

Biomembranes

Cumulative Contents

Editorial	1	<i>Lactococcus lactis</i> as host for overproduction of functional membrane proteins <i>E.R.S. Kunji, D.-J. Slotboom and B. Poolman (UK, The Netherlands)</i>	97
Reviews			
Assembly and overexpression of membrane proteins in <i>Escherichia coli</i> <i>D. Drew, L. Fröderberg, L. Baars and J.-W.L. De Gier (Sweden)</i>	3		
Specific lipid requirements of membrane proteins—a putative bottleneck in heterologous expression <i>M. Opekarová and W. Tanner (Czech Republic, Germany)</i>	11		
Practical aspects of overexpressing bacterial secondary membrane transporters for structural studies <i>D.-N. Wang, M. Safferling, M.J. Lemieux, H. Griffith, Y. Chen and X.-D. Li (USA)</i>	23		
The expression of outer membrane proteins for crystallization <i>M. Bannwarth and G.E. Schulz (Germany)</i>	37		
Monoclonal antibodies for the structural analysis of the Na ⁺ /H ⁺ antiporter NhaA from <i>Escherichia coli</i> <i>M. Venturi and C. Hunte (USA, Germany)</i>	46		
The trials and tribulations of membrane protein folding in vitro <i>P.J. Booth (UK)</i>	51		
In vitro folding of alpha-helical membrane proteins <i>H. Kiefer (Germany)</i>	57		
Overexpression, purification, and functional characterization of ATP-binding cassette transporters in the yeast, <i>Pichia pastoris</i> <i>J. Cai and P. Gros (Canada)</i>	63		
G protein-coupled receptor overexpression with the baculovirus–insect cell system: a tool for structural and functional studies <i>D. Massotte (France)</i>	77		
Semliki Forest virus vectors for rapid and high-level expression of integral membrane proteins <i>K. Lundstrom (Switzerland)</i>	90		
		<i>Research papers</i>	
		Downstream coding region determinants of bacterio-opsin, muscarinic acetylcholine receptor and adrenergic receptor expression in <i>Halobacterium salinarum</i> <i>C.L. Bartus, V.-P. Jaakola, R. Reusch, H.H. Valentine, P. Heikinheimo, A. Levay, L.T. Potter, H. Heimo, A. Goldman and G.J. Turner (USA, Finland)</i>	109
		Calnexin co-expression and the use of weaker promoters increase the expression of correctly assembled Shaker potassium channel in insect cells <i>M.K. Higgins, M. Demir and C.G. Tate (UK)</i>	124
		Expression and purification of truncated, non-glycosylated turkey beta-adrenergic receptors for crystallization <i>T. Warne, J. Chirnside and G.F.X. Schertler (UK)</i>	133
		Comparison of seven different heterologous protein expression systems for the production of the serotonin transporter <i>C.G. Tate, J. Haase, C. Baker, M. Boorsma, F. Magnani, Y. Vallis and D.C. Williams (UK, Ireland, Switzerland)</i>	141
		Preface	155
		<i>Reviews</i>	
		I. Phase behaviour of cholesterol/phospholipid mixtures	
		Condensed complexes of cholesterol and phospholipids <i>H.M. McConnell and A. Radhakrishnan (USA)</i>	159
		Role of cholesterol in lipid raft formation: lessons from lipid model systems <i>J.R. Silvius (Canada)</i>	174

II. Formation of crystalline domains of cholesterol in membranes		V. Role of rafts in signal transduction	
Phospholipid/cholesterol model membranes: formation of cholesterol crystallites		Lipid rafts are critical membrane domains in blood platelet activation processes	
<i>D. Bach and E. Wachtel (Israel)</i>	187	<i>S. Bodin, H. Tronchère and B. Payrastre (France)</i>	247
Direct evidence for cholesterol crystalline domains in biological membranes: role in human pathobiology		VI. Cholesterol in neuronal membranes	
<i>R. Preston Mason, T.N. Tulenko and R.F. Jacob (USA)</i>	198	Molecular characterization of the detergent-insoluble cholesterol-rich membrane microdomain (raft) of the central nervous system	
Structural information about organized cholesterol domains from specific antibody recognition		<i>S. Maekawa, S. Iino and S. Miyata (Japan, USA)</i>	261
<i>L. Addadi, M. Geva and H.S. Kruth (Israel, USA)</i>	208	Role of cholesterol in synapse formation and function	
III. Cholesterol trafficking		<i>F.W. Pfrieger (France)</i>	271
Relationship between cholesterol trafficking and signaling in rafts and caveolae		Amyloid beta-protein interactions with membranes and cholesterol: causes or casualties of Alzheimer's disease	
<i>C.J. Fielding and P.E. Fielding (USA)</i>	219	<i>W. Gibson Wood, G.P. Eckert, U. Igbavboa and W.E. Müller (USA, Germany)</i>	281
IV. Cholesterol domains in biological membranes		<i>Author Index</i>	291
Dynamics of raft molecules in the cell and artificial membranes: approaches by pulse EPR spin labeling and single molecule optical microscopy		<i>Cumulative Contents</i>	293
<i>W.K. Subczynski and A. Kusumi (USA, Japan)</i>	231
