

ERRATA

BIOCHIMICA ET BIOPHYSICA ACTA, VOL. 571 (1979)

p. 106, Methods, under 1. Purification; please note:

All enzymatic activities were calculated on the basis of nmol substrate liberated per h, and not per min as was indicated in the text.

p. 107, Table I, legend should read:

The specific activity of the enzyme is expressed in nmol PZ-Pro-Leu liberated per h (munits) per mg protein.
