

Biomembranes Cumulative Contents

<i>Editorial</i>	1	Computer simulations of membrane proteins <i>W.L. Ash, M.R. Zlomislic, E.O. Oloo and D.P. Tieleman (Canada)</i>	158
<i>Reviews</i>		The alignment, structure and dynamics of membrane-associated polypeptides by solid-state NMR spectroscopy <i>B. Bechinger, C. Aisenbrey and P.P. Bertani (France)</i>	190
Lipids in membrane protein structures <i>H. Palsdottir and C. Hunte (Germany)</i>	2	Lipids do influence protein function—the hydrophobic matching hypothesis revisited <i>M.Ø. Jensen and O.G. Mouritsen (Denmark)</i>	205
Diversity and versatility of lipid–protein interactions revealed by molecular genetic approaches <i>W. Dowhan, E. Mileykovskaya and M. Bogdanov (United States)</i>	19	Do proteins facilitate the formation of cholesterol-rich domains? <i>R.M. Epand (Canada)</i>	227
Thermodynamics of lipid–peptide interactions <i>J. Seelig (Switzerland)</i>	40	On the role of lipid in colicin pore formation <i>S.D. Zakharov, E.A. Kotova, Y.N. Antonenko and W.A. Cramer (United States, Russia)</i>	239
Where sterols are required for endocytosis <i>H. Pichler and H. Riezman (Switzerland)</i>	51	Folding and assembly of β -barrel membrane proteins <i>L.K. Tamm, H. Hong and B. Liang (USA)</i>	250
How lipids affect the activities of integral membrane proteins <i>A.G. Lee (UK)</i>	62	Protein–lipid interactions in membrane trafficking at the Golgi complex <i>M.A. De Matteis and A. Godi (Italy)</i>	264
Bacterial osmosensing: roles of membrane structure and electrostatics in lipid–protein and protein–protein interactions <i>B. Poolman, J.J. Spitzer and J.M. Wood (The Netherlands, USA, Canada)</i>	88	Nonbilayer lipids affect peripheral and integral membrane proteins via changes in the lateral pressure profile <i>E. van den Brink-van der Laan, J. Antoinette Killian and B. de Kruijff (The Netherlands)</i>	275
Membrane proteins, lipids and detergents: not just a soap opera <i>A.M. Seddon, P. Curnow and P.J. Booth (UK)</i>	105	<i>Author Index Volume 1666</i>	289
The protein–lipid interface: perspectives from magnetic resonance and crystal structures <i>D. Marsh and T. Páli (Germany, Hungary)</i>	118	<i>Cumulative Contents Volume 1666</i>	290
Membrane fluidity and its roles in the perception of environmental signals <i>D.A. Los and N. Murata (Russia, Japan)</i>	142
