

SUBJECT INDEX

- Acetylation
Kinetic studies with phosphotransacetylase.
The — of arsenate by Acetyl coenzyme A (Kyrtopoulos, Satchell) (268) 334
- Acetylcholinesterase
Inhibition of — by the enantiomers of isopropyl S-2-trimethyl-ammonioethyl methylphosphonothioate iodide. Affinity and phosphorylation constants (Jong, Dijk) (268) 680
- Acetylcholinesterase
Purification by affinity chromatography of — from electric organ tissue of the electric eel subsequent to tryptic treatment (Dudai et al.) (268) 138
- Acetylcholinesterase
Stability, inhibition and reactivation of — covalently coupled to glass (Baum et al.) (268) 411
- Acid hydrolases
— in neuronal and glial enriched fractions of rat brain (Raghavan et al.) (268) 755
- Acid hydrolases
Subcellular localization of — in rat lungs (de Lumen et al.) (268) 597
- Acid phosphatase
Biosynthesis of — of baker's yeast. Factors influencing its production by protoplasts and characterization of the secreted enzyme (van Rijn et al.) (268) 431
- Acid phosphatase
Purification of penicillinase (β -lactamase) and — from *Staphylococcus aureus* in one procedure (Schaege et al.) (268) 542
- Acylphosphatase
Kinetic studies with muscle — (Satchell et al.) (268) 233
- Adenine phosphoribosyltransferase
Kinetic studies of inhibition of — by guanylate (Henderson et al.) (268) 70
- Adenosine 3':5'-monophosphate
— dependent protein kinase in the lacrimal gland (Takáts et al.) (268) 77
- Adenosyl-L-methionine
Studies on the activation of lysine-2,3-aminomutase by (—)-S— (Zappia, Ayala) (268) 573
- Adenosyl-L-menthionine:magnesium-protoporphyrin IX methyltransferase
Activity and some properties of (—)-S— in crude homogenates from wheat seedlings (Ellsworth, Dullaghan) (268) 327
- Adenylate kinase
Isoenzymes of — in human tissue (Khoo, Russell) (268) 98
- Adenylate kinase isozymes
Sensitivity of — from normal and dystrophic human muscle to sulphydryl reagents (Schirmer, Thuma) (268) 92
- Aldehyde dehydrogenase
Common properties of D-glucuronolactone dehydrogenase and — from the soluble fraction of rat liver (Aarts, Hinnen-Bouwman) (268) 21
- Alkaline phosphatases
Imidazole: An inhibitor of L-phenylalanine-insensitive — of tissues other than intestine and placenta (Brunel, Cathala) (268) 415
- Alkaline p-nitrophenylphosphatase
Specific — activity from baker's yeast (Attias, Bonnet) (268) 422
- Aminopeptidase
Thiolesterase activity of leucine — (Metrione) (268) 518
- β -Amylase
Effect of Triton X-100 on sweet potato — (Takeda, Hizukuri) (268) 175
- 1-Anilino-8-naphthalene sulphonate
— as a coenzyme-competitive inhibitor of yeast glyceraldehyde-3-phosphate dehydrogenase: Multiple inhibition studies (Nagradova et al.) (268) 622
- Aquo platinum (II) complexes
Inhibition of leucine aminopeptidase and malte dehydrogenase by — (Melius et al.) (268) 194
- Ascorbate oxidase
— activity of caeruloplasmin (Curzon, Young) (268) 41
- L-Asparaginase
Failure of protective action of sodium and potassium ions against heat inactivation of *Escherichia coli* — (Ryoyana) (268) 539
- Aspergillus oryzae
Alkaline protease from —: Esterase activity (Ku et al.) (268) 225
- ATP: AMP phosphotransferase
Preparation and characterization of a crystalline human — (Thuma et al.) (268) 81
- Bacillus stearothermophilus
Substrate inactivation of fructose-1,6-diphosphate aldolase from — (Howard, Becker) (268) 249
- Caeruloplasmin
Ascorbate oxidase activity of — (Curzon, Young) (268) 41
- Carbonic anhydrase
Absence of — in red cell membranes (Randall, Maren) (268) 730
- Cathepsin C
Properties of — from rat liver (Liao Huang, Tappel) (268) 527
- Choline acetyltransferase
Inhibition of — activity in squid giant axon (Rosenberg et al.) (268) 49

Chymotrypsin

Human pancreatic enzymes: properties of two minor forms of — (Coan, Travis) (268) 207

Clostridium botulinum type B

Isolation and characterization of a protease from — (DasGupta, Sugiyama) (268) 719

Cortisone reductase

Steric, chiral and conformational aspects of the 3-hydroxy- and 20-hydroxysteroid dehydrogenase activities of — preparations (Gibb, Jeffery) (268) 13

Cyclic AMP phosphodiesterase

Purification and properties of — from rat brain (Miki, Yoshida) (268) 166

3-Deoxy-D-arabino-heptulosonate 7-phosphate synthases

Separation of three allosterically inhibitable — from extracts of *Neurospora crassa* and the purification of the tyrosine inhibitable isoenzyme (Hoffmann et al.) (268) 550

Deoxyribonucleases

New approach to the elucidation of the initial kinetics of neutral and acid — (Sicard et al.) (268) 468

Diacetyl reductase

Purification and some properties of — from beef liver (Burgos, Martín) (268) 261

o-Dihydroxyphenol meta-O-methyltransferase

Purification and properties of an — from cell suspension cultures of parsley and its relation to flavonoid biosynthesis (Ebel et al.) (268) 313

Dixon plots

Limitations in the use of — to evaluate enzyme inhibition (Purich, Fromm) (268) 1

Ehrlich ascites tumor cells

Purification and some properties of phosphofructokinase from — (Sumi, Ui) (268) 354

Elastase

Use of p-nitrophenyl N-tert-butyloxycarbonyl-L-alaninate as substrate for — (Visser, Blout) (268) 257

Electric organ

Purification by affinity chromatography of acetylcholinesterase from — tissue of the electric eel subsequent to tryptic treatment (Dudai et al.) (268) 138

Electromagnetic field

The effect of — on enzymic substrates (Comorosán et al.) (268) 620

Endopolygalacturonase

Selective purification of *Aspergillus niger* — by affinity chromatography on cross-linked pectic acid (Rexová-Benková, Tíbenský) (268) 187

Enteropeptidase

Enzymic release of — from isolated rat duodenal brush borders (Nordström) (266) 711

Enzyme inhibition

Limitations in the use of Dixon plots to evaluate — (Purich, Fromm) (268) 1

Enzymes

Use of bead polymerization of acrylic monomers for immobilization of — (Nilsson et al.) (268) 253

Erythrocytes

Study on the reduced pyridine nucleotide dehydrogenase of bovine erythrocytes. I. Crystallization and properties of the reduced pyridine nucleotide dehydrogenase of bovine — (Adachi, Okuyama) (268) 629

Euthyroid

Effect of riboflavin deficiency on metabolism of the rat in hyperthyroid and — state (Nolte et al.) (268) 611

Flavonoid biosynthesis

Purification and properties of an o-dihydroxyphenol meta-O-methyltransferase from cell suspension cultures of parsley and its relation to — (Ebel et al.) (268) 313

Fructose-1,6-diphosphate aldolase

Substrate inactivation of — from *Bacillus stearothermophilus* (Howard, Becker) (268) 249

Fructose-1,6-diphosphatases

Avian — I. Purification and comparison of physical and immunological properties of the liver and breast muscle enzymes from chicken (*Gallus domesticus*) (Olson, Marquardt) (268) 453

Fusarium moniliforme

Isolation and some properties of ribonuclease from — (Omori et al.) (268) 125

D-Glucuronolactone dehydrogenase

Common properties of — and aldehyde dehydrogenase from the soluble fraction of rat liver (Aarts, Hinnen-Bouwman) (268) 21

Glucose-6-phosphatase

Photoinactivation of microsomal — (Feldman, Butler) (268) 690

Glucose-6-phosphatase

Protein-bound phosphoryl histidine: A probable intermediate in the microsomal —/inorganic pyrophosphatase reaction (Feldman, Butler) (268) 698

Glucose-6-phosphate dehydrogenase

Intracellular distribution of isoenzymes of — and 6-phosphogluconate dehydrogenase in rat adipose tissue (Beitner, Naor) (268) 761

Glucose 6-phosphate dehydrogenase

Relationships among the multiple molecular forms of rat liver — (Holten) (268) 4

Glyceraldehyde-3-phosphate dehydrogenase

1-Anilino-8-naphthalene sulphonate as a co-enzyme-competitive inhibitor of yeast —: Multiple inhibition studies (Nagradova et al.) (268) 622

D-Glyceraldehyde-3-phosphate dehydrogenase

Some thermodynamic data on — action under optimal conditions (Keleti et al.) (268) 285

- Glycogen synthetase
 — of rat skeletal muscle and hepatomas and its comparison with the enzyme of rat liver (Sato et al.) (268) 646
- Glycogen synthetase-D
 Purification of — from human polymorphonuclear leukocytes (Plesner et al.) (268) 344
- Glycogen synthetase D and I
 — of rat liver and their interconversion in vitro (Sato et al.) (268) 638
- Haeme-modification
 — studies on horseradish peroxidase (Tamura et al.) (268) 292
- Heat inactivation
 Failure of protective action of sodium and potassium ions against — of *Escherichia* (Ryoyama) (268) 539
- Horseradish peroxidase
 Haeme-modification studies on — (Tamura et al.) (268) 292
- p-Hydroxyphenylpyruvate hydroxylase
 Substrate specificity of — (Fellman et al.) (268) 601
- 3-Hydroxy- and 20-hydroxysteroid dehydrogenase
 Steric, chiral and conformational aspects of the — activities of cortisone reductase preparations (Gibb, Jeffery) (268) 13
- 20-Hydroxysteroid dehydrogenase
 Steric, chiral and conformational aspects of the 3-hydroxy and — activities of cortisone reductase preparations (Gibb and Jeffery) (268) 13
- Hyperthyroid
 Effect of riboflavin deficiency on metabolism of the rat in — and euthyroid state (Nolte et al.) (268) 611
- Imidazole
 —: An inhibitor of L-phenylalanine-insensitive alkaline phosphatases of tissues other than intestine and placenta (Brunel, Cathala) (268) 415
- Immobilization of enzymes
 Use of bead polymerization of acrylic monomers for — (Nilsson et al.) (268) 253
- Immunological
 Avian fructose-1,6-diphosphatases. I. Purification and comparison of physical and — properties of the liver and breast muscle enzymes from chicken (*Gallus domesticus*) (Olson, Marquardt) (268) 453
- Inhibition studies
 1-Anilino-8-naphthalene sulphonate as a coenzyme-competitive inhibitor of yeast glyceraldehyde-3-phosphate dehydrogenase: Multiple — (Nagradova et al.) (268) 622
- Inhibitor
 New macromolecular — of yeast ribonuclease mediated through purine nucleotides (Imada et al.) (268) 674
- Isoamylase
 Characterization of *Pseudomonas* — by its actions on amylopectin and glycogen: comparison with *Aerobacter pullulanase* (Harada et al.) (268) 497
- Isopropyl S-2-trimethyl-ammonioethyl methylphosphonothioate iodide
 Inhibition of acetylcholinesterase by the enantiomers of —. Affinity and phosphorylation constants. (de Jong, van Dijk) (268) 680
- Kallikrein
 Inhibitory effects of ω -guanidino acid esters on trypsin, plasmin, plasma — and thrombin (Muramatsu, Fujii) (268) 221
- β -Lactamase
 Purification of penicillinase — and acid phosphatase from *Staphylococcus aureus* in one procedure (Schaeg et al.) (268) 542
- Laminarinases
 Study of the action of — from *Spisula sachalinensis* by the use of nuclear magnetic resonance (Isakov et al.) (268) 184
- Leucine aminopeptidase
 Inhibition of — and malate dehydrogenase by aquoplatinum (II) complexes (Melius et al.) (268) 194
- Leucine aminopeptidase
 Thiolesterase activity of — (Metrione) (268) 518
- Lysine-2,3-aminomutase
 Studies on the activation of — by (–)-S-adenosyl-L-methionine (Zappia, Ayala) (268) 573
- Magnesium
 Role of — in muscle phosphorylase kinase activity (Clerch, Huijing) (268) 654
- Malate dehydrogenase
 Inhibition of leucine aminopeptidase and — by aquoplatinum (II) complexes (Melius et al.) (268) 194
- Malic enzyme
 Studies on enzymes from parasitic helminths. I. Purification and physical properties of — from the muscle tissue of *Ascaris suum* (Fodge et al.) (268) 271
- β -Mannosidase
 Purification of — from a snail, *Achatina fulica*, and its action on glycopeptides (Sugahara et al.) (268) 488
- Methyl glycerol
 Protein-bound phosphorylated product as an intermediate in the biosynthesis of O — by *Mycobacterium tuberculosis* (Lornitzo) (268) 733
- Methyltransferase
 Activity and some properties of (–)-S-adenosyl-L-methionine:magnesium-protoporphyrin IX — in crude homogenates from wheat seedlings (Ellsworth, Dullaghan) (268) 327
- Methyltransferase
 Purification and properties of an o-dihydric-phenol meta-O — from cell suspension cultures of parsley and its relation to flavonoid biosynthesis (Ebel et al.) (268) 313

- Microsomal enzymes
 Regulation of — by phospholipids. IV.
 Species differences in the properties of
 microsomal UDP-glucuronyltransferase
 (Vessey, Zakin) (268) 61
- Muscle phosphorylase kinase
 Role of magnesium in — activity (Clerch,
 Huijing) (268) 654
- Mycobacterium tuberculosis
 Protein-bound phosphorylated product as
 an intermediate in the biosynthesis of O-
 methyl glycerol by — (Lornitzo) (268) 733
- NAD glycohydrolase
 — from the small intestine of rat; puri-
 fication, properties and possible role of the
 enzyme (Kakehi et al.) (268) 506
- Neochymotrypsinogens
 Preparation and properties of three-chain
 (Roverly, Bianchetta) (268) 212
- Neuraminidase
 Pneumococcal —: Purification and pro-
 perties (Stahl, O'Toole) (268) 480
- p-Nitrophenyl N-tert-butyloxycarbonyl-L-ala-
 nininate
 Use of — as substrate of elastase (Visser,
 Blout) (268) 257
- p-Pantothenate kinase
 Purification and properties of — from rat
 liver (Abiko et al.) (268) 364
- Penicillinase
 Purification of — (β -lactamase) and acid
 phosphatase from *Staphylococcus aureus*
 in one procedure (Schaeg et al.) (268) 542
- Peroxidase
 Haeme-modification studies on horseradish
 — (Tamura et al.) (268) 292
- Phosphatase
 Purification of penicillinase (β -lactamase)
 and acid — from *Staphylococcus aureus*
 in one procedure (Schaeg et al.) (268) 542
- Phosphatase
 Specific alkaline p-nitrophenyl — acti-
 vity from baker's yeast (Attias, Bonnet)
 (268) 422
- Phosphatases
 Imidazole: An inhibitor of L-phenylalanine-
 insensitive alkaline — of tissues other
 than intestine and placenta (Brunel, Ca-
 thala) (268) 415
- Phosphofructokinase
 Purification and some properties of —
 from Ehrlich ascites tumor cells (Sumi, Ui)
 (268) 354
- 6-Phosphogluconate dehydrogenase
 Intracellular distribution of isoenzymes of
 glucose-6-phosphate dehydrogenase and
 — in rat adipose tissue (Beitner, Naor)
 (268) 761
- Phospho-2-keto-3-deoxyheptonate aldolase
 Some regulatory properties of — from
 the blue-green alga *Anacystis nidulans*
 (Holtzclaw et al.) (268) 562
- Phospholipids
 Regulation of microsomal enzymes by —.
- IV. Species differences in the properties of
 microsomal UDP-glucuronyltransferase
 (Vessey, Zakin) (268) 61
- Phosphorylase kinase
 Role of magnesium in muscle — activity
 (Clerch, Huijing) (268) 654
- Phosphorylase phosphatase
 Effect of fluoride on liver — (Goris et al.)
 (268) 158
- Phosphorylated product
 Protein-bound — as an intermediate in
 the biosynthesis of O-methyl glycerol by
Mycobacterium tuberculosis (Lornitzo) (268)
 733
- Phosphoryl histidine
 Protein-bound —: A probable intermedi-
 ate in the microsomal glucose-6-phospha-
 tase/inorganic pyrophosphatase reaction
 (Feldman, Butler) (268) 698
- Phosphotransacetylase
 Kinetic studies with —. II. The acetyl-
 ation of arsenate by acetyl coenzyme A
 (Kyrtopoulos, Satchell) (268) 334
- Photoinactivation
 — of microsomal glucose-6-phosphatase
 (Feldman, Butler) (268) 690
- Phytase
 — and alkaline phosphatase activities in
 intestinal mucosae of rat, chicken, calf and
 man (Bitar, Reinhold) (268) 442
- Plasmin
 Inhibitory effects of ω -guanidino acid es-
 ters on trypsin, —, plasma kallikrein and
 thrombin (Muramatsu, Fujii) (268) 221
- Polyguanylic acid-inhibited ribonuclease
 — of *Klebsiella*. I. Purification and
 general properties (Friedling et al.) (268)
 391
- Polyguanylic acid-inhibited ribonuclease
 — of *Klebsiella*. II. Studies with syn-
 thetic polyribonucleotides (Schmukler et al.)
 (268) 403
- Polyphosphate kinase
 Properties of — prepared from *Mycobacterium smegmatis* (Suzuki et al.) (268)
 381
- Protease
 Alkaline — from *Aspergillus oryzae*: Es-
 terase activity (Ku et al.) (268) 225
- Protease
 Isolation and characterization of a —
 from *Clostridium botulinum* type B (Das-
 Gupta, Sugiyama) (268) 719
- Proteinase
 Occurrence of common inhibitors of trypsin
 and of leucocyte neutral — in human se-
 rum (Koj et al.) (268) 199
- Protein kinase
 Adenosine 3':5'-monophosphate dependent
 — in the lacrimal gland (Takáts et al.)
 (268) 77
- Pyruvate kinase
 — of *Bacillus subtilis* (Diesterhaft, Freese
 (268) 373

- Reduced pyridine nucleotide dehydrogenase
Study on the reduced pyridine nucleotide dehydrogenase of bovine erythrocytes. I. Crystallization and properties of the — of bovine erythrocytes (Adachi, Okuyama) (268) 629
- Riboflavin deficiency
Effect of — on metabolism of rat in hyperthyroid and euthyroid state (Nolte et al.) (268) 611
- Ribonuclease
Isolation and some properties of — from *Fusarium moniliforme* (Omori et al.) (268) 125
- Ribonuclease
Polyguanylic acid-inhibited — of *Klebsiella*. I. Purification and general properties (Friedling et al.) (268) 391
- Ribonuclease
Polyguanylic acid-inhibited — of *Klebsiella*. II. Studies with synthetic polyribonucleotides (Schmukler, et al.) (268) 403
- Ribonuclease
New macromolecular inhibitor of yeast — mediated through purine nucleotides (Imada et al.) (268) 674
- Ribonuclease A
Inactivation of — by $\text{Fe}^{2+} + \text{H}_2\text{O}_2$ (Fenton's Reagent) (Delgado, Slobodian) (268) 121
- Serotonin-O-sulphotransferase
Occurrence and distribution of — in human brain; a new radioisotopic assay (Hidaka, Austin) (268) 132
- Spisula sachalinensis*
Study of the action of laminarinases from — by the use of nuclear magnetic resonance (Isakov et al.) (268) 184
- Substrates
Effect of electromagnetic field on enzymic — (268) 620
- Superoxide dismutase
Preparation and physicochemical properties of green pea — (Sawada et al.) (268) 305
- Superoxide dismutase
Pulse radiolysis study of — (Rotilio et al.) (268) 605
- Tetrahydrofolate dehydrogenase
Improved purification of — from L1210 leukemia by affinity chromatography (Chello et al.) (268) 30
- Tetrahydrofolate dehydrogenase
Purification of — by affinity chromatography (Gauldie, Hillcoat) (268) 35
- Thermodynamic data
Some — on D-glyceraldehyde-3-phosphate dehydrogenase action under optimal conditions (Keleti et al.) (268) 285
- Thiolesterase
— activity of leucine aminopeptidase (Metrione) (268) 518
- Thrombin
Inhibitory effects of ω -guanidino acid esters on trypsin, plasmin, plasma kallikrein and — (Muramatsu, Fujii) (268) 221
- Thymidylate kinase
— activity in male rat anterior pituitary during growth (Valotaire, Duval) (268) 663
- Trypsin
Inhibitory effects of ω -guanidino acid esters on —, plasmin, plasma kallikrein and thrombin (Miramatsu, Fujii) (268) 221
- Trypsin
Occurrence of common inhibitors of — and of leucocyte neutral proteinase in human serum (Koj et al.) (268) 199
- Trypsin
— catalysed hydrolysis of D-lysine and D-arginine ethyl esters (Purdie et al.) (268) 523
- UDP N-acetyl-D-glucosamine 2-epimerase
— from rat liver. I. Catalytic regulatory properties (Sommar, Ellis) (268) 581
- UDP N-acetyl-D-glucosamine 2-epimerase
— from rat liver. II. Studies on the mechanism of action (Sommar, Ellis) (268) 590
- UDP-galactose pyrophosphorylase
Uridine diphosphoglucose pyrophorylase and — in human skin fibroblasts derived from normal and galactosemic individuals (Chacko et al.) (268) 113
- UDP-glucose pyrophosphorylase
Purification, properties and kinetic analysis of — from bovine mammary tissue (Aksamit, Ebner) (268) 102
- UDP-glucose pyrophosphorylase
— and uridine diphosphogalactose pyrophosphorylase in human skin fibroblasts derived from normal and galactosemic individuals (Chacko et al.) (268) 113
- UDP-glucuronyltransferase
Regulation of microsomal enzymes by phospholipids. IV. Species differences in the properties of microsomal — (Vessey, Zakin) (268) 61
