

CONTENTS Volume 12

Volume 12 No. 1

- Enhanced biodegradation of methylhydrazine and hydrazine contaminated NASA wastewater in fixed-film bioreactor**
A. U. Nwankwoala, N. O. Egiebor, K. Nyavor 1–10
- Bioaugmentation of butane-utilizing microorganisms to promote cometabolism of 1,1,1-trichloroethane in groundwater microcosms**
P. Jitnuyanont, L. A. Sayavedra-Soto, L. Semprini 11–22
- Aerobic biotransformation of 4-fluorocinnamic acid to 4-fluorobenzoic acid**
L. M. Freitas dos Santos, A. Spicq, A. P. New, G. Lo Biundo, J.-C. Wolff, A. Edwards 23–29
- How adaptation and mass transfer control the biodegradation of linear alkylbenzene sulfonate by activated sludge**
B. E. Rittmann, P. Tularak, K.-C. Lee, T. W. Federle, N. R. Itrich, S. K. Kaiser, J. Shi, D. C. McAvoy 31–37
- Degradation of 1,3-dichloropropene by a soil bacterial consortium and *Rhodococcus* sp. AS2C isolated from the consortium**
L.-T. Ou, J. E. Thomas, K.-Y. Chung, A. V. Ogram 39–47
- Distribution and location of polycyclic aromatic hydrocarbons (PAHs) and PAH-degrading bacteria within polluted soil aggregates**
N. Amellal, J.-M. Portal, T. Vogel, J. Berthelin 49–57
- Kinetics of anaerobic degradation of glycol-based Type I aircraft deicing fluids**
T. Schoenberg, S. Veltman, M. Switzenbaum 59–68
- Biodegradation of the Phenylurea Herbicide Isoproturon and its Metabolites in Agricultural Soils**
S. R. Sørensen, J. Aamand 69–77

Volume 12 No. 2

Special Issue on Mechanisms, Kinetics, and Modeling of the Aerobic Cometabolism of Chlorinated Solvents

Guest Editor: Lewis Semprini

- Editorial** 79–80
- Molecular and cellular fundamentals of aerobic cometabolism of trichloroethylene**
D. J. Arp, C. M. Yeager, M. R. Hyman 81–103
- Kinetics of aerobic cometabolism of chlorinated solvents**
L. Alvarez-Cohen, G. E. Speitel Jr. 105–126

Transport issues and bioremediation modeling for the *in situ* aerobic co-metabolism of chlorinated solvents

M. N. Goltz, E. J. Bouwer, J. Huang

127–140

Volume 12 No. 3

Degradation of paper mill water components in laboratory tests with pure cultures of bacteria

L. E. Lindberg, B. R. Holmbom, O. M. Väisänen, A. M-L. Weber, M. S. Salkinoja-Salonen

141–148

Induction of the halobenzoate catabolic pathway and cometabolism of *ortho*-chlorobenzoates in *Pseudomonas aeruginosa* 142 grown on glucose-supplemented media

M. E. Corbella, A. Garrido-Pertierra, A. Puyet

149–157

Anaerobic degradation and dehalogenation of chlorosalicylates and salicylate under four reducing conditions

P. W. Milligan, M. M. Häggblom

159–167

Formaldehyde and methanol biodegradation with the methylotrophic yeast *Hansenula polymorpha*. An application to real wastewater treatment

P. Kaszycki, M. Tyszka, P. Malec, H. Kołoczek

169–177

Purification and characterization of a salicylate hydroxylase involved in 1-hydroxy-2-naphthoic acid hydroxylation from the naphthalene and phenanthrene-degrading bacterial strain *Pseudomonas putida* BS202-P1

N. V. Balashova, A. Stolz, H-J. Knackmuss, I. A. Kosheleva, A. V. Naumov, A. M. Boronin

179–188

Biotransformation kinetics of *Pseudomonas putida* for cometabolism of phenol and 4-chlorophenol in the presence of sodium glutamate

S.-J. Wang, K.-C. Loh

189–199

Repeated inoculation as a strategy for the remediation of low concentrations of phenanthrene in soil

E. Schwartz, K. M. Scow

201–207

Volume 12 No. 4

Metabolism of 2,4-dinitrotoluene (2,4-DNT) by *Alcaligenes* sp. JS867 under oxygen limited conditions

B. F. Smets, R. J. Mueller

209–217

Degradation of alkali-lignin residues from solid-state fermentation of wheat straw by streptomycetes

M. Hernández, M. J. Hernández-Coronado, A. S. Ball, M. E. Arias

219–223

Effects of olive mill wastewater addition in composting of agroindustrial and urban wastes

C. Paredes, M. P. Bernal, A. Roig, J. Cegarra

225–234

Bioremediation of DDT in soil by genetically improved strains of soil fungus *Fusarium solani*

J. Mitra, P. K. Mukherjee, S. P. Kale, N. B. K. Murthy

235–245

Protein degradation during anaerobic wastewater treatment: derivation of stoichiometry I. R. Ramsay, P. C. Pullammanappallil	247–257
Biodegradation of lignocellulosic waste by <i>Aspergillus terreus</i> G. Emtiazi, N. Naghavi, A. Bordbar	259–263
Thermodynamic yield predictions for biodegradation through oxygenase activation reactions J. M. VanBriesen	265–281

Volume 12 No. 5

Utilisation of lignocellulosic wastes for lignin peroxidase production by semi-solid-state cultures of <i>Phanerochaete chrysosporium</i> S. Rodríguez Couto, A. Domínguez, A. Sanromán	283–289
Degradation of 2,3,4,6-tetrachlorophenol at low temperature and low dioxygen concentrations by phylogenetically different groundwater and bioreactor bacteria Minna K. Männistö, Marja A. Tirola, Jaakko A. Puhakka	291–301
Isolation and characterization of a <i>Pseudomonas</i> strain that degrades 4-acetamidophenol and 4-aminophenol Safia Ahmed, M. Afzal Javed, Shazia Tanvir, Abdul Hameed	303–309
Biostimulation-based bioremediation of diesel fuel: field demonstration E. Seklemova, A. Pavlova, K. Kovacheva	311–316
Isobutylidenediurea degradation by <i>Rhodococcus erythropolis</i> Thomas Jahns, Roswitha Schepp	317–323
Bioremediation of diesel-contaminated soils: Evaluation of potential <i>in situ</i> techniques by study of bacterial degradation José L.R. Gallego, Jorge Loredo, Juan F. Llamas, Fernando Vázquez, Jesús Sánchez	325–335
Product distribution during transformation of multiple contaminants by a high-rate, tetrachlorethene-dechlorinating enrichment culture David T. Adamson, Gene F. Parkin	337–348
Soil microbial population dynamics following bioaugmentation with a 3-chlorobenzoate-degrading bacterial culture Terry J. Gentry, Deborah T. Newby, Karen L. Josephson, Ian L. Pepper	349–357
Optimal operational factors for nitrite accumulation in batch reactors Wookeun Bae, Seungcheon Baek, Jinwook Chung, Yongwoo Lee	359–366
Converging catabolism of 2,4,6-trinitrophenol (picric acid) and 2,4-dinitrophenol by <i>Nocardioides simplex</i> FJ2-1A Sybille Ebert, Peter Fischer, Hans-Joachim Knackmuss	367–376
Erratum	377

Volume 12 No. 6

Detection of intermediate metabolites of benzene biodegradation under microaerophilic conditions Laleh Yerushalmi, Jean-Francois Lascourreges, Chakib Rhofir, Serge R. Guiot	379–391
--	---------

Fluoranthene degradation in <i>Pseudomonas alcaligenes</i> PA-10	393–400
Linda Gordon, Alan D.W. Dobson	
Uranyl precipitation by biomass from an enhanced biological phosphorus removal reactor	401–410
Neil Renninger, Katherine D. McMahon, Roger Knopp, Heino Nitsche, Douglas S. Clark, Jay D. Keasling	
Metal binding by pyridine-2,6-bis(monothiocarboxylic acid), a biochelator produced by <i>Pseudomonas stutzeri</i> and <i>Pseudomonas putida</i>	411–418
Jason C. Stolworthy, Andrzej Paszczynski, Roger Korus, Ronald L. Crawford	
Degradation of dissolved and sorbed 2,4-dichlorophenol in soil columns by suspended and sorbed bacteria	419–432
Göran Bengtsson, Christel Carlsson	
Naphthalene, phenanthrene and surfactant biodegradation	433–442
Gang Chen, Keith A. Strevett, Br. Angela Vanegas	
Biotransformation of linear alkylbenzene sulfonate (LAS) by <i>Phanerochaete chrysosporium</i> : oxidation of alkyl side-chain	443–453
Jagjit S. Yadav, David L. Lawrence, Barbara A. Nuck, Thomas W. Federle, C. Adinarayana Reddy	
The roles of intermediates in biodegradation of benzene, toluene, and <i>p</i>-xylene by <i>Pseudomonas putida</i> F1	455–463
Haibo Yu, Byung J. Kim, Bruce E. Rittmann	
A two-step model for the kinetics of BTX degradation and intermediate formation by <i>Pseudomonas putida</i> F1	465–475
Haibo Yu, Byung J. Kim, Bruce E. Rittmann	
Erratum	477
Corrigendum	479–480
Instructions for authors	481–482
Volume contents	483–486
Author index	487–488
