

Announcement

The new edition of *Enzyme Nomenclature, Recommendations, 1972*, prepared by the IUPAC—IUB Commission on Biochemical Nomenclature, has recently appeared (Elsevier, Amsterdam). The Commission is of the opinion that revisions of these Recommendations will be necessary within shorter intervals than previously. Therefore, biochemists who have suggestions to make regarding enzymes omitted from the Recommendations or errors or improvements in the names recommended are requested to send them to Professor E.C. Webb, J.D. Story Building, The University of Queensland, St-Lucia, Queensland, Australia 4067, chairman of the revision subcommittee of the Commission.
