

SUBJECT INDEX

- Acetylcholinesterase
Activation of — by Triton X-100 (Srinivasan et al.) (284) 349
- Acetylcholinesterase
Failure of toxogonin to reactivate soman-inhibited brain — in monkeys and regeneration of the enzyme (Filbert et al.) (284) 164
- Acetylcholinesterase
Human erythrocyte —. Purification, properties and kinetic behavior (Ciliv, Özand) (284) 136
- Acrosomal proteinase
Studies on — of rabbit spermatozoa (Stambaugh, Buckley) (284) 473
- Acyl phosphatase
Purification and some molecular properties of horse liver — (Ramponi et al.) (284) 485
- Adenosine 3',5'-cyclic phosphate phosphodiesterase
— from bovine thyroid: Isolation and properties of a partially purified, soluble fraction (Szabo, Burke) (284) 208
- Adenosine triphosphate
Some kinetic properties of yeast phosphofructokinase desensitized to inhibition by adenosine triphosphate (Karadsheh, Ramaiah) (284) 110
- Adenylate cyclase
Effect of calcium ion on horse parathyroid gland — (Matsuzaki, Dumont) (284) 227
- Adenylate cyclase
Second messenger system of mouse epidermis. I. Properties and β -adrenergic activation of — in vitro (Marks, Rebien) (284) 556
- Alkaline phosphatase
Specificity studies on Ruman intestinal — (Narayanan, Appleton) (284) 175
- ATPase
Microsomal HCO_3^- -stimulated — from the dog submandibular gland (Izutsu, Siegel) (284) 478
- Butyrylcholinesterase
Dissociation constants of the esteratic center of — (Pavlič) (284) 435
- Carbonic anhydrase
— from *Neisseria sicca*, strain 6021. I. Bacterial growth and purification of the enzyme (Adler et al.) (294) 298
- Carbonic anhydrase
— from *Neisseria sicca*, strain 6021. II. Properties of the purified enzyme (Brundell et al.) (284) 311
- Cathepsin D
Specificity of a bovine fibroblast —. I. Action on the S-sulfo derivatives of the insulin A and B chains and of porcine glucagon (Schwabe, Sweeney) (284) 465
- Cathepsin D and E
Effect of pepsin inhibitor from *Ascaris lumbricoides* on — (Keilová, Tomášek) (284) 464
- Cholinesterase
Inhibition of — by diethyl phosphorochloridate (Ashani et al.) (284) 427
- Cholinesterase
Reaction of Tris-(choline chloride) phosphate with eel — (Amshey, Steinberg) (284) 157
- Coenzyme B₁₂-dependent propanediol dehydratase — system. Ternary complex between apoenzyme, coenzyme and substrate analog (Toraya, Fukui) (284) 536
- Cyclic adenosine 3',5'-monophosphate phosphodiesterase
Separation of multiple molecular forms of — in rat cerebellum by polyacrylamide gel electrophoresis (Uzunov, Weiss) (284) 220
- Cyclic AMP
Study of a — dependent protein kinase from calf thymus (Pierre, Loeb) (284) 421
- Cytochrome oxidase
Myeloperoxidase of the leukocyte of normal blood. V. The spectral conversion of myeloperoxidase to a — like derivative (Oda-jima, Yamazaki) (284) 368
- Electron paramagnetic resonance
Optical and magnetic measurements of horseradish peroxidase. III. — studies at liquid-hydrogen and -helium temperatures (Tamura, Hori) (284) 20
- Esterases
Heterogeneity of — and cell types in rat liver (Kaneko et al.) (284) 128
- Euglena gracilis Z
Isoenzymes of malate dehydrogenase and their regulation in — (Peak et al.) (284) 16
- Fructokinase
Identification and properties of an inducible and highly specific — from *Streptomyces violaceoruber* (Sabater et al.) (284) 414
- Galactokinase
Study of — and glucose 4-epimerase from normal and galactosemic skin fibroblasts (Chacko et al.) (284) 552
- Glucoamylase
Separation and characterization of sucrase-isomaltase and of — of rat intestine (Kolínská, Kraml) (284) 235
- Glucose 4-epimerase
Study of galactokinase and — from normal and galactosemic skin fibroblasts (Chacko et al.) (284) 552
- Glutamate dehydrogenase
Spectrophotometric observation of a — L-glutamate complex (Prough et al.) (284) 16

- Glutathione peroxidase
Steroid hydroperoxides as substrates for — (Little) (284) 375
- Glycerol
Effect of — on some kinetic parameters of phosphorylase b (Damjanovich et al.) (284) 345
- Horseradish peroxidase
Optical and magnetic measurements of —. III. Electron paramagnetic resonance studies at liquid-hydrogen and -helium temperatures (Tamura, Hori) (284) 20
- Hydrocortisone
Phosphatase activities of chicken liver and duodenum. Characteristics, levels during development, and — induced changes (Strittmatter) (284) 183
- Immobilised penicillin amidase
Preparation and kinetics of — from *Escherichia coli* (Warburton et al.) (284) 278
- Insoluble trypsin
Kinetic study on the effect of coupling distance between — and its carrier matrix (Taylor, Swaisgood) (284) 268
- Inulase
Formation of di-D-fructofuranose 1,2':2,3' dianhydride from inulin by an extracellular — of *Arthrobacter ureafaciens* (Tanaka et al.) (284) 248
- Iodination
Lactoperoxidase-catalyzed — of tyrosine peptides (Bayse et al.) (284) 30
- Isoenzymes
— of malate dehydrogenase and their regulation in *Euglena gracilis* Z (Peak et al.) (284) 1
- Lactoperoxidase
—catalyzed iodination of tyrosine peptides (Bayse et al.) (284) 30
- Lipoxygenase
Heterogeneity of soyabean — (Verhue, Francke) (284) 43
- Lipoxygenase
Isolation of a third isoenzyme of soybean — (Christopher et al.) (284) 54
- Lysozyme
Extractability of — from bovine nasal cartilage (Sorgente et al.) (284) 441
- Malate dehydrogenase
Intracellular distribution of phosphoenolpyruvate carboxylase and (NADP)— in different muscle types (Nolte et al.) (284) 497
- Malate dehydrogenase
Isoenzymes of — and their regulation in *Euglena gracilis* Z (Peak et al.) (284) 1
- Mannokinase
Identification and properties of an inducible — from *Streptomyces violaceoruber* (Sabater et al.) (284) 406
- Myeloperoxidase
— of the leukocyte of normal blood. III. The reaction of ferric myeloperoxidase with superoxide anion (Odajima, Yamazaki) (284) 355
- Myeloperoxidase
— of the leukocyte of normal blood. IV. Some physicochemical properties (Odajima, Yamazaki) (284) 360
- Myeloperoxidase
— of the leukocyte of normal blood. V. The spectral conversion of myeloperoxidase to a cytochrome oxidase like derivative (Odajima, Yamazaki) (284) 368
- (NADP)malate dehydrogenase
Intracellular distribution of phosphoenolpyruvate carboxylase and — in different muscle types (Nolte et al.) (284) 497
- Neuraminidases
Soluble and lysosomal — in the liver of developing chicks (Tulsiani, Carubelli) (284) 257
- Ornithine decarboxylase
Studies on — from the liver of thioacetamide-treated rats. Purification and some properties (Onno et al.) (284) 285
- Penicillin amidase
Preparation and kinetics of immobilised — from *Escherichia coli* (Warburton et al.) (284) 278
- Pepsin inhibitor
Effect of — from *Ascaris lumbricoides* on cathepsin D and E (Keilová, Tomášek) (284) 464
- Peroxidase
—catalyzed oxidation of tyrosine (Bayse et al.) (284) 34
- Phosphatase
— activities of chicken liver and duodenum. Characteristics, levels during development, and hydrocortisone-induced changes (Strittmatter) (284) 183
- Phosphatase
Purification and some molecular properties of horse liver acyl — (Ramponi et al.) (284) 485
- Phosphatase
Zinc-stimulated acid and neutral *p*-nitrophenyl — activities of chick liver and duodenum (Strittmatter) (284) 196
- Phosphodiesterase
Adenosine 3',5'-cyclic phosphate — from bovine thyroid: Isolation and properties of a partially purified, soluble fraction (Szabo, Burke) (284) 208
- Phosphodiesterase
Separation of multiple molecular forms of cyclic adenosine 3',5'-monophosphate — in rat cerebellum by polyacrylamide gel electrophoresis (Uzunov, Weiss) (284) 220
- Phosphoenolpyruvate carboxylase
Intracellular distribution of — and (NADP) malate dehydrogenase in different muscle types (Nolte et al.) (284) 497
- Phosphofructokinase
Rat thymocyte —: Some kinetic properties compared with those of muscle phosphofructokinase (Yamada, Ohyama) (284) 101

- Phosphofructokinase
Some kinetic properties of yeast — desensitized to inhibition by adenosine triphosphate (Karadsheh, Ramaiah) (284) 110
- Phosphorylase b
Effect of glycerol on some kinetic parameters of — (Damjanovich et al.) (284) 345
- p-Hydroxyphenylpyruvate hydroxylase
Assay, properties and tissue distribution of — (Fellman et al.) (284) 90
- p-Nitrophenyl phosphatase
Zinc-stimulated acid and neutral — activities of chick liver and duodenum (Strittmatter) (284) 196
- Propanediol dehydratase
Coenzyme B₁₂-dependent — system. Ternary complex between apoenzyme, coenzyme and substrate analog (Toraya, Fukui) (284) 536
- Proteinase
Studies on acrosomal — of rabbit spermatozoa (Stambaugh, Buckley) (284) 473
- Protein kinase
Study of a cyclic AMP dependent — from calf thymus (Pierre, Loeb) (284) 421
- Pyrrolooxxygenase
—: Its action on tryptophan-containing enzymes and peptides (Frydman et al.) (284) 80
- Pyrrolooxxygenases
—: Isolation, properties, and products formed (Frydman et al.) (284) 63
- Pyruvate kinase
Activation and inhibition of human erythrocyte — by organic phosphates, amino acids, dipeptides and anions (Black, Henderson) (284) 115
- Salicylate hydroxylase
Mechanism of the — reaction. V. Kinetic analyses (Takemori et al.) (284) 382
- Soyabean lipoxxygenase
Heterogeneity of — (Verhue, Francke) (284) 43
- Soybean lipoxxygenase
Isolation of a third isoenzyme of — (Christopher et al.) (284) 54
- Steroid hydroperoxides
— as substrates for glutathione peroxidase (Little) (284) 375
- Sucrase-isomaltase
Separation and characterization of — and of glucoamylase of rat intestine (Kolínská, Kraml) (284) 235
- Threonine dehydratase
Kinetic studies on the reaction catalysed by — from *Rhodopseudomonas spheroides* (Barritt, Morrison) (284) 521
- Threonine dehydratase
Purification and properties of — from *Rhodopseudomonas spheroides* (Barritt, Morrison) (284) 508
- Triton X-100
Activation of acetylcholinesterase by — (Srinivasan et al.) (284) 349
- Trypsin-like enzyme
Anionic — from *Streptomyces erythreus*. Characterization (Inoue et al.) (284) 451
- Trypsin
Anionic —-like enzyme from *Streptomyces erythreus*. Characterization (Inoue et al.) (284) 451
- Trypsin
Kinetic study on the effect of coupling distance between insoluble — and its carrier matrix (Taylor, Swaisgood) (284) 268
- Tryptophan synthase
Enzymic properties of a mutant — from *Neurospora crassa* (Tsai, Suskind) (284) 324
- Tyrosine
Peroxidase-catalyzed oxidation of — (Bayse et al.) (284) 34
- UDP-D-galactose 4-epimerase
myo-Inosose-2 reactivation of reduced — from *Escherichia coli* (Ketley, Schellenberg) (284) 549
- UDP glucuronyltransferase
Kinetic properties of different forms of hepatic — (Winsnes) (284) 394
