

Biomembranes Cumulative Contents

Review

Thermodynamics of membrane domains

P.F.F. Almeida, A. Pokorny and A. Hinderliter

1

Regular papers

Lysophospholipid and fatty acid inhibition of pulmonary surfactant: Non-enzymatic models of phospholipase A₂ surfactant hydrolysis

R.D. Hite, M.C. Seeds, R.B. Jacinto, B.L. Grier, B.M. Waite and D.A. Bass

14

Adsorption equilibria between liposome membrane formed of phosphatidylcholine and aqueous sodium chloride solution as a function of pH

J. Kotyńska and Z.A. Figaszewski

22

Photoisomerisable cholesterol derivatives as photo-trigger of liposomes: Effect of lipid polarity, temperature, incorporation ratio, and cholesterol

X.-M. Liu, B. Yang, Y.-L. Wang and J.-Y. Wang

28

Length of C-terminus of rCx46 influences oligomerization and hemichannel properties

C. Zeilinger, M. Steffens and H.-A. Kolb

35

Functional expression of the rat organic anion transporter 1 (rOAT1) in *Saccharomyces cerevisiae*

S. Sawamiphak, S. Sophasan, H. Endou and C. Boonchird

44

Phenothiazine maleates stimulate MRP1 transport activity in human erythrocytes

O. Wesołowska, D. Mosiądz, N. Motohashi, M. Kawase and K. Michalak

52

Structures of pulmonary surfactant films adsorbed to an air-liquid interface in vitro

H. Bachofen, U. Gerber, P. Gehr, M. Amrein and S. Schürch

59

Lipid composition determines interaction of liposome membranes with Pluronic L61

A.E. Zhirnov, T.V. Demina, O.O. Krylova, I.D. Grozdova and N.S. Melik-Nubarov

73

Bilayer thickness and thermal response of dimyristoylphosphatidylcholine unilamellar vesicles containing cholesterol, ergosterol and lanosterol: A small-angle neutron scattering study

J. Pencer, M.-P. Nieh, T.A. Harroun, S. Krueger, C. Adams and J. Katsaras

84

A small HSP, Lo18, interacts with the cell membrane and modulates lipid physical state under heat shock conditions in a lactic acid bacterium

F. Coucheney, L. Gal, L. Beney, J. Lherminier, P. Gervais and J. Guzzo

92

Effects of pH-induced variations of the charge of the transmembrane α -helical peptide Ac-K₂(LA)₁₂K₂-amide on the organization and dynamics of the host dimyristoylphosphatidylcholine bilayer membrane

W.K. Subczynski, A. Wisniewska, A. Kusumi and R.N. McElhaney

99

Stabilization of trypsin by association to plasma membranes: Implications for tryptic cleavage of membrane-bound Na,K-ATPase

Y.A. Mahmoud

110

Intrinsic ionic conductances mediate the spontaneous electrical activity of cultured mouse myotubes

M. Sciancalepore, R. Afzalov, V. Buzzin, M. Jurdana, P. Lorenzon and F. Ruzzier

117

Oligomerization of the *Saccharomyces cerevisiae* Na⁺/H⁺ antiporter Nha1p: Implications for its antiporter activity

K. Mitsui, H. Yasui, N. Nakamura and H. Kanazawa

125

Effect of triorganotin compounds on membrane permeability

A. Ortiz, J.A. Teruel and F.J. Aranda

137
