

Contents

Quantitative model of small molecules uptake after in vitro cell electropermeabilization M. Puc, T. Kotnik, L.M. Mir and D. Miklavčič	1
Electrochemical monitoring of the interaction of doxorubicin with nicotinamide and Fe(III) ions under aerobic and anaerobic conditions S. Çakır, E. Biçer, E. Coşkun and O. Çakır	11
Effective gating charge of ion channels induced by toxin syringomycin E in lipid bilayers L.V. Schagina, P.A. Gurnev, J.Y. Takemoto and V.V. Malev	21
Electrochemical study of heavy metals and metallothionein in yeast <i>Yarrowia lipolytica</i> M. Strouhal, R. Kizek, J. Vacek, L. Trnková and M. Němec	29
Electrochemical study on the keto-enol tautomerization of <i>p</i> -hydroxyphenylpyruvic acid in aqueous solution Y. Chi, J. Duan, X. Qi and G. Chen	37
A short-term NaCl exposure increases the Na ⁺ conductance of outward-rectified cation currents in the pith cells of sweet pepper M. Blom-Zandstra and S.A. Vogelzang	47
Voltammetric and spectroelectrochemical characterization of a water-soluble viologen polymer and its application to electron-transfer mediator for enzyme-free regeneration of NADH H. Karatani, N. Wada and T. Sugimoto	57
Evaluation of redox mediators for amperometric biosensors: Ru-complex modified carbon-paste/enzyme electrodes E.V. Ivanova, V.S. Sergeeva, J. Oni, C. Kurzawa, A.D. Ryabov and W. Schuhmann	65
Effects of ELF and static magnetic fields on calcium oscillations in islets of Langerhans F. Madec, B. Billaudel, R. Charlet de Sauvage, P. Sartor and B. Veyret	73
Methotrexate cytotoxicity on MCF-7 breast cancer cells is not altered by exposure to 25 Hz, 1.5 mT magnetic field and iron (III) chloride hexahydrate E. Laqué-Rupérez, M.J. Ruiz-Gómez, L. de la Peña, L. Gil and M. Martínez-Morillo	81
Photoelectric effects on chlorophyll fluorescence of photosystem II in vivo. Kinetics in the absence and presence of valinomycin W.J. Vredenberg and A. Bulychyev	87
Modeling of ionic relaxation around a biomembrane disk L. Oroszi, O. Hasemann, E. Wolff and A. Déry	97
Electrical energy required to form large conducting pores J.C. Neu, K.C. Smith and W. Krassowska	107
Imaging of enzyme activity by scanning electrochemical microscope equipped with a feedback control for substrate–probe distance D. Oyamatsu, Y. Hirano, N. Kanaya, Y. Mase, M. Nishizawa and T. Matsue	115
Author Index to Volume 60	123
Subject Index to Volume 60	125
Contents of Volume 60	127
