

Biomembranes

Cumulative Contents

Editorial	1	Sodium-dependent copper uptake across epithelia: a review of rationale with experimental evidence from gill and intestine <i>R.D. Handy, F.B. Eddy and H. Baines (UK)</i>	104
<i>Reviews</i>			
Hans H. Ussing—scientific work: contemporary significance and perspectives <i>E.H. Larsen (Denmark)</i>	2	Rapid responses to steroid hormones: from frog skin to human colon. A homage to Hans Ussing <i>B.J. Harvey, R. Alzamora, V. Healy, C. Renard and C.M. Doolan (Ireland)</i>	116
Cystic fibrosis transmembrane conductance regulator in teleost fish <i>W.S. Marshall and T.D. Singer (Canada)</i>	16	Control of Cl [−] transport in the operculum epithelium of <i>Fundulus heteroclitus</i> : long- and short-term salinity adaptation <i>E.K. Hoffmann, E. Hoffmann, F. Lang and J.A. Zadunaisky (Denmark, Germany, USA)</i>	129
Mitochondria-rich cells as experimental model in studies of epithelial chloride channels <i>N.J. Willumsen, J. Amstrup, N. Møbjerg, A. Jespersen, P. Kristensen and E.H. Larsen (Denmark)</i>	28	Regulation of Na–K–2Cl cotransport by phosphorylation and protein–protein interactions <i>P.W. Flatman (UK)</i>	140
The route of passive chloride movement across amphibian skin: localization and regulatory mechanisms <i>W. Nagel, P. Somieski and U. Katz (Germany, Israel)</i>	44	Two-pore domain K ⁺ channels—molecular sensors <i>A.D. O'Connell, M.J. Morton and M. Hunter (UK)</i>	152
Cloning and characterisation of amphibian ClC-3 and ClC-5 chloride channels <i>S. Schmieder, S. Lindenthal and J. Ehrenfeld (France)</i>	55	Where have all the Na ⁺ channels gone? In search of functional ENaC in exocrine pancreas <i>I. Novak and M.R. Hansen (Denmark)</i>	162
Sodium–proton exchange in crayfish <i>L.B. Kirschner (USA)</i>	67	Renal organic anion transport: a comparative and cellular perspective <i>W.H. Dantzler (USA)</i>	169
Cultured gill epithelia as models for the freshwater fish gill <i>C.M. Wood, S.P. Kelly, B. Zhou, M. Fletcher, M. O'Donnell, B. Eletti and P. Pärt (Canada, Italy)</i>	72	Intestinal bicarbonate secretion by marine teleost fish—why and how? <i>R.W. Wilson, J.M. Wilson and M. Grosell (UK, Portugal, Denmark)</i>	182
Annelid epithelia as models for electrogenic Na ⁺ transport <i>M. Schnitzler, S. Krumm and W. Clauss (Germany)</i>	84	<i>Author Index</i>	194
Two isoforms of the Na ⁺ /K ⁺ /2Cl [−] cotransporter are expressed in the European eel (<i>Anguilla anguilla</i>) <i>C.P. Cutler and G. Cramb (UK)</i>	92	<i>Cumulative Contents</i>	195
