In the above mentioned paper the legend to Fig. 4 is incorrect. The correct legend should be as given below.

Chain length dependence of the transition enthalpy (A) and transition entropy (B) of the main chain-melting phase transitions of *N*-acylethanolamines and fatty acids of even chain length. Data obtained from heating scans of dry (●) and hydrated (■) samples of NAEs are shown. Corresponding data for fatty acids (○), taken from literature [21], are also shown for the sake of comparison. The solid and dashed lines represent linear least square fits to the data. Data for *N*-octanoylethanolamine in water (Table 1) are not shown in this figure.
