

Biomembranes Cumulative Contents

Regular papers

- | | | | |
|---|----|--|----|
| Behaviour of small solutes and large drugs in a lipid bilayer from computer simulations
<i>D. Bemporad, C. Luttmann and J.W. Essex</i> | 1 | EPR study of lipid phase in renal cortical membrane organelles from intact and cadmium-intoxicated rats
<i>M. Žuvić-Butorac, C.M. Herak-Kramberger, D. Krilov, I. Sabolić and J.N. Herak</i> | 44 |
| Characterization of cationic liposomes based on dimethyldioctadecylammonium and synthetic cord factor from <i>M. tuberculosis</i> (trehalose 6,6'-dibehenate)—A novel adjuvant inducing both strong CMI and antibody responses
<i>J. Davidsen, I. Rosenkrands, D. Christensen, A. Vangala, D. Kirby, Y. Perrie, E.M. Agger and P. Andersen</i> | 22 | Relationships of Cysteine and Lysine residues with the substrate binding site of the mitochondrial ornithine/citrulline carrier: An inhibition kinetic approach combined with the analysis of the homology structural model
<i>A. Tonazzi, N. Giangregorio, F. Palmieri and C. Indiveri</i> | 53 |
| Inhibition by calyculin A and okadaic acid of the Ca^{2+} release-activated Ca^{2+} entry pathway in rat basophilic leukemia cells: Evidence for regulation by Type 1/2A serine/threonine phosphatase activity
<i>N.E. Evans, M.K.L. Forth, A.K. Simpson and M.J. Mason</i> | 32 | Acyl chain length affects ceramide action on sterol/sphingomyelin-rich domains
<i>S. Nybond, Y.J.E. Björkqvist, B. Ramstedt and J.P. Slotte</i> | 61 |
| | | Study of the interaction of sulfur dioxide derivative with cardiac sodium channel
<i>A. Nie and Z. Meng</i> | 67 |
| | | <i>Cumulative Contents</i> | 74 |
