

Contents of Volume 55 and 56

Vol. 55 Nos. 1–2

Special Issue: Extended Abstracts of the XVIth International Symposium on Bioelectrochemistry and Bioenergetics Part 1
edited by T. Hianik

<i>Editorial</i>	x
Reagentless biosensing using electrochemical impedance spectroscopy G. Farace, G. Lillie, T. Hianik, P. Payne and P. Vadgama	1
Single channel recordings of α -hemolysin reconstituted in S-layer-supported lipid bilayers B. Schuster and U.B. Sleytr	5
A novel enzyme biosensor for steroidal glycoalkaloids detection based on pH-sensitive field effect transistors Y.I. Korpan, V.V. Volotovskiy, C. Martelet, N. Jaffrezic-Renault, E.A. Nazarenko, A.V. El'skaya and A.P. Soldatkin	9
Immobilisation of enzymes on poly(aniline)–poly(anion) composite films. Preparation of bioanodes for biofuel cell applications E. Simon, C.M. Halliwell, C.S. Toh, A.E.G. Cass and P.N. Bartlett	13
AC-magnetic field controlled drug release from magnetoliposomes: design of a method for site-specific chemotherapy M. Babincová, P. Čičmanec, V. Altanerová, Č. Altaner and P. Babinec	17
The design of dehydrogenase enzymes for use in a biofuel cell: the role of genetically introduced peptide tags in enzyme immobilization on electrodes C.M. Halliwell, E. Simon, C.-S. Toh, A.E.G. Cass and P.N. Bartlett	21
Electrode potential-controlled DNA damage in the presence of copper ions and their complexes M. Fojta, L. Havran, T. Kubičárová and E. Paleček	25
Bioelectrochemical application of some PQQ-dependent enzymes V. Laurinavicius, J. Razumiene, B. Kurtinaitiene, I. Lapenaite, I. Bachmatova, L. Marcinkeviciene, R. Meskys and A. Ramanavicius.	29
Fluorescence studies on PAMAM dendrimers interactions with bovine serum albumin B. Klajnert and M. Bryszewska	33
Intermolecular biological electron transfer: an electrochemical approach K. Niki, J.R. Sprinkle and E. Margoliash	37
An evolutionary analysis of the reaction mechanisms of photosystem I reduction by cytochrome c_6 and plastocyanin M.A. De la Rosa, J.A. Navarro, A. Díaz-Quintana, B. De la Cerda, F.P. Molina-Heredia, A. Balme, P.S. Murdoch, I. Díaz-Moreno, R.V. Durán and M. Hervás	41
Estimation of electrochrome dyes position in the bilayer through the 2nd harmonic of capacitive current V.I. Passechnik and V.S. Sokolov	47
Fluidity gradient of erythrocyte membranes in diabetics: the effect of resorcyldene aminoguanidine I. Waczulíková, L. Šikurová and J. Čársky	53
Affinity interactions on a liposome surface detected by ultrasound velocimetry R. Krivanek, P. Rybar, S. Küpcü, U.B. Sleytr and T. Hianik	57
Electrochemical oxidation mechanism of guanine and adenine using a glassy carbon microelectrode A.M. Oliveira-Brett, V. Diculescu and J.A.P. Piedade	61
Scanning probe microscopic imaging of guanine on a highly oriented pyrolytic graphite electrode A.-M. Chiorcea and A.M. Oliveira-Brett	63
A dynamic method of measuring surface potential change due to binding of bitter substance at monolayer-coated liquid membrane surface K. Nomura and T. Yata	67
Ion channels in the human red blood cell membrane: their further investigation and physiological relevance L. Kaestner and I. Bernhardt	71
Polyaniline-modified cholinesterase sensor for pesticide determination A.N. Ivanov, L.V. Lukachova, G.A. Evtugyn, E.E. Karyakina, S.G. Kiseleva, H.C. Budnikov, A.V. Orlov, G.P. Karpacheva and A.A. Karyakin.	75

Development of enzyme biosensor based on pH-sensitive field-effect transistors for detection of phenolic compounds S.V. Dzyadevych, T. Mai Anh, A.P. Soldatkin, N. Duc Chien, N. Jaffrezic-Renault and J.-M. Chovelon	79
Effect of pH on direct electron transfer in the system gold electrode–recombinant horseradish peroxidase E. Ferapontova and L. Gorton	83
Bacterial flagellar motor and H ⁺ /ATP synthase: two proton-driven rotary molecular devices with different functions D. Walz and S.R. Caplan	89
Designing membrane electrochemical reactors for oxidoreductase-catalysed synthesis K. Délécouls-Servat, R. Basséguy and A. Bergel	93
Transient dielectro-deformations of erythrocyte governed by time variation of cell ionic state V.L. Kononenko and J.K. Shimkus	97
Electrochemotherapy of horses. A preliminary clinical report M.P. Rols, Y. Tamzali and J. Teissié	101
Recent biotechnological developments of electropulsation. A prospective review J. Teissié, N. Eynard, M.C. Vernhes, A. Bénichou, V. Ganeva, B. Galutzov and P.A. Cabanes	107
Oxidative behaviour of apomorphine and its metabolites J.M.P.J. Garrido, C. Delerue-Matos, M.F.M. Borges, T.R.A. Macedo and A.M. Oliveira-Brett	113
Determination of glutathione- <i>S</i> -transferase traces in preparations of p53 C-terminal domain (aa320–393) M. Brázdová, R. Kizek, L. Havran and E. Paleček	115
Determination of nanogram quantities of osmium-labeled single stranded DNA by differential pulse stripping voltammetry R. Kizek, L. Havran, M. Fojta and E. Paleček	119
Strategic issues in reliable sensing A. Gill, G. Farace, G. Lillie and P. Vadgama	123
Adsorption of differently charged forms of horseradish peroxidase on metal electrodes of different nature: effect of surface charges E. Ferapontova and E. Domínguez	127
Elimination voltammetry of nucleic acids on silver electrodes L. Trnková, R. Kizek and O. Dračka	131
P680: what is it and where is it? J. Barber	135
Electron transfer dynamics of cytochrome <i>c</i> bound to self-assembled monolayers on silver electrodes P. Hildebrandt and D.H. Murgida	139
Electrosynthesis of poly- <i>o</i> -diaminobenzene on the Prussian Blue modified electrodes for improvement of hydrogen peroxide transducer characteristics L.V. Lukachova, E.A. Kotelnikova, D. D'Ottavi, E.A. Shkerin, E.E. Karyakina, D. Moscone, G. Palleschi, A. Curulli and A.A. Karyakin	145
Stabilization of ferrocene leakage by physical retention in a cellulose acetate membrane. The fructose biosensor J. Tkáč, I. Voštiar, P. Gemeiner and E. Šturdík	149
Surface modified microelectrodes for selective electroanalysis of metal ions in environmental components D. Barančok, J. Cirák, P. Tomčík and K. Gmucová	153
Direct electrochemistry of catalase on glassy carbon electrodes M.E. Lai and A. Bergel	157
Effects of low-frequency magnetic fields on bacteria <i>Escherichia coli</i> L. Strašák, V. Vetterl and J. Šmarda	161
Cyclic voltammetry of echinomycin and its interaction with double-stranded and single-stranded DNA adsorbed at the electrode F. Jelen, A. Erdem and E. Paleček	165
Direct and electrically wired bioelectrocatalysis by hydrogenase from <i>Thiobacillus roseopersicina</i> S.V. Morozov, E.E. Karyakina, N.A. Zorin, S.D. Varfolomeyev, S. Cosnier and A.A. Karyakin	169
Interaction of merocyanine 540 with charged membranes A. Mateášik, L. Šikurová and D. Chorvát Jr.	173
STM study of morphology and electron transport features in cytochrome <i>c</i> and nanocluster molecule monolayers G.B. Khomutov, L.V. Belovolova, S.P. Gubin, V.V. Khanin, A.Yu. Obydenov, A.N. Sergeev-Cherenkov, E.S. Soldatov and A.S. Trifonov	177

Vol. 56 Nos. 1–2

Special Issue: Extended Abstracts of the XVIth International Symposium on Bioelectrochemistry and Bioenergetics Part 2

Editorial	1
---------------------	---

Electron Transport

Effect of protein relaxation on electron transfer from the cytochrome subunit to the bacteriochlorophyll dimer in <i>Rps. sulfoviridis</i> reaction centers within mixed adiabatic/nonadiabatic model A.I. Kotelnikov, J.M. Ortega, E.S. Medvedev, B.L. Psikha, D. Garcia and P. Mathis	3
Coupling of electron and proton transport in photosynthetic membranes: molecular mechanism A. Kukushkin, S. Poltev and S. Khuznetsova	9
Backward electron transport in photosystem 2 reaction center and temperature dependence of delayed luminescence characteristics D.Z. Badretdinov, S.A. Kuznetsova, S.V. Poltev and A.K. Kukushkin.	13
Enzyme-catalysed nitrate reduction—themes and variations as revealed by protein film voltammetry J.N. Butt, L.J. Anderson, L.M. Rubio, D.J. Richardson, E. Flores and A. Herrero.	17
Flavin photochemistry in the analysis of electron transfer reactions: role of charged and hydrophobic residues at the carboxyl terminus of ferredoxin–NADP ⁺ reductase in the interaction with its substrates M. Faro, J.K. Hurley, M. Medina, G. Tollin and C. Gómez-Moreno	19
Indirect evidence of direct electron communication between the active site of galactose oxidase and a graphite electrode J. Tkac, I. Vostiar, P. Gemeiner and E. Sturdik	23
Monolayers of a de novo designed 4- α -helix bundle carboxyprotein and partial structures on Au(111)-surfaces J. Brask, H. Wackerbarth, K.J. Jensen, J. Zhang, J.U. Nielsen, J.E.T. Andersen and J. Ulstrup	27

Electrified Interfaces

An impedance study of the adsorption of nucleic acid bases at glassy carbon electrodes A.M. Oliveira-Brett, C.M.A. Brett and L.A. Silva	33
Electrochemical impedance spectroscopy of polynucleotide adsorption L. Strašák, J. Dvořák, S. Hasoň and V. Vetterl	37
Two-dimensional condensation of nucleic acid components at mercury film and gold electrodes S. Hasoň and V. Vetterl	43
A novel method of introducing hydrophobic moieties into oligonucleotides for covalent and non-covalent immobilization on electrode surfaces T.S. Oretskaya, E.A. Romanova, S.Yu. Andreev, S.I. Antsyrovich, C. Tóth, V. Gajdos and T. Hianik	47
Reduction of lapachones and their reaction with L-cysteine and mercaptoethanol on glassy carbon electrodes A.M. Oliveira-Brett, M.O.F. Goulart and F.C. Abreu	53
Catalytic signal of rabbit liver metallothionein on a mercury electrode: a combination of derivative chronopotentiometry with adsorptive transfer stripping L. Trnková, R. Kizek and J. Vacek	57
Differential pulse adsorptive stripping voltammetry of osmium-modified peptides S. Billová, R. Kizek and E. Paleček	63
Mediator-modified electrodes for catalytic NADH oxidation: high rate constants at interesting overpotentials F.D. Munteanu, N. Mano, A. Kuhn and L. Gorton	67
Nitric oxide determination by amperometric carbon fiber microelectrode J. Katrlík and P. Zálešáková	73
The role of hydrogenases in the anaerobic microbiologically influenced corrosion of steels S. Da Silva, R. Basséguy and A. Bergel	77

Biosensors

Electrochemical sensing of DNA–adriamycin interactions J.A.P. Piedade, I.R. Fernandes and A.M. Oliveira-Brett	81
New approaches in the development of DNA sensors: hybridization and electrochemical detection of DNA and RNA at two different surfaces E. Paleček, M. Fojta and F. Jelen	85
Surfactant bilayers for the direct electrochemical detection of affinity interactions M.Yu. Vagin, A.A. Karyakin and T. Hianik	91
A comparative thermodynamic study for both natural and artificial RNA/DNA–protein binary complexes V. Spiridonova, T. Rassokhin, A. Golovin, E. Petrova, T. Rohzdestvensky, Yu. Pakhomova and A. Kopylov	95
A glucose/hydrogen peroxide biofuel cell that uses oxidase and peroxidase as catalysts by composite bulk-modified bioelectrodes based on a solid binding matrix A. Pizzariello, M. Stred'ansky and S. Miertuš	99
Electrochemical studies on reconstituted horseradish peroxidase modified carbon paste electrodes S. Varma	107

Amperometric urea biosensor based on urease and electropolymerized toluidine blue dye as a pH-sensitive redox probe I. Vostiar, J. Tkac, E. Sturdik and P. Gemeiner	113
Modified electrodes for NADH oxidation and dehydrogenase-based biosensors P.N. Bartlett, E. Simon and C.S. Toh	117
Affinity assembled multilayers for new dehydrogenase biosensors N. Mano and A. Kuhn	123
Monitoring of ethanol during fermentation using a microbial biosensor with enhanced selectivity J. Tkac, I. Vostiar, P. Gemeiner and E. Sturdik	127
Impedimetric immunosensor using avidin–biotin for antibody immobilization O. Ouerghi, A. Touhami, N. Jaffrezic-Renault, C. Martelet, H.B. Ouada and S. Cosnier	131

Biomembranes and Model Membranes

Mechanisms of the interaction of α -helical transmembrane peptides with phospholipid bilayers R.N.A.H. Lewis, Y.-P. Zhang, F. Liu and R.N. McElhaney	135
Electric field effects in proteins in membranes H.G.L. Coster and T.C. Chilcott	141
Studying the spatial organization of membrane proteins by means of tritium stratigraphy: bacteriorhodopsin in purple membrane A.V. Shishkov, A.L. Ksenofontov, E.N. Bogacheva, L.V. Kordyukova, G.A. Badun, A.V. Alekseevsky, V.I. Tsetlin and L.A. Baratova	147
DC photoelectric signals from bacteriorhodopsin adsorbed on lipid monolayers and thiol/lipid bilayers supported by mercury A. Dolfi, F. Tadini Buoninsegni, M.R. Moncelli and R. Guidelli	151
Mixed urease/amphiphile LB films and their application for biosensor development A. Zhang, Y. Hou, N. Jaffrezic-Renault, J. Wan, A. Soldatkin and J.-M. Chovelon	157
Monolayers and multilayers of chlorophyll <i>a</i> on a mercury electrode M.R. Moncelli, L. Becucci, A. Dolfi, F. Tadini Buoninsegni and A. Agostiano	159
Ionic conductivity of electroporated lipid bilayer membranes S. Kakorin and E. Neumann	163
Spatial distribution of ion channel activity in biological membranes: the role of noise P. Babinec and M. Babincová	167
The 40th anniversary of bilayer lipid membrane research A. Ottova and H. Ti Tien	171
Polyelectrolyte-supported lipid membranes R. Kügler and W. Knoll	175
Electrochemical studies of blocking properties of solid supported tethered lipid membranes on gold A. Żebrowska, P. Krysiński and Z. Łotowski	179
Cyclic voltammetry study of glucose and insulin interactions with supported lipid membrane G. Laputková and J. Sabo	185
DNA–membrane complexes, mitochondria and aging V.V. Kuvichkin.	189
Specific natural DNA-bound lipids in post-genome era. The lipid conception of chromatin organization V.A. Struchkov, N.B. Strazhevskaya and R.I. Zhdanov.	195

Bioenergetics

The asymmetric, rectifier-like <i>I</i> – <i>V</i> curve of the Na/K pump transient currents in frog skeletal muscle fibers W. Chen and W. Wu	199
The influence of sugar synthesis and transport rates on bioenergetics and kinetics of higher plant photosynthesis A. Tuleshova, D. Badretdinov, A. Kukushkin and S. Khuznetsova.	203

Electric and Magnetic Field Effect

Understanding conditions for which biological effects of nonionizing electromagnetic fields can be expected J.C. Weaver.	207
Estimating the subcellular absorption of electric field energy: equations for an ellipsoidal single shell model D. Wachner, M. Simeonova and J. Gimsa.	211
Cellular absorption of electric field energy: influence of molecular properties of the cytoplasm M. Simeonova, D. Wachner and J. Gimsa.	215
Evaluation of viability of retinal photoreceptor cells by using their endogenous electrical field E. Kovács, R. Pologea-Moraru and B.G. Hosu	219

The effects of low level microwaves on the fluidity of photoreceptor cell membrane R. Pologea-Moraru, E. Kovacs, K.R. Iliescu, V. Calota and G. Sajin	223
Effects of static magnetic field on human leukemic cell line HL-60 J. Sabo, L. Mirossay, L. Horovcak, M. Sarissky, A. Mirossay and J. Mojzis	227
<i>Applications</i>	
Clinical evaluation of safety and human tolerance of electrical sensation induced by electric fields with non-invasive electrodes L. Zhang and D.P. Rabussay	233
