

Biomembranes Cumulative Contents

Rapid report

A voltage-independent K^+ conductance activated by cell swelling in Ehrlich cells is modulated by a G-protein-mediated process

M.I. Niemeyer, A. Stutzin and F.V. Sepúlveda (Chile)

1

Review

Protein-translocating outer membrane porins of Gram-negative bacteria

M.-R. Yen, C.R. Peabody, S.M. Partovi, Y. Zhai, Y.-H. Tseng and M.H. Saier Jr. (USA, Taiwan, ROC)

6

Regular papers

Specific interactions of the antimicrobial peptide cyclic β -sheet tachyplesin I with lipopolysaccharides

Y. Hirakura, S. Kobayashi and K. Matsuzaki (Japan)

32

Magainin 2 in phospholipid bilayers: peptide orientation and lipid chain ordering studied by X-ray diffraction

C. Münster, A. Spaar, B. Bechinger and T. Salditt (Germany)

37

Secondary structure of spiralin in solution, at the air/water interface, and in interaction with lipid monolayers

S. Castano, D. Blaudez, B. Desbat, J. Dufourcq and H. Wróblewski (France)

45

Circular dichroic properties and average dimensions of DNA-containing reverse micellar aggregates

A.V. Pietrini and P.L. Luisi (Switzerland)

57

Pore formation activity of Cry1Ab toxin from *Bacillus thuringiensis* in an improved membrane vesicle preparation from *Manduca sexta* midgut cell microvilli

A. Bravo, R. Miranda, I. Gómez and M. Soberón (Mexico)
