosis Factor) entrapped in immunoliposomes on cells normally insensitive to TNF

*H. Morishige, T. Ohkuma and A. Kaji (USA, Japan)*

59

Novel radioactive phospholipid probes as a tool for measurement of phospholipid translocation across biomembranes

*K. Anzai, Y. Yoshioka and Y. Kirino (Japan)*

69

Effect of salts on conformational change of basic amphipathic peptides from  $\beta$ -structure to  $\alpha$ -helix in the presence of phospholipid liposomes and their channel-forming ability

*S. Lee, T. Iwata, H. Oyagi, H. Aoyagi, M. Ohno, K. Anzai, Y. Kirino and G. Sugihara (Japan)*

76

In vivo inactivation of the yeast plasma membrane ATPase in the absence of exogenous catabolism

*L. Amigo, E. Moreno and R. Lagunas (Spain)*

83

Rapid kinetic analyses of the  $\text{Na}^+/\text{K}^+$ -ATPase distinguish among different criteria for conformational change

*P.R. Pratap and J.D. Robinson (USA)*

89

Oligomeric structure of the sodium-dependent phlorizin binding protein from kidney brush-border membranes

*C. Gerardi-Laffin, P. Delque-Bayer, P. Sudaka and J.C. Poiree (France)*

99

### Rapid Report

Electric field-mediated glycoporphin insertion in cell membrane is a localized event

*K. El Ouagari, B. Gabriel, H. Benoist and J. Teissié (France)*

105

### Regular Papers

Lipophilic derivatization and its effect on the interaction of cholecystokinin (CCK) nonapeptide with phospholipids

*R. Romano, T.M. Bayerl and L. Moroder (Germany)*

111

Adhesive interaction of hemopoietic progenitor cell membrane with the RGD domain of fibronectin

*J.J. Minguell, C.L. Hardy and M. Tavassoli (USA)*

120

Interaction of myelin basic protein with single bilayers on a solid support: an NMR, DSC and polarized infrared ATR study

*H.M. Reinl and T.M. Bayerl (Germany)*

127

|                                                                                                                                                                                                                                                                                                                                                                                  |     |                                                                                                                                                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Enzymatic hydrolysis of reconstituted dimyristoylphosphatidylcholine-apo A-I complexes<br><i>L. Lins, S. Piron, K. Conrath, B. Vanloo, R. Brasseur, M. Rosseneu, J. Baert and J.-M. Ruyschaert (Belgium)</i>                                                                                                                                                                     | 137 | Solubilization and reconstitution of high- and low-affinity Na <sup>+</sup> -dependent neutral L- $\alpha$ -amino acid transporters from rabbit small intestine<br><i>M. Nakanishi, T. Tetsuka, Y. Kagawa, A. Moriyama, M. Sasaki and H. Hirata (Japan)</i>            | 193 |
| Inhibition of transport systems in yeast by photodynamic treatment with Toluidine blue<br><i>M. Paardekooper, A.W. De Bruijne, J. Van Steveninck and P.J.A. Van den Broek (The Netherlands)</i>                                                                                                                                                                                  | 143 | Transmembrane ammonium sulfate gradients in liposomes produce efficient and stable entrapment of amphipathic weak bases<br><i>G. Haran, R. Cohen, L.K. Bar and Y. Barenholz (Israel)</i>                                                                               | 201 |
| Identification of the phosphorylation site on human erythrocyte band 7 integral membrane protein: implications for a monotopic protein structure<br><i>U. Salzer, H. Ahorn and R. Prohaska (Austria)</i>                                                                                                                                                                         | 149 | A near perfect temperature adaptation of bilayer order in vertebrate brain membranes<br><i>M.K. Behan-Martin, G.R. Jones, K. Bowler and A.R. Cossins (UK)</i>                                                                                                          | 216 |
| The relationship between sodium-dependent transport of anionic amino acids and cell proliferation<br><i>O. Bussolati, J. Uggeri, B.M. Rotoli, R. Franchi-Gazzola and G.C. Gazzola (Italy)</i>                                                                                                                                                                                    | 153 | Mitochondrial pyruvate transport in working guinea-pig heart. Work-related vs. carrier-mediated control of pyruvate oxidation<br><i>R. Büniger and R.T. Mallet (USA)</i>                                                                                               | 223 |
| The diversity of Na <sup>+</sup> -independent uptake systems for polyamines in rat intestinal brush-border membrane vesicles<br><i>M. Kobayashi, K. Iseki, M. Sugawara and K. Miyazaki (Japan)</i>                                                                                                                                                                               | 161 | H <sup>+</sup> -coupled dipeptide (glycylsarcosine) transport across apical and basal borders of human intestinal Caco-2 cell monolayers display distinctive characteristics<br><i>D.T. Thwaites, C.D.A. Brown, B.H. Hirst and N.L. Simmons (UK)</i>                   | 237 |
| Photophysical properties of 3,3'-dialkylthiacarbocyanine dyes in organized media: unilamellar liposomes and thin polymer films<br><i>M. Krieg, M.B. Srichai and R.W. Redmond (USA)</i>                                                                                                                                                                                           | 168 | Ral and Rab3a are major GTP-binding proteins of axonal rapid transport and synaptic vesicles and do not redistribute following depolarization stimulated synaptosomal exocytosis<br><i>D.F. Bielinski, H.Y. Pyun, K. Linko-Stentz, I.G. Macara and R.E. Fine (USA)</i> | 246 |
| <i>Saccharomyces cerevisiae</i> expression of exogenous vacuolar ATPase subunits B<br><i>Y.-X. Pan, H.H. Gu, J. Xu and G.E. Dean (USA)</i>                                                                                                                                                                                                                                       | 175 | Electric depolarization of photosensitized cells: lipid vs. protein alterations<br><i>B. Ehrenberg, E. Gross, Y. Nitzan and Z. Malik (Israel)</i>                                                                                                                      | 257 |
| Kinetics and peculiarities of thermal inactivation of volume-induced Na <sup>+</sup> /H <sup>+</sup> exchange, Na <sup>+</sup> ,K <sup>+</sup> ,2Cl <sup>-</sup> cotransport and K <sup>+</sup> ,Cl <sup>-</sup> cotransport in rat erythrocytes<br><i>S.N. Orlov, I.A. Kolosova, E.J. Cragoe, T.G. Gurlo, A.A. Mongin, S.L. Aksentsev and S.V. Konev (Russia, USA, Belarus)</i> | 186 | <i>Cumulative Contents, Vol. 1151</i>                                                                                                                                                                                                                                  | 265 |
|                                                                                                                                                                                                                                                                                                                                                                                  |     | <i>Author Index</i>                                                                                                                                                                                                                                                    | 267 |
