

Subject Index to Volume 55 and 56

Absorption

Estimating the subcellular absorption of electric field energy: equations for an ellipsoidal single shell model (56) 211

Absorption spectroscopy

Interaction of merocyanine 540 with charged membranes (55) 173

Adenine

Electrochemical oxidation mechanism of guanine and adenine using a glassy carbon microelectrode (55) 61

An impedance study of the adsorption of nucleic acid bases at glassy carbon electrodes (56) 33

Adriamycin

Electrochemical sensing of DNA–adriamycin interactions (56) 81

Adsorption

Scanning probe microscopic imaging of guanine on a highly oriented pyrolytic graphite electrode (56) 63

Adsorption

Adsorption of differently charged forms of horseradish peroxidase on metal electrodes of different nature: effect of surface charges (56) 127

An impedance study of the adsorption of nucleic acid bases at glassy carbon electrodes (56) 33

Two-dimensional condensation of nucleic acid components at mercury film and gold electrodes (56) 43

Adsorptive transfer stripping

Catalytic signal of rabbit liver metallothionein on a mercury electrode: a combination of derivative chronopotentiometry with adsorptive transfer stripping (56) 57

Affinity interactions

Surfactant bilayers for the direct electrochemical detection of affinity interactions (56) 91

Aging

DNA–membrane complexes, mitochondria and aging (56) 189

4- α -helix bundle

Monolayers of a de novo designed 4- α -helix bundle carboxypeptidase and partial structures on Au(111)-surfaces (56) 27

α -hemolysin

Single channel recordings of α -hemolysin reconstituted in S-layer-supported lipid bilayers (55) 5

Alcohol dehydrogenase

Bioelectrochemical application of some PQQ-dependent enzymes (55) 29

Alkanethiolate

Intermolecular biological electron transfer: an electrochemical approach (56) 37

Alternating magnetic field

AC-magnetic field controlled drug release from magnetoliposomes: design of a method for site-specific chemotherapy (56) 17

Amoebae

Recent biotechnological developments of electropulsation. A prospective review (56) 107

Amperometric biosensor

Monitoring of ethanol during fermentation using a microbial biosensor with enhanced selectivity (56) 127

Amperometric pH sensing

Amperometric urea biosensor based on urease and electropolymerized toluidine blue dye as a pH-sensitive redox probe (56) 113

Anesthesia

Clinical evaluation of safety and human tolerance of electrical sensation induced by electric fields with non-invasive electrodes (56) 233

Apomorphine

Oxidative behaviour of apomorphine and its metabolites (56) 113

Athermal microwave effects

The effects of low level microwaves on the fluidity of photoreceptor cell membrane (56) 223

Atomic force microscopy

Scanning probe microscopic imaging of guanine on a highly oriented pyrolytic graphite electrode (56) 63

Attenuation coefficient

Studying the spatial organization of membrane proteins by means of tritium stratigraphy: bacteriorhodopsin in purple membrane (56) 147

Au electrode

Effect of pH on direct electron transfer in the system gold electrode–recombinant horseradish peroxidase (55) 83

Au(111)-electrodes

Monolayers of a de novo designed 4- α -helix bundle carboxypeptidase and partial structures on Au(111)-surfaces (56) 27

Bacteriorhodopsin

Studying the spatial organization of membrane proteins by means of tritium stratigraphy: bacteriorhodopsin in purple membrane (56) 147

DC photoelectric signals from bacteriorhodopsin adsorbed on lipid monolayers and thiol/lipid bilayers supported by mercury (56) 151

Behenic acid

Mixed urease/amphiphile LB films and their application for biosensor development (56) 157

Bilayer

Electric field effects in proteins in membranes (56) 141

Bilayer lipid membrane

The 40th anniversary of bilayer lipid membrane research (56) 171

Bilayer lipid membranes

Estimation of electrochromic dyes position in the bilayer through the 2nd harmonic of capacitive current (56) 47

Bilayers

DC photoelectric signals from bacteriorhodopsin adsorbed on lipid monolayers and thiol/lipid bilayers supported by mercury (56) 151

Bioanode

The design of dehydrogenase enzymes for use in a biofuel cell: the role of genetically introduced peptide tags in enzyme immobilization on electrodes (55) 21

Bioelectrocatalysis

Effect of pH on direct electron transfer in the system gold electrode–recombinant horseradish peroxidase (55) 83

Adsorption of differently charged forms of horseradish peroxidase on metal electrodes of different nature: effect of surface charges (56) 127

Biofuel cell

- Immobilisation of enzymes on poly(aniline)–poly(anion) composite films. Preparation of bioanodes for biofuel cell applications (56) 13
- The design of dehydrogenase enzymes for use in a biofuel cell: the role of genetically introduced peptide tags in enzyme immobilization on electrodes (55) 21
- A glucose/hydrogen peroxide biofuel cell that uses oxidase and peroxidase as catalysts by composite bulk-modified bioelectrodes based on a solid binding matrix (56) 99

Biosensors

- The 40th anniversary of bilayer lipid membrane research (56) 171

Biosensor

- Reagentless biosensing using electrochemical impedance spectroscopy (55) 1
- Development of enzyme biosensor based on pH-sensitive field-effect transistors for detection of phenolic compounds (55) 79
- Strategic issues in reliable sensing (56) 123
- Stabilization of ferrocene leakage by physical retention in a cellulose acetate membrane. The fructose biosensor (55) 149
- Indirect evidence of direct electron communication between the active site of galactose oxidase and a graphite electrode (56) 23
- Amperometric urea biosensor based on urease and electropolymerized toluidine blue dye as a pH-sensitive redox probe (56) 113
- Modified electrodes for NADH oxidation and dehydrogenase-based biosensors (56) 117
- Cyclic voltammetry study of glucose and insulin interactions with supported lipid membrane (56) 185

Biosensors

- Affinity assembled multilayers for new dehydrogenase biosensors (56) 123

Biotechnology

- Recent biotechnological developments of electropulsation. A prospective review (56) 107
- The 40th anniversary of bilayer lipid membrane research (56) 171

Biotinylated polypyrrole

- Impedimetric immunosensor using avidin–biotin for antibody immobilization (56) 131

BLMs

- The 40th anniversary of bilayer lipid membrane research (56) 171

Bovine serum albumin

- Fluorescence studies on PAMAM dendrimers interactions with bovine serum albumin (56) 33

Brownian ratchet

- Bacterial flagellar motor and H^+ /ATP synthase: two proton-driven rotary molecular devices with different functions (55) 89

Cancer therapy

- AC-magnetic field controlled drug release from magnetoliposomes: design of a method for site-specific chemotherapy (56) 17

Carbon fiber

- Nitric oxide determination by amperometric carbon fiber microelectrode (56) 73

Carbon paste electrode

- Mediator-modified electrodes for catalytic NADH oxidation: high rate constants at interesting overpotentials (56) 67

Carboprotein

- Monolayers of a de novo designed 4- α -helix bundle carboprotein and partial structures on Au(111)-surfaces (56) 27

Carboxylic acid-terminated

- Intermolecular biological electron transfer: an electrochemical approach (56) 37

Cardiolipin

- Specific natural DNA-bound lipids in post-genome era. The lipid conception of chromatin organization (56) 195

Catalase

- Direct electrochemistry of catalase on glassy carbon electrodes (56) 157

Catalytic hydrogen evolution

- Catalytic signal of rabbit liver metallothionein on a mercury electrode: a combination of derivative chronopotentiometry with adsorptive transfer stripping (56) 57

Cell deformation

- Transient dielectro-deformations of erythrocyte governed by time variation of cell ionic state (55) 97

Cellulose acetate membrane

- Stabilization of ferrocene leakage by physical retention in a cellulose acetate membrane. The fructose biosensor (55) 149
- Monitoring of ethanol during fermentation using a microbial biosensor with enhanced selectivity (56) 127

Cell viability

- Evaluation of viability of retinal photoreceptor cells by using their endogenous electrical field (56) 219

Charged liposomes

- Interaction of merocyanine 540 with charged membranes (55) 173

Charge transport

- Modified electrodes for NADH oxidation and dehydrogenase-based biosensors (56) 117

Chemical changes

- Understanding conditions for which biological effects of nonionizing electromagnetic fields can be expected (56) 207

Chemically modified electrodes

- Surface modified microelectrodes for selective electroanalysis of metal ions in environmental components (55) 153

Chemical modification of DNA

- Determination of nanogram quantities of osmium-labeled single stranded DNA by differential pulse stripping voltammetry (55) 119

Chemical modification of peptides

- Differential pulse adsorptive stripping voltammetry of osmium-modified peptides (56) 63

Chemotherapy

- Effects of static magnetic field on human leukemic cell line HL-60 (56) 227

4-Chlorophenol

- Development of enzyme biosensor based on pH-sensitive field-effect transistors for detection of phenolic compounds (55) 79

Chlorophyll *a*

- P680: what is it and where is it? (56) 135
- Monolayers and multilayers of chlorophyll *a* on a mercury electrode (56) 159

Cholesterol

- Specific natural DNA-bound lipids in post-genome era. The lipid conception of chromatin organization (56) 195

Cholinesterase biosensor

- Polyaniline-modified cholinesterase sensor for pesticide determination (55) 75

Chromatin

- Specific natural DNA-bound lipids in post-genome era. The lipid conception of chromatin organization (56) 195

Chronopotentiometric stripping analysis

- Catalytic signal of rabbit liver metallothionein on a mercury electrode: a combination of derivative chronopotentiometry with adsorptive transfer stripping (56) 57

Cisplatin

- Electrochemotherapy of horses. A preliminary clinical report (55) 101

Clot formation

- Ion channels in the human red blood cell membrane: their further investigation and physiological relevance (55) 71

Cofactor recycling

- The design of dehydrogenase enzymes for use in a biofuel cell: the role of genetically introduced peptide tags in enzyme immobilization on electrodes (55) 21

Cold and heat injury

- Backward electron transport in photosystem 2 reaction center and temperature dependence of delayed luminescence characteristics (56) 13

- Collective phenomena
Spatial distribution of ion channel activity in biological membranes: the role of noise (56) 167
- Conducting polymers
Modified electrodes for NADH oxidation and dehydrogenase-based biosensors (56) 117
- Conductivity
A novel method of introducing hydrophobic moieties into oligonucleotides for covalent and non-covalent immobilization on electrode surfaces (56) 47
- Conductometry
Ionic conductivity of electroporated lipid bilayer membranes (56) 163
- Constant current chronopotentiometry
Determination of glutathione-S-transferase traces in preparations of p53 C-terminal domain (aa320–393) (55) 115
- Copper ions
Electrode potential-controlled DNA damage in the presence of copper ions and their complexes (55) 25
- Copper oxidase
Indirect evidence of direct electron communication between the active site of galactose oxidase and a graphite electrode (56) 23
- Corrosion
The role of hydrogenases in the anaerobic microbiologically influenced corrosion of steels (56) 77
- Crystalline bacterial surface layer (S-layer)
Single channel recordings of α -hemolysin reconstituted in S-layer-supported lipid bilayers (55) 5
- Cyclic voltammetry
Mediator-modified electrodes for catalytic NADH oxidation: high rate constants at interesting overpotentials (56) 67
Electrochemical studies of blocking properties of solid supported tethered lipid membranes on gold (56) 179
Cyclic voltammetry study of glucose and insulin interactions with supported lipid membrane (56) 185
- Cytidine adlayers
Two-dimensional condensation of nucleic acid components at mercury film and gold electrodes (56) 43
- Cytochrome *c*
Intermolecular biological electron transfer: an electrochemical approach (56) 37
- Cytochrome *c*₆
An evolutionary analysis of the reaction mechanisms of photosystem I reduction by cytochrome *c*₆ and plastocyanin (55) 41
Electron transfer dynamics of cytochrome *c* bound to self-assembled monolayers on silver electrodes (55) 139
STM study of morphology and electron transport features in cytochrome *c* and nanocluster molecule monolayers (55) 177
- Cytochrome *c* mutant
Intermolecular biological electron transfer: an electrochemical approach (56) 37
- Cytotoxic action
Reduction of lapachones and their reaction with L-cysteine and mercaptoethanol on glassy carbon electrodes (56) 53
- Cytotoxicity
Effects of static magnetic field on human leukemic cell line HL-60 (56) 227
- Dehydrogenase
Modified electrodes for NADH oxidation and dehydrogenase-based biosensors (56) 117
- Delayed luminescence
Backward electron transport in photosystem 2 reaction center and temperature dependence of delayed luminescence characteristics (56) 13
- De novo design
Monolayers of a de novo designed 4- α -helix bundle carboprotein and partial structures on Au(111)-surfaces (56) 27
- Densitometry
Affinity interactions on a liposome surface detected by ultrasound velocimetry (56) 57
- Diabetes mellitus
Fluidity gradient of erythrocyte membranes in diabetics: the effect of resorcyldene aminoguanidine (56) 53
- Dielectric dispersion
Estimating the subcellular absorption of electric field energy: equations for an ellipsoidal single shell model (56) 211
- Dielectric relaxation
Effect of protein relaxation on electron transfer from the cytochrome subunit to the bacteriochlorophyll dimer in *Rps. sulfoviridis* reaction centers within mixed adiabatic/nonadiabatic model (56) 3
- Differential capacitance
Electrochemical impedance spectroscopy of polynucleotide adsorption (56) 37
- Differential pulse adsorptive stripping voltammetry
Differential pulse adsorptive stripping voltammetry of osmium-modified peptides (56) 63
- Differential pulse stripping voltammetry
Determination of nanogram quantities of osmium-labeled single stranded DNA by differential pulse stripping voltammetry (55) 119
- Diphenylhexatriene
Fluidity gradient of erythrocyte membranes in diabetics: the effect of resorcyldene aminoguanidine (56) 53
- Direct bioelectrocatalysis
Direct and electrically wired bioelectrocatalysis by hydrogenase from *Thiocapsa roseopersicina* (55) 169
- Direct electronic transfer
Direct electrochemistry of catalase on glassy carbon electrodes (56) 157
- Direct electron transfer
Indirect evidence of direct electron communication between the active site of galactose oxidase and a graphite electrode (56) 23
The role of hydrogenases in the anaerobic microbiologically influenced corrosion of steels (56) 77
- DNA
Reagentless biosensing using electrochemical impedance spectroscopy (55) 1
Elimination voltammetry of nucleic acids on silver electrodes (56) 131
DNA-membrane complexes, mitochondria and aging (56) 189
Specific natural DNA-bound lipids in post-genome era. The lipid conception of chromatin organization (56) 195
- DNA adsorption
Electrochemical impedance spectroscopy of polynucleotide adsorption (56) 37
- DNA-biosensor
Electrochemical sensing of DNA-adriamycin interactions (56) 81
- DNA bis-intercalator
Cyclic voltammetry of echinomycin and its interaction with double-stranded and single-stranded DNA adsorbed at the electrode (56) 156
- DNA damage
Electrode potential-controlled DNA damage in the presence of copper ions and their complexes (55) 25
- DNA hybridization sensors
Cyclic voltammetry of echinomycin and its interaction with double-stranded and single-stranded DNA adsorbed at the electrode (55) 165
- DNA-membrane complexes
DNA-membrane complexes, mitochondria and aging (56) 189
- DNA sensor
Surfactant bilayers for the direct electrochemical detection of affinity interactions (56) 91
- DNA sensors
A novel method of introducing hydrophobic moieties into oligonucleotides for covalent and non-covalent immobilization on electrode surfaces (56) 47

- New approaches in the development of DNA sensors: hybridization and electrochemical detection of DNA and RNA at two different surfaces (56) 85
- Dopamine
Electrochemical studies of blocking properties of solid supported tethered lipid membranes on gold (56) 179
- Double-step voltacoulometry
Surface modified microelectrodes for selective electroanalysis of metal ions in environmental components (55) 153
- Doxorubicin
AC-magnetic field controlled drug release from magnetoliposomes: design of a method for site-specific chemotherapy (56) 17
- Drug release
AC-magnetic field controlled drug release from magnetoliposomes: design of a method for site-specific chemotherapy (56) 17
- Dyes' position
Estimation of electrochrome dyes position in the bilayer through the 2nd harmonic of capacitive current (56) 47
- Effect of aeration
Catalytic signal of rabbit liver metallothionein on a mercury electrode: a combination of derivative chronopotentiometry with adsorptive transfer stripping (56) 57
- Electrical sensation
Clinical evaluation of safety and human tolerance of electrical sensation induced by electric fields with non-invasive electrodes (56) 233
- Electric field
Transient dielectro-deformations of erythrocyte governed by time variation of cell ionic state (55) 97
Electron transfer dynamics of cytochrome *c* bound to self-assembled monolayers on silver electrodes (55) 139
- Electric Field
Electric field effects in proteins in membranes (56) 141
- Electrocatalysis
Affinity assembled multilayers for new dehydrogenase biosensors (56) 123
- Electrochemical
Designing membrane electrochemical reactors for oxidoreductase-catalysed synthesis (55) 93
Nitric oxide determination by amperometric carbon fiber microelectrode (56) 73
- Electrochemical biosensor
A novel enzyme biosensor for steroidal glycoalkaloids detection based on pH-sensitive field effect transistors (56) 9
- Electrochemical detection
New approaches in the development of DNA sensors: hybridization and electrochemical detection of DNA and RNA at two different surfaces (56) 85
- Electrochemical impedance
An impedance study of the adsorption of nucleic acid bases at glassy carbon electrodes (56) 33
- Electrochemical impedance spectroscopy
Electrochemical impedance spectroscopy of polynucleotide adsorption (56) 37
- Electrochemical oxidation
Electrochemical oxidation mechanism of guanine and adenine using a glassy carbon microelectrode (55) 61
- Electrochemical reduction
Reduction of lapachones and their reaction with L-cysteine and mercaptoethanol on glassy carbon electrodes (56) 53
- Electrochemistry
Oxidative behaviour of apomorphine and its metabolites (56) 113
Enzyme-catalysed nitrate reduction—themes and variations as revealed by protein film voltammetry (56) 17
- Electrochemistry of DNA
Cyclic voltammetry of echinomycin and its interaction with double-stranded and single-stranded DNA adsorbed at the electrode (55) 165
- Electrochemotherapy
Electrochemotherapy of horses. A preliminary clinical report (55) 101
- Electrode
Electron transfer dynamics of cytochrome *c* bound to self-assembled monolayers on silver electrodes (55) 139
Nitric oxide determination by amperometric carbon fiber microelectrode (56) 73
- Electromagnetic fields
Understanding conditions for which biological effects of nonionizing electromagnetic fields can be expected (56) 207
- Electron and proton transport
Coupling of electron and proton transport in photosynthetic membranes: molecular mechanism (56) 9
- Electron transfer
An evolutionary analysis of the reaction mechanisms of photosystem I reduction by cytochrome *c₆* and plastocyanin (55) 41
Electron transfer dynamics of cytochrome *c* bound to self-assembled monolayers on silver electrodes (55) 139
Flavin photochemistry in the analysis of electron transfer reactions: role of charged and hydrophobic residues at the carboxyl terminus of ferredoxin–NADP⁺ reductase in the interaction with its substrates (56) 19
- Electron transfer kinetics
Intermolecular biological electron transfer: an electrochemical approach (56) 37
- Electron transport
STM study of morphology and electron transport features in cytochrome *c* and nanocluster molecule monolayers (55) 177
- Electron tunneling
STM study of morphology and electron transport features in cytochrome *c* and nanocluster molecule monolayers (55) 177
- Electrooptics
Ionic conductivity of electroporated lipid bilayer membranes (56) 163
- Electropolymerisation
Strategic issues in reliable sensing (56) 123
- Electropolymerization
Impedimetric immunosensor using avidin–biotin for antibody immobilization (56) 131
- Electroporation
Ionic conductivity of electroporated lipid bilayer membranes (56) 163
Clinical evaluation of safety and human tolerance of electrical sensation induced by electric fields with non-invasive electrodes (56) 233
- Electropulsation
Recent biotechnological developments of electropulsation. A prospective review (56) 107
- Electroreflectance
Intermolecular biological electron transfer: an electrochemical approach (56) 37
- Electro-smog
Estimating the subcellular absorption of electric field energy: equations for an ellipsoidal single shell model (56) 211
- Electrostatic interactions
Adsorption of differently charged forms of horseradish peroxidase on metal electrodes of different nature: effect of surface charges (56) 127
- ELF magnetic fields
Effects of low-frequency magnetic fields on bacteria *Escherichia coli* (55) 161
- Elimination voltammetry
Elimination voltammetry of nucleic acids on silver electrodes (56) 131
- Ellipsoidal single shell model
Cellular absorption of electric field energy: influence of molecular properties of the cytoplasm (56) 215
Cellular absorption of electric field energy: influence of molecular properties of the cytoplasm (55) 218
- Endothelium
Nitric oxide determination by amperometric carbon fiber microelectrode (56) 73

Energy of reorganization

Effect of protein relaxation on electron transfer from the cytochrome subunit to the bacteriochlorophyll dimer in *Rps. sulfoviridis* reaction centers within mixed adiabatic/nonadiabatic model (56) 3

ENFET

A novel enzyme biosensor for steroidal glycoalkaloids detection based on pH-sensitive field effect transistors (56) 9

Enzymatic activity

A comparative thermodynamic study for both natural and artificial RNA/DNA–protein binary complexes (56) 95

Enzyme

Designing membrane electrochemical reactors for oxidoreductase-catalysed synthesis (55) 93

Enzyme electrodes

Direct and electrically wired bioelectrocatalysis by hydrogenase from *Thiobacillus roseopersicina* (55) 169

Electrochemical studies on reconstituted horseradish peroxidase modified carbon paste electrodes (56) 107

Enzyme immobilisation

Immobilisation of enzymes on poly(aniline)–poly(anion) composite films. Preparation of bioanodes for biofuel cell applications (56) 13

Enzyme immobilization

The design of dehydrogenase enzymes for use in a biofuel cell: the role of genetically introduced peptide tags in enzyme immobilization on electrodes (55) 21

Enzyme inhibition

A novel enzyme biosensor for steroidal glycoalkaloids detection based on pH-sensitive field effect transistors (56) 9

Erythrocyte

Ion channels in the human red blood cell membrane: their further investigation and physiological relevance (55) 71

Erythrocyte ionic state

Transient dielectro-deformations of erythrocyte governed by time variation of cell ionic state (55) 97

Escherichia coli

Effects of low-frequency magnetic fields on bacteria *Escherichia coli* (55) 161

Ethanol fermentation

Monitoring of ethanol during fermentation using a microbial biosensor with enhanced selectivity (56) 127

Ferredoxin

Flavin photochemistry in the analysis of electron transfer reactions: role of charged and hydrophobic residues at the carboxyl terminus of ferredoxin–NADP⁺ reductase in the interaction with its substrates (56) 19

Ferrocene

Stabilization of ferrocene leakage by physical retention in a cellulose acetate membrane. The fructose biosensor (55) 149

Finite element model

Estimating the subcellular absorption of electric field energy: equations for an ellipsoidal single shell model (56) 211

Fixed charges

Electric field effects in proteins in membranes (56) 141

Fluorenone

Mediator-modified electrodes for catalytic NADH oxidation: high rate constants at interesting overpotentials (56) 67

Fluorescence quenching

Fluorescence studies on PAMAM dendrimers interactions with bovine serum albumin (56) 33

FRAP

Polyelectrolyte-supported lipid membranes (56) 175

Free energy

Effect of protein relaxation on electron transfer from the cytochrome subunit to the bacteriochlorophyll dimer in *Rps. sulfoviridis* reaction centers within mixed adiabatic/nonadiabatic model (56) 3

Fructose dehydrogenase

Stabilization of ferrocene leakage by physical retention in a cellulose acetate membrane. The fructose biosensor (55) 149

Functional genomics

Specific natural DNA-bound lipids in post-genome era. The lipid conception of chromatin organization (56) 195

Galactose oxidase

Indirect evidence of direct electron communication between the active site of galactose oxidase and a graphite electrode (56) 23

Glassy carbon

Direct electrochemistry of catalase on glassy carbon electrodes (56) 157

Gluconobacter oxydans

Monitoring of ethanol during fermentation using a microbial biosensor with enhanced selectivity (56) 127

Glucose

Cyclic voltammetry study of glucose and insulin interactions with supported lipid membrane (56) 185

Glucose dehydrogenase

Bioelectrochemical application of some PQQ-dependent enzymes (55) 29

Glutathione-S-transferase determination

Determination of glutathione-S-transferase traces in preparations of p53 C-terminal domain (aa320–393) (55) 115

Glycerol dehydrogenase

Bioelectrochemical application of some PQQ-dependent enzymes (55) 29

Gold single crystal

Two-dimensional condensation of nucleic acid components at mercury film and gold electrodes (56) 43

Guanine

Electrochemical oxidation mechanism of guanine and adenine using a glassy carbon microelectrode (55) 61

Scanning probe microscopic imaging of guanine on a highly oriented pyrolytic graphite electrode (56) 63

An impedance study of the adsorption of nucleic acid bases at glassy carbon electrodes (56) 33

Guanosine

An impedance study of the adsorption of nucleic acid bases at glassy carbon electrodes (56) 33

Hanging mercury drop electrode

Determination of glutathione-S-transferase traces in preparations of p53 C-terminal domain (aa320–393) (55) 115

Cyclic voltammetry of echinomycin and its interaction with double-stranded and single-stranded DNA adsorbed at the electrode (55) 165

Harmonics of capacitive current

Estimation of electrochromic dyes position in the bilayer through the 2nd harmonic of capacitive current (56) 47

 α -Helical transmembrane peptide

Mechanisms of the interaction of α -helical transmembrane peptides with phospholipid bilayers (56) 135

Hemoglobin

Cellular absorption of electric field energy: influence of molecular properties of the cytoplasm (56) 215

Cellular absorption of electric field energy: influence of molecular properties of the cytoplasm (55) 218

Heterogeneous direct electron transfer

Effect of pH on direct electron transfer in the system gold electrode–recombinant horseradish peroxidase (55) 83

HL-60

Effects of static magnetic field on human leukemic cell line HL-60 (56) 227

HMDE

Determination of nanogram quantities of osmium-labeled single stranded DNA by differential pulse stripping voltammetry (55) 119

Functional genomics

Specific natural DNA-bound lipids in post-genome era. The lipid conception of chromatin organization (Struchkov et al.) (56) 195

Galactose oxidase

Indirect evidence of direct electron communication between the active site of galactose oxidase and a graphite electrode (Tkac et al.) (56) 23

Glassy carbon

Direct electrochemistry of catalase on glassy carbon electrodes (Lai, Bergel) (56) 157

Gluconobacter oxydans

Monitoring of ethanol during fermentation using a microbial biosensor with enhanced selectivity (Tkac et al.) (56) 127

Glucose

Cyclic voltammetry study of glucose and insulin interactions with supported lipid membrane (Laputková, Sabo) (56) 185

Glucose dehydrogenase

Bioelectrochemical application of some PQQ-dependent enzymes (Laurinavicius et al.) (55) 29

Glutathione-S-transferase determination

Determination of glutathione-S-transferase traces in preparations of p53 C-terminal domain (aa320–393) (Brázdová et al.) (55) 115

Glycerol dehydrogenase

Bioelectrochemical application of some PQQ-dependent enzymes (Laurinavicius et al.) (55) 29

Gold single crystal

Two-dimensional condensation of nucleic acid components at mercury film and gold electrodes (Hasoň, Vetterl) (56) 43

Guanine

Electrochemical oxidation mechanism of guanine and adenine using a glassy carbon microelectrode (Oliveira-Brett et al.) (55) 61

Scanning probe microscopic imaging of guanine on a highly oriented pyrolytic graphite electrode (Chiorcea, Oliveira-Brett) (56) 63

An impedance study of the adsorption of nucleic acid bases at glassy carbon electrodes (Oliveira-Brett et al.) (56) 33

Guanosine

An impedance study of the adsorption of nucleic acid bases at glassy carbon electrodes (Oliveira-Brett et al.) (56) 33

Hanging mercury drop electrode

Determination of glutathione-S-transferase traces in preparations of p53 C-terminal domain (aa320–393) (Brázdová et al.) (55) 115

Cyclic voltammetry of echinomycin and its interaction with double-stranded and single-stranded DNA adsorbed at the electrode (Jelen et al.) (55) 165

Harmonics of capacitive current

Estimation of electrochrome dyes position in the bilayer through the 2nd harmonic of capacitive current (Passechnik, Sokolov) (56) 47

 α -Helical transmembrane peptide

Mechanisms of the interaction of α -helical transmembrane peptides with phospholipid bilayers (Lewis et al.) (56) 135

Hemoglobin

Cellular absorption of electric field energy: influence of molecular properties of the cytoplasm (Simeonova et al.) (56) 215

Cellular absorption of electric field energy: influence of molecular properties of the cytoplasm (Simeonova et al.) (55) 218

Heterogeneous direct electron transfer

Effect of pH on direct electron transfer in the system gold electrode–recombinant horseradish peroxidase (Ferafontova, Gorton) (55) 83

HL-60

Effects of static magnetic field on human leukemic cell line HL-60 (Sabo et al.) (56) 227

HMDE

Determination of nanogram quantities of osmium-labeled single stranded DNA by differential pulse stripping voltammetry (Kizek et al.) (55) 119

Horseradish peroxidase

Adsorption of differently charged forms of horseradish peroxidase on metal electrodes of different nature: effect of surface charges (Ferafontova, Domínguez) (56) 127

Horseradish peroxidase covalent coupling enzyme electrochemistry

Electrochemical studies on reconstituted horseradish peroxidase modified carbon paste electrodes (Varma) (56) 107

Horses

Electrochemotherapy of horses. A preliminary clinical report (Rols et al.) (55) 101

Human

Clinical evaluation of safety and human tolerance of electrical sensation induced by electric fields with non-invasive electrodes (Zhang, Rabussay) (56) 233

Human red blood cells

Cellular absorption of electric field energy: influence of molecular properties of the cytoplasm (Simeonova et al.) (56) 215

Cellular absorption of electric field energy: influence of molecular properties of the cytoplasm (Simeonova et al.) (55) 218

Hybridization

A novel method of introducing hydrophobic moieties into oligonucleotides for covalent and non-covalent immobilization on electrode surfaces (Oretskaya et al.) (56) 47

New approaches in the development of DNA sensors: hybridization and electrochemical detection of DNA and RNA at two different surfaces (Paleček et al.) (56) 85

Hydration

Affinity interactions on a liposome surface detected by ultrasound velocimetry (Krivanek et al.) (56) 57

Hydrogenase

Direct and electrically wired bioelectrocatalysis by hydrogenase from *Thiocalapsa roseopersicina* (Morozov et al.) (55) 169

The role of hydrogenases in the anaerobic microbiologically influenced corrosion of steels (Da Silva et al.) (56) 77

Hydrogen peroxide

Electrosynthesis of poly-*o*-diaminobenzene on the Prussian Blue modified electrodes for improvement of hydrogen peroxide transducer characteristics (Lukachova et al.) (55) 145

Hydrophobicity

A dynamic method of measuring surface potential change due to binding of bitter substance at monolayer-coated liquid membrane surface (Nomura, Yata) (56) 67

Hydrophobic mismatch

Mechanisms of the interaction of α -helical transmembrane peptides with phospholipid bilayers (Lewis et al.) (56) 135

Hyperthermia

AC-magnetic field controlled drug release from magnetoliposomes: design of a method for site-specific chemotherapy (Babincová et al.) (56) 17

IgG

Affinity interactions on a liposome surface detected by ultrasound velocimetry (Krivanek et al.) (56) 57

Immunoassay

Reagentless biosensing using electrochemical impedance spectroscopy (Farace et al.) (55) 1

Immunosensor

Impedimetric immunosensor using avidin–biotin for antibody immobilization (Querghi et al.) (56) 131

Impedance spectroscopy

Surfactant bilayers for the direct electrochemical detection of affinity interactions (Vagin et al.) (56) 91

Impedimetric immunosensor using avidin–biotin for antibody immobilization (Querghi et al.) (56) 131

Polyelectrolyte-supported lipid membranes (Kügler, Knoll) (56) 175

Impotence

Clinical evaluation of safety and human tolerance of electrical sensa-

- Magnetic fields**
Effects of static magnetic field on human leukemic cell line HL-60 (56) 227
- Magnetoliposomes**
AC-magnetic field controlled drug release from magnetoliposomes: design of a method for site-specific chemotherapy (56) 17
- Marcus theory**
Effect of protein relaxation on electron transfer from the cytochrome subunit to the bacteriochlorophyll dimer in *Rps. sulfoviridis* reaction centers within mixed adiabatic/nonadiabatic model (56) 3
- Mediator**
Mediator-modified electrodes for catalytic NADH oxidation: high rate constants at interesting overpotentials (56) 67
- Membrane**
Designing membrane electrochemical reactors for oxidoreductase-catalysed synthesis (55) 93
Electric field effects in proteins in membranes (56) 141
- Membrane fluidity**
Fluidity gradient of erythrocyte membranes in diabetics: the effect of resorcyldene aminoguanidine (56) 53
The effects of low level microwaves on the fluidity of photoreceptor cell membrane (56) 223
- Membrane models**
Electrochemical studies of blocking properties of solid supported tethered lipid membranes on gold (56) 179
- Membrane reconstitution**
The 40th anniversary of bilayer lipid membrane research (56) 171
- Mercury**
DC photoelectric signals from bacteriorhodopsin adsorbed on lipid monolayers and thiol/lipid bilayers supported by mercury (56) 151
Monolayers and multilayers of chlorophyll *a* on a mercury electrode (56) 159
- Mercury electrode**
Electrode potential-controlled DNA damage in the presence of copper ions and their complexes (55) 25
Differential pulse adsorptive stripping voltammetry of osmium-modified peptides (56) 63
- Mercury film electrodes**
Two-dimensional condensation of nucleic acid components at mercury film and gold electrodes (56) 43
- Merocyanine 540**
Interaction of merocyanine 540 with charged membranes (55) 173
- Metallothionein**
Catalytic signal of rabbit liver metallothionein on a mercury electrode: a combination of derivative chronopotentiometry with adsorptive transfer stripping (56) 57
- Microdetermination of DNA**
Determination of nanogram quantities of osmium-labeled single stranded DNA by differential pulse stripping voltammetry (55) 119
- Microorganisms**
Recent biotechnological developments of electropulsation. A prospective review (56) 107
- Mitochondria**
DNA-membrane complexes, mitochondria and aging (56) 189
- Mixed LB films**
Mixed urease/amphiphile LB films and their application for biosensor development (56) 157
- Modified electrodes**
Affinity assembled multilayers for new dehydrogenase biosensors (56) 123
- Molecular devices**
The 40th anniversary of bilayer lipid membrane research (56) 171
- Molecular dispersions**
Cellular absorption of electric field energy: influence of molecular properties of the cytoplasm (56) 215
Cellular absorption of electric field energy: influence of molecular properties of the cytoplasm (55) 218
- Molecular organisation**
Electric field effects in proteins in membranes (56) 141
- Molecular recognition**
The 40th anniversary of bilayer lipid membrane research (56) 171
- Molybdenum**
Enzyme-catalysed nitrate reduction—themes and variations as revealed by protein film voltammetry (56) 17
- Monolayer**
A dynamic method of measuring surface potential change due to binding of bitter substance at monolayer-coated liquid membrane surface (56) 67
STM study of morphology and electron transport features in cytochrome *c* and nanocluster molecule monolayers (55) 177
- NAD⁺**
The design of dehydrogenase enzymes for use in a biofuel cell: the role of genetically introduced peptide tags in enzyme immobilization on electrodes (55) 21
- NADH**
Immobilisation of enzymes on poly(aniline)–poly(anion) composite films. Preparation of bioanodes for biofuel cell applications (56) 13
- NADH oxidation**
Mediator-modified electrodes for catalytic NADH oxidation: high rate constants at interesting overpotentials (56) 67
Modified electrodes for NADH oxidation and dehydrogenase-based biosensors (56) 117
- NADP⁺**
Flavin photochemistry in the analysis of electron transfer reactions: role of charged and hydrophobic residues at the carboxyl terminus of ferredoxin–NADP⁺ reductase in the interaction with its substrates (56) 19
- Na/K ATPase**
The asymmetric, rectifier-like *I*–*V* curve of the Na/K pump transient currents in frog skeletal muscle fibers (56) 199
- Nanocluster**
STM study of morphology and electron transport features in cytochrome *c* and nanocluster molecule monolayers (55) 177
- Nanoelectronics**
STM study of morphology and electron transport features in cytochrome *c* and nanocluster molecule monolayers (55) 177
- Nernst–Planck equation**
Ionic conductivity of electroporated lipid bilayer membranes (56) 163
- Neutron reflectometry**
Polyelectrolyte-supported lipid membranes (56) 175
- Nitrate reductase**
Enzyme-catalysed nitrate reduction—themes and variations as revealed by protein film voltammetry (56) 17
- Nitric oxide**
Nitric oxide determination by amperometric carbon fiber microelectrode (56) 73
- Nitrofluorenones**
Affinity assembled multilayers for new dehydrogenase biosensors (56) 123
- Noise**
Spatial distribution of ion channel activity in biological membranes: the role of noise (56) 167
- Nonionizing**
Understanding conditions for which biological effects of nonionizing electromagnetic fields can be expected (56) 207
- Nonlinear dynamics**
Spatial distribution of ion channel activity in biological membranes: the role of noise (56) 167
- NO sensor**
Nitric oxide determination by amperometric carbon fiber microelectrode (56) 73

- Octadecylamine
Mixed urease/amphiphile LB films and their application for biosensor development (56) 157
- Oligodeoxyribonucleotide
A novel method of introducing hydrophobic moieties into oligonucleotides for covalent and non-covalent immobilization on electrode surfaces (56) 47
- Orientation patterns
Evaluation of viability of retinal photoreceptor cells by using their endogenous electrical field (56) 219
- Oscillating electric field
The asymmetric, rectifier-like I - V curve of the Na/K pump transient currents in frog skeletal muscle fibers (56) 199
- Osmium tetroxide, 2,2'-bipyridine
Differential pulse adsorptive stripping voltammetry of osmium-modified peptides (56) 63
- Osmium tetroxide complexes
Determination of nanogram quantities of osmium-labeled single stranded DNA by differential pulse stripping voltammetry (55) 119
- Oxidative behaviour
Oxidative behaviour of apomorphine and its metabolites (56) 113
- Oxidative damage
Electrochemical sensing of DNA-adriamycin interactions (56) 81
- 8-oxoguanine
Electrochemical sensing of DNA-adriamycin interactions (56) 81
- Oxygen reduction
Direct electrochemistry of catalase on glassy carbon electrodes (56) 157
- p53
Determination of glutathione- S -transferase traces in preparations of p53 C-terminal domain (aa320–393) (55) 115
- pH-FET
Development of enzyme biosensor based on pH-sensitive field-effect transistors for detection of phenolic compounds (55) 79
- PAMAM dendrimers
Fluorescence studies on PAMAM dendrimers interactions with bovine serum albumin (56) 33
- Patch-clamp
Ion channels in the human red blood cell membrane: their further investigation and physiological relevance (55) 71
- Peak H
Catalytic signal of rabbit liver metallothionein on a mercury electrode: a combination of derivative chronopotentiometry with adsorptive transfer stripping (56) 57
- Pesticide determination
Polyaniline-modified cholinesterase sensor for pesticide determination (55) 75
- Phenanthroline
Electrode potential-controlled DNA damage in the presence of copper ions and their complexes (55) 25
- Phosphate translocator
The influence of sugar synthesis and transport rates on bioenergetics and kinetics of higher plant photosynthesis (56) 203
- Phosphatidylcholine
Mechanisms of the interaction of α -helical transmembrane peptides with phospholipid bilayers (56) 135
- Phosphatidylethanolamine
Mechanisms of the interaction of α -helical transmembrane peptides with phospholipid bilayers (56) 135
- Phospholipid bilayers
Mechanisms of the interaction of α -helical transmembrane peptides with phospholipid bilayers (56) 135
- Photocurrent
Monolayers and multilayers of chlorophyll a on a mercury electrode (56) 159
- Photoreceptors
The effects of low level microwaves on the fluidity of photoreceptor cell membrane (56) 223
- Photoreceptors polarity
Evaluation of viability of retinal photoreceptor cells by using their endogenous electrical field (56) 219
- Photosynthetic reaction centres
P680: what is it and where is it? (56) 135
- Photosystem
An evolutionary analysis of the reaction mechanisms of photosystem I reduction by cytochrome c_6 and plastocyanin (55) 41
- Photosystem 2
Coupling of electron and proton transport in photosynthetic membranes: molecular mechanism (56) 9
- Photosystem II
P680: what is it and where is it? (56) 135
- pH-SFET
A novel enzyme biosensor for steroidal glycoalkaloids detection based on pH-sensitive field effect transistors (56) 9
- Planar lipid bilayer
Single channel recordings of α -hemolysin reconstituted in S-layer-supported lipid bilayers (55) 5
- Plastocyanin
An evolutionary analysis of the reaction mechanisms of photosystem I reduction by cytochrome c_6 and plastocyanin (55) 41
- Plastoquinone
Coupling of electron and proton transport in photosynthetic membranes: molecular mechanism (56) 9
- Poly A adsorption
Electrochemical impedance spectroscopy of polynucleotide adsorption (56) 37
- Polyaniline
Polyaniline-modified cholinesterase sensor for pesticide determination (55) 75
- Poly(aniline) composite films
Immobilisation of enzymes on poly(aniline)-poly(anion) composite films. Preparation of bioanodes for biofuel cell applications (56) 13
- Poly(1,2-diaminobenzene)
Electrosynthesis of poly- o -diaminobenzene on the Prussian Blue modified electrodes for improvement of hydrogen peroxide transducer characteristics (55) 145
- Polyelectrolyte multilayers
Polyelectrolyte-supported lipid membranes (56) 175
- Poly (pyrrole)
Reagentless biosensing using electrochemical impedance spectroscopy (55) 1
- Polypyrrole
Bioelectrochemical application of some PQQ-dependent enzymes (55) 29
- Poly (pyrrole)
Strategic issues in reliable sensing (56) 123
- Polypyrrole
Direct and electrically wired bioelectrocatalysis by hydrogenase from *Thiobacillus roseopersicina* (55) 169
- Polytoluidine blue
Amperometric urea biosensor based on urease and electropolymerized toluidine blue dye as a pH-sensitive redox probe (56) 113
- Potassium ferrocyanide
Electrochemical studies of blocking properties of solid supported tethered lipid membranes on gold (56) 179
- Power dissipation
Estimating the subcellular absorption of electric field energy: equations for an ellipsoidal single shell model (56) 211
- Prostaglandin E_2
Ion channels in the human red blood cell membrane: their further investigation and physiological relevance (55) 71

- Protein dynamics
Effect of protein relaxation on electron transfer from the cytochrome subunit to the bacteriochlorophyll dimer in *Rps. sulfoviridis* reaction centers within mixed adiabatic/nonadiabatic model (56) 3
- Protein film voltammetry
Enzyme-catalysed nitrate reduction—themes and variations as revealed by protein film voltammetry (56) 17
- Proton transfer
Effect of pH on direct electron transfer in the system gold electrode–recombinant horseradish peroxidase (55) 83
- Proton transport
DC photoelectric signals from bacteriorhodopsin adsorbed on lipid monolayers and thiol/lipid bilayers supported by mercury (56) 151
- Proton turbine
Bacterial flagellar motor and H^+ /ATP synthase: two proton-driven rotary molecular devices with different functions (55) 89
- Prussian Blue
Electrosynthesis of poly-*o*-diaminobenzene on the Prussian Blue modified electrodes for improvement of hydrogen peroxide transducer characteristics (55) 145
- PVC
Strategic issues in reliable sensing (56) 123
- Pyrolytic graphite
Scanning probe microscopic imaging of guanine on a highly oriented pyrolytic graphite electrode (56) 63
- Pyrolytic graphite electrode
Two-dimensional condensation of nucleic acid components at mercury film and gold electrodes (56) 43
- Quartz crystal microbalance
Adsorption of differently charged forms of horseradish peroxidase on metal electrodes of different nature: effect of surface charges (56) 127
- Quinine
A dynamic method of measuring surface potential change due to binding of bitter substance at monolayer-coated liquid membrane surface (56) 67
- Rate constant
Mediator-modified electrodes for catalytic NADH oxidation: high rate constants at interesting overpotentials (56) 67
- Reactor
Designing membrane electrochemical reactors for oxidoreductase-catalysed synthesis (55) 93
- Reagentless
Reagentless biosensing using electrochemical impedance spectroscopy (55) 1
- Recombinant horseradish peroxidase
Effect of pH on direct electron transfer in the system gold electrode–recombinant horseradish peroxidase (55) 83
- Reconstitution
Single channel recordings of α -hemolysin reconstituted in S-layer-supported lipid bilayers (55) 5
- Redox potential
P680: what is it and where is it? (56) 135
- Renewable fuels
A glucose/hydrogen peroxide biofuel cell that uses oxidase and peroxidase as catalysts by composite bulk-modified bioelectrodes based on a solid binding matrix (56) 99
- Resorcyldene aminoguanidine
Fluidity gradient of erythrocyte membranes in diabetics: the effect of resorcyldene aminoguanidine (56) 53
- Retinal transplant
Evaluation of viability of retinal photoreceptor cells by using their endogenous electrical field (56) 219
