

SUBJECT INDEX

- Acetylglucosaminidase
 exo- β -N- — from *Bacillus subtilis* B; extraction and purification (Ortiz et al.) (289) 174
- Adenosine-3'(α -naphthylphosphate)
 Specific colorimetric and cytochemical substrate for ribonuclease T₂: — (Kole et al.) (289) 323
- Adenylate cyclase
 — activity in Lubrol-treated membranes from *Neurospora crassa* (Flawiá, Torres) (289) 428
- Adenylate-deaminating activity
 Induced appearance of — in highly purified bovine liver mitochondrial monoamine oxidase (Akopyan et al.) (289) 44
- Affinity chromatography
 Purification of soybean lipoxygenase by — (Grossman et al.) (289) 77
- Aldolase
 Behavior of cycloaldolase from *Neurospora crassa* towards substrate analogs and — inhibitors (Mogyoros et al.) (289) 420
- Aldonate oxidoreductases
 Colorimetric estimations of — from *Escherichia coli* K 12: Applications (Portelier, Stoeber) (289) 19
- Alkaline phosphatases
 Kinetics and inhibition of — from canine tissues (Van Belle) (289) 158
- Allosteric properties
 — of the isoenzymes of pyruvate kinase from rat kidney cortex (Costa et al.) (289) 128
- D-Amino acid oxidase
 Conversion of the red semiquinone of — to the blue semiquinone by complex formation (Yagi et al.) (289) 37
- Aminosugars
 Biosynthesis of respiratory tract mucins. III. Metabolism of — by tracheal mucosal extracts (Ellis et al.) (289) 108
- Aminotransferase
 Functional properties of ornithine-ketoacid — from rat liver (Peraino) (289) 117
- Aminotransferase
 Inhibition of L-glutamine:D-fructose-6-phosphate — by methylglyoxal (Kikuchi et al.) (289) 303
- Amniotic fluid
 Activation of renin in human — by proteolytic enzymes (Morris, Lumbers) (289) 385
- Angiotensin I-converting enzyme
 Inhibitors of the pulmonary — (Sander et al.) (289) 392
- Antinomycete protease inhibitors
 Proteases of macrophages in rat peritoneal exudate, with special reference to the effects of — (Kato et al.) (289) 187
- Apiosyltransferase
 Purification and properties of UDPapiose: 7-O-(β -D-glucosyl)-flavone — from cell suspension cultures of parsley (Ortman et al.) (289) 293
- Arom gene cluster
 Purification and stability of the multienzyme complex encoded in the — of *Neurospora crassa* (Jacobson et al.) (289) 1
- Bacillus subtilis* B
 exo- β -N-Acetylglucosaminidase from —; extraction and purification (Ortiz et al.) (289) 174
- Bilirubin
 — and the heterogeneity of microsomal uridine diphosphate glucuronyltransferase from rat liver (Mulder) (289) 284
- Brain
 Partial purification and characterization of spermine synthase from rat — (Hannonen et al.) (289) 225
- Brush-border enzymes
 Release of enteropeptidase and other — from the small intestinal wall in the rat (Nordström) (289) 367
- Cartilage collagen
 —: Inability to serve as a substrate for collagenases active against skin and bone collagen (Robertson, Miller) (289) 247
- Catalase
 Interactions between hydroxymethylhydroperoxide and — (Marklund) (289) 269
- Cholinesterase
 Recognition of atypical plasma — by relative substrate hydrolysis rate (Smith, Foldes) (289) 352
- Cobra venom
 Effect of fatty acids and of albumin on the action of a purified phospholipase A₂ from — on synthetic lecithins (Smith et al.) (289) 147
- Collagenase
 Anomalous kinetics observed in the catalysis of a peptide substrate with — (Soberrano, Schoellmann) (289) 401
- Collagenases
 Cartilage collagen: Inability to serve as a substrate for — active against skin and bone collagen (Robertson, Miller) (289) 247
- Complex formation
 Conversion of the red semiquinone of D-amino acid oxidase to the blue semiquinone by — (Yagi et al.) (289) 37
- Covalent bonding
 — of fungal β -galactosidase to glass (Woychik, Wondolowski) (289) 347
- Cycloaldolase
 Behavior of — from *Neurospora crassa*

- towards substrate analogs and aldolase inhibitors (Mogyoros et al.) (289) 420
- Deoxyribonuclease I
Kinetic studies on the mechanism of Mg(II) activation of — (Perlgut, Hernandez) (289) 169
- Diacetyl reductase
Kinetic studies of beef liver — (Martín, Burgos) (289) 13
- Dixon plots
Use of — to study enzyme inhibition (Butterworth) (289) 251
- Electron acceptor specificity
Studies on reduced pyridine nucleotide dehydrogenase in bovine erythrocytes. II. — of two types of reduced pyridine nucleotide dehydrogenase in bovine erythrocytes (Adachi) (289) 262
- Enteropeptidase
Release of — and other brush-border enzymes from the small intestinal wall in the rat (Nordström) (289) 367
- Escherichia coli
Colorimetric estimations of aldonate oxidoreductases from — K 12: applications (Portalier, Stoeber) (289) 19
- Escherichia coli
 β -Lactamase of — (Ogawara et al.) (289) 203
- Escherichia coli
Solubilization and properties of formate dehydrogenases from the membrane of — (Ruíz-Herrera et al.) (289) 254
- Esterases
On the immunological inter-relationships of the vertebrate — (Haite-Kingsbury, Masters) (289) 331
- Fibroblasts
 β -Galactosidase activity of human skin — (Kanfer, Spielvogel) (289) 359
- Formate dehydrogenases
Solubilization and properties of — from the membrane of Escherichia coli (Ruíz-Herrera et al.) (289) 251
- Fructose-1,6-diphosphatase
Properties of glutaraldehyde-modified bovine hepatic — (Aloyo et al.) (289) 242
- β -Galactosidase
Covalent bonding of fungal — to glass (Woychik, Wondolowski) (289) 347
- β -Galactosidase
— activity of human skin fibroblasts (Kanfer, Spielvogel) (289) 359
- L-Glutamate dehydrogenase
Binding of α -ketoglutarate in a binary complex and in a ternary complex with NADP⁺ by — (Cross et al.) (289) 28
- L-Glutaminase
Purification and physicochemical properties of — from Pseudomonas (Katsumata et al.) (289) 405
- L-Glutamine:D-fructose-6-phosphate aminotransferase Inhibition of — by methylglyoxal (Kikuchi et al.) (289) 303
- Glutaraldehyde
Properties of —-modified bovine hepatic fructose-1,6-diphosphatase (Aloyo et al.) (289) 242
- Glycogen-debranching enzyme
Preparation and properties of the — from rabbit liver (Gordon et al.) (289) 97
- Horseradish peroxidase transients
Study of peroxidase mechanisms by pulse radiolysis. I. Spectra of — (Bielski) (289) 57
- Hydroxymethylhydroperoxide
Interactions between — and catalase (Marklund) (289) 269
- Immobilization
— of protocatechuate 3,4-dioxygenase with activated agarose (Zaborsky, Ogletree) (289) 68
- Immunological inter-relationships
On the — of the vertebrate esterases (Haite-Kingsbury, Masters) (289) 331
- Inhibition
Use of Dixon plots to study enzyme — (Butterworth) (289) 251
- Inhibitors
Behavior of cycloaldolase from Neurospora crassa towards substrate analogs and aldolase — (Mogyoros et al.) (289) 420
- Isoenzymes
Allosteric properties of the — of pyruvate kinase from rat kidney cortex (Costa et al.) (289) 128
- β -Lactamase
— of Escherichia coli (Ogawara et al.) (289) 203
- Lipoxygenase
Factors influencing the positional specificity of soybean — (Christopher et al.) (289) 82
- Lipoxygenase
Purification of soybean — by affinity chromatography (Grossman et al.) (289) 77
- Membrane
Solubilization and properties of formate dehydrogenases from the — of Escherichia coli (Ruíz-Herrera et al.) (289) 254
- Mg(II) activation
Kinetic studies on the mechanism of — of deoxyribonuclease I (Perlgut, Hernandez) (289) 169
- Mitochondrial
Sheep kidney — phosphoenolpyruvate carboxylase reaction mechanism (Barns et al.) (289) 212
- Mitochondrial monoamine oxidase
Induced appearance of adenylate-deaminating activity in highly purified bovine liver — (Akopyan et al.) (289) 44
- Monoamine oxidase
Induced appearance of adenylate-deaminating activity in highly purified bovine liver mitochondrial — (Akopyan et al.) (289) 44
- Mucins
Biosynthesis of respiratory tract —. III Metabolism of aminosugars by tracheal mucosal extracts (Ellis et al.) (289) 108
- Multienzyme complex
Purification and stability of the — en-

- coded in the *arom* gene cluster of *Neurospora crassa* (Jacobson et al.) (289) 1
- NADP⁺
Binding of α -ketoglutarate in a binary complex and in a ternary complex with — by L-glutamate dehydrogenase (Cross et al.) (289) 28
- Neurospora crassa*
Adenylate cyclase activity in Lubrol-treated membranes from — (Flawiá, Torres) (289) 428
- Neurospora crassa*
Behavior of cycloaldolase from — towards substrate analogs and aldolase inhibitors (Mogyoros et al.) (289) 420
- Neurospora crassa*
Purification and stability of the multi-enzyme complex encoded in the *arom* gene cluster of — (Jacobson et al.) (289) 1
- Nucleotides
Inhibition of hepatic UDPglucuronyltransferase by — (Winsnes) (289) 88
- Ornithine-ketoacid
Functional properties of — aminotransferase from rat liver (Peraino) (289) 117
- Papain
Sigmoidal progress curves in the polymerization of leucine methyl ester catalyzed by — (Sluyterman, Wijdenes) (289) 194
- Peroxidase mechanisms
Study of — by pulse radiolysis. I. Spectra of horseradish peroxidase transients (Bielski) (289) 57
- Phosphatases
Kinetics and inhibition of alkaline — from canine tissues (Van Belle) (289) 158
- Phosphoenolpyruvate carboxylase
Sheep kidney mitochondrial — reaction mechanism (Barns et al.) (289) 212
- Phosphoenolpyruvate carboxylase
Sheep kidney —. Further studies on the sulphydryl groups using dinitrofluorobenzene and N-ethylmaleimide (Barns, Keech) (289) 410
- Phosphoenzyme
Formation of an active — by diphosphoglycerate-dependent phosphoglyceromutases from muscle, kidney and yeast (Britton et al.) (289) 311
- Phosphoglucomutase
Studies on crystalline yeast —: the presence of intrinsic zinc (Hirose et al.) (289) 137
- Phosphoglyceromutases
Formation of an active phosphoenzyme by diphosphoglycerate-dependent — from muscle, kidney and yeast (Britton et al.) (289) 311
- Phospholipase A₂
Effect of fatty acids and of albumin on the action of a purified — from cobra venom on synthetic lecithins (Smith et al.) (289) 147
- Phosphoprotein kinases
— from rat liver cytosol (Matsumura, Takeda) (289) 237
- Plasma cholinesterase
Recognition of atypical — by relative substrate hydrolysis rate (Smith, Folds) (289) 352
- Polymerization
Signoidal progress curves in the — of leucine methyl ester catalyzed by papain (Sluyterman, Wijdenes) (289) 194
- Proteases
— of macrophages in rat peritoneal exudate, with special reference to the effects of antinomycete protease inhibitors (Kato et al.) (289) 187
- Proteolytic enzymes
Activation of renin in human amniotic fluid by — (Morris, Lumbers) (289) 385
- Proteolytic enzymes
— in extracts of *Schistosoma mansoni* cercariae (Dresden, Asch) (289) 378
- Protocatechuate 3,4-dioxygenase
Immobilization of — with activated agarose (Zaborsky, Ogletree) (289) 68
- Pseudomonas
Purification and physicochemical properties of L-glutaminase from — (Katsumata et al.) (289) 405
- Pulse radiolysis
Study of peroxidase mechanisms by —. I. Spectra of horseradish peroxidase transients (Bielski) (289) 57
- Pyridine nucleotide dehydrogenase
Studies on reduced pyridine nucleotide dehydrogenase in bovine erythrocytes. II. Electron acceptor specificity of two types of reduced — in bovine erythrocytes (Adachi) (289) 262
- Pyruvate kinase
Allosteric properties of the isoenzymes of — from rat kidney cortex (Costa et al.) (289) 128
- Renin
Activation of — in human amniotic fluid by proteolytic enzymes (Morris, Lumbers) (289) 385
- Respiratory tract mucins
Biosynthesis of —. III. Metabolism of aminosugars by tracheal mucosal extracts (Ellis et al.) (289) 108
- Ribonuclease T₂:
Specific colorimetric and cytochemical substrate for — adenosine-3'(α -naphthylphosphate) (Kole et al.) (289) 323
- Schistosoma mansoni* cercariae
Proteolytic enzymes in extracts of — (Dresden, Asch) (289) 278
- Soybean lipoxxygenase
Factors influencing the positional specificity of — (Christopher et al.) (289) 82
- Soybean lipoxxygenase
Purification of — by affinity chromatography (Grossman et al.) (289) 77
- Spermine synthase
Partial purification and characterization of — from rat brain (Hannonen et al.) (289) 225

Sulphydryl groups

Sheep kidney phosphoenolpyruvate carboxylase. Further studies on the — using dinitrofluorobenzene and N-ethylmaleimide (Barns, Keech) (289) 410

Superoxide dismutase

Purification and properties of — from *Saccharomyces cerevisiae* (Goscin, Fridovich) (289) 276

UDPGlucose:7-O-(β -D-glucosyl)-flavone apiosyltransferase

Purification and properties of — from cell

suspension cultures of parsley (Ortman et al.) (289) 293

UDPGlucuronyltransferase

Inhibition of hepatic — by nucleotides (Winsnes) (289) 88

Uridine diphosphate glucuronyltransferase

Bilirubin and the heterogeneity of microsomal — from rat liver (Mulder) (289) 284

Zinc

Studies on crystalline yeast phosphoglucosyltransferase: the presence of intrinsic — (Hirose et al.) (289) 137
